Welcome to DTIC's 36th Annual Conference

### DTIC Celebrated 5<sup>th</sup> Year as Field Activity in June 2009

DoD Field Activity Since 2004 DoD Field Activity Since 2004 DoD Field Activity Since 2004 DoD Field Activity Since 2004

The Fifth Anniversary
of the
Defense Technical Information Center
as a
U.S. Department of Defense Field Activity
Since June 4, 2004

June 4, 2009

Date

R. Paul Ryan

Administrator, Defense Technical Information Center

### What's New at This 2010 DTIC Conference?

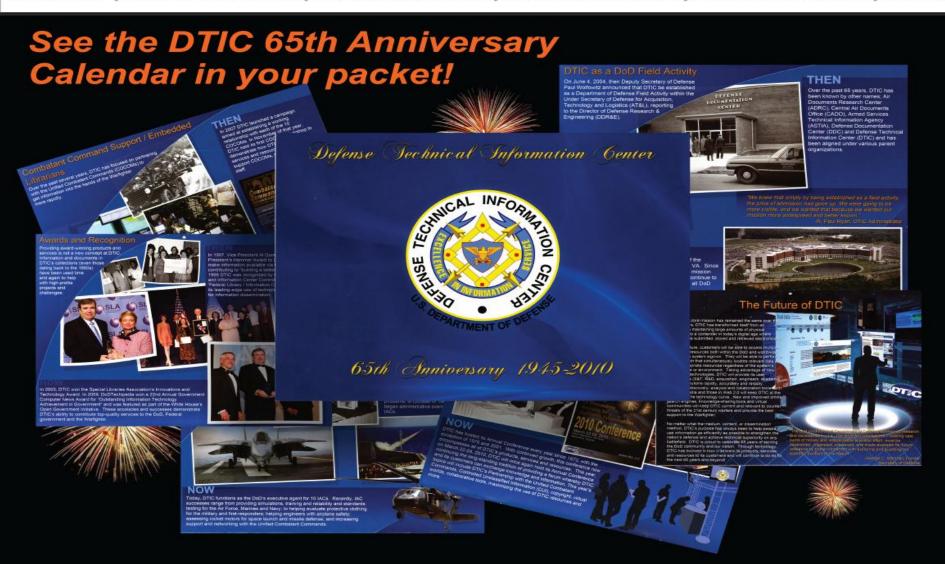

DoD Field Activity Since 2004 DoD Field Activity Since 2004

- Defense Connect Online (DCO) for increased access during and after the conference
  - Presentations are being recorded during Day 1,
     Day 2, and the Day 3 training track in Salon A.
  - Wait for the microphone if you ask a question so that your voice will be recorded with the session.
  - See 2010 Agenda and the DTIC booth for instructions about registering for DCO and requesting access to this conference and the 2009 COCOM Workshop.

### 65<sup>th</sup> Anniversary Calendar Available at DTIC booth

DoD Field Activity Since 2004 DoD Fi

As World War II was coming to an end in Europe, the United States was still battling the Japanese. Allied commanders hoped to discover the secrets of the German scientific and technical community to use to their advantage in the Pacific theater.

Approximately 1,500 Air Force Air Technical Intelligence (ATI) teams searched abandoned German towns for aeronautical research materials. Over 1,700 tons of reports were recovered by ATI teams containing information such as the design for the Messerschmidt-262 jet and the details needed to develop V-1 and V-2 guided missiles, among other innovations.

In 1945 the Air Documents Research Center (ADRC) was established to process, analyze, and catalog the information found by ATI teams. In 1979 the name officially changed to the Defense Technical Information Center (DTIC).

For over 65 years, as the name and mission evolved, so did the technology used to disseminate the information to the user community. From card catalogs to microfilm to DROLS to the Internet and wikis, DTIC continues to use cutting-edge technology to connect the defense community with the scientific and technical information it needs to support the

DTE **Defense Technical Information Center** 8725 John J. Kingman Road, Suite 0944 Fort Belvoir, VA 22060-6218 800-225-3842 http://www.dtic.mil **DTIC Online** http://www.dtic.mil **DTIC Online Access Controlled** https://www.dtic.mil **DoDTechipedia** https://www.dodtechipedia.mil DefenseSolutions.gov http://www.defensesolutions.gov

Since the end of WWII, DTIC's mission has remained crucial as it provides...

