

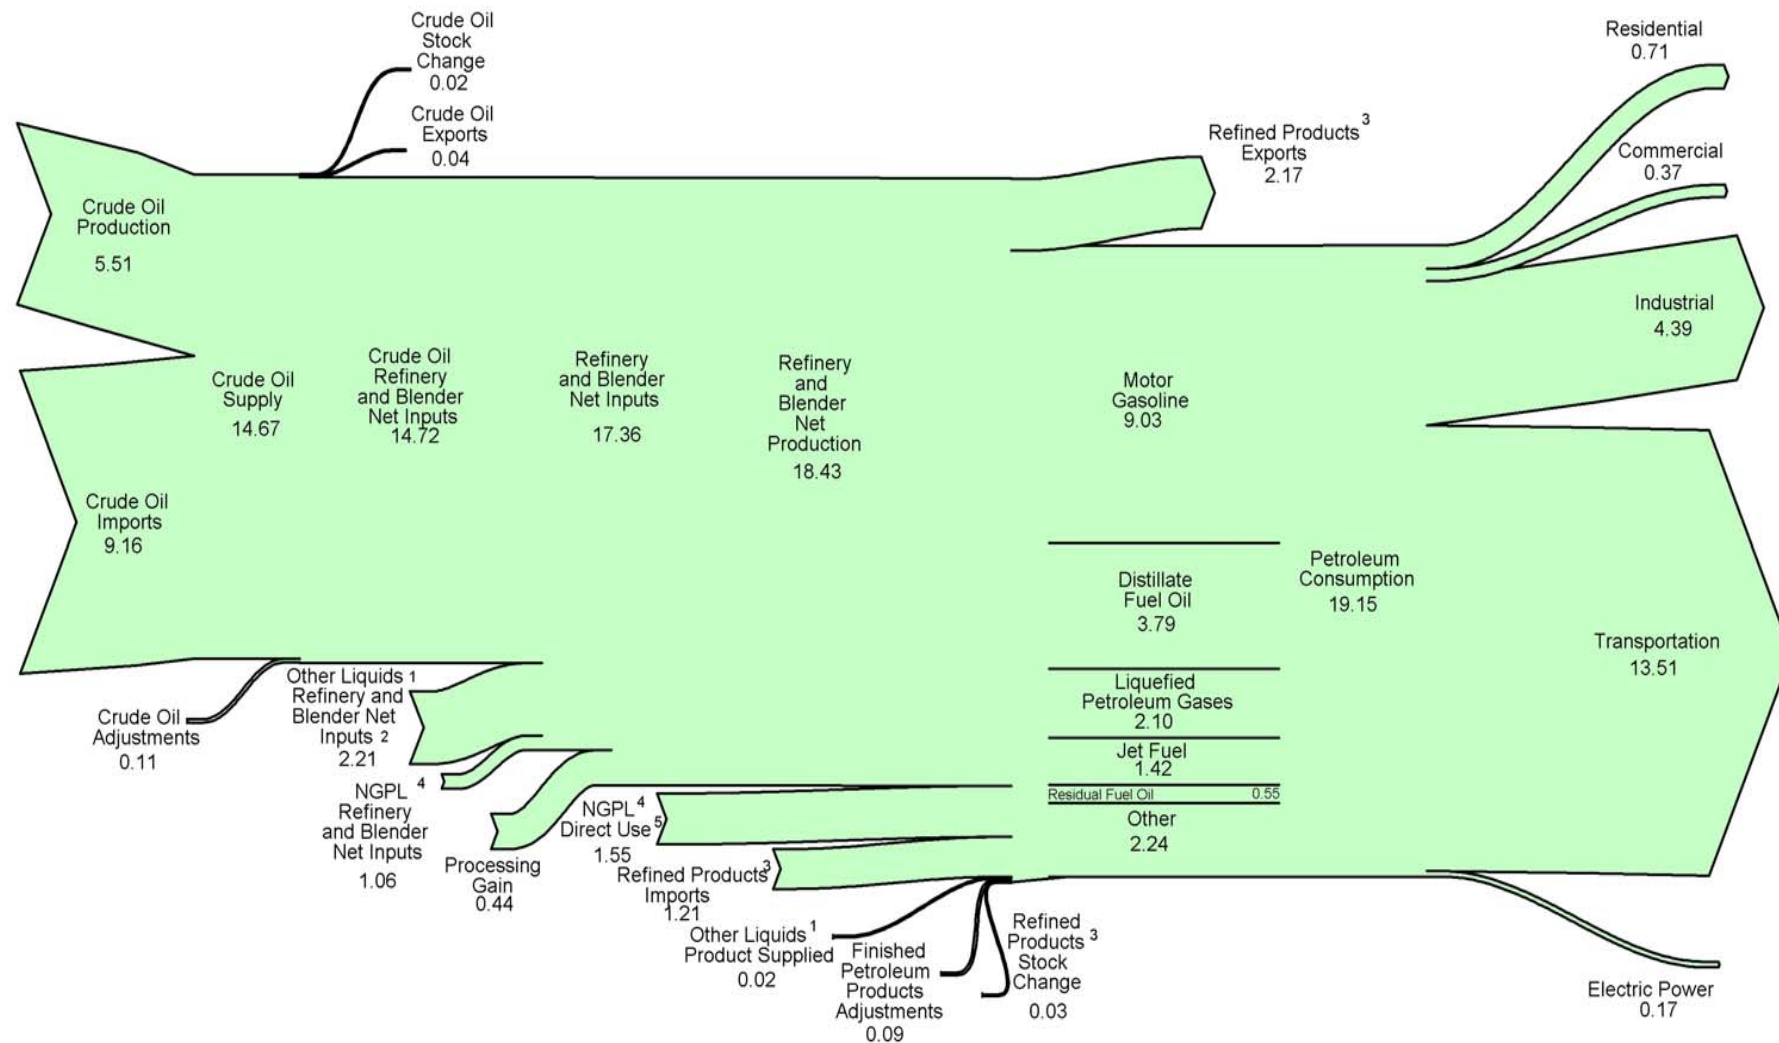

**Figure 5.0. Petroleum Flow, 2010**  
(Million Barrels per Day)

<sup>1</sup> Unfinished oils, hydrogen/oxygenates/renewables/other hydrocarbons, and motor gasoline and aviation gasoline blending components.

<sup>2</sup> Renewable fuels and oxygenate plant net production (0.92), net imports (1.28) and adjustments (0.08) minus stock change (0.06) and product supplied (0.02).

<sup>3</sup> Finished petroleum products, liquefied petroleum gases, and pentanes plus.

<sup>4</sup> Natural gas plant liquids.

<sup>5</sup> Production minus refinery input.

Notes: • Data are preliminary. • Values are derived from source data prior to rounding for publication. • Totals may not equal sum of components due to independent rounding.
