Introduction

PURPOSE AND USES OF THE ECONOMIC CENSUS

The economic census is the major source of facts about the structure and functioning of the economy. It provides essential information for government, business, industry, and the general public. Title 13 of the United States Code (Sections 131, 191, and 224) directs the Census Bureau to take the economic census every 5 years, covering years ending in "2" and "7."

The economic census furnishes an important part of the framework for such composite measures as the local gross product, input/output measures, and other statistical series that measure short-term changes in economic conditions. Specific uses of economic census data include the following:

- Policymaking agencies of the federal government use the data to monitor economic activity and to provide assistance to business.
- Local governments use the data to assess business activities and tax bases within their jurisdictions and to develop programs to attract business.
- Trade associations study trends in their own and competing industries, which allows them to keep their members informed of market changes.
- Individual businesses use the data to locate potential markets and to analyze their own production and sales performance relative to industry or area averages.

SCOPE

Data from the 2002 Economic Census of Island Areas are published for the first time on the basis of the North American Industry Classification System (NAICS). NAICS replaces the Standard Industrial Classification (SIC) System used in 1997 and earlier censuses. The 2002 Island Areas publications cover the following NAICS sectors:

21 Mining

The mining sector comprises establishments that extract naturally occurring mineral solids, such as coal and ores; liquid minerals, such as crude petroleum; and gases, such as natural gas. The most common type of mining activity in the island areas comprises stone quarrying. The mining sector distinguishes two basic activities: mine operation and mining support activities. Establishments are grouped and classified according to the natural resource mined or to be mined. Industries include establishments that develop the mine site, extract the natural resources, and/or those that benefit from (i.e., prepare) the mineral mined.

22 Utilities

The utilities sector comprises establishments engaged in the provision of the following utility services: electric power, natural gas, steam supply, water supply, and sewage removal. Activities associated with the utility services provided vary by utility: electric power includes generation, transmission, and distribution; natural gas includes distribution; steam supply includes provision and/or distribution; water supply includes treatment and distribution; and sewage removal includes collection, treatment, and disposal of waste through sewer systems and sewage treatment facilities.

23 Construction

The construction sector comprises establishments primarily engaged in the construction of buildings or engineering projects (e.g., highways and utility systems). Establishments primarily engaged in the preparation of sites for new construction and in subdividing land for sale as building sites are also included. Construction work done may include new work, additions, alterations, or maintenance and repairs. Establishments primarily engaged in activities to produce a specific component (e.g., masonry, painting, and electrical work) of a construction project are commonly known as specialty trade contractors.

There are substantial differences in the types of equipment, work force skills, and other inputs required by establishments in this sector. To highlight these differences and variations in the underlying production functions, this sector is divided into three subsectors: Construction of Buildings (Subsector 236), Heavy and Civil Engineering Construction (Subsector 237), and Specialty Trade Contractors (Subsector 238).

Information for the construction sector is not included in the Geographic Area Statistics publication for Puerto Rico. Data for the construction sector is published in a separate report (IA0200IPRC).

31-33 Manufacturing

The manufacturing sector comprises establishments engaged in the mechanical, physical, or chemical transformation of materials, substances, or components into new products. The assembling of component parts of manufactured products is considered manufacturing, except in cases where the activity is appropriately classified in Sector 23, Construction. Manufacturing establishments from this sector are often described as plants, factories, or mills and characteristically use power-driven machines and materials-handling equipment. The subsectors in the manufacturing sector generally reflect distinct production processes related to material inputs, production equipment, and employee skills.

Information for the manufacturing sector is not included in the Geographic Area Statistics publication for Puerto Rico. Data for the manufacturing sector is published in a separate report (IA0200IPRM).

42 Wholesale Trade

The wholesale trade sector comprises establishments engaged in wholesaling merchandise, generally without transformation, and rendering services incidental to the sale of merchandise. The wholesaling process is an intermediate step in the distribution of merchandise. Wholesalers are organized to sell or arrange the purchase or sale of goods for resale (i.e., goods sold to other wholesalers or retailers), capital or durable nonconsumer goods, or raw and intermediate materials and supplies used in production. Wholesalers normally operate from a warehouse or office. This sector comprises two main types of wholesalers: those that sell goods on their own account known as wholesale merchants and those that arrange sales and purchases for others generally for a commission or fee.

44-45 Retail Trade

The retail trade sector comprises establishments engaged in retailing merchandise, generally without transformation, and rendering services incidental to the sale of merchandise. The retailing process is the final step in the distribution of merchandise. Retailers sell merchandise in small quantities to the general public. This sector comprises two main types of retailers: store and non-store retailers. Store retailers operate fixed point-of-sale locations to attract walk-in customers. Nonstore retailers, also serve the general public by reaching customers and marketing merchandise with methods, such as the broadcasting of "infomercials," the broadcasting and publishing of direct-response advertising, the publishing of paper and electronic catalogs, door-to-door solicitation, in-home demonstration, selling from portable stalls (street vendors, except food), and distribution through vending machines.

48–49 Transportation and Warehousing

The transportation and warehousing sector includes industries providing transportation of passengers and cargo, warehousing and storage for goods, scenic and sightseeing transportation, and support activities related to modes of transportation. The modes of transportation are air, rail, water, road, and pipeline. This sector distinguishes three basic types of activities: subsectors for each mode of transportation, a subsector for warehousing and storage, and a subsector for establishments providing support activities for transportation. In addition, there are subsectors for establishments that provide passenger transportation for scenic and sightseeing purposes, postal services, and courier services.

51 Information

The Information sector comprises establishments engaged in producing and distributing information and cultural products, providing the means to transmit or distribute these products as well as data or communications, and processing data. The main components of this sector are the publishing industries, including software publishing, and both traditional publishing and publishing exclusively on the Internet; the motion picture and sound recording industries; the broadcasting industries, including traditional broadcasting and those broadcasting exclusively over the Internet; the telecommunications industries; the industries known as Internet service providers and Web search portals, data processing industries and the information services industries.

52 Finance and Insurance

The finance and insurance sector comprises establishments primarily engaged in financial transactions and/or in facilitating financial transactions. Three principal types of activities are identified: Raising funds by taking deposits and/or issuing securities and, in the process, incurring liabilities; pooling of risk by underwriting insurance and annuities; and providing specialized services facilitating or supporting financial intermediation, insurance, and employee benefit programs. Monetary authorities charged with monetary control are also included in this sector.

53 Real Estate and Rental and Leasing

The real estate and rental and leasing sector comprises establishments primarily engaged in renting, leasing, or otherwise allowing the use of tangible or intangible assets, and establishments providing related services. This sector also includes establishments engaged in managing real estate for others, selling, renting and/or buying real estate for others, and appraising real estate.

54 Professional, Scientific, and Technical Services

The professional, scientific, and technical services sector comprises establishments that specialize in performing professional, scientific, and technical activities for others. The establishments in this sector specialize according to expertise and provide to a variety of industries and households. Activities performed include: legal advice and representation; accounting, bookkeeping, and payroll services; architectural, engineering, and specialized design services; computer services; consulting services; research services; advertising services; photographic services; translation and interpretation services; veterinary services; and other professional, scientific, and technical services.

55 Management of Companies and Enterprises

The management of companies and enterprises sector comprises establishments that hold the securities of companies and enterprises for the purpose of owning a controlling interest or influencing management decisions or establishments (except government establishments) that administer, oversee, and manage establishments of the company or enterprise and that normally undertake the strategic or organizational planning and decision-making role of the company or enterprise. Establishments that administer, oversee, and manage may hold the securities of the company or enterprise.

56 Administrative and Support and Waste Management and Remediation Services

The administrative and support and waste management and remediation services sector comprises establishments performing routine support activities for the day-to-day operations of other organizations. Establishments in many sectors of the economy often undertake these essential activities in-house. The establishments in this sector specialize in one or more of these support activities and provide these services to clients in a variety of industries and, in some cases, to households. Activities performed include: office administration, hiring and placing of personnel, document preparation and similar clerical services, solicitation, collection, security and surveillance services, cleaning, and waste disposal services.

61 Educational Services

The educational services sector comprises establishments that provide instruction and training in a wide variety of subjects. This instruction and training is provided by specialized establishments, such as schools, colleges, universities, and training centers. These establishments may be privately owned and operated for profit or not for profit, or they may be publicly owned and operated. They may also offer food and accommodation services to their students.

62 Health Care and Social Assistance

The health care and social assistance sector comprises establishments providing health care and social assistance for individuals. The sector includes both health care and social assistance because it is sometimes difficult to distinguish between the boundaries of these two activities. The services provided by establishments in this sector are delivered by trained professionals. All industries in the sector share this commonality of process, namely, labor inputs of health practitioners or social workers with the requisite expertise. Many of the industries in the sector are defined based on the educational degree held by the practitioners included in the industry.

