

# Population and Housing Profile: 2000

*2000 Census of Population and Housing*

Issued May 2003

(Revised)

## **U.S. Virgin Islands**

**U.S. Department of Commerce**  
**Donald L. Evans,**  
Secretary

**Samuel W. Bodman,**  
Deputy Secretary

**Economics and Statistics Administration**  
**Kathleen B. Cooper,**  
Under Secretary  
for Economic Affairs

**U.S. CENSUS BUREAU**  
**Charles Louis Kincannon,**  
Director

**Population and Housing Profile: 2000**  
**Geography: U.S. Virgin Islands**

NOTE: For information on confidentiality protection, nonsampling error, and definitions, see the footnote below.

Subject	Number	Percent	Subject	Number	Percent
<b>SEX AND AGE</b>			<b>RELATIONSHIP</b>		
<b>Total population</b>	108,612	100.0	<b>Total population</b>	108,612	100.0
Male	51,864	47.8	In households	107,341	98.8
Female	56,748	52.2	Householder	40,648	37.4
			Spouse	13,498	12.4
Under 5 years	8,553	7.9	Child	38,878	35.8
5 to 9 years	10,176	9.4	Own child under 18 years	28,176	25.9
10 to 14 years	9,676	8.9	Other relatives	9,904	9.1
15 to 19 years	8,688	8.0	Under 18 years	5,606	5.2
20 to 24 years	5,916	5.4	Nonrelatives	4,413	4.1
25 to 34 years	13,705	12.6	Unmarried partner	2,609	2.4
35 to 44 years	15,746	14.5	In group quarters	1,271	1.2
45 to 54 years	15,521	14.3	Institutionalized population	675	0.6
55 to 59 years	6,757	6.2	Noninstitutionalized population	596	0.5
60 to 64 years	4,757	4.4			
65 to 74 years	5,845	5.4	<b>HOUSEHOLDS BY TYPE</b>		
75 to 84 years	2,505	2.3	<b>Total households</b>	40,648	100.0
85 years and over	767	0.7	Family households (families)	26,636	65.5
			With own children under 18 years	14,107	34.7
Median age (years)	33.4	(X)	Married-couple families	13,498	33.2
			With own children under 18 years	5,905	14.5
18 years and over	74,323	68.4	Female householder, no husband present	10,132	24.9
Male	34,735	32.0	With own children under 18 years	6,450	15.9
Female	39,588	36.4	Nonfamily households	14,012	34.5
21 years and over	70,250	64.7	Householder living alone	12,269	30.2
62 years and over	11,815	10.9	Householder 65 years and over	2,602	6.4
65 years and over	9,117	8.4			
Male	3,971	3.7	Households with individuals under 18 years	16,732	41.2
Female	5,146	4.7	Households with individuals 65 years and over	7,420	18.3
			Average household size	2.64	(X)
<b>RACE [1]</b>			Average family size	3.34	(X)
<b>Total population</b>	108,612	100.0	<b>SCHOOL ENROLLMENT</b>		
One race	104,820	96.5	<b>Population 3 years and over enrolled in school</b>		
Black or African American	82,750	76.2	Nursery school, preschool	2,484	7.7
White	14,218	13.1	Kindergarten	2,230	6.9
Other races [2]	7,852	7.2	Elementary school (grades 1-8)	16,858	52.5
Two or more races	3,792	3.5	High school (grades 9-12)	7,440	23.2
			College or graduate school	3,107	9.7
<b>Race alone or in combination with one or more other races: [3]</b>			<b>EDUCATIONAL ATTAINMENT</b>		
Black or African American	85,078	78.3	<b>Population 25 years and over</b>		
White	15,694	14.4	Less than 9 <sup>th</sup> grade	12,133	18.5
Other races	11,367	10.5	9 <sup>th</sup> to 12 <sup>th</sup> grade, no diploma	13,743	20.9
			High school graduate (includes equivalency)	17,044	26.0
<b>HISPANIC OR LATINO AND RACE</b>			Some college, no degree	9,425	14.4
<b>Total population</b>	108,612	100.0	Associate degree	2,269	3.5
Hispanic or Latino (of any race)	15,196	14.0	Bachelor's degree	6,841	10.4
Mexican	308	0.3	Graduate or professional degree	4,148	6.3
Puerto Rican	8,558	7.9			
Cuban	141	0.1	Percent high school graduate or higher	60.6	(X)
Other Hispanic or Latino	6,189	5.7	Percent bachelor's degree or higher	16.8	(X)
Not Hispanic or Latino	93,416	86.0			
Black or African American alone	76,696	70.6			
White alone	12,275	11.3			

1. Classification of population by race and ethnicity reflects the Office of Management and Budget, "Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity," Federal Register, Vol. 62, No. 210, October 30, 1997, pp. 58782-58790

2. Includes data for the American Indian and Alaska Native, Asian, Native Hawaiian and Other Pacific Islander, and Some other race populations.

3. In combination with one or more other races listed. The following three numbers may add to more than the total population and the three percentages may add to more than 100 percent because individuals may report more than one race.

NOTE: To maintain confidentiality, the Census Bureau applies statistical procedures that introduce some uncertainty into data for small geographic areas with small population groups. The census results in these tables contain nonsampling error, but do not contain sampling error. Data users who create their own estimates using data from these tables should cite the Census Bureau as the source of the original data only. See also the subject definitions.

- Represents zero or rounds to zero. (X) Not applicable.

Not Hispanic or Latino	47,469	92.7			
Black or African American alone	39,369	76.9			
White alone	6,012	11.7			

1. Classification of population by race and ethnicity reflects the Office of Management and Budget, "Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity," Federal Register, Vol. 62, No. 210, October 30, 1997, pp. 58782-58790

2. Includes data for the American Indian and Alaska Native, Asian, Native Hawaiian and Other Pacific Islander, and Some other race populations.

3. In combination with one or more other races listed. The following three numbers may add to more than the total population and the three percentages may add to more than 100 percent because individuals may report more than one race.

NOTE: To maintain confidentiality, the Census Bureau applies statistical procedures that introduce some uncertainty into data for small geographic areas with small population groups. The census results in these tables contain nonsampling error, but do not contain sampling error. Data users who create their own estimates using data from these tables should cite the Census Bureau as the source of the original data only. See also the subject definitions.

- Represents zero or rounds to zero. (X) Not applicable.

1. Classification of population by race and ethnicity reflects the Office of Management and Budget, "Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity," Federal Register, Vol. 62, No. 210, October 30, 1997, pp. 58782-58790

2. Includes data for the American Indian and Alaska Native, Asian, Native Hawaiian and Other Pacific Islander, and Some other race populations.

