

Distributed Learning Enterprise Solutions

Accessible Training via AtlasPro

Web-based learning management systems offer government organizations the benefits of distance learning and streamlined administrative processes. But the process of selecting the right system or reconfiguring an existing one can prove complex and time consuming.

Through decades of partnership with virtually all agencies of the federal government, Booz Allen Hamilton has developed an understanding of government needs. And as these needs change, we focus on delivering new solutions. To meet the current need for cost-effective, accessible training within government organizations, Booz Allen developed AtlasPro. Key features of this software include:

Collaborative Tools

- Library, tasks, news, glossary, calendar

External Interfaces

- Easy integration to external systems
- Authentication
- Service-Oriented Architecture

Data Transfer

Survey Management

Report Management

- COTS integration

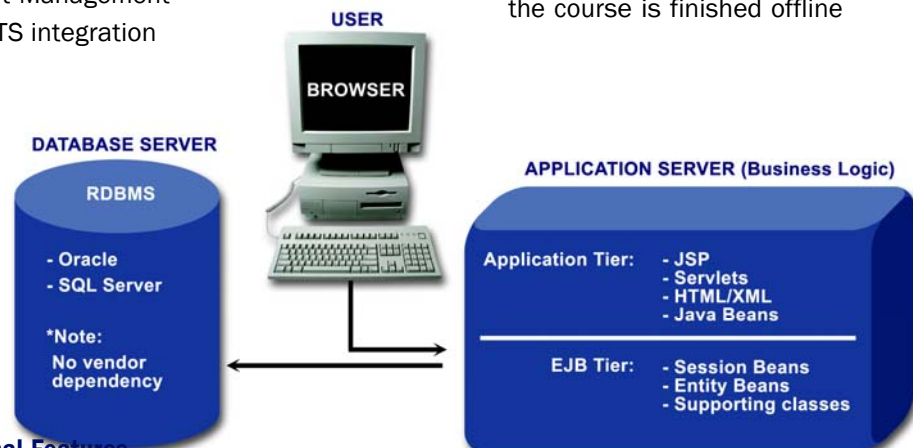

Security

Financial Management

- Quota Management
- eCommerce

Mobile Learning System

- Capability to download or install the SCORM-compliant content to workstations and work offline
- Ability to upload student progress information to the main campus when the course is finished offline

Additional Features

Maintains compliance standards

- Section 508
- SCORM 1.2, 2004
- QTI

Offers an open architecture

- Integration of COTS products
- Easily interchangeable components
- Ability to integrate custom solutions of COTS/Atlas at a minimal cost
- Integrated Web Services

Vendor-independent server products

Flexible database options

- SQL Server, Oracle, Sybase, MySQL

High performance

State-of-the-art design

- Smart/CAC card integration
- Login and authentication
- Test score reporting