71 Arts, Entertainment, and Recreation

The arts, entertainment, and recreation sector includes a wide range of establishments that operate facilities or provide services to meet varied cultural, entertainment, and recreational interests of their patrons. This sector comprises establishments that are involved in producing, promoting, or participating in live performances, events, or exhibits intended for public viewing, establishments that preserve and exhibit objects and sites of historical, cultural, or educational interest, and establishments that operate facilities or provide services that enable patrons to participate in recreational activities or pursue amusement, hobby, and leisure time interests.

72 Accommodation and Food Services

The accommodation and food services sector comprises establishments providing customers with lodging and/or preparing meals, snacks, and beverages for immediate consumption. The sector includes both accommodation and food services establishments because the two activities are often combined at the same establishment.

81 Other Services (except Public Administration)

The other services (except public administration) sector comprises establishments engaged in providing services not specifically provided for elsewhere in the classification system. Establishments in this sector are primarily engaged in activities such as equipment and machinery repairing, promoting or administering religious activities, grantmaking, advocacy, and providing dry-cleaning and laundry services, personal care services, death care services, pet care services, photofinishing services, temporary parking services, and dating services.

(Not covered are the Agriculture, Forestry, Fishing, and Hunting sector (NAICS 11), and the Public Administration sector (NAICS 92). The economic census excludes Petroleum Refineries (NAICS 32411) for the Virgin Islands only.)

Definitions: Selected NAICS industries are defined in Appendix B, NAICS Codes, Titles, and Descriptions. Other terms are defined in Appendix A, Explanation of Terms.

BASIS OF REPORTING

The economic census is conducted on an establishment basis. A company operating at more than one location is required to file a separate report for each store, factory, shop, or other location. Each establishment is assigned a separate industry classification based on its primary activity and not that of its parent company.

GEOGRAPHIC AREA CODING

Accurate and complete information on the physical location of each establishment is required to tabulate the census data for municipalities, districts, towns, villages, counties, municipios, or islands. Respondents were required to report their physical location (street address or location description and municipality, district, town, village, county, municipio, or island) if it differed from their mailing address. For those establishments that did not provide acceptable information on physical location, location information from the Internal Revenue Service (IRS) tax forms or from the previous census is used as a basis for coding.

AVAILABILITY OF ADDITIONAL DATA

Reports in Print and Electronic Media. All results of the 2002 Economic Census will be available on the Census Bureau Internet site (www.census.gov) and on digital versatile discs (DVD-ROMs) for sale by the Census Bureau. The American FactFinder system at the Web site allows selective retrieval and downloading of the data. For more information, including a description of electronic and printed reports being issued, see the Internet site, write to U.S. Census Bureau, Washington, DC 20233-0801, or call Customer Services at 301-763-4100.

Special Tabulations. Special tabulations of data collected in the 2002 Economic Census may be obtained, depending on availability of time and personnel, in electronic or tabular form. The data will be summaries subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual business establishments or companies) that govern the regular publications.

Special tabulations are prepared on a cost basis. A request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to the Chief of the Economic Census Branch, Company Statistics Division, U.S. Census Bureau, Washington, DC 20233-6400.

To discuss a special tabulation before submitting specifications, call 301-763-3314.

HISTORICAL INFORMATION

The economic census has been taken at 5-year intervals for the following areas, except where noted below:

- Northern Mariana Islands — Since 1982
- Guam — Since 1958
- Virgin Islands — Since 1958
- Puerto Rico — Economic censuses were conducted beginning with a census of manufactures for 1909 and continuing at 10-year intervals through 1949, excepting 1929. Wholesale and retail trades and services industries were included as part of the economic censuses for 1939. Starting with 1949 through 2002, the censuses of wholesale and retail trades and service industries have been conducted concurrently with the census of manufactures. The census of construction industries has been included since 1967. Congress has authorized the economic censuses to be taken at 5-year intervals covering years ending in "2" and "7."
- American Samoa — The 2002 Economic Census is the first economic census conducted. Henceforth, the census will follow every 5 years.

The range of industries covered in the economic census for the Northern Mariana Islands, Guam, Virgin Islands, and Puerto Rico was broadened in 2002. Sectors added for the first time in 2002 include information, finance and insurance, real estate, health care, and other service industries.

Printed statistical reports from the 1997 and earlier censuses provide historical data for the Northern Mariana Islands, Guam, the Virgin Islands, and Puerto Rico and are available in some libraries. Reports for 1992 and 1997 are also available in portable document format (PDF) on the Internet.

More information about the scope, coverage, classification system, data items, and publications for each of the economic censuses and related surveys is published in the *Guide to the 2002 Economic Census* at www.census.gov/epcd/ec02/guide.html. More information on the methodology, procedures, and history of the censuses will be published in the *History of the 2002 Economic Census* at www.census.gov/econ/www/history.html.

COMPARABILITY OF THE 1997 AND 2002 CENSUSES

The 2002 Economic Census of Island Areas is the first to present data based on the new North American Industry Classification System (NAICS). Previous census data were presented according to the Standard Industrial Classification (SIC) System developed in the 1930s. Due to this change, comparability between census years is limited. NAICS identifies new industries, redefines concepts, and develops classifications to reflect changes in the economy.

The 2002 Economic Census covers more of the economy than any previous census. New for 2002 are data on information, finance and insurance, real estate, and health-care industries. The scope of the census includes virtually all sectors of the economy.

Additional information about NAICS is available from the Census Bureau Internet site (www.census.gov/naics).

RELIABILITY OF DATA

All data compiled in this report originated from a complete enumeration and, therefore, are not subject to sampling variability. However, the data are subject to nonsampling errors. Nonsampling errors can be attributed to many sources including: inability to identify all cases in the actual universe; inability or unwillingness on the part of respondents to provide correct information; definition and classification difficulties; response errors and bias; errors in collection or processing; misinterpretation of questions; and other errors of recording, keying, and estimation for missing or misreported data.

No direct measurement of these effects has been obtained. Precautionary steps were taken in all phases of the collection, processing, and tabulation of the data in an effort to minimize the effects of nonsampling errors. More information on the reliability of the data is included in Appendix C, Methodology.

DISCLOSURE

In accordance with federal law governing census reports (Title 13 of the United States Code), no data are published that would disclose the operations of an individual establishment or business. However, the number of establishments in a kind-of-business classification is not considered a disclosure; therefore, this information may be released even though other information is withheld.

Techniques employed to limit disclosure are discussed at
www.census.gov/epcd/ec02/disclosure.htm.

Introducción

PROPÓSITO Y USO DEL CENSO ECONÓMICO

El censo económico es la fuente principal de datos acerca de la estructura y función de la economía. El censo provee información esencial para el gobierno, el comercio, la industria y el público en general. El censo económico es requerido por el título 13 del Código de los Estados Unidos (Secciones 131, 191 y 224) y por la Ley No. 11 de la legislatura del Estado Libre Asociado de Puerto Rico, que fuera aprobada el 27 de marzo de 1950. El título 13 requiere que el Negociado del Censo realice el censo económico cada 5 años, cubriendo los años que terminan en "2" y "7".

El censo económico proporciona una parte importante del sistema mediante el cual se preparan estimados compuestos, tales como el producto bruto, el insumo producto y otras estadísticas que determinan los cambios en la economía a corto plazo. Los datos del censo económico se utilizan de la siguiente manera:

- Las agencias del gobierno federal que se dedican a la creación de política pública utilizan los datos para observar las actividades económicas y proveer asistencia a los negocios.
- Los gobiernos locales utilizan los datos para evaluar las actividades comerciales e impuestos dentro de su jurisdicción y para desarrollar programas que atraigan negocios.
- Las asociaciones comerciales estudian tendencias en sus propias industrias y en la competencia, lo cual les permite mantener a sus miembros informados sobre cambios en el mercado.
- Los negocios utilizan los datos para determinar mercados potenciales y analizar su propia producción y ventas en comparación a los promedios del área geográfica o la industria.

ALCANCE

Los datos del Censo Económico del 2002 de las Áreas Insulares están publicados por primera vez en base al Sistema de Clasificación Norteamericano de la Industria, mejor conocido como NAICS (North American Industry Classification System). El sistema de clasificación de la industria NAICS sustituye al Sistema de Clasificación Industrial Uniforme (CIU) utilizado en 1997 y años anteriores. Las publicaciones del 2002 para las Áreas Insulares incluyen los siguientes sectores de NAICS:

21 Minería

El sector minero se compone de establecimientos que extraen minerales naturales sólidos, tales como carbón y otros minerales; minerales líquidos, tal como el petróleo crudo; y los gases, tal como el gas natural. El tipo más común de actividad minera en las áreas insulares comprende la extracción de piedra. El sector minero distingue dos actividades básicas: operación de minas y actividades de apoyo para minas. Los establecimientos son agrupados y clasificados según el recurso natural extraído o el que será extraído. Las industrias incluyen establecimientos que desarrollan minas, que extraen los recursos naturales y/o que preparan el mineral extraído.