3. In combination with one or more other races listed. The following three numbers may add to more than the total population and the three percentages may add to more than 100 percent because individuals may report more than one race.

NOTE: To maintain confidentiality, the Census Bureau applies statistical procedures that introduce some uncertainty into data for small geographic areas with small population groups. The census results in these tables contain nonsampling error, but do not contain sampling error. Data users who create their own estimates using data from these tables should cite the Census Bureau as the source of the original data only. See also the subject definitions.

- Represents zero or rounds to zero. (X) Not applicable.

<b>Total population</b>	7,700	100.0	High school graduate (includes equivalency)	1,124	26.0
Hispanic or Latino (of any race)	1,764	22.9	Some college, no degree	436	10.1
Mexican	21	0.3	Associate degree	105	2.4
Puerto Rican	1,222	15.9	Bachelor's degree	232	5.4
Cuban	13	0.2	Graduate or professional degree	180	4.2
Other Hispanic or Latino	508	6.6			
Not Hispanic or Latino	5,936	77.1	Percent high school graduate or higher	48.0	(X)
Black or African American alone	5,374	69.8	Percent bachelor's degree or higher	9.5	(X)
White alone	185	2.4			

1. Classification of population by race and ethnicity reflects the Office of Management and Budget, "Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity," Federal Register, Vol. 62, No. 210, October 30, 1997, pp. 58782-58790

2. Includes data for the American Indian and Alaska Native, Asian, Native Hawaiian and Other Pacific Islander, and Some other race populations.

3. In combination with one or more other races listed. The following three numbers may add to more than the total population and the three percentages may add to more than 100 percent because individuals may report more than one race.

NOTE: To maintain confidentiality, the Census Bureau applies statistical procedures that introduce some uncertainty into data for small geographic areas with small population groups. The census results in these tables contain nonsampling error, but do not contain sampling error. Data users who create their own estimates using data from these tables should cite the Census Bureau as the source of the original data only. See also the subject definitions.

- Represents zero or rounds to zero. (X) Not applicable.

1. Classification of population by race and ethnicity reflects the Office of Management and Budget, "Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity," Federal Register, Vol. 62, No. 210, October 30, 1997, pp. 58782-58790

2. Includes data for the American Indian and Alaska Native, Asian, Native Hawaiian and Other Pacific Islander, and Some other race populations.

3. In combination with one or more other races listed. The following three numbers may add to more than the total population and the three percentages may add to more than 100 percent because individuals may report more than one race.

NOTE: To maintain confidentiality, the Census Bureau applies statistical procedures that introduce some uncertainty into data for small geographic areas with small population groups. The census results in these tables contain nonsampling error, but do not contain sampling error. Data users who create their own estimates using data from these tables should cite the Census Bureau as the source of the original data only. See also the subject definitions.

- Represents zero or rounds to zero. (X) Not applicable.

<b>Total population</b>	2,058	100.0	High school graduate (includes equivalency)	344	25.8
Hispanic or Latino (of any race)	92	4.5	Some college, no degree	296	22.2
Mexican	-	-	Associate degree	76	5.7
Puerto Rican	49	2.4	Bachelor's degree	236	17.7
Cuban	5	0.2	Graduate or professional degree	169	12.7
Other Hispanic or Latino	38	1.8			
Not Hispanic or Latino	1,966	95.5	Percent high school graduate or higher	84.2	(X)
Black or African American alone	1,610	78.2	Percent bachelor's degree or higher	30.4	(X)
White alone	265	12.9			

1. Classification of population by race and ethnicity reflects the Office of Management and Budget, "Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity," Federal Register, Vol. 62, No. 210, October 30, 1997, pp. 58782-58790

2. Includes data for the American Indian and Alaska Native, Asian, Native Hawaiian and Other Pacific Islander, and Some other race populations.

3. In combination with one or more other races listed. The following three numbers may add to more than the total population and the three percentages may add to more than 100 percent because individuals may report more than one race.

NOTE: To maintain confidentiality, the Census Bureau applies statistical procedures that introduce some uncertainty into data for small geographic areas with small population groups. The census results in these tables contain nonsampling error, but do not contain sampling error. Data users who create their own estimates using data from these tables should cite the Census Bureau as the source of the original data only. See also the subject definitions.

- Represents zero or rounds to zero. (X) Not applicable.

Hispanic or Latino (of any race)	708	26.8	Some college, no degree	134	8.5
Mexican	10	0.4	Associate degree	48	3.1
Puerto Rican	331	12.6	Bachelor's degree	84	5.3
Cuban	2	0.1	Graduate or professional degree	57	3.6
Other Hispanic or Latino	365	13.8			
Not Hispanic or Latino	1,929	73.2	Percent high school graduate or higher	46.7	(X)
Black or African American alone	1,790	67.9	Percent bachelor's degree or higher	9.0	(X)
White alone	86	3.3			

1. Classification of population by race and ethnicity reflects the Office of Management and Budget, "Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity," Federal Register, Vol. 62, No. 210, October 30, 1997, pp. 58782-58790

2. Includes data for the American Indian and Alaska Native, Asian, Native Hawaiian and Other Pacific Islander, and Some other race populations.

3. In combination with one or more other races listed. The following three numbers may add to more than the total population and the three percentages may add to more than 100 percent because individuals may report more than one race.

NOTE: To maintain confidentiality, the Census Bureau applies statistical procedures that introduce some uncertainty into data for small geographic areas with small population groups. The census results in these tables contain nonsampling error, but do not contain sampling error. Data users who create their own estimates using data from these tables should cite the Census Bureau as the source of the original data only. See also the subject definitions.

- Represents zero or rounds to zero. (X) Not applicable.

# U.S. Virgin Islands Profile Subject Definitions

## NOTE TO ALL DATA USERS

To maintain confidentiality, the Census Bureau applies statistical procedures that introduce some uncertainty into data for small geographic areas. Census results contain nonsampling error. Researchers who create their own estimates using data from Census 2000 should cite the Census Bureau as the source of the original data only.

## SUBJECT DEFINITIONS

**Ability to speak English.** For people who speak a language other than English at home, the response represents the person's own perception of his or her ability to speak English, from "very well" to "not at all." Because census questionnaires are usually completed by one household member, the responses may represent the perception of another household member. (For more information, see "Language spoken at home.")

**Age.** The age classification is based on the age of the person in complete years as of April 1, 2000. The age of the person usually was derived from their date of birth information. Their reported age was used only when date of birth information was unavailable.

