

Department of the Interior Recovery Investments

Investing in America's Economic Recovery

Capital Improvements Projects

Need

Some BLM campgrounds and recreation sites across Arizona need to be repaired. Other aspects of these projects include multiple solar power installations which will be integrated with existing grid power sources. Solar power improvements will promote the use of renewable energy within federal facilities.

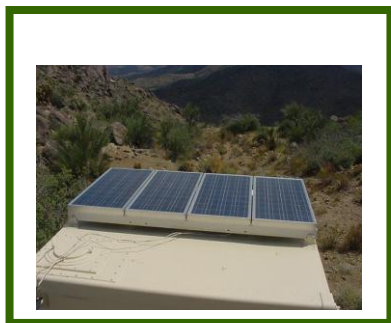

Recovery Act Funding

These 17 Arizona ARRA projects have been allocated \$3.2 million. These projects will repair existing facilities and construct new facilities across the state. These projects will be accomplished primarily through contracts.

Benefits

These projects will improve Arizona campgrounds and recreation sites. Improvements to existing facilities and construction of new facilities will lower the cost of maintenance and promote energy independence on public land facilities.

More Information

Other aspects of these projects will protect water quality through improved water and waste-water facilities and the installation of low-energy consumption electrical systems.

For more information on this BLM project, contact: Samuel Burton, Arizona ARRA Coordinator, Arizona State Office, 602-417-9618, sam_burton@blm.gov.