#### Information for the Defense Community

The Air Documents Research Center is established in London. Moves to Wright Field, Ohio, as the Air Documents Division (ADD).

#### 1948

ADD becomes
Central Air
Documents Office
(CADO), designed to
collect, process and
distribute
information.

#### 1951

CADO becomes the Armed Services Technical Information Agency (ASTIA).

#### 1962

The DoD Scientific and Technical Information (STINFO) Program is established.

#### 1963

ASTIA is renamed Defense Documentation Center (DDC) and becomes a field activity of the Defense Supply Agency (DSA).

#### 1972

The Defense Research, Development, Test and Evaluation Online System (DROLS) becomes operational.

#### 1979

DDC officially changes its name to Defense Technical Information Center (DTIC).

#### 1980

DoD Information Analysis Center (IAC) Program is added to DTIC's mission.

#### 1994

DTIC begins offering products and services via the Internet.

Scientific and
Technical
Information Network
(STINET)
goes online.

#### 1995

DTIC moves to its current location in the Andrew T. McNamara Headquarters Complex, Fort Belvoir, Virginia.

#### 2004

DTIC becomes a
DoD Field Activity
aligned under the
Under Secretary of
Defense for
Acquisitions,
Technology and
Logistics reporting to
the Director, Defense
Research &
Engineering.

#### 2008

DTIC Online is launched, providing one Web site to search and access DoD scientific, technical, research and engineering information.

#### 2008

DTIC launches DoDTechipedia, DoD's scientific and technical information wiki.

#### 2009

DTIC launches
DefenseSolutions.gov,
an idea portal for
potential DoD
Contractors to submit
solutions to DoD
challenges.

DTIC celebrates 65
years of meeting the
scientific and technical
information needs of the
DoD community in
support of the
warfighter.

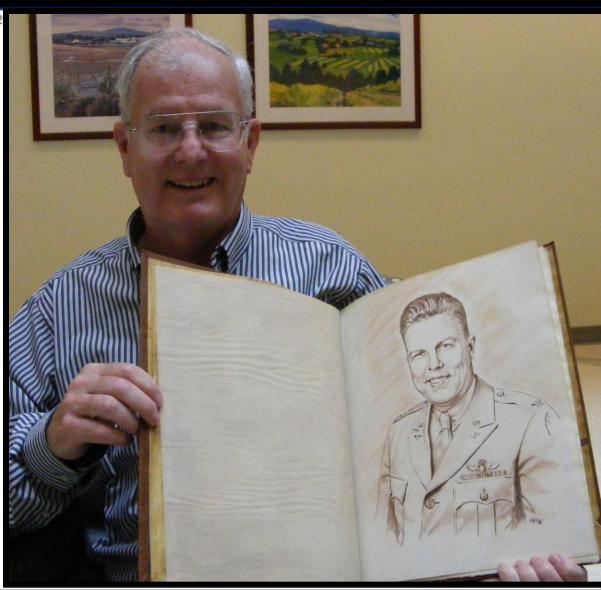

### Colonel Mac "The Real McCoy"

DoD Field Activity Since 2004 DoD Field Activity Since 2

- John D. McCoy, son of Colonel H. M McCoy, the first supervisor of the Air Documents Research Center (now DTIC) at Wright Field (now WPAFB) after World War II.
- Delivered the original farewell folder and portrait presented to "Colonel Mac, The Real McCoy" when he transferred to a new position.
- Delivered copies of older articles and a picture of Col McCoy receiving the Legion of Merit award.
- Visit to DTIC, 1 May 2009

#### **Progress**

DoD Field Activity Since 2004 DoD Field Activity Since 2004 DoD Field Activity Since 2004 DoD Field Activity Since 2004

### 65 Years of Access, Innovation and Collaboration

 From tons of paper documents brought over by ship to bits and bytes of memory...

 From stacks of paper-clipped documents to cataloged, indexed, and searchable metadata online...

#### From a collection of these early products ...

#### Supporting the Warfighter

#### Use DTIC to:

- ✓ Access almost 1 million technical reports
- ✓ Query MultiSearch to retrieve information from more than 50 S&T resources in one search
- ✓ Download the Congressional Budget 24 hours after release
- ✓ Request experienced Reference Librarian to assist with your research or exercises

Visit www.dtic.mil today!