**Armed Forces.** People on active duty with the U.S. Army, Air Force, Navy, Marine Corps, or Coast Guard. It does not include Armed Forces members stationed abroad in foreign countries.

**Average family size.** A measure obtained by dividing the number of people in families by the total number of families (or family householders).

**Average household size.** A measure obtained by dividing the number of people in households by the total number of households (or householders).

**Average household size of owner-occupied units.** A measure obtained by dividing the number of people living in owner-occupied housing units by the total number of owner-occupied housing units.

**Average household size of renter-occupied units.** A measure obtained by dividing the number of people living in renter-occupied housing units by the total number of renter-occupied housing units.

**Bedrooms.** The count of rooms that would be listed as bedrooms if the house, apartment, or mobile home were on the market for sale or for rent.

**Child.** A child includes a son or daughter by birth, a stepchild, or an adopted child of the household, regardless of the child's age or marital status.

**Citizenship status.** U.S. citizens include people born as citizens and people who acquire citizenship through naturalization. All natives are U.S. citizens at birth. A foreign-born person is classified as either a "Naturalized citizen" or "Not a citizen." (For more information, see "Native" and "Foreign born.")

**Class of worker.** The class of worker refers to the same job as the respondent's industry and occupation, categorizing people according to the type of ownership of the employing organization. Class of worker categories are private wage and salary workers, employees in own incorporated business, government workers, self-employed in own not incorporated business workers,

---

and unpaid family workers. Private wage and salary workers includes private-for-profit and private not-for-profit employees. Government workers includes local or federal government employees. Self-employed in own incorporated business are included with private wage and salary workers and are shown separately because they are paid employees of their own companies; whereas, self-employed in own not incorporated business includes people who work in their own unincorporated business, profession, or trade, or who operated a farm. Unpaid family workers includes people who work 15 hours or more without pay in a business or on a farm operated by a relative.

**Commuting to work.** Means of transportation to work refers to the principal mode of travel or type of conveyance that the worker usually used to get from home to work during the reference week. The category “Car, truck, or van — drove alone” includes people who usually drove alone to work, as well as people who were driven to work by someone who then drove back home or to a nonwork destination during the reference week. The category “Car, truck, or van — carpooled” includes workers who reported that two or more people usually rode to work in the vehicle during the reference week. The category “Public transportation (including taxicab)” includes workers who usually used a bus, safari or taxi bus, ferryboat or water taxi, or taxicab during the reference week. The category “Other means” includes workers who used a mode of travel that is not identified separately.

**Cooking fuel.** The data show the type of fuel used most for cooking. “Gas: bottled or tank” includes liquid propane gas stored in bottles or tanks that are refilled or exchanged when empty. “Fuel oil, kerosene, etc.” includes fuel oil, kerosene, gasoline, alcohol, and other combustible liquids. “Wood or charcoal” includes purchased wood or charcoal, wood cut by household members on their property or elsewhere, driftwood, sawmill or construction scraps, or the like. “Other fuel” includes all other fuels not specified elsewhere. “No fuel used” includes units that do not use any fuel or that do not have kitchen facilities.

**Disability status.** People 5 years old and over are considered to have a disability if they have one or more of the following: (a) blindness, deafness, or a severe vision or hearing impairment; (b) a substantial limitation in the ability to perform basic physical activities, such as walking, climbing stairs, reaching, lifting, or carrying; (c) difficulty learning, remembering, or concentrating; or (d) difficulty dressing, bathing, or getting around inside the home. In addition to the above criteria, people 16 years old and over are considered to have a disability if they have difficulty going outside the home alone to shop or visit a doctor’s office, and people 16 to 64 years old are considered to have a disability if they have difficulty working at a job or business.

**Earnings.** Earnings is defined as the sum of wage and salary income and net income from self-employment. Earnings represents the amount of income received regularly before deductions for personal income taxes, social security, bond purchases, union dues, medicare deductions, etc.

**Educational attainment.** Educational attainment is the highest degree or level of school completed. The category “Associate degree” includes people whose highest degree is an associate degree, which generally requires two years of college-level work and is either in an occupational program that prepares them for a specific occupation or an academic program primarily in the arts and sciences. The course work may or may not be transferrable to a bachelor’s degree. Master’s degrees include the traditional MA and MS degrees and field-specific degrees, such as MSW, MEd, MBA, MLS, and MEng. Some examples of professional degrees include medicine, dentistry, chiropractic, optometry, osteopathic medicine, pharmacy, podiatry, veterinary medicine, law, and theology. Vocational and technical training, such as that in barber school; business, trade, technical, and vocational schools; or other training for a specific trade are specifically excluded.

**Employed.** All civilians 16 years old and over who are either (1) “at work” - those who did any work at all during the reference week as paid employees, worked in their own business or profession, worked on their own farm, or worked 15 hours or more as unpaid workers on a family farm or in a family business; or (2) are “with a job, but not at work” - those who did not work during the reference week, but had jobs or businesses from which they were temporarily absent. Excluded from the employed are people whose only activity consisted of work around their own

---

house (painting, repairing, or own home housework) or unpaid volunteer work for religious, charitable, and similar organizations. Also excluded are people on active duty in the U.S. Armed Forces. The reference week is the full calendar week preceding the date on which the respondent completed the questionnaire or was interviewed by enumerators. (For more information, see “Labor force” and “Unemployed.”)

**Family household (family).** A family includes a householder and one or more people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householder’s family in census tabulations. Thus, the number of family households is equal to the number of families, but family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families since a household may comprise a group of unrelated people or one person living alone.

**Female householder, no husband present.** A female maintaining a household with no husband of the householder present.

**Fertility.** This question was asked of women 15 years old and over regardless of marital status. Stillbirths, stepchildren, and adopted children were excluded from the number of children ever born. Ever-married women were instructed to include all children born to them before and during their most recent marriage, children no longer living, and children away from home, as well as children who were still living in the home. Never-married women were instructed to include all children born to them.

**Foreign born.** The foreign-born population includes all people who were not U.S. citizens at birth. (For more information, see “Native.”)

**Full-time, year-round workers.** This category consists of people 16 years old and over who usually worked 35 hours or more per week for 50 to 52 weeks in 1999.

**Grandparents as caregivers.** Data were collected on whether a grandchild lives in the household, whether the grandparent has responsibility for the basic needs of the grandchild, and the duration of that responsibility. The data on grandparents as caregivers were derived from answers to questions asked of the population 15 years old and over. Because of the very few numbers of people under 30 years being grandparents, data are only shown for people 30 years and over.

