Tucson	1
All Areas	134

- Overall, there is a decrease in ILI in IHS nationwide and in several Areas, though a few areas saw an increase relative to the previous week.
- Continued increases in vaccination coverage.
- U.S. general population influenza vaccine coverage estimates for Nov. 2010¹, based on self-report (not medical chart review) are:

6 months – 17 yrs: 30.6% (± 5.0%); 18+ yrs: 33.5% (+ 2.5%);

All ages: 32.8% (<u>+</u> 2.4%).

While these estimates are higher than those reported by I/T/U sites through the IIAS, differences in survey methodology may account for some of the difference.