#### **DTIC Update**

DoD Field Activity Since 2004 DoD Fi

### What progress has been made since the 2009 DTIC Conference? What changes are ahead?

- Registration Improvements
- DTIC Online Enhancements
- DTIC Online Access Controlled Launch & Access
- DoDTechipedia Innovation and Growth
- Outreach & Collaboration
- Administrative News

DoD Field Activity Since 2004 DoD Fi

#### **Registration Improvements:**

Strengthen Security,
Make Process Easier for Users,
and Provide Quicker Access
To DTIC Collection
and DoD Resources

#### Why Register with DTIC?

DoD Field Activity Since 2004 DoD Field Activity Since 2004

- Access more information than available on public side
- Upgrade to classified access possible
- Search ALL DTIC Collections
  - Public/Access Controlled/ Classified
- Free downloads of full-text controlled & classified information
- Ability to order documents
- Support from DTIC staff

#### **CAC** Authentication

DoD Field Activity Since 2004 DoD Field Activity Since 2004 DoD Field Activity Since 2004 DoD Field Activity Since 2004

#### Logon

- Common Access Card (CAC) allows easier access to more DTIC unclassified sites.
- CAC-enabled sites include DoDTechipedia, DTIC Online Access Controlled, Private STINET, TEMS, and the latest, Aristotle
- Individuals without CAC continue to use DTIC USERID & Password for logon.

#### Registration Improvements

ce 2004 DoD Field Activity Since 2004 DoD Field Activity Since 2004 DoD Field Activity Since 2004

New

- Common Access Card (CAC) holders are required:
  - to register for new DTIC account with CAC
  - to update existing DTIC account with CAC
  - to change password with CAC
  - to update profile with CAC
  - to approve as sponsor or security officer with CAC
- CAC holders receive immediate access with CAC registration

**Change: Effective Feb 2010** 

#### Registration Policy Changes

OoD Field Activity Since 2004 DoD Field Activity Since 2004

#### Federal Government:

- Extended account renewal period from 1 to 2 years (Effective May 2009)
- Eliminated requirement for supervisor's approval of unclassified access (Effective May 2009)

#### Contractors Registering with CAC:

- Eliminated requirement for contract number and government sponsor for <u>un</u>classified access (Effective Feb 2010)
- Immediate access to A, C, D information (Effective Feb 2010)

A= Public; C= US Govt & Their Contractors; D= DoD & DoD Contractors

### Expanded Customer Service for Ease of Access

DoD Field Activity Since 2004 DoD Fi

- Bulk Registration Service in coordination with groups
  - Air Force Research Lab: >3,000 (Jan 10)
  - Army Research Development & Engineering Command: >2,500 (Feb 10)
  - Dept. of Homeland Security: >450 (Dec 09)
  - Office of Naval Research: >360 (Feb 09)
- Contact <u>reghelp@dtic.mil</u> with your request
- Use subject line: Bulk Registration Service Request

#### Registration Enhancements

DoD Field Activity Since 2004 DoD Fi

- Single registration application for DTIC Online Access Controlled and DoDTechipedia
  - Contractors registering with CAC do not provide contract number or government sponsor
  - Process uses first name, last name & email address from CAC; not editable to applicant