22 Utilidades

El sector de utilidades se compone de establecimientos que se dedican a proveer los siguientes servicios de utilidades: energía eléctrica, gas natural, suministro de vapor, abastecimiento de agua y el tratamiento de aguas negras. Las actividades asociadas con los servicios ofrecidos varían según las utilidades: la energía eléctrica incluye generación, transmisión y distribución de energía; el gas natural incluye la distribución; el suministro de vapor incluye la provisión y/o la

distribución; el abastecimiento de agua incluye el tratamiento y la distribución; y el tratamiento de aguas negras incluye el recogido, el tratamiento y el desecho de desperdicios a través de sistemas de alcantarillado y plantas de tratamiento de aguas negras.

23 Construcción

El sector de la construcción se compone de establecimientos que se dedican principalmente a la construcción de edificios o proyectos de ingeniería (tales como autopistas y sistemas de infraestructura). También se incluyen los establecimientos que se dedican principalmente a la preparación de lotes para la construcción nueva y a la segregación de lotes para la construcción de edificios. El trabajo de construcción realizado puede incluir ampliaciones, alteraciones o mantenimiento y reparación. Los establecimientos que se dedican principalmente a producir componentes específicos (por ejemplo albañilería, pintura y trabajo eléctrico), se les conoce generalmente como contratistas de trabajos especializados.

Existen diferencias sustanciales en el tipo de equipo, personal y otros factores requeridos por los establecimientos en este sector. Para destacar las diferencias y variaciones en las funciones operativas, este sector se divide en tres subsectores: Construcción de Edificios (Subsector 236), Construcción de Infraestructura e Ingeniería (Subsector 237) y Contratistas de Trabajos Especializados (Subsector 238).

La información sobre el sector de construcción no se incluye en la publicación de Estadísticas de Área Geográfica para Puerto Rico. Los datos para el sector de construcción son publicados en un informe aparte (IA0200IPRC).

31-33 Manufactura

El sector de manufactura se compone de establecimientos que se dedican a la transformación mecánica, física o química de materiales, sustancias o componentes en nuevos productos. El montaje de las partes que componen los productos manufacturados se considera manufactura, excepto cuando la actividad se clasifica en el Sector 23, Construcción. En el sector de la manufactura, los establecimientos se describen usualmente como plantas, fábricas o talleres y usan máquinas de fuerza motriz y equipo para el manejo de materiales. Los subsectores que forman parte del sector de manufactura, generalmente reflejan distintos procesos de producción que están relacionados los materiales, equipo de producción y las destrezas del personal.

La información sobre el sector de manufactura no se incluye en la publicación de Estadísticas de Área Geográfica para Puerto Rico. Los datos para el sector de manufactura son publicados en un informe aparte (IA0200IPRM).

42 Comercio al por Mayor

El sector del comercio al por mayor se compone de establecimientos que se dedican a la venta de mercancía al por mayor, generalmente sin transformación alguna, y a prestar servicios relacionados con la venta de mercancía. El proceso de la venta al por mayor es la etapa intermedia en la distribución de mercancía. Los mayoristas venden o tramitan la compra o venta de productos para la reventa (esto es, los productos vendidos a otros mayoristas o detallistas), productos no perecederos o de capital que no son para el consumo o materias primas e intermedias y suministros utilizados en la producción. Los mayoristas operan normalmente desde un almacén u oficina. Este sector se compone de dos tipos principales de mayoristas: aquéllos que venden productos por cuenta propia, conocidos como distribuidores al por mayor, y aquéllos que tramitan ventas y compras para otros generalmente a base de una comisión o cuota.

44-45 Comercio al Detal

El sector del comercio al detal se compone de establecimientos que se dedican a la venta de mercancía al por menor, generalmente sin transformación alguna, y a prestar servicios relacionados con la venta de mercancía. El proceso de la venta al detal es la etapa final en la distribución de mercancía. Los detallistas venden mercancía en cantidades pequeñas al público en general. Este sector se compone de dos tipos principales de detallistas: detallistas con y sin tienda. Los detallistas con tienda operan desde una ubicación física para atraer a los clientes. Los

detallistas sin tienda también sirven al público en general, poniéndose en contacto con clientes y utilizando métodos de mercadeo, tales como comerciales de radio y televisión, transmisión y publicación de anuncios, publicación de catálogos o de catálogos electrónicos, ventas de puerta en puerta, demostraciones en casas, venta desde quioscos o puestos temporeros (vendedores ambulantes, excepto los que venden comida) y la distribución a través de máquinas que venden mercancía.

48-49 Transportación y Almacenaje

El sector de transportación y almacenaje incluye las industrias que proporcionan el transporte de pasajeros y carga, el almacenamiento de artículos, transporte turístico y actividades de apoyo relacionadas con diferentes modos de transportación. Los modos de transportación son aéreos, ferroviarios, marítimos, carreteras y tuberías. Este sector distingue tres tipos básicos de actividades: subsectores para cada modo de transportación, un subsector para almacenaje y un subsector para establecimientos que proporcionan actividades relacionadas con la transportación. Además, existen subsectores para establecimientos que proporcionan transporte turístico a pasajeros, servicios postales y servicios de mensajero.

51 Información

El sector de información se compone de establecimientos que se dedican a la producción y distribución de información y productos culturales, proporcionando los medios para transmitir o distribuir dichos productos así como datos o comunicaciones y procesando los datos. Los componentes principales de este sector son las industrias editoriales, incluyendo la publicación de programas de computadora, publicaciones tradicionales y aquellas que se publican exclusivamente en el Internet; las industrias cinematográficas y de grabación de sonido; estaciones de radio y televisión e Internet; las industrias de telecomunicaciones; las industrias conocidas como proveedoras de servicios de Internet y portales de búsqueda, de procesamiento de datos y de servicio de información.

52 Finanzas y Seguros

El sector de finanzas y seguros se compone de establecimientos que se dedican principalmente a transacciones financieras y/o a facilitar las transacciones financieras. Los tres tipos principales de actividades que se identifican en este sector son: la acumulación de fondos tomando depósitos y/o emitiendo valores y contrayendo las obligaciones durante el proceso; la minimización del riesgo mediante la tramitación de seguros y seguros de renta; y el suministro de servicios especializados que facilitan o apoyan la intervención financiera, seguros y programas de beneficio al empleado. El sector de servicios administrativos y apoyo y manejo de desperdicios y remediación se compone de establecimientos que realizan actividades de apoyo relacionadas con las operaciones diarias de otras organizaciones. En muchos sectores de la economía los establecimientos asumen en ocasiones la responsabilidad de dichas actividades. Los establecimientos en este sector se especializan en una o más actividades de apoyo y prestan dichos servicios a clientes en una variedad de industrias y en algunos casos a individuos. Las actividades realizadas incluyen: administración de oficinas, empleo, preparación de documentos y servicios cléricales, solicitudes para ofrecer servicios, cobro, servicios de vigilancia y seguridad, limpieza y servicios de desecho de desperdicios.

El sector del cuidado de salud y asistencia social se compone de establecimientos que proveen cuidados de salud y asistencia social a individuos. El sector incluye cuidado de salud y asistencia social ya que ambos están relacionados y es difícil distinguir sus actividades por separado. Los establecimientos de este sector proveen servicios rendidos por profesionales entrenados. Todas las industrias en el sector comparten procesos similares, especialmente la participación de profesionales de la salud o trabajadores sociales con la experiencia requerida. (Los sectores de Agricultura, Silvicultura, Pesca, y Caza (NAICS 11) y el sector de Administración Pública (NAICS 92) no están incluidos. El censo económico excluye las Refinerías de Petróleo (NAICS 32411) para la Islas Vírgenes solamente.)

Definiciones: Las industrias seleccionadas de NAICS están definidas en el Apéndice B, Códigos, Títulos y Descripciones de NAICS. Otros términos están definidos en el Apéndice A, Explicación de los Términos.

BASE INFORMATIVA

El censo económico se realiza a base de establecimientos. A toda compañía que administre establecimientos en más de una localidad se le pide que complete un informe por cada una de las localidades. A cada establecimiento se le asigna una clasificación industrial de acuerdo a su actividad principal y no a la de su compañía matriz.

CODIFICACIÓN DEL ÁREA GEOGRÁFICA

Para tabular los datos censales por municipalidades, distritos, pueblos, aldeas, condados, municipios o islas se necesita obtener información certera y completa sobre la ubicación física de cada establecimiento. Se le pidió a los respondedores que indicaran la ubicación física (calle y número o descripción de la ubicación física y municipalidad, distrito, pueblo, aldea, municipio o isla), si la misma era diferente a la dirección de envío. Los establecimientos que no proporcionaron información aceptable sobre la ubicación física, fueron codificados en base a la información rendida en su informe sobre impuestos al Servicio de Rentas Internas (IRS) o en base a la información obtenida en censos anteriores.

