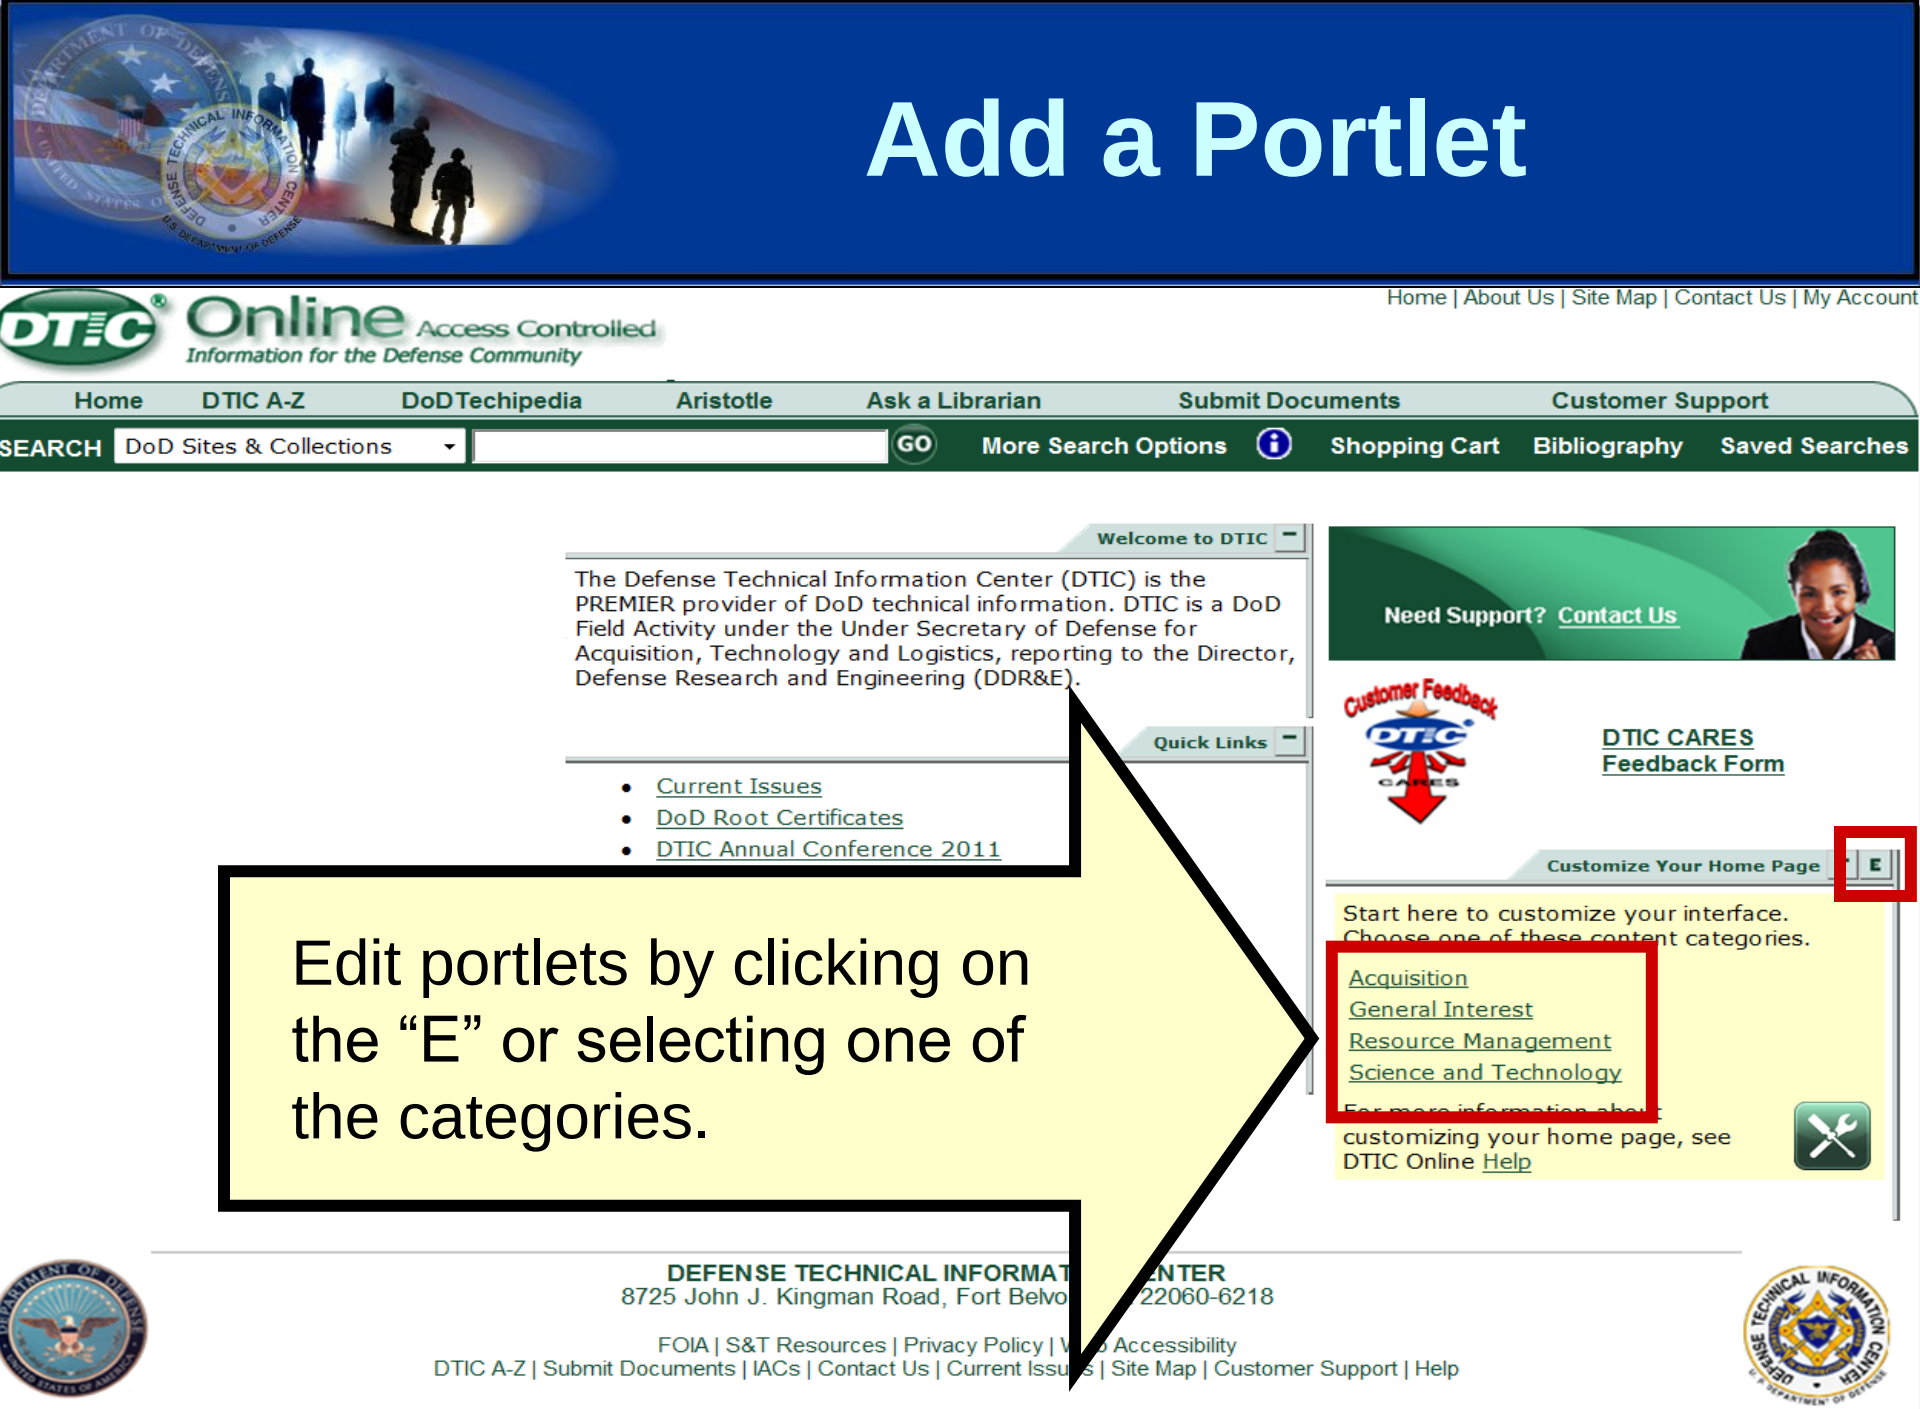