#### Future Registration Enhancements

DoD Field Activity Since 2004 DoD Fi

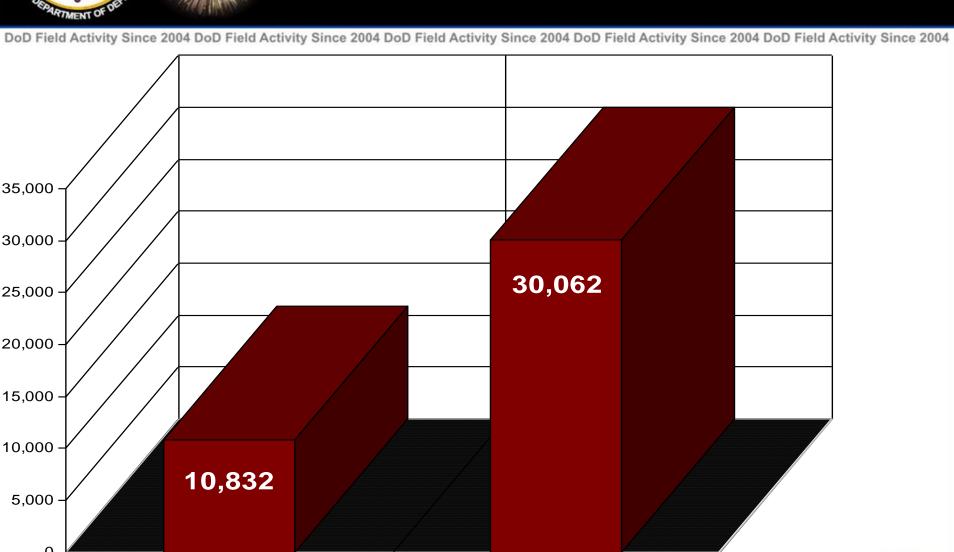

- Requirements for Existing DoD/Military DoDTechipedia Users:
  - Update existing DTIC account to match CAC email
  - Change password with CAC
  - Update profile with CAC
  - Approve as sponsor or security officer with CAC

Hear the "Basics" from the Registration, Reference, & Training Teams.

### Average Total Registered Users 2008 vs. 2009

2009

DTIC Online Access Controlled is the central facility for the acquisition, storage, retrieval and dissemination of scientific and technical information supporting the Research and Engineering needs of the Department of Defense. Maintained by the Defense Technical Information Center (DTIC), a recognized leader in information and knowledge management. This site provides access to DTIC's collections, online subscriptions, R&E Resources and more. To Register with DTIC link to https://register.dtic.mil/DTIC.

You are accessing a U.S. Government (USG) Information System (IS) that is provided for USG-authorized use only. By using this IS (which includes any device attached to this IS), you consent to the following conditions:

- The USG routinely intercepts and monitors communications on this IS for purposes including, but not limited to, penetration testing, COMSEC monitoring, network operations and defense, personnel misconduct (PM), law enforcement (LE), and counterintelligence (CI) investigations.
- · At any time, the USG may inspect and seize data stored on this IS.
- . Communications using, or data stored on, this IS are not private, are subject to routine monitoring, interception, and search, and may be disclosed or used for any USG authorized purpose.
- . This IS includes security measures (e.g., authentication and access controls) to protect USG interests--not for your personal benefit or privacy.
- Notwithstanding the above, using this IS does not constitute consent to PM, LE or CI investigative searching or monitoring of the content of privileged communications, or work product, related to personal representation or services by attorneys, psychotherapists, or clergy, and their assistants. Such communications and work product are private and confidential. See User Agreement for details.

STEM refers to the areas of science, technology, engineering, and mathematics. STEM initiatives started as a way to

American ingenuity, built on a foundation of science and engineering, has led our country to the forefront of innovation and discovery in the 19th and 20th centuries and has changed the basis of our economy. In the 21st century, scientific and technological innovations have become increasingly important as we face the benefits and challenges of both globalization and a knowledge-based economy. To succeed in this new information-based and highly technological society, all students

need to develop their capabilities in STEM to levels much beyond what was considered acceptable in the past. A particular need exists for an increased emphasis on technology and engineering at all levels in our Nation's education system.

Business and industry leaders, governors, policy makers, educators, higher education officials, and our national defense and security agencies have repeatedly stated the need for efforts to reform the teaching of STEM disciplines in the Nation so that the United States will continue to be competitive in the global, knowledge-based economy. Many reports have spoken to this growing crisis

 Sandbox Customer Feedback For our nation to remain a leader in scientific advancement and technological innovation, we must strengthen America's schools. The Enhancing Science, Technology, Engineering, and Mathematics Education Act (E-STEM) of 2009, H.R. 2710 provides the support for the education and skills necessary for students to compete in today's global economy and to understand increasingly complex issues. [3]

The United States National Academies have expressed their concern about the declining state of STEM education in the United States. Its Committee on Science, Engineering and Public Policy developed a list of actions federal policy makers could take to advance stem education in the United States to compete successfully in the 21st century.

#### Propose an Idea

Funding decisions fast: DoD's new idea portal

The U.S. Department of Defense (DoD) is looking for a few really good ideas—concepts that have the potential to advance our military's missions. This program focuses on the development of leading edge, research-oriented technology culminating in the assembly of a pre-acquisition prototype or multiple prototypes suitable for field testing.