**Gross rent.** Gross rent is monthly contract rent plus the estimated average monthly cost of utilities and fuels, if these are paid by the renter. (For more information, see “Specified renter-occupied units.”)

**Gross rent as a percentage of household income in 1999.** A computed ratio of monthly gross rent to monthly household income (total household income in 1999 divided by 12). Units for which no cash rent is paid and units occupied by households that reported no income or a net loss in 1999 comprise the category “Not computed.” (For more information, see “Specified renter-occupied units.”)

**Group quarters population.** The group quarters population includes all people not living in housing units. Two general categories of people in group quarters are recognized: (1) the institutionalized population, which includes people under formally authorized, supervised care or custody in institutions at the time of enumeration (such as correctional institutions, nursing homes, and juvenile institutions), and (2) the noninstitutionalized population, which includes all people who live in group quarters other than institutions (such as college dormitories, military quarters, and group homes).

**Hispanic or Latino.** People who identify with the terms “Hispanic” or “Latino” are those who classify themselves in one of the specific Hispanic or Latino categories listed on the questionnaire “Mexican,” “Puerto Rican,” or “Cuban” as well as those who indicate that they are “other Spanish,

---

Hispanic, or Latino.” Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person’s parents or ancestors before their arrival in the United States. People who identify their origin as Spanish, Hispanic, or Latino may be of any race.

**Homeowner vacancy rate.** The homeowner vacancy rate is the proportion of the homeowner housing inventory that is vacant for sale. It is computed by dividing the number of vacant units for sale only by the sum of owner-occupied units and vacant units that are for sale only, and then multiplying by 100. (For more information, see “Vacant housing unit.”)

**Household.** A household includes all of the people who occupy a housing unit. People not living in households are classified as living in group quarters.

**Householder.** In most cases, the householder is the person, or one of the people, in whose name the home is owned, being bought, or rented and who is listed as Person 1 on the census questionnaire. If there is no such person in the household, any adult household member 15 years old and over could be designated as the householder (i.e., Person 1).

**Housing unit.** A housing unit may be a house, an apartment, a mobile home, a group of rooms, or a single room that is occupied (or if vacant, is intended for occupancy) as separate living quarters. Separate living quarters are those in which the occupants live separately from any other individuals in the building and that have direct access from outside the building or through a common hall.

**Income in 1999.** Information on money income received in calendar year 1999 was requested from individuals 15 years and over. “Total Income” is the sum of the amounts reported separately for wage or salary income; net self-employment income; interest, dividends, or net rental or royalty income; social security or railroad retirement income; supplemental security income (SSI); public assistance or welfare payments; retirement or disability income; and all other income.

Receipts from the following sources are not included as income: money received from the sale of property (unless the recipient was engaged in the business of selling such property); capital gains; the value of income “in kind” from food stamps, public housing subsidies, medical care, employer contributions for individuals, etc.; withdrawal of bank deposits; money borrowed; tax refunds; exchange of money between relatives living in the same household; and gifts and lump-sum inheritances, insurance payments, and other types of lump-sum receipts.

Although the income statistics cover calendar year 1999, the characteristics of individuals and the composition of households/families refer to the time of enumeration. Thus, the income of the household or family does not include amounts received by individuals who were members of the household/family during all or part of the calendar year 1999 if these individuals no longer resided with the household/family at the time of enumeration. Similarly, income amounts reported by individuals who did not reside with the household/family during 1999 but who were members of the household/family at the time of enumeration are included. However, the composition of most households/families was the same during 1999 as at the time of enumeration.

**Income of families.** In compiling statistics on family income, the incomes of all members 15 years old and over in each family are summed and treated as a single amount.

**Income of households.** Includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income.

### **Income Type in 1999**

**Wage or salary income.** Wage or salary income includes total money earnings received for work performed as an employee during calendar year 1999. It includes wages, salary, armed forces pay, commissions, tips, piece-rate payments, and cash bonuses earned before deductions were made for taxes, bonds, pensions, union dues, etc.

---

**Self-employment income.** Self-employment income includes both farm and nonfarm self-employment income:

*Nonfarm self-employment income.* Nonfarm self-employment income includes net money income (gross receipts minus expenses) from one's own business, professional enterprise, or partnership. Gross receipts include the value of all goods sold and services rendered. Expenses include costs of goods purchased, rent, heat, light, power, depreciation, charges, wages and salaries paid, business taxes (not personal income taxes), etc.

*Farm self-employment.* Farm self-employment income includes net money income (gross receipts minus operating expenses) from the operation of a farm by a person on his or her own account, as an owner, renter, or sharecropper. Gross receipts include the value of all products sold; government farm programs; money received from the rental of farm equipment to others; and incidental receipts from the sale of wood, sand, gravel, etc. Operating expenses include cost of feed, fertilizer, seed, and other farming supplies; cash wages paid to farmhands; depreciation charges; cash rent; interest on farm mortgages; farm building repairs; farm taxes (not state and federal personal income taxes), etc. The value of fuel, food, or other farm products used for family living is not included as part of net income.

**Interest, dividends, or net rental income.** Interest, dividends, or net rental income includes interests on savings or bonds, dividends from stockholdings or membership in associations, net income from rental of property to others and receipts from boarders or lodgers, net royalties, and periodic payments from an estate or trust fund.

**Social security income.** Social security income includes social security pensions and survivors' benefits and permanent disability insurance payments made by the Social Security Administration prior to deductions for medical insurance, and railroad retirement insurance checks from the U.S. government. Medicare reimbursements are not included.

**Supplemental security income (SSI).** Supplemental security income is a nationwide federal assistance program administered by the Social Security Administration that guarantees a minimum level of income for needy aged, blind, or disabled individuals.

**Public assistance income.** Public assistance income includes general assistance and temporary assistance to needy families (TANF). Separate payments received for hospital or other medical care (vendor payments) are excluded. This does not include supplemental security income (SSI).

**Retirement or disability income.** Retirement or disability income includes: (1) retirement pensions and survivor benefits from a former employer; labor union; or federal, state, local government; and the U.S. military; (2) income from workers' compensation; disability income from companies or unions; federal, state, or local government; and the U.S. military; (3) periodic receipts from annuities and insurance; and (4) regular income from IRA and KEOGH plans. This does not include social security income.

**All other income.** All other income includes unemployment compensation, Veterans' Administration (VA) payments, alimony and child support, contributions received periodically from people not living in the household, military family allotments, and other kinds of periodic income other than earnings.