INFORMACIÓN HISTÓRICA

El censo económico ha sido realizado cada 5 años para las siguientes áreas, excepto donde se indica a continuación:

- Islas Marianas del Norte — Desde 1982
- Guam — Desde 1958
- Islas Vírgenes — Desde 1958
- Puerto Rico — El censo de manufactura de 1909 marcó el comienzo del censo económico en Puerto Rico, que hasta 1949 se realizó a intervalos de 10 años exceptuando el año 1929. Las actividades del comercio al por mayor y al detal, al igual que las de las industrias de servicios fueron incluidas como parte del censo económico de 1939. Por primera vez en 1949 hasta el 2002, los censos de comercio al por mayor y comercio al detal e industrias de servicios fueron tomados al mismo tiempo que el censo de manufactura. El censo de las industrias de construcción ha estado incluido desde 1967. El Congreso ha dado su autorización para que los censos económicos se realicen cada 5 años, cubriendo los años que terminan en "2" y "7".
- Samoa Americana — El Censo Económico del 2002 es el primer censo realizado en esta área. En lo sucesivo, dicho censo se realizará cada 5 años.

La variedad de industrias incluidas en el censo económico de las Islas Marianas del Norte, Guam, Islas Vírgenes y Puerto Rico se amplió en el 2002. Los sectores que se incluyeron por primera vez en el 2002 son información, finanzas y seguros, bienes raíces, cuidado de salud y otras industrias de servicio.

VALOR EN DÓLARES

Todas las cifras monetarias que se incluyen en este informe representan los precios actuales. Las mismas están expresadas en términos de miles de dólares.

COMPARABILIDAD ENTRE LOS CENSOS DE 1997 Y DEL 2002

El Censo Económico del 2002 de las Áreas Insulares es el primero en presentar datos censales en base al nuevo Sistema de Clasificación Norteamericano de la Industria (NAICS). Los datos censales anteriores fueron presentados de acuerdo al Sistema de Clasificación Industrial Uniforme (CIU), desarrollado en 1930. Debido al cambio en el sistema de clasificación, la comparación entre los años censales es limitada. El sistema de NAICS identifica nuevas industrias, redefine conceptos y desarrolla clasificaciones para reflejar los cambios en la economía.

El Censo Económico del 2002 cubre más sectores de la economía que ningún otro censo. Entre los sectores nuevos que se han incluido para el 2002, se encuentran datos sobre los sectores de información, finanzas y seguro, bienes raíces e industrias de cuidado para la salud. El alcance de este censo incluye casi todos los sectores de la economía.

Información adicional sobre el sistema de clasificación NAICS, está disponible en la página del Negociado del Censo en el Internet (www.census.gov/naics).

CONFIABILIDAD DE LOS DATOS

Los datos recopilados en este informe se obtuvieron mediante una enumeración completa, por lo tanto, no están sujetos a la variabilidad del muestreo. No obstante, los datos están sujetos a errores ajenos al muestreo. Los errores ajenos al muestreo pueden ocurrir por muchas razones: incapacidad para identificar todos los casos en el universo, incapacidad o renuencia de parte de los respondedores para proveer la información correcta, dificultades con las definiciones y clasificaciones, errores y sesgos en las respuestas, errores en la recopilación o procesamiento de los datos, mala interpretación de las preguntas y otros errores en el registro y digitación de los datos y estimados que se utilizan para los récords sin respuestas o respuestas incorrectas.

Hasta el momento, no ha sido posible medir con exactitud los efectos que causan estos errores. Sin embargo, se han tomado medidas de precaución necesarias durante las fases de recopilación, procesamiento y tabulación de los datos para minimizar los efectos de los errores ajenos al muestreo. Refiérase al Apéndice C, Metodología, para más información sobre la confiabilidad de los datos.

DIVULGACIÓN

De acuerdo con la ley federal que rige los informes censales (título 13 del Código de los Estados Unidos), los datos que se publican no divulgan las operaciones de un establecimiento o negocio en particular. Sin embargo, el número de establecimientos clasificados bajo un tipo de negocio no constituye una divulgación, por lo tanto, esta información puede ser publicada aunque otra información sea suprimida. Las técnicas empleadas para limitar la divulgación son discutidas en www.census.gov/epcd/ec02/disclosure.htm.

CONTACTOS PARA LOS USUARIOS DE DATOS

Las preguntas relacionadas con los datos censales deben ser dirigidas a U.S. Census Bureau, Company Statistics Division, Economic Census Branch, 301-763-3314 o por correo electrónico a csd@census.gov.

¹The Herfindahl-Hirschman index is calculated by summing the squares of the individual establishments' market share percentages for the 50 largest establishments or for the universe, whichever is lower, in a particular kind of business. The market share for each establishment is the total sales, receipts, or revenue for that establishment divided by total sales, receipts, or revenue for the entire kind of business, multiplied by 100.

Explanation of Terms

ANNUAL PAYROLL

Payroll includes all forms of compensation, such as salaries, wages, commissions, dismissal pay, bonuses, vacation allowances, sick-leave pay, and employee contributions to qualified pension plans paid during the year to all employees. For corporations, payroll includes amounts paid to officers and executives; for unincorporated businesses, it does not include profit or other compensation of proprietors or partners. Payroll is reported before deductions for social security, income tax, insurance, union dues, and other withholdings. This definition of payroll is the same as that used by the Internal Revenue Service (IRS) on Form 941-PR.

E-COMMERCE

E-commerce includes sales, receipts, or revenue from any transaction completed over an Internet, Extranet, Electronic Data Interchange (EDI) network, electronic mail, or other online system. Payment for these goods or services may or may not be made online.

EMPLOYEES

Paid employees consist of full- and part-time employees, including salaried officers and executives of corporations. Included are employees on paid sick leave, paid holidays, and paid vacations; not included are proprietors and partners of unincorporated businesses. The definition of paid employees is the same as that used by the Internal Revenue Service (IRS) Form 941-PR.

EMPLOYMENT BY PRIMARY FUNCTION

Employees of wholesale trade establishments are classified in the following categories according to their primary function for the pay period including March 12:

1. Selling — Includes employees engaged in sales activities, traveling salespeople, truck salespeople, and selling employees working out of their homes.
2. Sale support — Includes employees engaged in sales support activities such as office and clerical, warehouse, customer service, maintenance, delivery, sorting, grading, or packaging activities in conjunction with sales operations. Employees who provide services to this establishment, such as janitorial or repair, are also included.
3. General support of other establishments — Includes headquarters employees, regional or district managers who control more than just one establishment, corporate accountants, researchers, and central warehouse employees.
4. Packaging — Includes employees engaged in packaging.
5. Production — Includes employees engaged in production work.
6. Assembly — Includes employees who combine parts into a finished product that can stand alone.
7. Other — Includes employees not elsewhere classified, such as, employees engaged in agricultural, construction, or other activities.

ESTABLISHMENTS

An establishment is a single physical location at which business is conducted and/or services are provided. It is not necessarily identical to a company or enterprise, which may consist of one establishment or more. Economic census figures represent a summary of reports for individual

establishments rather than companies. For cases where a census report was received, separate information was obtained for each location where business was conducted. When administrative records of other federal agencies were used instead of a census report, no information was available on the number of locations operated. Each economic census establishment was tabulated according to the physical location at which the business was conducted. The count of establishments represents those in business at any time during 2002.

When two activities or more were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment. The entire establishment was classified on the basis of its major activity and all data for it were included in that classification. However, when distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted at a single location under a single ownership, separate establishment reports for each of the different activities were obtained in the census.

FIRMS

A firm is a business organization or entity consisting of one domestic establishment (location) or more under common ownership or control. All establishments of subsidiary firms are included as part of the owning or controlling firm. For the economic census, the terms "firm" and "company" are synonymous.

FIRST-QUARTER PAYROLL

Represents payroll paid to persons employed at any time during the quarter January to March 2002, before deductions.

FRANCHISE STATUS

This item indicates whether a retail trade establishment operated as a franchise in 2002.

HERFINDAHL-HIRSCHMAN INDEX FOR THE 50 LARGEST ESTABLISHMENTS

Represents a measure of market concentration for the 50 largest establishments at the 3-digit NAICS level for retail and selected kind-of-business sectors. The index takes into account the size and distribution of establishments in a particular kind of business. It is calculated by summing the squares of the individual establishments' market share percentages for the 50 largest establishments or for the universe, whichever is lower in a particular kind of business. The market share for each establishment is the total sales, receipts, or revenue for that establishment divided by total sales, receipts, or revenue for the entire kind of business, multiplied by 100.