DefenseSolutions.gov is a portal through which innovative companies, entrepreneurs, and research organizations can offer potential solutions to the DoD needs. Although anyone can submit an idea, this portal, and the team behind it, primarily are designed to encourage companies to participate that have never considered doing business with the DoD.

Use this portal to submit your ideas and get an initial response in less than 30 days. For the time being, we can accept ideas in only one theme area, but new themes will be added. To begin the submission process for a current theme, click on the theme below, or join our e-mail list and we will

DoDTechipedia

Department of Defense

Using Wikis to Rapidly Deliver Technology Innovation to the Military

## White House Announcement: DoDTechipedia (May 2009)

DoD Field Activity Since 2004 DoD Field Activity Since 2004

#### The Challenge

The Department of Defense needs to improve its ability to make existing science and technology (S&T) investments accessible and discoverable by Department decision makers. They also need to dramatically improve their ability to keep pace with the vast innovation occurring in industry.

#### The Solution

By bringing experts and expertise together in both government and industry, DoDTechipedia is making information transparency a reality in finding internal and external technology innovations that address the Department's capability needs. The DoDTechipedia Family of Services utilizes a wiki-based approach to foster collaboration between the S&T community and the military services and combatant commands. The Department of Defense is also fostering government and industry collaboration to improve overall technology awareness, and is experimenting with innovative procurement approaches that leverage the innovation of industry in addressing immediate military needs.

DoDTechipedia Family of Services currently has 4 Components: DoDTechipedia Limited for internal collaboration on key technologies and our existing S&T investments; a classified version of DoDTechipedia; DefenseSolutions.gov which allows entrepreneurs in industry and academia an easy way to get innovative solutions funded; and a future public version of DoDTechipedia, which, consistent with the framework and guidelines of National Security, will enable informal collaboration between government S&T personnel, large and small companies, research organizations and sole proprietors with emerging technologies and products.

#### The Benefit

DoDTechipedia levels the playing field to ensure that everyone with good ideas, even if they have never worked with teh Department of Defense, can share them with decision makers. In addition, DoDTechipedia ensures that Combatant Commands have access to the information they need from the science and technology community to make the best investment decisions. This helps keep both our soldiers and the American people more safe.

#### Additional Details

DoDTechipedia Limited, which launched in October, 2008, now has over 6400 registrants who have logged over 150,000 page views while creating 30 separate blogs and more than 900 technology area, interest area and organization pages. DefenseSolutions.gov has received 37 innovative ideas on its initial theme area, six of which are now being considered for funding.

## Government Computer News (GCN) Award, Oct 2009

DoD Field Activity Since 2004 DoD Field Activity Since 2004

"The annual GCN Awards honor agencies for their outstanding achievements in the application of information technology to advance their work and the services they provide. The 2009 agency winners are now part of a tradition of innovation, excellence, and service. We congratulate them for their extraordinary work and their continued dedication to better serving the public sector."

- GCN Editor-in-Chief Wyatt Kash

### **DTIC's Suite of Services**

DoD Field Activity Since 2004 DoD Fi

## aformation for the Defense Community

The Defense Technical Information Center (DTIC) is the central facility for the acquisition, storage, retrieval, and dissemination of scientific and technical (S&T) information supporting the research and engineering (R&E) needs of the Department of Defense (DoD). For over 60 years, DTIC has been the recognized leader in online information and knowledge management innovations.

#### What does DTIC do?

- Collects, consolidates, and provides controlled access to DoD S&T
- Supports S&T specialized subject areas through Information Analysis Centers (IACs).
- Designs and hosts more than 100 DoD Web sites.
- Offers customized training and reference services,

DTIC's products and services provide users with the resources they need to access DoD scientific, technical, research and engineering information

#### **DTIC Online Suite of Services**

DTIC Online: http://www.dtic.mil (Does not require registration)

- Public Technical Reports (TR) with free access to unclassified. unlimited full-text documents.
- Public release bibliographic citations to reports describing the progress or results of research efforts and other S&T information held by
- Citations to full-text documents along with Handles (persistent identifiers for the location or URL).
- MultiSearch, DTIC's federated search.
- Research and Development Descriptive Summaries (RDDS).