**Industry.** Information on industry relates to the kind of business conducted by a person's employing organization. For employed people, the data refer to the person's job during the reference week. For those who worked at two or more jobs, the data refer to the job at which the person worked the greatest number of hours. Some examples of industrial groups shown in this product include agriculture, forestry, fishing, and hunting; construction; manufacturing; wholesale trade; retail trade; and public administration.

**Institutionalized population.** The institutionalized population includes people under formally authorized, supervised care or custody in institutions at the time of enumeration. (For more information, see "Group quarters population.")

---

**Kitchen facilities.** A building has complete kitchen facilities when cooking facilities (electric, kerosene, or gas stove, microwave and oven nonportable burners, or cookstove), refrigerator, and a sink with piped water are located in the same building as the living quarters being enumerated. They need not be in the same room.

**Labor force.** The labor force includes all people classified in the civilian labor force (that is, “employed” and “unemployed” people) plus members of the U.S. Armed Forces (people on active duty in the U.S. Army, Air Force, Navy, Marine Corps, and Coast Guard). (For more information, see “Employed” and “Unemployed.”)

**Language spoken at home.** The population who speaks a language other than English includes only those who sometimes or always speak a language other than English at home. It does not include those who speak a language other than English only at school or work or those who were limited to only a few expressions or slang of the other language. Most people who speak another language at home also speak English. (For more information, see “Ability to speak English”)

**Marital status.** Each person is asked whether they are “now married,” “widowed,” “divorced,” “separated,” or “never married.” Couples who live together (for example, people in common-law marriages) are able to report the marital status they considered the most appropriate.

**Married-couple family.** A family in which the householder and his or her spouse are enumerated as members of the same household.

**Mean earnings.** See “Mean income.”

**Mean income.** Mean income is the amount obtained by dividing the total income of a particular statistical universe by the number of units in that universe. Thus, mean household income is obtained by dividing total household income by the total number of households. For the various types of income, the means are based on households having those types of income.

Care should be exercised in using and interpreting mean income values for small subgroups of the population. Because the mean is influenced strongly by extreme values in the distribution, it is especially susceptible to the effects of sampling variability, misreporting, and processing errors. The median, which is not affected by extreme values, is, therefore, a better measure than the mean when the population base is small.

**Mean public assistance income.** See “Mean income.”

**Mean retirement income.** See “Mean income.”

**Mean social security income.** See “Mean income.”

**Mean supplemental security income.** See “Mean income.”

**Mean travel time to work (minutes).** Mean travel time to work is the average travel time in minutes that workers usually took to get from home to work (one way) during the reference week. This measure is obtained by dividing the total number of minutes taken to get from home to work by the number of workers 16 years old and over who did not work at home. The travel time includes time spent waiting for public transportation, picking up passengers in carpools, and time spent in other activities related to getting to work.

**Means of transportation to work.** See “Commuting to work.”

**Median age.** This measure divides the age distribution into two equal parts: one-half of the cases falling below the median value and one-half above the value. Median age is computed on the basis of a single year of age distribution.

**Median earnings for full-time, year-round workers.** The median divides the earnings distribution into two equal parts, one-half of the cases falling below the median and one-half above the median. Median earnings for full-time, year-round workers is based on individuals 16 years and over with earnings who usually worked 35 hours or more per week for 50 to 52 weeks in 1999. This measure is rounded to the nearest dollar. (For more information, see “Earnings.”)

---

**Median gross rent.** The median divides the gross rent distribution (rent, plus utilities, if paid separately from rent) into two equal parts, one-half of the cases falling below the median gross rent and one-half above the median. This measure is rounded to the nearest whole dollar. Housing units that are renter occupied without payment of cash rent are excluded in the calculation of median gross rent.

**Median income.** The median divides the income distribution into two equal parts, one-half of the cases falling below the median income and one-half above the median. For households and families, the median income is based on the distribution of the total number of households or families including those with no income. The median for individuals is based on individuals 15 years and over with income. This measure is rounded to the nearest whole dollar.

**Median rooms.** The median divides the room distribution into two equal parts, one-half of the cases falling below the median number of rooms and one-half above the median. In computing median rooms, the whole number is used as the midpoint of the interval; thus, the category “3 rooms” is treated as an interval ranging from 2.5 to 3.5 rooms. This measure is rounded to the nearest tenth.

**Median selected monthly owner costs.** The median divides the selected monthly owner costs into two equal parts, one-half of the cases falling below the median selected monthly owner costs and one-half above the median. Medians are shown separately for units “with a mortgage” and for units “not mortgaged.” This measure is rounded to the nearest whole dollar.

**Median value.** The median divides the value distribution into two equal parts, one-half of the cases falling below the median value of the property (house and lot, mobile home and lot, or condominium unit) and one-half above the median. This measure is rounded to the nearest hundred dollars. (For more information, see “Specified owner-occupied units.”)

**Mortgage status.** “Mortgage” refers to all forms of debt where the property is pledged as security for repayment of the debt, including deeds of trust, trust deed, contracts to purchase, land contracts, junior mortgages, and home equity loans. (For more information, see “Selected monthly owner costs.”)

**Native.** The native population includes people born in the United States, Puerto Rico, or the U.S. Island Areas. People who were born in a foreign country but have at least one American parent also are included in this category. This category also includes people born in American Samoa who are U.S. nationals, not U.S. citizens. (For more information, see “Foreign born.”)

**No telephone service.** See “Telephone.”

**Nonfamily household.** A household consisting of a householder living alone or with nonrelatives only.

**Noninstitutionalized population.** All people who live in group quarters other than institutions. Also, included are staff residing at institutional group quarters. (For more information, see “Group quarters population.”)

**Nonrelative.** Any household member who is not related to the householder by birth, marriage, or adoption, including foster children.

**Occupants per room.** Occupants per room is obtained by dividing the number of people in each occupied housing unit by the number of rooms in the unit. Occupants per room is rounded to the nearest hundredth.

**Occupation.** Occupation describes the kind of work the person does on the job. For employed people, the data refer to the person’s job during the reference week. For those who worked at two or more jobs, the data refer to the job at which the person worked the greatest number of hours during the reference week. Some examples of occupational groups shown in this product include service, sales, and farming.

---

**Occupied housing unit.** A housing unit is classified as occupied if it is the usual place of residence of the person or group of people living in it at the time of enumeration, or if the occupants are only temporarily absent; that is, away on vacation or business.

**Other relative.** Any household member related to the householder by birth, marriage, or adoption, but not included specifically in another relationship category.

**Own child.** A never-married child under 18 years old who is a son or daughter of the householder by birth, marriage (a stepchild), or adoption. In tabulations of own children by employment status of parents, the number of “own children” includes children in families and subfamilies and may, therefore, differ from other household by type tabulations.

