

PROTOCOL
BETWEEN THE DEPARTMENT OF STATE
OF THE UNITED STATES OF AMERICA AND
THE SECRETARIAT OF COMMUNICATIONS AND TRANSPORTATION
OF THE UNITED MEXICAN STATES
CONCERNING THE ALLOTMENT AND USE OF
THE 138-144 MHz BAND
FOR TERRESTRIAL NON-BROADCASTING RADIOCOMMUNICATION SERVICES
ALONG THE COMMON BORDER

This Protocol is being concluded on an interim basis pursuant to the Agreement Between the Government of the United States of America and the Government of the United Mexican States Concerning the Allocation and Use of Frequency Bands by Terrestrial Non-Broadcasting Radiocommunication Services Along the Common Border signed at Williamsburg, Virginia June 16, 1994, (herein referred to as the “Agreement”).

ARTICLE I. Purposes

1. The purposes of this Protocol are:
 - a. To establish and adopt a plan for the equitable allotment on an interim basis of the frequency sub-bands in the 138-144 MHz band within the Sharing Zone defined in this Protocol; and
 - b. To allow for new assignments in frequency sub-bands allotted as primary for each Administration in the 138-144 MHz band within the Sharing Zone defined in this Protocol on an interim basis until a more complete protocol governing both new assignments and existing stations can be negotiated and concluded.
2. This Protocol does not apply to existing stations for radiocommunication services in the 138-144 MHz band within the Sharing Zone defined in this Protocol.

ARTICLE II. Designation of Administrations and Definitions

1. The National Telecommunications and Information Administration of the Department of Commerce of the United States of America and the Secretaría de Comunicaciones y Transportes of the United Mexican States are hereby designated the Administrations responsible for the implementation of this Protocol for the United States of America (hereinafter

“United States”) and the United Mexican States (hereinafter “Mexico”), respectively, as provided for in Article IV of the Agreement.

2. The Sharing Zone is defined to include the area within the United States and Mexico and their respective territorial waters as set forth in Appendix I.

ARTICLE III. Supersession

Upon entry into force, this Protocol supersedes the provisions of the Memorandum of Understanding (MOU) Between the Department of Agriculture Forest Service and the Federal Communications Commission of the United States of America and the Secretaría de Comunicaciones y Transportes of the United Mexican States for the Use of Radio-Frequencies, Coordination and Cooperation for Emergency Purposes, signed at Washington and Mexico City December 9, 1998 to the extent that the MOU’s provisions would apply to new assignments made on or after the date that this Protocol enters into force with respect to the two frequencies 139.150 MHz and 142.725 MHz.

In the event of a conflict between the provisions of the MOU and this Protocol with respect to either of the frequencies 139.150 MHz or 142.725 MHz, the provisions of this Protocol shall prevail.

ARTICLE IV. Conditions of Use

1. Within the Sharing Zone, the frequency sub-bands in the 138-144 MHz band shall be allotted for the primary use of each Administration in accordance with Appendix II. Each Administration shall ensure that new assignments made on or after the date that this Protocol enters into force are operated in such a way that the transmission bandwidth shall not exceed the primary frequency allotments in Appendix II.

2. Each Administration shall ensure that fixed and mobile stations assigned to primary frequency allotments within the Sharing Zone shall be operated on an interim basis in accordance with the effective radiated power (ERP) and antenna height limitations specified in the following table (Table I). Likewise, each Administration shall take measures to eliminate any harmful interference caused by transmissions from its stations that propagate beyond the Sharing Zone.

Table I

Average of the Antenna Height Above Average Terrain on Standard Radials in the Direction of the Common Border ¹ Meters	Maximum ERP in Any Direction Toward the Common Border	
	Watts	dBm
Up to 150	500	+56.98
Above 150 to 225	350	+55.44
Above 225 to 300	250	+53.98
Above 300 to 450	200	+53.01
Above 450 to 600	150	+51.76
Above 600 to 750	100	+50.00
Above 750 to 900	75	+48.75
Above 900 to 1,050	50	+46.98
Above 1,050	30	+44.77

¹ Standard radials are 000°, 045°, 090°, 135°, 180°, 225°, 270° and 315° relative to True North.

ARTICLE V. Appendices

Appendices I and II are integral parts of this Protocol.

ARTICLE VI. Entry into Force and Termination

This Protocol shall enter into force on the date of signature, and shall remain in force until it is replaced by a Protocol governing both new assignments and existing stations, or until it is terminated in accordance with Article VII of the Agreement.

IN WITNESS WHEREOF, the respective representatives have signed the present Protocol.

Done at Washington, D.C. this seventeenth day of July, 2006, in duplicate, in the English and Spanish languages, both texts being equally authentic.

Chairman Hector Osuna Jaime

APPENDIX I

Areas Within Which the Frequencies Are to Be Protected

U.S.-MEXICO SHARING ZONE

The Sharing Zone is defined on an interim basis as the areas covered by a distance of 145 kilometers (90.1 miles) from the U.S.-Mexico common border into the national territory of each country and includes areas of the Pacific Ocean and the Gulf of Mexico.

These areas are enclosed by the boundaries shown on the map to the right and are further defined in Table II.

Table II

The following geographic coordinates define the U.S.-Mexico Sharing Zone on an interim basis in the national territory of each country. Point 1 is located in the Pacific Ocean due west from the U.S.-Mexico common border and is the starting point in defining the Sharing Zone. The boundary of the Sharing Zone is then defined by plotting each geographic point in advancing numerical order in a clockwise direction. Each distance path between consecutive points is traversed by great circle arc.