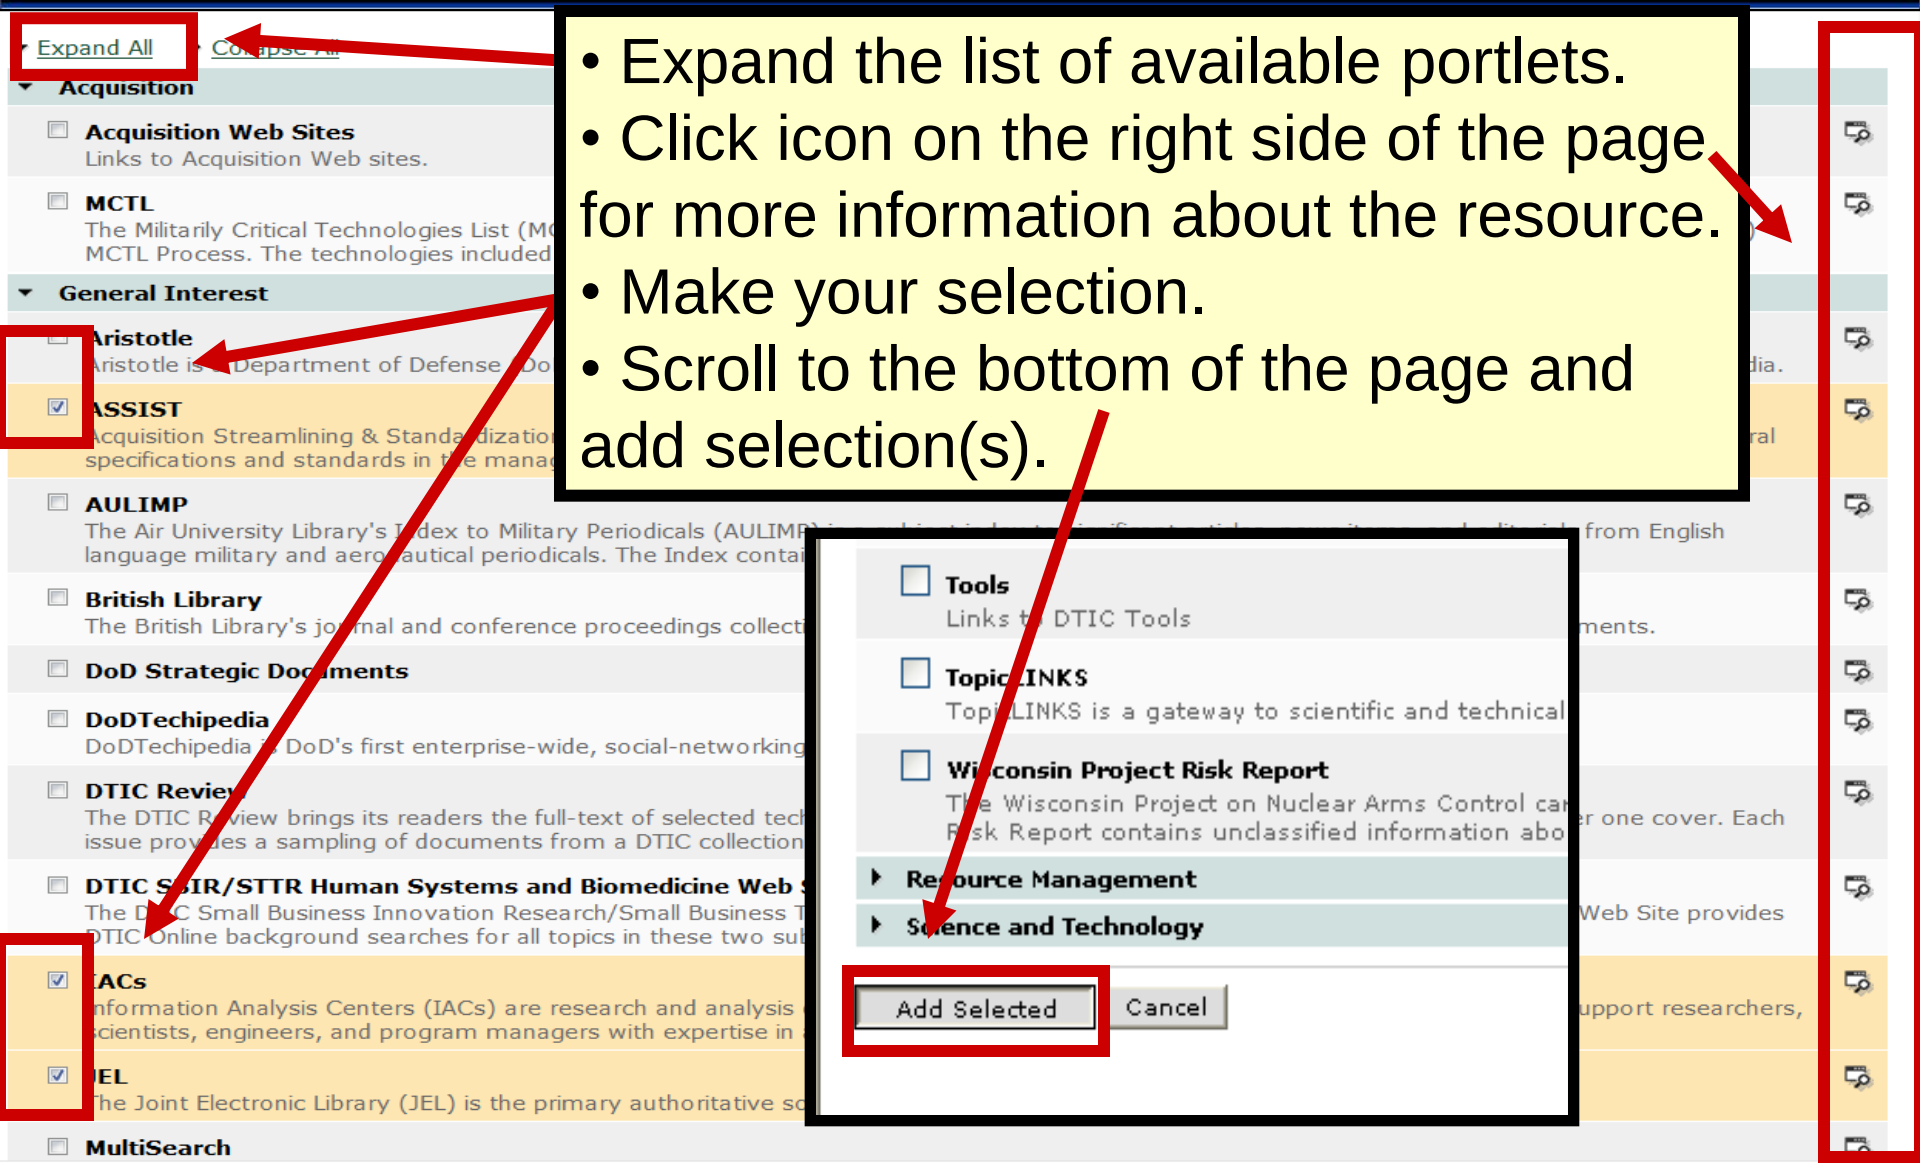
Add a Portlet



