

Records Management Services Workshop

Serving Records Management Technologies of the Past, Present, and Future

Background: RMS began in January 2005 as an Interagency Project Team (IPT) comprised of stakeholders in records management and enterprise architecture from 18 Federal agencies and the National Archives and Records Administration (NARA). The IPT produced its final report "Functional Requirements, Attributes, and Unified Modeling Language Class Diagrams for Records Management Services," 7-Sep-2006.

NARA brought the initial 7-Dec-2005 draft of the RMS Functional Requirements to the OMG's Government Domain Task Force (GovDTF) and participated in the task force to produce the Records Management Services Specification. The result is a full and formal articulation of the RMSC requirements rendered in OMG's Unified Modeling Language (UML), providing standard domain and service models as well as the specification of a standard Records Exchange Format.

Date & Time: 24-Mar-2011 13:00-16:30

Location: Crystal City Hyatt
2799 Jefferson Davis Highway
Arlington, VA 22202 USA
