

## **Astronaut Recruitment PSA #1**

"I graduated from Wellesley College before I became a test pilot in the Air Force."

"I spent nine days living in an underwater research laboratory."

"I received three patents for my research in optics."

"I was a high school science teacher in Vancouver, Washington."

What do these women have in common? They all applied to be NASA Astronauts and they made it. America needs you at the frontiers of space and technology.
