

NEAR MISS & HAZARD REPORT

EHS is requesting your assistance in keeping NCI-Frederick a safe place to conduct scientific research. The mission of EHS is to eradicate all hazardous work conditions and to identify any near misses to help that end. A near miss is a potential hazard or incident that has not resulted in any personal injury. Near misses are commonly referred to as “a close call”. By reporting a near miss to EHS you would help us correct **and prevent** the potential accident/incident from ever happening again. If you are concerned or aware of any area that you feel may be unsafe, equipment that may be malfunctioning or used improperly, or need guidance on best safe practices - please contact EHS. What you report to us may help us save someone from being injured! **This form can be printed and mailed anonymously to EHS / 426** through interoffice mail. EHS will then investigate and correct any safety issues.

Unsafe Act:

Unsafe Condition:

Date: _____ Time of Day: _____

Specific Location (Bldg. / Room): _____

Description of incident or potential hazard: _____
