

Be a hero in the eyes of
your fellow Americans
every time you step
into your yard.

If you're for water like me, then you know you can have a beautiful yard and still save thousands of gallons every year. Just by making smart choices like picking the right plants for your climate, and watering them in the right weather and at the right time of day. For tips on saving water in your own backyard, check out the WaterSense website. Join me and thousands of our neighbors in the We're for Water campaign. Together we can stand up for water by making simple changes at home.