LEGAL FORM OF ORGANIZATION

1. Corporation — An incorporated business created by statute as a legal entity separate and distinct from its owners.
 - a. Private nonprofit — Corporate entity whose shares are not traded on the open market. Profits are used to promote the goals of the corporation and not to benefit the shareholders financially.
 - b. Private for-profit — Corporate entity whose shares are not traded on the open market. Shareholders benefit financially from the profit of the corporation.
 - c. Public — Corporate entity whose shares are traded on the open market. Shareholders benefit financially from the profits of the corporation.
 - d. Not reported — Include corporate entities that did not report a type of corporation.
2. Individual proprietorship — An unincorporated business owned by an individual.
3. Partnership — An unincorporated business owned by two or more persons having a shared financial interest in the business.

-
4. Cooperative associations — A legal entity where a group of individuals join together to conduct an economic activity of mutual benefit. Most cooperatives are controlled by its members in an egalitarian fashion.
 5. Other — Includes businesses that reported other legal form of organization not listed above.
 6. Not classified — Includes businesses that were not classified in any of the categories listed above.

MALL OR SHOPPING CENTER LOCATION

This item applies to retail and selected kind-of-business establishments. This item indicates whether the establishments are physically located in a shopping center or mall. Data on mall or shopping center location for businesses were provided by the respondents. Data are tabulated according to the physical location of the business in a mall or shopping center.

NUMBER OF GUESTROOMS

Guestrooms consist of the number of rooms, units, or quarters that can be rented as separate units for short term. Suites of rooms that cannot be subdivided are counted as a single unit.

OPERATING EXPENSES

Includes payroll, employee benefits, interest and rent expenses, payroll taxes, cost of supplies used for operation, depreciation expenses, fundraising expenses, contracted or purchased services, and other expenses charged to operations during 2002. Expenses exclude cost of goods sold, income taxes, and interest for wholesale establishments; outlays for the purchase of real estate; construction and all other capital improvements; funds invested; assessments or dues paid to the parent or other chapters of the same organization; and, for fundraising organizations, funds transferred to charities and other organizations.

PRODUCT LINES FOR WHOLESALE AND RETAIL TRADES

Tables 10, 11, 24, and 25 present sales data for product lines. An individual establishment is the unit assigned to a single kind-of-business classification for which data are summarized in most wholesale and retail census tabulations. Prior to their recompilation by product-line category, kind of business statistics do not provide the product-line composition of wholesale and retail sales. To meet expanded needs, sales by product lines are collected in the census and are presented in this report in terms of product-line groupings.

In planning product-line inquiries for the 2002 Economic Census of Puerto Rico, the Census Bureau consulted extensively with local government and trade associations for advice on the information to be provided by the census, and on reportability, which was the major limiting factor. One hundred and twenty-one product lines for wholesale trade and fifty-three product lines for retail trade were devised to account for all the sales and receipts of wholesale and retail establishments, regardless of kind-of-business classification.

Limitations in reporting sales by product lines

Even with a limited breakdown of 121 and 53 major lines for wholesale and retail trades, respectively, there may be a tendency on the part of respondents to fail to identify minor lines for a particular business. This has the effect of understating the number of establishments for individual product lines, and to a lesser extent, it affects the measurement of the volume of sales of individual lines.

Product-line categories by which individual wholesalers and retailers group their sales are not uniform and will not always correspond to categories established in a reporting system designed for general use. In addition, because some wholesalers and retailers may have had little if any recorded information on sales by line of product, a substantial amount of estimation may be involved in the reporting of product lines. Furthermore, there is, of course, no assurance that the pattern for the establishments reporting sales by product lines is representative of those which

did not report. Figures for product-line sales should constitute useful approximations to serve many important current requirements and should be helpful in measuring important changes occurring over fairly long intervals, such as between successive censuses.

A related problem for large wholesale or retail firms may be the absence of product-line records on an individual establishment basis. Some firms may have information available only for a group of establishments within a warehouse district or some other grouping used by the firm. In such cases it was necessary for the firm to estimate sales for individual establishments by using the pattern of sales shown by the entire group of establishments.

Coverage

Tables 10 and 24 present coverage ranges for each kind of business shown. Coverage ranges for each kind of business indicate the degree to which sales were acceptably reported by product lines. Coverage was determined by dividing total sales of establishments reporting acceptable data by lines by total sales of all establishments classified in that particular kind of business.

Except when precluded by the census disclosure rules (see Disclosure in Introduction), data have been shown for individual kinds of business when the dollar volume of reporting coverage was sufficient to account for 60 percent or more of sales (ranges t through w). (See Introduction for meaning of Abbreviations and Symbols.)

As noted above, the fact that an establishment reported its sales by product lines does not always mean that all lines handled by the establishment are reported separately.

Description of the tables

In addition to a coverage indicator, Tables 10 and 24 provide data for each kind of business and for each product-line report:

- The number of establishments and total sales of establishments handling the specified line;
- Sales of specified line;
- The percentage of total sales of the specific kind of business accounted for by each of the lines carried;
- The degree of specialization in that line. Specialization is derived by computing sales of a line as a percentage of total sales of establishments that handled that particular line.

Tables 11 and 25 provide summary data by product line for wholesale and retail trades, respectively, including counts of establishments handling the line and total sales of the line. Provided within each product line are counts of establishments carrying the line and the amount and percent of the line sold by various kinds of businesses.

To avoid disclosure, data for product lines and kinds of businesses may not add to the total because some product lines and kinds of businesses are not shown.

Operating expenses are also included as part of selected expenses for the wholesale trade only.

TOURIST INCENTIVE ACT STATUS

Indicates whether the establishments are operating under the Tourist Incentive Act of 1993. The act was designed to stimulate investment in hotel operations on the island. It provides exemptions from income, property, and municipal license taxes for a period of up to 10 years.

TYPES OF OPERATION

In addition to being classified by kind of business, wholesale establishments are also classified by type of operation according to the ownership of the business and character of the transactions. Establishments in wholesale trade are grouped into the following two major types of operation classifications:

- **Merchant wholesalers.** Establishments primarily engaged in buying and selling goods on their own account. Included are such types of establishments as wholesale distributors and jobbers, importers, exporters, own-brand importers/marketers, terminal and country grain elevators, farm products assemblers, and manufacturers' sales branches or offices. Merchant wholesalers usually operate from their own warehouse, where they receive and sell goods for their customers.
- **Agents, brokers, and commission merchants.** Establishments primarily engaged in arranging the purchase or sale of goods owned by others or purchasing goods generally on a commission basis. Included are such types of operations as auction companies, agents and brokers, commission merchants, manufacturers' agents, import/export agents and brokers, and electronic markets. The "sales" of agents, brokers, and commission merchants are the gross sales (or purchase) value of the goods in the transactions negotiated. These establishments operate from offices and generally do not own or handle the goods they sell.

In this report, data are shown separately for merchant wholesalers. Data for agents, brokers, and commission merchants are presented under "Other operating types."

La nómina incluye todo tipo de compensación, tales como, salarios, sueldos, comisiones, bonificaciones, pagos por vacaciones, enfermedad y contribuciones de empleados a planes de pensiones calificados pagados durante el año a todos los empleados. Para las corporaciones, la nómina incluye las cantidades pagadas a los oficiales y ejecutivos. Si el establecimiento no es una corporación, la nómina excluye los beneficios y compensaciones pagadas a los propietarios y socios. La cantidad de la nómina de sueldos se declara sin restar los pagos por seguro social, contribuciones sobre ingresos, primas de seguro, cuotas de sindicatos y otros ajustes. La definición de nómina que se presenta es la misma que empleó el Servicio de Rentas Internas (IRS) en el Formulario 941-PR.

COMERCIO ELECTRÓNICO

El comercio electrónico incluye todo tipo de ventas, envíos o ingresos provenientes de cualquier transacción realizada a través del Internet, Extranet, Red Electrónica de Intercambio de Datos (EDI), correo electrónico o cualquier otro sistema en línea. El pago de artículos o servicios puede o no hacerse en línea.

EMPLEADOS

Comprende el número de empleados remunerados de jornada completa y parcial, incluyendo los oficiales asalariados y ejecutivos de corporaciones. También están incluidos los empleados a quienes se les pagaron días feriados o días libres tomados por vacaciones o enfermedad. Sin embargo, no están incluidos los propietarios o socios de negocios que no están incorporados. La definición de empleados que se presenta es la misma que empleó el Servicio de Rentas Internas (IRS) en el Formulario 941-PR.

ESTABLECIMIENTOS

Un establecimiento es una ubicación física individual donde se lleva a cabo actividades comerciales y/o se prestan servicios. Un establecimiento no es necesariamente idéntico a una compañía o empresa, la cual podría tener uno o más establecimientos. Las estadísticas del censo económico representan un resumen de los informes individuales de cada establecimiento y no de las compañías. Por medio de los cuestionarios censales recibidos, se obtuvo información detallada para cada ubicación donde se llevó a cabo un negocio. Los registros administrativos de otras agencias federales fueron utilizados para determinar el número de ubicaciones cuando la información no estaba disponible en el cuestionario. Cada establecimiento dentro del censo económico fue tabulado según la ubicación física en la que se llevó a cabo el negocio. El número de establecimientos representa aquellos negocios que estuvieron en operación en cualquier momento durante el 2002.

