- Overall, ILI activity remains low in IHS nationwide. Areas in the Northwest have seen an increase over the previous week.
- Slight increases in vaccination coverage.
- U.S. general population influenza vaccine coverage estimates for Nov. 2010¹, based on self-report (not medical chart review) are:

6 months – 17 yrs: 30.6% (<u>+</u> 5.0%); 18+ yrs: 33.5% (<u>+</u> 2.5%);

All ages: 32.8% (<u>+</u> 2.4%).

While these estimates are higher than those reported by I/T/U sites through the IIAS, differences in survey methodology may account for some of the difference.