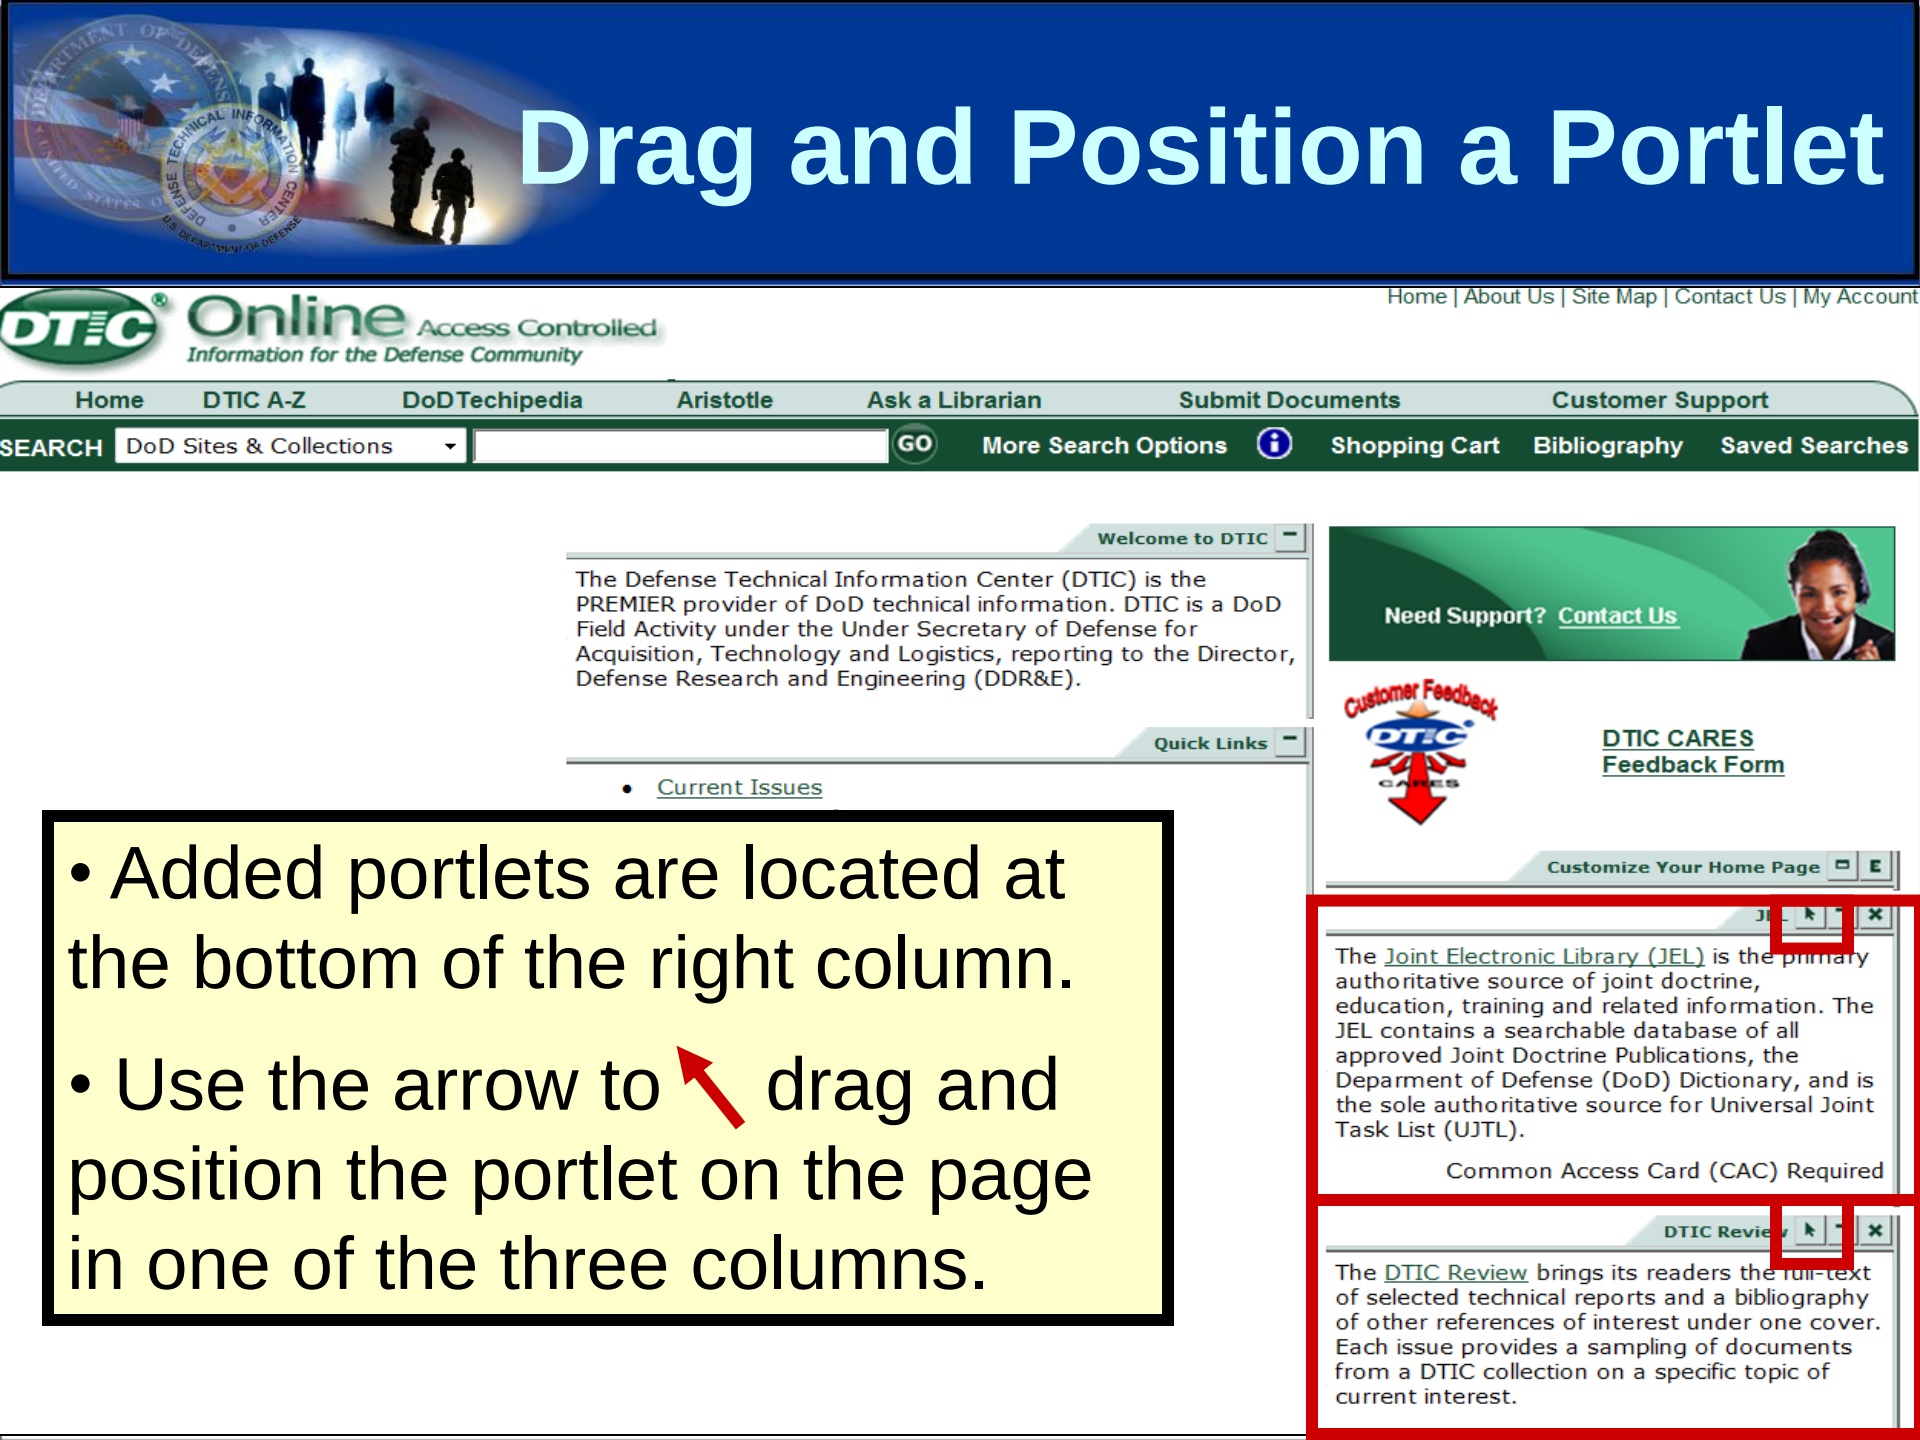
Edit portlets by clicking on the “E” or selecting one of the categories.

