

Table 188. Learning Disability or Attention Deficit Hyperactivity Disorder for Children 3 to 17 Years of Age by Selected Characteristics: 2009

[In thousands, except percent (61,638 represents 61,638,000). Learning disability is based on the question, "Has a representative from a school or a health professional ever told you that (child's name) had a learning disability?" Attention Deficit Hyperactivity Disorder is based on the question, "Has a doctor or health professional ever told you that (child's name) had Attention Hyperactivity Disorder or Attention Deficit Disorder?"]

B Base figure too small to meet statistical standards for reliability of a derived figure. ¹ Unknowns for the columns are not included in the frequencies, but they are included in the "Total" column. ² Unknowns for the column variables are not included in the denominators when calculating percentages. ³ Includes other races not shown separately. ⁴ Percents are age-adjusted to the 2000 projected U.S. standard population using age groups 3–4 years, 5–11 years, and 12–17 years. ⁵ Refers to persons who indicated only a single race group. ⁶ Figures do not meet standard of reliability or precision. ⁷ Refers to all persons who indicated more than one race group. ⁸ Persons of Hispanic or Latino origin may be any race.