Cuando dos actividades o más se llevan a cabo en un establecimiento que pertenece a un solo dueño, todas las actividades son agrupadas como parte de las actividades del mismo. La clasificación del establecimiento se establece a base de la actividad principal conducida en el mismo y todos los datos fueron incluidos bajo esa clasificación. Sin embargo, se obtuvo un informe para cada una de las actividades del establecimiento, cuando en una ubicación física individual habían actividades económicas diferentes y separadas para las cuales existían clasificaciones industriales.

FIRMAS

Una firma es una organización comercial o entidad que consiste de uno o más establecimientos domésticos bajo una misma propiedad o control. Todos los establecimientos de las firmas subsidiarias están incluidos como parte de la firma que tiene derechos de propiedad o control. Para el censo económico, los términos "firma" y "compañía" son sinónimos.

NÓMINA DEL PRIMER TRIMESTRE

Representa la nómina pagada, antes de las deducciones, a personas empleadas en cualquier momento durante el trimestre de enero a marzo del 2002.

ESTADO DE LA FRANQUICIA

Indica si un establecimiento que se dedica al comercio al detal operó como una franquicia durante el 2002.

ÍNDICE HERFINDAHL-HIRSCHMAN PARA LOS 50 ESTABLECIMIENTOS MÁS GRANDES

Representa una medida de concentración del mercado para los 50 establecimientos más grandes al nivel de 3 dígitos para los sectores de comercio al detal y tipos de negocios seleccionados. Dicho índice toma en cuenta el tamaño y la distribución de los establecimientos en un tipo de negocio en particular. El índice se calcula sumando los porcentajes de la participación en el mercado de cada establecimiento al cuadrado, para los 50 establecimientos más grandes o para el universo, el que sea menor. El porcentaje de la participación del mercado para cada establecimiento consiste del valor total de ventas, ingresos y entradas para dicho establecimiento dividido entre el valor total de ventas, ingresos y entradas para la industria, multiplicado por 100.

TIPO DE ORGANIZACIÓN JURÍDICA

1. Corporación — Negocio incorporado creado por un estatuto como una entidad legal separada de los dueños.

-
- a. Privada sin fines de lucro — Entidad corporativa cuyas acciones no son negociables en el mercado. Las ganancias obtenidas son utilizadas para promover las metas de la corporación y no para el beneficio de los dueños.
 - b. Privada con fines de lucro — Entidad corporativa cuyas acciones no son negociables en el mercado. En dichas entidades, los accionistas se benefician de las ganancias de la corporación.
 - c. Pública — Entidad corporativa cuyas acciones son negociables en el mercado. En dichas entidades, los accionistas se benefician de las ganancias de la corporación.
 - d. No reportadas — Entidades corporativas que no se identificaron con ningún tipo de corporación.
2. Propiedad individual — Negocio que no está incorporado y donde el dueño es un individuo.
 3. Sociedad de propietarios — Negocio que no está incorporado y donde los dueños comparten intereses financieros.
 4. Asociaciones cooperativas — Entidad legal dirigida por un grupo de individuos que se unen para realizar una actividad económica para el beneficio mutuo. Las cooperativas son generalmente controladas por sus miembros de igual forma.
 5. Otras — Incluye establecimientos que indicaron otra forma de organización jurídica que no se especificó anteriormente.
 6. No clasificado — Incluye establecimientos que no fueron clasificados en ninguna de las categorías antes mencionadas.

LOCALIZACIÓN EN UN “MALL” O CENTRO COMERCIAL

Se refiere a establecimientos de comercio al detal y otros tipos de negocios seleccionados. La información indica si los establecimientos están localizados físicamente en un “mall” o centro comercial. Los datos sobre la localización de los negocios dentro de un “mall” o centro comercial, fueron provistos por los respondedores. Los datos están tabulados según la localización física del negocio dentro de un “mall” o centro comercial.

NÚMERO DE HABITACIONES PARA HUÉSPEDES

Las habitaciones para huéspedes consisten en el número de habitaciones que pueden ser alquiladas como unidades individuales por un período de tiempo limitado. Las “suites” de habitaciones que no pueden ser subdivididas son contadas como una sola unidad.

GASTOS DE OPERACIÓN

Incluye nómina de sueldos, beneficios pagados al empleado, gastos en intereses y alquiler, impuestos de nómina, costo de suministros utilizados para la operación, gastos de depreciación, gastos relacionados con la recaudación de fondos, servicios contratados o comprados y otros gastos incurridos en las operaciones durante el 2002. Los gastos excluyen el costo de la mercancía vendida, contribuciones sobre ingreso e intereses para establecimientos mayoristas; desembolsos para la compra de bienes raíces; gastos de construcción y todas las otras mejoras de capital; fondos invertidos; aportaciones adicionales o cuotas pagadas a la compañía matriz u otros capítulos de la misma organización; y para organizaciones que se dedican a recaudar fondos, fondos transferidos a organizaciones caritativas y otras organizaciones.

LÍNEAS DE PRODUCTOS PARA EL COMERCIO AL POR MAYOR Y AL DETAL

Las tablas 10, 11, 24 y 25 proporcionan datos sobre las ventas de las líneas de productos. Un establecimiento individual es la unidad a la que se asigna una sola clasificación de tipo de negocio, para la cual se hace un resumen de los datos en la mayoría de las tabulaciones censales de comercio al por mayor y al detal. Antes de ser recopiladas conforme a categorías correspondientes de las líneas de productos, las estadísticas de tipo de negocio no suministran

las líneas de productos que componen las ventas al por mayor y al detal. Para poder cumplir requisitos específicos, se recopilaron datos en el censo que indican las ventas según las líneas de productos y se presentan dichos datos a base de grupos de estas líneas.

Con el propósito de preparar las preguntas del Censo Económico de Puerto Rico del 2002 que se relacionan con las líneas de productos, el Negociado del Censo consultó al gobierno local y asociaciones mercantiles con respecto a la información que el censo debía proporcionar y también con respecto a la viabilidad de facilitar los datos, la cual constituye el factor limitante. Se formularon ciento veintiuna líneas de productos para el comercio al por mayor y cincuenta y tres líneas de productos para el comercio al detal para dar cuenta de todas las ventas e ingresos de los establecimientos, sin considerar la clasificación de tipo de negocio.

Limitaciones al declarar las ventas según las líneas de productos

Aún con un desglose tan limitado de 121 y 53 líneas principales para el comercio al por mayor y al detal, respectivamente, puede haber la tendencia de parte de los respondedores a dejar de identificar las líneas menos importantes de un negocio en particular. Esto resulta en una subestimación del número de establecimientos que hay para las líneas individuales de ventas de mercancía y, en menor grado, afecta la medida del volumen de ventas de las líneas individuales.

Las categorías de las líneas de productos que los mayoristas y detallistas individuales utilizan para agrupar sus ventas no son uniformes y no siempre corresponden a las categorías establecidas en un sistema informativo que ha sido diseñado para uso general. También, puesto que algunos mayoristas y detallistas podrían tener poca (si alguna) información registrada con respecto a las ventas por líneas de productos, el declarar información acerca de las líneas de productos requiere un sinnúmero de estimaciones. Además, no hay ninguna seguridad de que el patrón establecido por los establecimientos que declaran las ventas de acuerdo a las líneas de productos pueda representar a aquéllos que no respondieron. Las cifras correspondientes a las ventas de líneas de productos deberían constituir aproximaciones útiles que satisfagan un gran número de los requerimientos más importantes que existen en la actualidad y deberían ayudar a medir los cambios importantes que ocurren durante intervalos relativamente largos, tal como el intervalo entre un censo y otro.

La falta de registros (sobre líneas de productos) que estuvieran basados en establecimientos individuales pudo haber significado un problema para las grandes empresas mayoristas y detallistas. Algunas empresas sólo tenían información disponible para un grupo de establecimientos que estuvieran localizados dentro de un distrito de almacenamiento o para algún otro grupo o clasificación utilizada por la empresa. En estos casos fue necesario que la empresa estimara las ventas de los establecimientos individuales utilizando el patrón de ventas establecido por el grupo entero de establecimientos.

Cobertura

Las tablas 10 y 24 indican el rango de la cobertura para cada tipo de negocio incluido. El rango de la cobertura de cada tipo de negocio indica cuán aceptable resultó ser la información declarada acerca de las ventas de las líneas de productos. Se calculó la cobertura dividiendo el total de ventas de los establecimientos que proporcionaron datos aceptables (por líneas de productos), entre el total de ventas de todos los establecimientos clasificados bajo ese tipo de negocio en particular.