Select and Add Portlets

- Expand the list of available portlets.
- Click icon on the right side of the page for more information about the resource.
- Make your selection.
- Scroll to the bottom of the page and add selection(s).

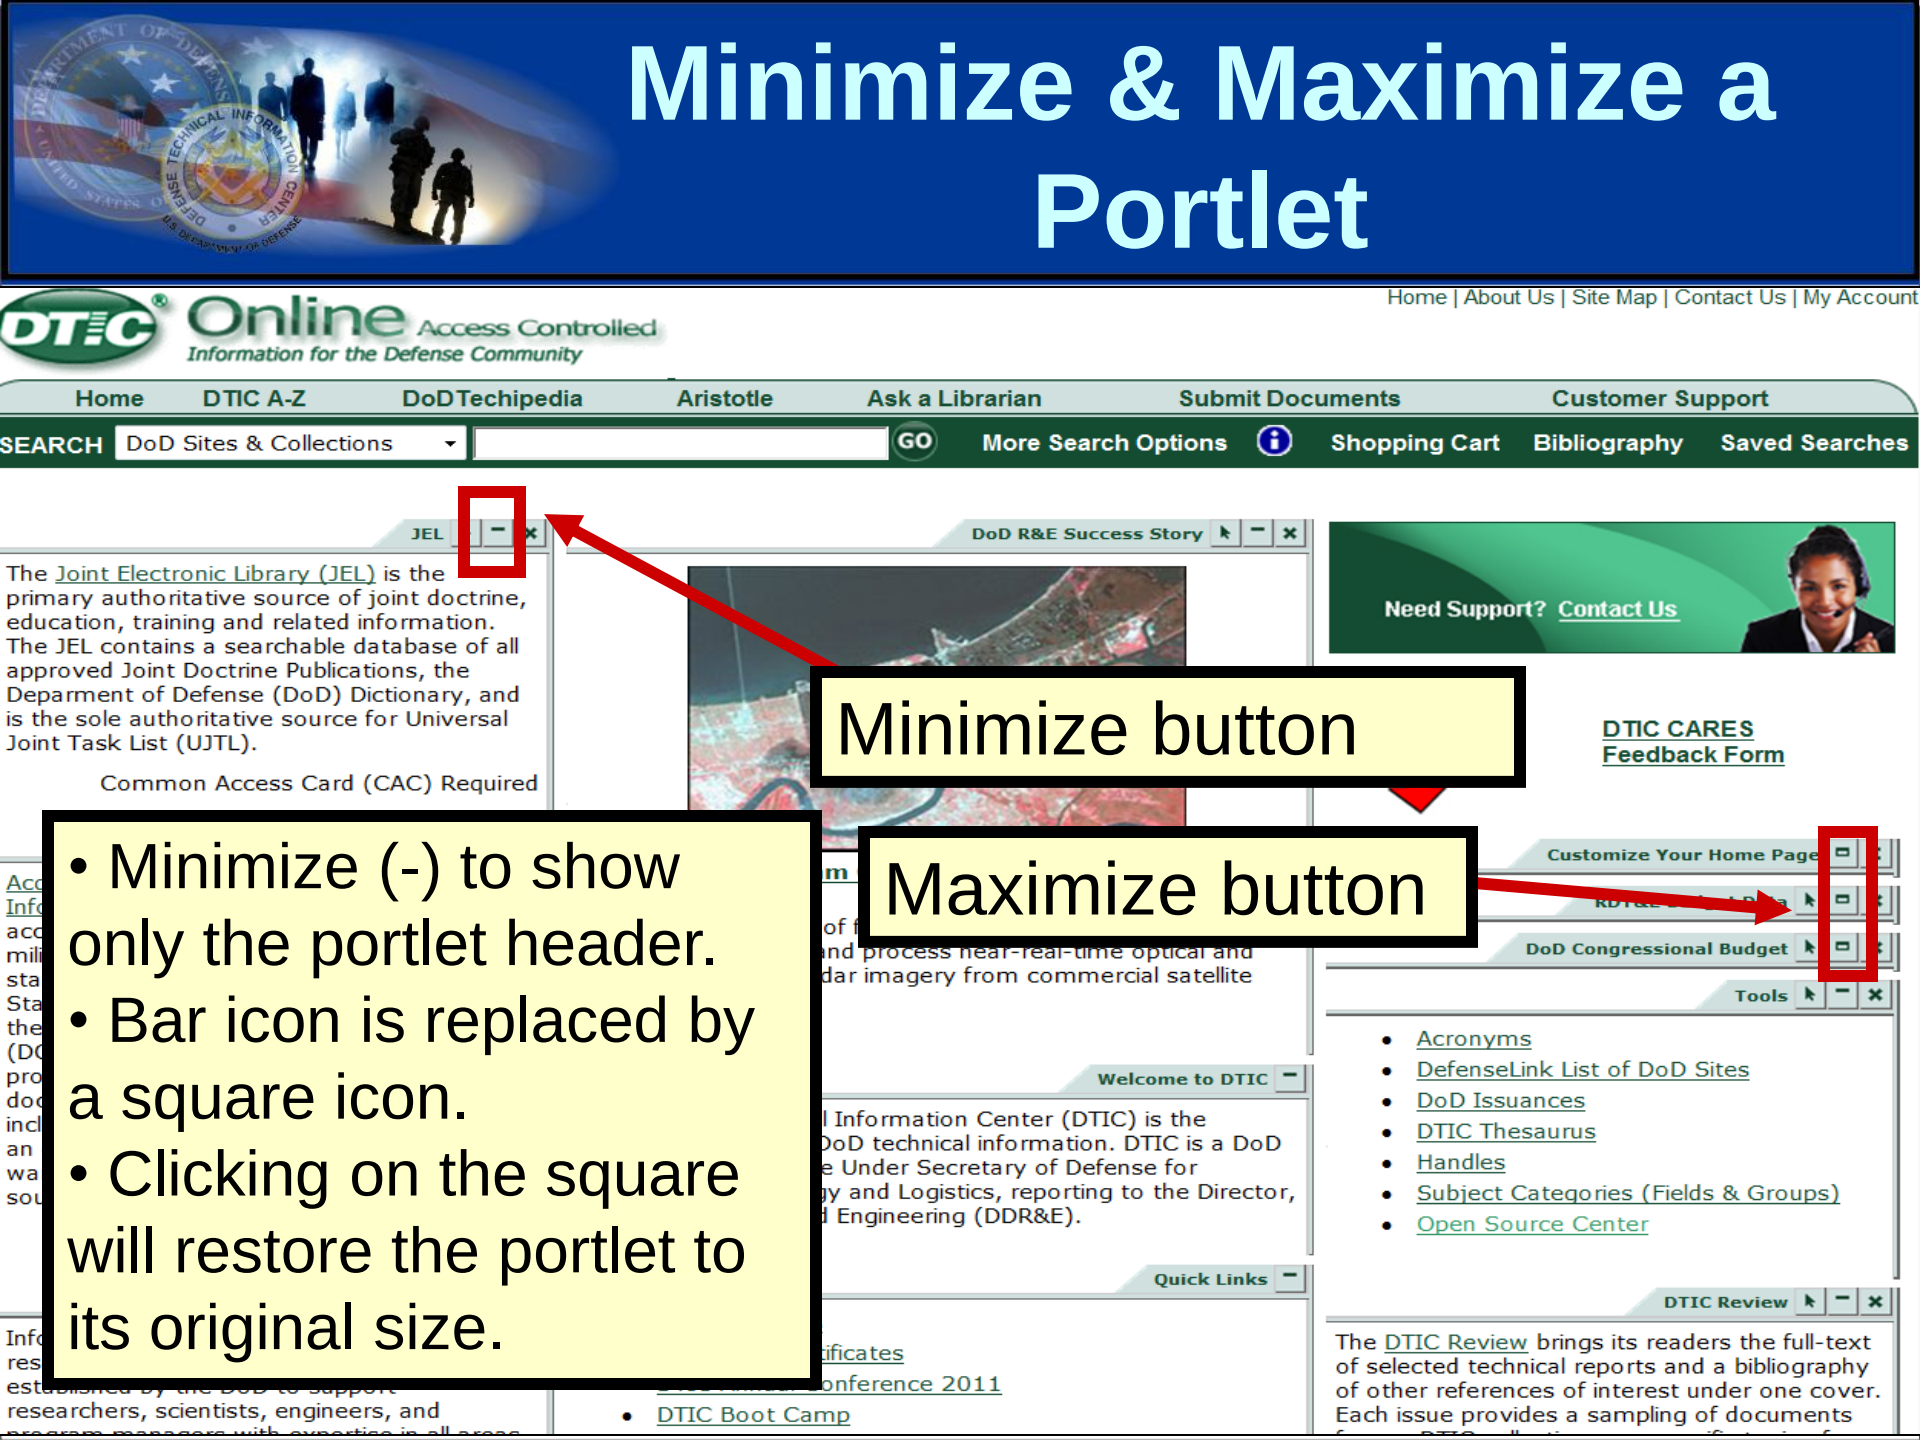


Drag and Position a Portlet



- Added portlets are located at the bottom of the right column.
- Use the arrow to drag and position the portlet on the page in one of the three columns.

Minimize & Maximize a Portlet



- Minimize (-) to show only the portlet header.
- Bar icon is replaced by a square icon.
- Clicking on the square will restore the portlet to its original size.

X to Remove a Portlet

Collection: Technical Reports

Abstract: (U) Salmonella typhimurium is a leading cause of foodborne illness and a critical threat agent for potential bioterrorism. Current rapid detection initiatives include biosensors that routinely incorporate antibodies for biorecognition. However, antibodies are costly and may degrade under unfavorable environmental conditions. A stable, Inexpensive substitute may be filamentous bacteriophage affinity selected from a phage display library for specificity to S. typhimurium. We immobilized affinity-selected phage to a quartz crystal microbalance for detection of S. typhimurium in solution. An ELISA procedure, precipitation assay, and flow cytometry were employed to confirm phage specificity and selectivity. The phage was up to 22,000 times more specific for S. typhimurium than controls and up to 1,000 times more selective in comparison to other bacteria. For recognition of the phage targeted bacterial outer membrane structure, biotinylated S. typhimurium surface proteins from lysate were reacted with phage cross- linked to water-soluble resin to prepare a protein eluate for Western blot, which revealed a single 60-70 kD band. Three immobilization methods (physical adsorption, biotin-streptavidin-phage self-assembly, and Langmuir-Blodgett) using two phage forms (filamentous and phage coat proteins) were evaluated for proof of concept sensor preparation. Specific binding between phage and target on the biosensor resulted in concentration dependent resonance frequency changes. Best results were obtained when 10(exp 10) - 10(exp 11) filamentous phage particles converted to spherical forms (spheroids) by chloroform denaturation were immobilized as phage coat proteins using Langmuir-Blodgett technique. In summary, filamentous phage selected from a phage library can be used for the preparat
