

Indian Health Service Division of Epidemiology and Disease Prevention 2009 Influenza A (H1N1) Surveillance Report IHS Influenza Awareness System (IIAS) #20 (Reporting Period: 2/7/10 – 2/13/10)

H1N1 ILI Surveillance

Percentage of Visits for Influenza-Like Illness (ILI) in IHS, Weeks 12 (3/22/09 – 3/28/09) through 6 (2/7/10 – 2/13/10)

Summary of ILI Surveillance in IHS:

- ILI definition, based on uploaded RPMS data: [influenza-specific ICD-9 code] or [measured temp > 100F and presence of at least 1 of 24 ILI ICD-9 codes].
- Approximately 60% of IHS facilities are reporting and have their data included in this report.
- The data for California Area is incomplete and not included in this week's report.

H1N1 Vaccination Surveillance

Due to a data glitch, we are reporting the same numbers from Week 5.

Cumulative H1N1 Vaccine Doses Administered in I/T/U Facilities

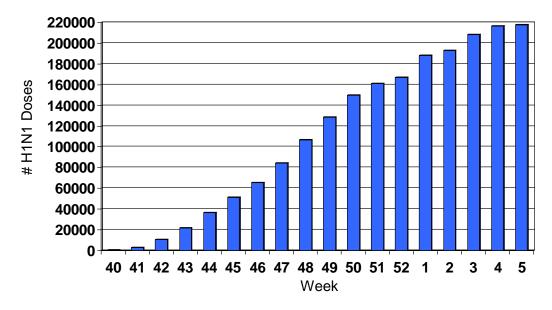

Table 1: Cumulative H1N1 Vaccine Doses Administered by IHS Area

IHS Area	# H1N1 doses
Aberdeen	16,596
Alaska	19,982
Albuquerque	9,951
Bemidji	5,105
Billings	16,689
California	9,707
Nashville	5,204
Navajo	62,412
Oklahoma	30,987
Phoenix	18,959
Portland	14,798
Tucson	7,334
Unknown	4
Total Number of Doses	217,728

Table 2: Number of H1N1 Vaccine Doses by Age Group

Age Group	# H1N1 doses
*< 5 years	40,962
*5-24 years	79,306
*25-64 years high risk	29,916
25 – 64 no high risk condition	52,582
65+ years	14,962
Total Number of Doses	217,728

*Red denotes an initial target group for H1N1 vaccine. People in other groups who received vaccine may have fallen into one of the other target groups not included here: Household contacts of those < 6 months old and Healthcare Personnel.

Summary of H1N1 vaccine events:

- As of February 6, over 147 million doses of H1N1 vaccine have been made available to states.
- All IHS Areas are currently administering H1N1 vaccine. A total of 217,728 H1N1 vaccine doses have been administered by I/T/U facilities (Table 1)
- At least 69% of the H1N1 doses administered have been given to people in one of the following initial vaccine target groups: People 6 months 24 years of age and people 25 64 years with a high risk medical condition (Table 2).
- 5,427 doses of H1N1 vaccine have been administered to pregnant women.
- More than 21,000 doses of H1N1 vaccines for personnel employed in I/T/U facilities have been distributed by the IHS National Supply Service Center (NSSC). Sites needing additional H1N1 flu vaccine for employees should work with their Area CMO to place an order with the NSSC.
- IHS is partnering with FDA and CDC to monitor H1N1 vaccine safety.

H1N1 Communication and Education

Summary of Communication and Education activities:

 Please visit <u>http://www.ihs.gov/H1N1</u> for information about H1N1 activities and Indian Country.

H1N1 Mitigation Measures

Summary of response and mitigation efforts:

- If locations need anti-virals or N-95 respirators, please place an order to the National Supply Service Center through your respective Area Emergency Management Point of Contact.
- Continue a strong push for community vaccinations.

H1N1 Summary

Key Points:

• We will need to remain vigilant for a return of H1N1-related disease in IHS, and continue to work very hard to get our population and health care workers vaccinated, because it is unknown whether H1N1 will again emerge during the usual mid-winter influenza season.