Excepto cuando lo impidieron los reglamentos que controlan la divulgación censal (véase Divulgación en la Introducción), se proporcionaron datos para tipos de negocio individuales en aquellos casos en que el volumen en dólares de la cobertura era suficiente para dar cuenta de un 60 por ciento o más de las ventas (del indicador t hasta w). (Vea la Introducción para el significado de las Abreviaturas y Símbolos.)

Según se indicó anteriormente, el hecho de que un establecimiento haya declarado sus ventas según las líneas de productos no siempre significa que todas las líneas administradas por el establecimiento hayan sido declaradas por separado.

Descripción de las tablas

Además de proporcionar indicadores de cobertura, las tablas 10 y 24 proporcionan datos para cada tipo de negocio, y lo siguiente para cada línea de producto:

- El número de establecimientos y el total de las ventas de los establecimientos que administran la línea especificada;
- Ventas de cada línea en particular;
- El porcentaje total de ventas realizadas por el tipo de negocio específico que es representado por cada una de las líneas que estos tienen a la venta;
- El grado de especialización en esa línea. La especialización se obtiene calculando las ventas de una línea como un porcentaje del total de ventas de los establecimientos que vendían esa línea en particular.

Las tablas 11 y 25 proporcionan datos sumarios para el comercio al por mayor y al detal, respectivamente, según la línea de producto, incluyendo el número de establecimientos que administran esa línea y el total de ventas para esa línea. SOURCES OF THE DATA

The 2002 Economic Census of the Northern Mariana Islands, Guam, Virgin Islands, and Puerto Rico was conducted by mail. The economic census for American Samoa was conducted using a combination of mail and personal enumeration. Descriptions of the sources of data for the island areas follow:

1. Northern Mariana Islands, Guam, Virgin Islands, and Puerto Rico — A census form was mailed to all employer firms (employers of one person or more) in operation at any time during 2002 and classified as being within the scope of the census. One single report form was used to collect data for the Northern Mariana Islands, Guam, and Virgin Islands. Nine separate report forms (*Utilities, Transportation, and Warehousing; Construction; Manufacturing; Wholesale Trade; Retail Trade; Finance, Insurance, Real Estate, Rental and Leasing; Accommodation Services; Services; and General Schedule*) with English and Spanish versions were used to collect data for Puerto Rico. Firms were instructed to return their completed report form by mail. A telephone follow-up was conducted to obtain information from selected firms that failed to return their report form.

The governments of the Northern Mariana Islands and Guam, under the provisions in Title 13 of the United States Code, Section 191(b), were responsible for contacting respondents about overdue census forms. The Director of the Central Statistics Division, Department of Commerce in the Northern Mariana Islands, and the Chief Economist of the Department of Labor in Guam supervised the local activities. Staff from the Census Bureau trained the project leaders, supervisors, and interviewers in the Northern Mariana Islands and Guam, respectively. Staff from the Department of Commerce in the Northern Mariana Islands and the Department of Labor in Guam, who worked with census data, were sworn to uphold the confidentiality of the data. The Census Bureau provided the Central Statistics Division and the Department of Labor with a list of the establishments for which a report form had not been received. Interviewers were instructed to contact establishments by telephone to obtain the required information. Personal interviews were conducted to obtain data from establishments that requested a personal visit or could not be contacted by telephone. Quality checks were performed to ensure that the necessary reports were obtained.

2. American Samoa — A combination of mail and personal enumeration was used to conduct the first economic census of American Samoa. Data were collected for establishments with and without employees that were in operation during 2002. A single report form was used to collect data for American Samoa.
 - a. Employer establishments — Establishments with at least one employee and payroll were sent a report form to be completed and returned to the Census Bureau by mail. A telephone follow-up was conducted to collect information for establishments that failed to answer the census.
 - b. Nonemployer establishments — Data for nonemployer establishments were collected through personal enumeration. The Government of American Samoa collected the data under the provisions in Title 13 of the United States Code, Section 191(b). The Chief Statistician of the Statistics Division at the American Samoa Department of Commerce supervised the field enumeration and follow-up of nonemployer and nonrespondent employer establishments referred by the Census Bureau. All persons working with census data were sworn to maintain the confidentiality of Census Bureau information. A Census Advisor trained the project leader as well as the interviewers. The advisor worked with local staff to ensure that Census Bureau standards and procedures were followed.

American Samoa was divided into four zones for enumeration — Manu'a Islands, Eastern, Central, and Western districts of Tutuila. Nonemployer establishments were identified from the American Samoa Government Business License List. Interviewers were provided with an assignment list that included the establishments assigned for interview and a labeled report form for each establishment listed. The interviewers obtained information about months in operation, physical location, sales/receipts, employment and payroll, expenses, kind of business, sales by class of customer, description of merchandise sold, construction work done, products produced, or services provided, legal form of organization, ownership status, and status of the establishment at the end of 2002. A consistency review was performed on every report form to ensure the accuracy of the reported data.

The report forms used to collect information for establishments in the island areas are available at www.help.econ.census.gov/econhelp/index2002.html.

A more detailed examination of census methodology is presented in the *History of the 2002 Economic Census* at www.census.gov/econ/www/history.html.

INDUSTRY CLASSIFICATION OF ESTABLISHMENTS

The classifications for all establishments are based on the *North American Industry Classification System, United States*, 2002 manual. The method of assigning classifications and the level of detail at which establishments are classified depends on whether a report form was obtained for the establishment.

- Establishments that returned a report form are classified on the basis of their self-designation, detail/description of product lines sold, type of construction work done, products produced, or services provided, and other industry-specific inquiries.
- Establishments that did not return a report form are classified on the basis of information obtained from previous survey data and administrative records of other government agencies.

RELIABILITY OF DATA

All data compiled in this publication are subject to nonsampling errors. Nonsampling errors can be attributed to many sources during the development or execution of the census, such as:

- inability to identify all cases in the actual universe;
- definition and classification difficulties;
- differences in the interpretation of questions;
- errors in recording or coding the data obtained; and
- other errors of collection, response, coverage, processing, and estimation for missing or misreported data.

The accuracy of these tabulated data is determined by the joint effects of the various nonsampling errors. Explicit measures of the effects of these nonsampling errors are not available. Precautionary steps were taken in all phases of the collection, processing, and tabulation of the data in an effort to minimize the effects of nonsampling errors.

The Census Bureau obtains limited information extracted from administrative records of other federal agencies, such as employment and payroll. This information is used in conjunction with other information available to the Census Bureau to develop estimates for missing items on the report form or for establishments for which responses were not received in time for publication.

TREATMENT OF NONRESPONSE

Census report forms included two types of inquiries: general inquiries and industry-specific inquiries. Data for the general inquiries, which include location, kind of business or operation, sales, shipments, receipts, or revenue, payroll, and number of employees, were available from a combination of sources for all establishments. Data for industry-specific inquiries, tailored to particular kinds of business, were available only from those establishments that completed the appropriate inquiries on the report form.

For total nonresponse cases (report forms not returned) and missing items, the establishment's administrative records information was used in conjunction with industry averages, prior period data, and outside reference sources to estimate general and industry-specific inquiries. Large non-response cases were contacted to obtain information for general and industry-specific inquiries, as appropriate.

When reporting was incomplete or inadequate, product-line data for Puerto Rico wholesale and retail trades were expanded on the premise that data for those establishments not reporting this information are similar to product-line data for those establishments in the same kind of business that reported this information. In 2002, the method used to account for nonresponse to product-line inquiries was to expand the total of reported data to represent 100 percent of the universe. Data presented for product lines were expanded in direct relationship to total sales of all establishments included in the category. A similar expansion was done using the number of establishments that reported product lines to adjust the establishment count.

DISCLOSURE

In accordance with federal law governing census reports (Title 13 of the United States Code), no data are published that would disclose the operations of an individual establishment or business. However, the number of establishments in a kind-of-business classification is not considered a disclosure; therefore, this information may be released even though other information is withheld. Techniques employed to limit disclosure are discussed at www.census.gov/epcd/ec02/disclosure.htm.

Apéndice C.

Metodología

FUENTES DE DATOS

El Censo Económico del 2002 de las Islas Marianas del Norte, Guam, Islas Vírgenes y Puerto Rico se realizó por correo. El censo económico de Samoa Americana se llevó a cabo utilizando una combinación de enumeración por correo y personal. Las descripciones sobre las fuentes de datos para las áreas insulares se presentan a continuación:

1. Islas Marianas del Norte, Guam, Islas Vírgenes y Puerto Rico — El cuestionario censal fue enviado a todas las firmas que empleaban una o más personas, que estuvieron activas en cualquier momento durante el año 2002 y que estaban clasificadas dentro del alcance del censo. Se utilizó un solo cuestionario para recopilar datos sobre las Islas Marianas del Norte, Guam e Islas Vírgenes. Para recopilar los datos de Puerto Rico se utilizaron nueve cuestionarios individuales (Utilidades, Transportación y Almacenaje; Construcción; Manufactura; Comercio al por Mayor; Comercio al Detal; Finanzas, Seguros, Bienes Raíces, Alquiler y Arrendamiento; Servicios de Alojamiento; Servicios; y Cuestionario General) con versiones en inglés y español. Se le indicó a las firmas que completaran los cuestionarios y los devolvieran por correo. Se llevó a cabo un seguimiento por teléfono para obtener los datos de firmas seleccionadas que hasta entonces no habían rendido sus informes.

