

What's in the R2 practices?

- Environmental, Health and Safety Management System Is Needed
- Reuse and Recycling are preferred over disposal
- Comply with all Federal, State, Local Laws and make sure Exports of Focus Materials are Legal
- On-Site Health and Safety
- Refurbishing, Testing and Packaging of Materials going to reuse
- Exercise due diligence - ensure that downstream recyclers and processors manage focus materials appropriately throughout the recycling chain
- Ensure that focus materials are not incinerated or landfilled
- Destroy, purge or sanitize data from memory
- Track throughput and recordkeeping;
- Store and transport materials securely and safely; and
- Possess insurance, closure plans and financial mechanisms to cover the potential risks of the facility.

Stakeholder Process

- Document was drafted by neutral facilitator
- Versions were discussed by working group and revised by facilitator
- R2 was reviewed by 4 auditors to assure auditability
- R2 was field tested at 6 recyclers
- EPA's assistance in getting documentation from foreign countries was tested