**Owner-occupied housing unit.** A housing unit is owner occupied if the owner or co-owner lives in the unit even if it is mortgaged or not fully paid for.

**Per capita income.** Per capita income is the mean income computed for every man, woman, and child in a particular group. It is derived by dividing the total income of a particular group by the total population in that group.

**Place of birth and parent’s place of birth.** The place of birth, father’s place of birth, and mother’s place of birth questions asked for the name of the island, the U.S. state, or the foreign country where each person was born according to current international boundaries. (For more information, see “Foreign born,” and “Native.”)

**Plumbing facilities.** A unit has complete plumbing facilities when piped water (either hot or cold), a flush toilet, and a bathtub or shower are located in the housing unit being enumerated.

**Poverty status in 1999.** Poverty is measured by using 48 thresholds that vary by family size and number of children within the family and age of the householder. To determine whether a person is poor, one compares the total income of that person’s family with the threshold appropriate for that family. If the total family income is less than the threshold, then the person is considered poor, together with every member of his or her family.

Not every person is included in the poverty universe: institutionalized people, people in military group quarters, people living in college dormitories, and unrelated individuals under 15 years old are considered neither as “poor” nor as “nonpoor,” and are excluded from both the numerator and the denominator when calculating poverty rates.

The Office of Management and Budget (OMB) mandates that all federal agencies (including the Census Bureau) use this poverty definition for statistical purposes (OMB Statistical Policy Directive 14, May 1978).

**Purchase of water from water vendor.** Households are considered to have purchased water from a water vendor, even if only one purchase was made during the year; and even though their primary source of water is from a public system, public standpipe, or some other source. Bottled water purchased from a commercial establishment, such as a grocery store or drugstore, is not included.

**Race.** The concept of race as used by the Census Bureau reflects self-identification by people according to the race or races with which they most closely identify. The categories are sociopolitical constructs and should not be interpreted as being scientific or anthropological in nature. Furthermore, the race categories include both racial and national-origin groups.

The racial classifications used by the Census Bureau adhere to the October 30, 1997, Federal Register Notice entitled, “Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity” issued by the Office of Management and Budget (OMB). These standards govern the categories used to collect and present federal data on race and ethnicity. The OMB requires five minimum categories (White, Black or African American, American Indian and Alaska Native, Asian, and Native Hawaiian and Other Pacific Islander) for race. The race categories are described below with a sixth category, “Some other race,” added with OMB approval. In addition to the five race groups, the OMB also states that respondents should be offered the option of selecting one or more races.

---

If an individual could not provide a race response, the race or races of the householder or other household members were assigned by the computer using specific rules of precedence of household relationship. For example, if race was missing for a natural-born child in the household, then either the race or races of the householder, another natural-born child, or the spouse of the householder were assigned. If race was not reported for anyone in the household, the race or races of a householder in a previously processed household were assigned.

**White.** A person having origins in any of the original peoples of Europe, the Middle East, or North Africa. It includes people who indicate their race as “White” or report entries such as Irish, German, Italian, Lebanese, Near Easterner, Arab, or Polish.

**Black or African American.** A person having origins in any of the Black racial groups of Africa. It includes people who indicate their race as “Black, African Am., or Negro,” or who provide written entries such as African American, Afro American, Kenyan, Nigerian, or Haitian.

**American Indian and Alaska Native.** A person having origins in any of the original peoples of North and South America (including Central America) and who maintain tribal affiliation or community attachment. It includes people who classify themselves as described below.

*American Indian.* Includes people who indicate their race as “American Indian,” entered the name of an Indian tribe, or report such entries as Canadian Indian, French-American Indian, or Spanish-American Indian.

*Alaska Native.* Includes written responses of Eskimos, Aleuts, and Alaska Indians as well as entries such as Arctic Slope, Inupiat, Yupik, Alutiiq, Egegik, and Pribilovian. The Alaska tribes are the Alaskan Athabaskan, Tlingit, and Haida. The information for Census 2000 is derived from the American Indian Detailed Tribal Classification List for the 1990 census and was expanded to list the individual Alaska Native Villages when provided as a written response for race.

**Asian.** A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam. It includes “Asian Indian,” “Chinese,” “Filipino,” “Korean,” “Japanese,” “Vietnamese,” and “Other Asian.”

*Asian Indian.* Includes people who indicate their race as “Asian Indian” or identify themselves as Bengalese, Bharat, Dravidian, East Indian, or Goanese.

*Chinese.* Includes people who indicate their race as “Chinese” or who identify themselves as Cantonese or Chinese American. In some census tabulations, written entries of Taiwanese are included with Chinese while in others they are shown separately.

*Filipino.* Includes people who indicate their race as “Filipino” or who report entries such as Filipino, Philippine, or Filipino American.

*Japanese.* Includes people who indicate their race as “Japanese” or who report entries such as Nipponese or Japanese American.

*Korean.* Includes people who indicate their race as “Korean” or who provide a response of Korean American.

*Vietnamese.* Includes people who indicate their race as “Vietnamese” or who provide a response of Vietnamese American.

*Other Asian.* Includes people who provide a response of Bangladeshi, Burmese, Cambodian, Hmong, Indonesian, Laotian, Pakistani, Sri Lankan, or Thai.

**Native Hawaiian and Other Pacific Islander.** A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands. It includes people who indicate their race as “Native Hawaiian,” “Guamanian or Chamorro,” “Samoan,” and “Other Pacific Islander.”

---

*Native Hawaiian.* Includes people who indicate their race as “Native Hawaiian” or who identify themselves as “Part Hawaiian” or “Hawaiian.”

*Guamanian or Chamorro.* Includes people who indicate their race as such, including written entries of Chamorro or Guam.

*Samoan.* Includes people who indicate their race as “Samoan” or who identified themselves as American Samoan or Western Samoan.

*Other Pacific Islander.* Includes people who provided a write-in response of a Pacific Islander group, such as Tahitian, Northern Mariana Islander, Palauan, Fijian, or a cultural group, such as Melanesian, Micronesian, or Polynesian.

**Some other race.** Includes all other responses not included in the “White,” “Black or African American,” “American Indian and Alaska Native,” “Asian,” and the “Native Hawaiian and Other Pacific Islander” race categories described above. Respondents providing write-in entries, such as multiracial, mixed, interracial, or a Hispanic/Latino group (for example, Mexican, Puerto Rican, or Cuban) in the “Some other race” category are included in this category.