suitable for continuous food and environmental monitoring devices, diagnostic assays, a

TEMS (Total Electronic Migration System)

- Technical reports collection for the 10 Information Analysis Centers (IACs).
- Public release, limited, sanitized citations to classified reports.
- Soon, you can search only the citation (metadata) or full text.
- Soon, you can limit your search by individual IAC.

DTIC (DoD) IACs

Multiple Award TATs - SNIM

As the Department's focus has shifted to address asymmetric threats, DoD scientists and engineers simply do not have the time to sift through mountains of data to uncover essential information to address emerging requirements. This situation underscores the value of and necessity for organizations that provide analysis, synthesis, and dissemination of relevant, timely knowledge and information. The Information Analysis Center Program is just such a resource.

Search Tips

Case & Boolean Operators

Case

- No searches are case sensitive
  - aim
  - AIM
  - AiM

Boolean operators

- *AND* – must include both terms
  - *land and sea*
- *OR* – must include either term
  - *sea or land*
- *NOT* – must not include the term that follows
  - *land not sea*

NOTE: **The default between terms is *AND***

- ***land water*** retrieves ***land and water***

Phrase Searching

Phrase

- Search phrases using double quotes.
  - "Digital Control of Exchange Interaction in a Spin-Based Silicon Quantum Computer"
  - "Tanks for the Memories"

- NOTE: USING QUOTES
  - Use only dumb quotes **" "** . Dumb quotes appear when you type in the search box .
  - Smart quotes **“ ”** usually appear when typing in MS Word.
  - Use "dumb quotes"
  - Do not use “smart quotes”

Punctuation & Nesting

Punctuation

- Punctuation is ignored and treated as a space.
  - AN/BQQ-5 = an bqq 5 = an AND bqq AND 5
- To search a term with punctuation as a string, use quotes to indicate it is a phrase.
  - “AN/BQQ-5 " = "an bqq 5"
- Exceptions:
  - ***** and **?** are always treated as wildcards.
  - Double quotes **" "** always indicate the beginning or end of a phrase.