#### DTIC Online Access Controlled: https://www.dtic.mil (Requires DTIC registration)

- A Common Access Card (CAC) accessible gateway to DoD science, technology, research and engineering information with a customizable home
- DoD Congressional Budget Queries.
- R&E project information in Research Summaries and the R&E Database
- Free online access to citations and available full-text documents for unclassified, unlimited as well as unclassified, limited information from DTIC's TR collection.
- DTIC's Independent Research and Development (IR&D) database.
- Militarily Critical Technologies List (MCTL).

#### DTIC Online SIPRNET: http://www.dtic,mil/dtic/registration (Requires DTIC registration)

- Available free on the official U.S. Only Secret Network-Secret Internet Protocol Router Network (SIPRNET).
- Access to DTIC's entire TR collection (unclassified, unlimited; unclassified, limited; and classified up to SECRET documents).

#### **DoDTechipedia Suite of Services**

DoDTechipedia Limited: https://www.dodtechipedia.mil (Requires DTIC registration)

- A CAC accessible internal Wiki for the federal government S&T community.
- Provides a forum to post ideas, ask questions, make suggestions or share information with colleagues on organizational pages and technology areas.

#### DoDTechipedia Classified:

(Requires DTIC registration)

- An internal Wiki for the DoD S&T Community focused on information at the secret level.
- Available free on the SIPRNET.

#### DefenseSolutions.gov - Submit a Solution:

http://www.defensesolutions.gov

- A portal through which innovative companies, entrepreneurs, academia, and research organizations can submit potential ideas or solutions to the DoD through the Open Business Cell.
- A venue for vendors, educational institutions, Federally Funded Research and Development Centers (FFRDCs), Labs and others wanting to make their Information Technology/National Security Systems (IT/NSS) and Information Assurance (IA) products, services and capability solutions known to DoD,

#### Information Analysis Centers (IACs)

ACs: http://www.dtic.mil/dtic/iac/

- Research organizations chartered by the DoD to assist researchers, engineers, scientists and program managers in locating and analyzing scientific and technical information in specialized subject areas.
- Maintain the Total Electronic Migration System (TEMS) databases. providing access to both citations and downloadable full-text IAC documents.

## COCOM Support Hear more about Reference on 24 March.

DoD Field Activity Since 2004 DoD Fi

- Completed research forall 61 COCOM S&T Integrated Priority List (STIPLs) for CY2009
- Created DTIC section on JIEDDO Knowledge & Information Fusion Exchange (JKnIFE) site; added documents on Human Terrain, Sniper, & IEDs (NIPR and SIPR)
- Conducted research on Cyber Security & Nuclear Knowledge Management in support of the Global Innovation and Strategy Center (USSTRATCOM) interns.

### Planning for Future Talent: Student Paper Competition Meet the Winners!

DoD Field Activity Since 2004 DoD Field Si

## Student Paper Competition for Defense Technical Information Center (DTIC) 2010 Conference March 22-24, 2010

DTIC, in support of the Department of Defense (DoD) Scientific and Technical Information Program, solicits student papers for consideration on the agenda of its annual conference. Selected student authors will be invited to present their papers at the DTIC 2010 Conference, March 22-24, 2010, in Alexandria, VA (see <a href="http://www.dtic.mil/dtic/annualconf/2010Home.html">http://www.dtic.mil/dtic/annualconf/2010Home.html</a>).

#### PURPOSE:

- To promote the generation of new ideas and the conduct of new research in areas of strategic interest to DTIC
- To promote understanding of DTIC's mission and program among information professionals

#### TOPICS:

Papers should show relevance to DTIC's mission. DTIC is the central scientific, research and engineering information support activity for the DoD, Director of Defense Research and Engineering (DDR&E) and supports the DDR&E's execution of the DoD Scientific and Technical Information Program. General information about DTIC is available at: <a href="http://www.dtic.mil/">http://www.dtic.mil/</a>.

Examples (to stimulate input, not to constrain topics):

- Use of Web 2.0 and 3.0 technology for collaborative searching and problem solving
- Making scientific and technical information discoverable through virtual worlds
- · Delivering scientific and technical information to mobile devices
- · Recommended features of a tool suite for usability experimentation

#### CONFERENCE PARTICIPATION:

DTIC will consider the papers for presentation at the DTIC 2010 Conference. Selected authors will be compensated for traveling expenses to attend the conference. Papers may have multiple authors, but only one person will be