**Two or more races.** People may have chosen to provide two or more races either by checking two or more race response check boxes, by providing multiple write-in responses, or by some combination of check boxes and write-in responses. The race response categories shown on the questionnaire are collapsed into the five minimum race groups identified by the OMB, plus the Census Bureau “Some other race” category. For data product purposes, “Two or more races” refers to combinations of two or more of the following race categories:

- White
- Black or African American
- American Indian and Alaska Native
- Asian
- Native Hawaiian and Other Pacific Islander
- Some other race

**Coding of write-in entries.** During processing of Census 2000 questionnaires, written entries were coded from four response categories on the race item American Indian or Alaska Native, Other Asian, Other Pacific Islander, and Some other race for which an area for a write-in response was provided. The Other Asian and Other Pacific Islander response categories shared the same write-in area on the questionnaire.

**Reference week.** The data on employment status and commuting to work are related to a one-week time period, known as the reference week. For each person, this week is the full calendar week, Sunday through Saturday, preceding the date the questionnaire was completed. This calendar week is not the same for all people since the enumeration was not completed in one week.

**Related children.** Related children include all people under 18 years old related to the householder, regardless of their marital status. Excluded are spouses of householders.

**Rental vacancy rate.** The proportion of the rental inventory that is vacant for rent. It is computed by dividing the number of vacant units for rent by the sum of the renter-occupied units and the number of vacant units for rent, and then multiplying by 100.

**Renter-occupied housing unit.** All occupied housing units that are not owner occupied, whether they are rented for cash rent or occupied without payment of cash rent, are classified as renter occupied. Housing units in “continuing care” or life care facilities are included in the “rented for cash rent” category.

**Residence in 1995.** Residence in 1995 question asked for the island and village or the U.S. state or the foreign country where each person lived on April 1, 1995, for those people who lived in a different house than their current residence on that date.

---

**Rooms.** The data on rooms were obtained from both occupied and vacant housing units. The intent of this question is to count the number of whole rooms used for living purposes.

For each unit, rooms include living rooms, dining rooms, kitchens, bedrooms, finished recreation rooms, enclosed porches suitable for year-round use, and lodger's rooms. Excluded are strip or pullman kitchens, bathrooms, open porches, balconies, halls or foyers, half-rooms, utility rooms, unfinished attics or basements, or other unfinished space used for storage. A partially divided room is a separate room only if there is a partition from floor to ceiling, but not if the partition consists solely of shelves or cabinets.

**School enrollment.** People are classified as enrolled in school if they reported attending a "regular" public or private school or college at anytime between February 1, 2000, and the time of enumeration. The question includes instructions to "include only nursery school, kindergarten, elementary school, and schooling that would lead to a high school diploma or college degree" as regular school. Tutoring or correspondence school counts if credit can be obtained in a "regular school." Schools supported and controlled primarily by a local, county, state, or federal government are defined as public. Those supported and controlled primarily by religious organizations or other private groups are private.

People who are enrolled also report the level in which they are enrolled, from nursery school or preschool through college undergraduate years and graduate and professional school. Vocational, trade, and business schools are not included.

**Seasonal, recreational, or occasional use housing unit.** Seasonal, recreational, or occasional use housing units include vacant units used or intended for use only in certain seasons, for weekends, or other occasional use throughout the year. Interval ownership units, sometimes called shared ownership or time-sharing condominiums are included in this category. (For more information, see "Vacant housing unit.")

**Selected monthly owner costs.** Selected monthly owner costs are the sum of payments for mortgages, deeds of trust, contracts to purchase, or similar debts on the property; real estate taxes; fire, hazard, and flood insurance on the property; utilities; and fuels. It also includes, where appropriate, the monthly condominium fees or mobile home costs.

**Selected monthly owner costs as a percentage of household income in 1999.** Selected monthly owner costs as a percentage of household income is the computed ratio of selected monthly owner costs to monthly household income in 1999. The ratio was computed separately for each unit and rounded to the nearest whole percentage. Units occupied by households reporting no income or a net loss in 1999 are included in the "Not computed" category.

**Sewage disposal.** A public sewer may be operated by a government body or by a private organization. A housing unit is considered to be connected to a septic tank or cesspool when the unit is provided with an underground pit or tank for sewage disposal. "Other means" includes housing units that dispose of sewage in some other way.

**Sex.** The data on sex were derived from answers to a question that was asked of all people. Individuals were asked to mark either "male" or "female" to indicate their sex. For most cases in which sex was not reported, it was determined by the appropriate entry from the person's given (i.e., first) name and household relationship. Otherwise, sex was imputed according to the relationship to the householder and the age of the person.

**Source of water.** A common source supplying water through underground pipes to five or more units is classified as "a public system only" or a "public system and cistern." Another source of water may be "a cistern, tanks, or drums only" in which rain water is collected. "A public stand-pipe" is an elevated tank or vertical storage cylinder or street hydrant that is connected to a public system from which nearby residents draw water. The category "some other source, such as an individual well or a spring" includes water obtained from creeks, rivers, lakes, etc.

---

**Specified owner-occupied units** Specified owner-occupied units are owner-occupied, one-family, attached and detached houses on less than 10 acres without a business or medical office on the property.

**Specified renter-occupied units.** Specified renter-occupied units include all renter-occupied units except 1-unit attached or detached houses on 10 acres or more.

**Spouse.** A person who is married to and living with the householder. This category includes people in formal marriages, as well as people in common-law marriages.

**Telephone.** Households with telephone service have a telephone in working order and are able to make and receive calls.

**Tenure.** All occupied housing units are classified as either owner occupied or renter occupied. A housing unit is owner occupied if the owner or co-owner lives in the unit even if it is mortgaged or not fully paid for. All occupied housing units that are not owner occupied, whether they are rented for cash rent or occupied without payment of cash rent, are classified as renter occupied.

**Unemployed.** Civilians 16 years old and over are classified as unemployed if they (1) were neither “at work” nor “with a job but not at work” during the reference week, (2) were looking for work during the last four weeks, and (3) were available to start a job. Also included as unemployed are civilians 16 years old and over who did not work at all during the reference week, were on temporary layoff from a job, expected to be recalled to work within the next 6 months or had been given a date to return to work, and were available for work during the reference week. (For more information, see “Employed” and “Labor force.”)

**Units in structure.** The data on units in structure (also referred to as “type of structure”) were obtained from both occupied and vacant housing units. A structure is a separate building that either has open spaces on all sides or is separated from other structures by dividing walls that extend from ground to roof. In determining the number of units in a structure, all housing units, both occupied and vacant, are counted. Stores and office space are excluded. The statistics are presented for the number of housing units in structures of specified type and size, not for the number of residential buildings.

