

**Important Information on Expiry Dating of IXIARO®,  
Japanese Encephalitis Vaccine, Inactivated, Adsorbed**

June 2011

**Subject: Incorrect Expiry Date for Lot JEV10G56F of IXIARO®**

Dear Military Health Care Professional:

Intercell AG, in consultation with the Food and Drug Administration, are asking Military Health Care Professionals to note that the syringes for Lot **JEV10G56F** of IXIARO® have been labeled with an incorrect expiry date.

- Do not continue to use IXIARO® Lot **JEV10G56F** beyond **end of July 2012**.
- There is no evidence of a safety concern with this batch.

The syringe labels applied to IXIARO® Lot **JEV10G56F** show an incorrect expiry date of “End of **January 2013**”. The correct expiration date for this lot is “End of **July 2012**” and Lot **JEV10G56F** must not be administered after this date. The correct shelf-life is printed on the blister trays and packaging boxes of IXIARO® Lot **JEV10G56F**.

IXIARO® is manufactured and distributed for military use by Intercell. We reiterate our commitment to the delivery of quality vaccine products and to the timely dissemination of important prescribing information to physicians, other healthcare professionals, and patients.

Should you require additional information regarding this notice or the use of IXIARO®, please contact:

Intercell USA, Inc. at 1-240-454-7333.

Thank you for your attention to the matter and we regret any inconvenience this might cause.

Sincerely,

Thomas Lingelbach  
CEO Intercell AG