Los gobiernos de las Islas Marianas del Norte y de Guam fueron responsables, bajo las estipulaciones del título 13 del Código de los Estados Unidos, sección 191(b), de contactar a los respondedores que no devolvieron el cuestionario censal. El Director de la División Central de Estadísticas del Departamento de Comercio de las Islas Marianas del Norte y el Economista Jefe del Departamento del Trabajo en Guam supervisaron las actividades locales. El personal del Negociado del Censo entrenó a los líderes del proyecto, supervisores y entrevistadores en las Islas Marianas del Norte y Guam. El personal del Departamento del Comercio en las Islas Marianas del Norte y del Departamento del Trabajo en Guam, que trabajó con los datos censales, fue juramentado para mantener la confidencialidad de los datos. El Negociado del Censo proporcionó a la División Central de Estadísticas y al Departamento del Trabajo una lista de establecimientos para los cuales no se habían recibido cuestionarios. Se le indicó a los entrevistadores que contactaran a los establecimientos por teléfono para obtener la información. Se llevaron a cabo entrevistas personales para obtener datos de establecimientos que solicitaron una visita personal o que no pudieron ser contactados por teléfono. Se cotejó que los cuestionarios necesarios fueran obtenidos.

2. Samoa Americana — Para llevar a cabo el primer censo económico de Samoa Americana se utilizó una combinación de enumeración por correo y personal. Los datos se recopilaron para establecimientos con y sin empleados que estuvieron en operación durante el 2002. Se utilizó un solo cuestionario para recopilar los datos de Samoa Americana.
 - a. Establecimientos con empleados — Se le envió un cuestionario a establecimientos que tenían por lo menos un empleado y nómina, para que lo completaran y devolvieran por correo al Negociado del Censo. Se llevó a cabo un seguimiento por teléfono para los establecimientos que no respondieron al censo.
 - b. Establecimientos sin empleados — Los datos para los establecimientos que no tenían empleados se recopilaron mediante la enumeración personal. El gobierno de Samoa Americana recopiló los datos bajo las estipulaciones del título 13 del Código de Estados Unidos, sección 191(b). El Jefe de Estadísticas de la División de Estadísticas del Departamento de Comercio de Samoa Americana supervisó la enumeración y el seguimiento de establecimientos sin empleados y de aquéllos referidos por el Negociado

del Censo que tenían empleados pero que no respondieron al censo. Todas las personas que trabajaron con los datos censales fueron juramentadas para mantener la confidencialidad de la información obtenida por el Negociado del Censo. El líder del proyecto y los entrevistadores fueron entrenados por un asesor del Negociado del Censo. El asesor trabajó con el personal local para garantizar que los procedimientos y normas del Negociado del Censo fueran seguidos.

Samoa Americana se dividió en cuatro zonas para la enumeración — Las islas Manu'a y el distrito Oriental, Central y Occidental de Tutuila. Los establecimientos que no tenían empleados se identificaron en base a la Lista de Licencias Comerciales del Gobierno de Samoa Americana. Se le proporcionó a los entrevistadores una lista con los establecimientos que iban a entrevistar y un cuestionario para cada establecimiento. Cada cuestionario tenía una etiqueta con el nombre del establecimiento a entrevistar. Los entrevistadores obtuvieron información acerca de los meses en operación, ubicación física, ventas/ingresos, empleo y nómina, gastos, tipo de negocio, ventas por clase de cliente, descripción de la mercancía vendida, trabajo de construcción realizado, productos elaborados o servicios prestados, tipo de organización jurídica, estado de la propiedad y estado del establecimiento a fines del 2002. Se realizaron revisiones sistemáticas para garantizar la exactitud de los datos reportados.

Los cuestionarios utilizados para recopilar los datos sobre los establecimientos en las áreas insulares se encuentran disponibles en www.help.econ.census.gov/econhelp/index2002.html.

La Historia del Censo Económico del 2002 (History of the 2002 Economic Census) en el Internet (www.census.gov/econ/www/history.html) presenta un examen más detallado de la metodología del censo.

CLASIFICACIÓN INDUSTRIAL DE LOS ESTABLECIMIENTOS

Las clasificaciones para todos los establecimientos están basadas en la edición del 2002 del manual del *Sistema Norteamericano de Clasificación Industrial de los Estados Unidos*. El método de asignar clasificaciones y el nivel de detalle al cual los establecimientos son clasificados, depende de que el cuestionario haya sido recibido.

- Los establecimientos que devuelven los informes son clasificados en base a su auto-designación, detalle/descripción de líneas de productos vendidas, tipo de construcción realizada, productos elaborados u otros servicios prestados y otras respuestas específicas sobre la industria.
- Los establecimientos que no devolvieron el cuestionario son clasificados en base a la información obtenida en censos anteriores y registros administrativos de otras agencias de gobierno.

CONFIABILIDAD DE LOS DATOS

Los datos recopilados en esta publicación están sujetos a errores ajenos al muestreo. Estos errores pueden ocurrir por muchas razones durante el desarrollo o levantamiento del censo:

- incapacidad para identificar los casos en el universo;
- dificultades con las definiciones y clasificaciones;
- discrepancias en la interpretación de las preguntas;
- errores en el registro o codificación de los datos obtenidos; y
- otros errores relacionados con la recopilación, respuesta, cobertura, procesamiento y estimados que se utilizan para los récords sin respuestas o respuestas incorrectas.

La exactitud de los datos tabulados es determinada por el conjunto de efectos que tienen los errores ajenos al muestreo. No existen medidas explícitas de los efectos que tienen dichos errores. Se han tomado medidas de precaución durante las fases de recopilación, procesamiento y tabulación de los datos para minimizar los efectos de los errores ajenos al muestreo.

El Negociado del Censo obtiene información limitada extraída de registros administrativos de otras agencias federales, tales como empleo y nómina. Dicha información se utiliza conjuntamente con otra información disponible al Negociado del Censo para estimar las preguntas sin respuesta (dejadas en blanco) del cuestionario o los establecimientos cuyas respuestas no fueron recibidas a tiempo para la publicación de los datos censales.

INTERPRETACIÓN DE LA FALTA DE RESPUESTAS

Los informes censales incluyen dos tipos de preguntas, preguntas generales y preguntas específicas sobre una industria en particular. Las respuestas a las preguntas generales, incluyendo ubicación física, tipo de negocio u operación, ventas, envíos, ingresos o entradas, nómina y número de empleados, fueron obtenidas de diversas fuentes de información para todos los establecimientos. Las respuestas a las preguntas específicas formuladas para obtener información acerca de ciertos tipos de negocio, fueron obtenidas únicamente de los establecimientos que contestaron las preguntas apropiadas en el cuestionario.

Para los casos que no respondieron (cuestionarios no devueltos) o que no respondieron a todas las preguntas (preguntas dejadas en blanco) se usó la información provista en los registros administrativos de los establecimientos conjuntamente con los promedios industriales, datos de períodos anteriores y otras fuentes de referencia externas para estimar las respuestas de preguntas generales y específicas. Los casos grandes, aquellos con ventas, envíos, ingresos o entradas cuantiosas, fueron contactados para obtener respuestas sobre preguntas generales y específicas.

Los datos por líneas de productos para establecimientos de comercio al por mayor y al detal fueron expandidos utilizando la premisa de que los datos por líneas de productos para aquellos establecimientos que no reportaron esta información son similares a los datos por líneas de productos para los establecimientos en el mismo tipo de negocio que sí reportaron esta información. En el 2002, el método que se utilizó para representar casos sin respuestas a las preguntas sobre líneas de productos fue la expansión del total de datos reportados para representar el 100 por ciento del universo. Los datos presentados para las líneas de productos fueron expandidos en relación directa al total de ventas de todos los establecimientos incluidos en la categoría. De forma similar, se hizo una expansión utilizando el número de establecimientos que reportaron líneas de productos para ajustar el número de establecimientos.

DIVULGACIÓN

De acuerdo con la ley federal que rige los informes censales (título 13 del Código de los Estados Unidos), los datos que se publican no divulgan las operaciones de un establecimiento o negocio en particular. Sin embargo, el número de establecimientos clasificados bajo un tipo de negocio no constituye una divulgación, por lo tanto, esta información puede ser publicada aunque otra información sea suprimida. Las técnicas empleadas para limitar la divulgación son discutidas en www.census.gov/epcd/ec02/disclosure.htm.