**Unmarried partner.** An unmarried partner is a person who is not related to the householder, who shares living quarters with and has a close personal relationship with the householder.

**Unrelated individuals.** Unrelated individuals include: (1) a householder living alone or with non-relatives only, (2) a household member who is not related to the householder, or (3) a person living in group quarters who is not an inmate of an institution.

**Vacant housing unit.** A housing unit is vacant if no one is living in it at the time of enumeration, unless its occupants are only temporarily absent. Units temporarily occupied at the time of enumeration entirely by people who have a usual residence elsewhere are also classified as vacant. (For more information, see “Housing unit.”)

**Value.** Value is the respondent’s estimate of how much the property (house and lot, mobile home and lot, or condominium unit) would sell for if it were for sale.

**Vehicles available.** Vehicles available are the number of passenger cars, vans, and pick-up or panel trucks of one-ton capacity or less kept at home and available for use by household members.

**Veteran status.** A “civilian veteran” is a person 18 years old or over who, at the time of enumeration, had served on active duty in the U.S. Army, Navy, Air Force, Marine Corps, or the Coast Guard in the past (even for a short time), but was not then on active duty, or who had served in the Merchant Marine during World War II. People who had served in the National Guard or military Reserves are classified as veterans only if they had ever been called or ordered to active duty, not counting the four to six months for initial training or yearly summer camps.

---

**Workers.** Workers 16 years and over are members of the Armed Forces and civilians who were at work during the reference week. (For more information, see “Place of work” and “Reference week.”)

**Year householder moved into unit.** Year householder moved into unit is the year of the latest move by the householder. If the householder moved back into a housing unit he or she previously occupied, the year of the latest move was reported. The intent is to establish the year the present occupancy began.

**Year of entry.** The year in which a person born outside the U.S. Virgin Islands came to live in the U.S. Virgin Islands.

**Year structure built.** The data on year structure built are obtained for both occupied and vacant housing units. Year structure built refers to when the building was first constructed, not when it was remodeled, added to, or converted. The data relate to the number of units built during the specified periods that were still in existence at the time of enumeration.

## **DERIVED MEASURES**

### **Average**

See “Mean.”

### **Interpolation**

Interpolation frequently is used in calculating medians or quartiles based on interval data and in approximating standard errors from tables. Linear interpolation is used to estimate values of a function between two known values. “Pareto interpolation” is an alternative to linear interpolation. In Pareto interpolation, the median is derived by interpolating between the logarithms of the upper and lower income limits of the median category. It is used by the Census Bureau in calculating median income within intervals wider than \$2,500.

### **Mean**

This measure represents an arithmetic average of a set of values. It is derived by dividing the sum (or aggregate) of a group of numerical items by the total number of items in that group. For example, mean household earnings is obtained by dividing the aggregate of all earnings reported by individuals with earnings in households by the total number of households with earnings. (Additional information on means is included in the separate explanations of many population and housing subjects.)

### **Median**

This measure represents the middle value (if n is odd) or the average of the two middle values (if n is even) in an ordered list of n data values. The median divides the total frequency distribution into two equal parts: one-half of the cases falling below the median and one-half above the median. The median is computed on the basis of the distribution as tabulated, which is sometimes more detailed than the distribution shown in specific census publications and other data products. (See also “Interpolation.”)

### **Percentage**

This measure is calculated by taking the number of items in a group possessing a characteristic of interest and dividing by the total number of items in that group, and then multiplying by 100.

### **Rate**

This is a measure of occurrences in a given period of time divided by the possible number of occurrences during that period. Rates are sometimes presented as percentages.

**FOR MORE INFORMATION**

The Population and Housing Profile data also are available through the American FactFinder®, which can be accessed from the Census Bureau's Internet site at [www.census.gov](http://www.census.gov). The most efficient way to order this product is to access the CATALOG at [www.census.gov](http://www.census.gov) to use the e-commerce option. However, you may also place an order by calling 301-763-INFO (4636), faxing your order to 888-249-7295, or e-mailing your order to [webmaster@census.gov](mailto:webmaster@census.gov). We accept American Express, Discover, MasterCard, and Visa.

If you wish to pay by check, send your order to U.S. Department of Commerce, U.S. Census Bureau (MS 0801), PO Box 277943, Atlanta, GA 30384-7943. Make your check payable to Commerce-Census.

# Population and Housing Profile

## Data Note 2

---

### **U.S. VIRGIN ISLANDS**

**Supplemental Security Income (SSI).** Supplemental Security Income (SSI) is a U.S. federal assistance program administered by the Social Security Administration that guarantees a minimum level of income for needy aged, blind, or disabled individuals. The census questionnaire for the U.S. Virgin Islands asked about the receipt of SSI; however, SSI is not a federally administered program in the U.S. Virgin Islands. Therefore, it is not the same concept as SSI in the United States. The only way a resident of the U.S. Virgin Islands could have appropriately reported SSI would have been if they lived in the United States at any time during calendar year 1999 and received SSI.

## Data Note 3

---

### **U.S. VIRGIN ISLANDS**

In the U.S. Virgin Islands Demographic Profile, “Median earnings (dollars)” for male and female full-time, year-round workers is mislabeled. It should read, “Median total money income (dollars)” for male and female full-time, year-round workers.

## Data Note 4

---

### **U.S. VIRGIN ISLANDS**

The U.S. Virgin Islands Demographic Profile data concerning grandparents who are living with grandchildren may be slightly different from the data in the U.S. Virgin Islands Summary File. The data in the profiles are for the total population while the summary file data are restricted to persons in households similar to other summary file products.

## Data Note 5

---

### **U.S. VIRGIN ISLANDS**

In the U.S. Virgin Islands Demographic Profile, under "Poverty Status in 1999," the total number of unrelated individuals 15 years and over who are below the poverty level was incorrect. The data should include (1) all individuals in family households who are not related to the reference person; (2) all individuals who live in nonfamily households, including householders living alone or with nonrelatives only; and (3) all individuals in noninstitutional group quarters. However, the data shown exclude householders in nonfamily households. The correct data are available from the U.S. Virgin Islands Summary File.

## Data Note 6

---

### **U.S. VIRGIN ISLANDS**

In the U.S. Virgin Islands Demographic Profile, median incomes below \$1,000 were calculated in a manner different from that which was used in the U.S. Virgin Islands Summary File. The demographic profile calculated the median based on a single interval of less than \$2,500. The summary file calculated the median based on two intervals of less than \$1,000 and \$1,000 to \$2,499. As a result, there may be differences between the median incomes listed in the demographic profile and the median incomes listed in the summary file.