Nesting

- Use parentheses

Proximity Operator

Proximity operator

- Use *near#* where # is a number from 1 to 10. The number indicates how many words appear **between two words**. The two words can appear in either order.
  - *Airpower near1 specifically*

    Finds: "*Tanks for the Memories? Will Airpower, Specifically Helicopters, Replace Tanks in 2010?* "
  - *title: (2010 near10 tanks)*

    Finds: "*Tanks for the Memories? Will Airpower, Specifically Helicopters, Replace Tanks in 2010*"

Singular and Plurals

Singular and plurals

- Lemmatization (Stemming) presently searches for both singular and plurals but will be expanded to include more suffixes. A search for any term should find its singular and plural.
  - *Tank* also finds *tanks*
- Double quotes will turn off lemmatization.
  - " *tanks* " searches only for the word tanks and does not search for tank.
- Lemmatization is not operational in the Title and Author boxes on the More Search Options page.

Wild Cards & Fielded Searching

Wild Cards

- Use the asterisk (*****) to replace multiple characters.
  - **terror**
  - *un*able*
- Use the question mark (**?**) to replace a single (1) character.
  - *defen?e*

Fielded Searching

- To limit a search to a field, use the Field mnemonic and a colon.
  - *title:radar*
  - Retrieves the term radar in the title.
  - *author: "smith robert"*
  - Retrieves the author robert smith
- To search more that one term in a field, surround the terms with parentheses.
  - *title: (submarines and sonar)*
  - Retrieves both the terms submarines and sonar in the title.

Authors

- Authors
  - Enter an author's name in quotes to find them as a phrase in the author field.
  - When searching authors, pay attention to the order in which the complete name appears in a particular database. For example, most of the DTIC Online collections have authors' names entered in the order ***lastname firstname/initial middle name/initial.***
  - Enter names in the order in which they appear in the collection(s) you are searching.
  - You can include punctuation or leave it out.

    - *"Harris, Robert V., Jr."*
    - *"nethercote, w c e"*
    - *"Leras, Byran M." and "Heiden, Charles G"*
    - *author:("Leras, Byran M." and "Heiden, Charles G")*

DoD Congressional Budget

Two sites provide information on Congressional Budget changes to the President's Budget Request (PBR).

The DoD Congressional Budget Data Web site provides PDF and Excel spreadsheet versions of the Congressional Budget reports shortly after they are posted on the Thomas (Library of Congress) website.

The Congressional Budget Queries Web site helps the Director of Defense Research & Engineering (DDR&E) resource managers to respond to changes proposed by Congress to the Research Development Test & Evaluation (RDT&E) budget. Locate information concerning:

- Total Authorization/Appropriation by Service/Agency and Budget Activity
- House Armed Services Committee
- Senate Armed Services Committee
- House Appropriations Committee
- Senate Appropriations Committee
- Conference Report
- Authorization/Appropriation by Program Element.

Distribution A

RDT&E Budget Data

The Research, Development, Test, and Evaluation (RDT&E) Budget Data Web site provides funding information on budget cycles (Program Objective Memorandum (POM), Budget Estimate Submission (BES), and President's Budget Request (PBR)) by Budget Activity (BA) from FY1990 to the present and by Appropriation from FY1962. Users may export results to an Excel spreadsheet.

FY10 by BA and FY10 by Component

Distribution D

RDDS (R-2s)

Research and Development Descriptive Summaries (RDDS) furnish narrative information on Research, Development, Test and Evaluation (RDT&E) programs and Program Elements (PE Numbers) within the Department of Defense (DoD). You can access older R-2s (1996-2000) through the Scientific & Technical Information Network (STINET) Web site.

Create a Bibliography

A bibliography (bib) is a list of records selected from specific databases that can be exported and saved as one document.

- Records can be added from multiple searches from over 30 collections with the choice of 3 formats.
- You can delete records from a bib.
- All search results on a page can be added to your bibliography.
- When the bib content is ready, export and save.
- View in HTML or PDF
- Presently, you can add 500 records to a bib.

TEMS

The Total Electronic Migration System (TEMS) provides access to the full online collection of Information Analysis Center (IAC) scientific and technical information. TEMS provides over 1,000,000 citations and 140,000 downloadable full text documents.

Access to Data Controlled by Distribution Code

Aristotle

Aristotle is a Department of Defense (DoD) social networking site. It was created to facilitate access to information and people, to enhance collaboration within projects, and to open new avenues in media sharing. Aristotle reaches back to knowledge stores including millions of projects, topics and documents from the Defense Technical Information Center (DTIC). It provides social networking not just for people, but also for science and technology projects. Aristotle is a knowledge network based on an ever-expanding technical repository of topics. Aristotle allows discovery of what technical topics interest the scientific community, which topics interrelate to which projects, how topics of interest intercompare with others, and which documents interlink to which topics.

Access Restricted to DoD and Federal Employees and their Contractors

DoDTechipedia

DoDTechipedia is DoD's first enterprise-wide, social-networking tool focused on the science and technology community. Using a wiki format, DoDTechipedia's goal is to foster communication and collaboration
