

## **HHS Tribal Budget Consultation**

Posted on March 6, 2012 to the IHS Director's Blog

For those attending the Department of Health and Human Services Annual Tribal Budget Consultation this week in Washington, D.C., here is a [document](#) [PDF - 198KB] that summarizes the Indian Health Service's FY 2011 accomplishments. We missed the deadline for inclusion of this file on the USB drive for the meeting and wanted to provide the electronic copy. A paper copy will be available at the registration desk. I am looking forward to the meeting, especially the presentation on the tribal recommendations on the IHS budget for FY 2014 that were developed as a result of the recent IHS tribal budget formulation process. We are grateful for the increases we have received the past few years and will continue to work to ensure we include tribal priorities in our budget requests. I am also looking forward to hearing tribal input on the budget and programs for all HHS operating divisions.
