AIRCRAFT:	REVISION NO. 8c	PAGE NO.		
HAWKER HS-125	DATE: DRAFT	IX		
(SERIES 1 THROUGH 900XP)				
HIGHLIGHTS OF CHANGE				

Effective above date, the HS-125 Master Minimum Equipment List has been revised. The following are the changes for **Revision 8a** to the HS-125 MMEL.

THE IOHOWING	g are the changes for Revision 8a to the HS-125 MMEL.
	Guidelines for (O) & (M) procedures update name of source document.
	Caldelines for (e) a (w) procedures apadic frame of source accument.
22-10-1	Corrected Remarks with "provided".
22-20-1	Change Remarks for Yaw Damper because there is no AFM Limitation.
24-21-3	Removed Category C relief for 115 VAC/60HZ System because no alternate procedures are needed and remaining relief for deactivation is adequate. This eliminates the need for an (O) procedure for this item.
25-00-1	Removed Passenger Convenience Items IAW PL-116.
25-10-2	Deleted Cockpit Convenience Items IAW PL-116
29-30-6	Removed (M) procedure and remark b) because verification of adequate pre-charge is already determined by the (O) procedure.
30-40-2	Deleted NOTE because it was not relevant.
30-80-1	Change Remarks for Ice Detection System to require alternate procedures to detect icing conditions and activate anti-icing equipment.
33-40-5	Remove (O) procedure requirement and revise Remarks for consideration of Ice Detection system.
34-10-2	Remove second relief for Altitude Alerter because no longer allowed by regulation.
34-40-1	Add (O) & (M) to Radio Altimeter System and revise Remarks
34-40-2	Revise Predictive Windshear IAW PL-67
34-50-4	Change Transponder relief to Category B IAW PL-76 & Add RVSM NOTE.
34-70-5	Change EFIS Symbol Generator to 3 installed and Remarks to allow deferral of the right side SG/DPU or the MFD MSG/MPU.
35-00-1-1	Change (O) to (M) because discovery and action is maintenance only.

(OLIVIEO	HIGHLIGHTS OF CHANGE					
The following	are the changes for Revision 8b to the HS-125 MMEL.					
23-60-1	Revised Static Wick relief expiration date to accommodate CDL development schedule and change Remarks to address minimum static wicks required.					
23-60-2	Revised Bonding Strap relief expiration date to accommodate CDL development schedule.					
27-60-3	Revised Rudder Gust Lock Flapper Door relief expiration date to accommodate CDL development schedule					
28-20-1	Add (M) and deactivation to Fuel Booster Pumps Remark to account for deactivation procedures in compliance with AFM Supplement.					
The following	are the changes for Revision 8c to the HS-125 MMEL.					
21-10-1	Add nomenclature change for Dump Valve to Vent Valve for DCPS.					
21-10-2	Add nomenclature change for Dump Valve to Vent Valve for DCPS					
21-10-3	Add nomenclature change for Dump Valve to Vent Valve for DCPS					
21-10-6-2 21-10-7	Add nomenclature change for Dump Valve to Vent Valve for DCPS Add nomenclature change for Dump Valve to Vent Valve for DCPS					
21-10-7	Add nomenclature change for Dump Valve to Vent Valve for DCPS Add nomenclature change for Dump Valve to Vent Valve for DCPS					
21-10-11	Add nomenclature change for Dump Valve to Vent Valve for DCPS					
21-10-13	Add nomenclature change for Dump Valve to Vent Valve for DCPS					
21-10-15	Add nomenclature change for Dump Valve to Vent Valve for DCPS					
21-10-16	Add nomenclature change for Dump Valve to Vent Valve for DCPS					
21-20-4	Add nomenclature change for Dump Valve to Vent Valve for DCPS					
21-30-3	Add Item applicability for DCPS & nomenclature change for Dump Valve to Vent Valve for DCPS					
21-30-4	Add Item applicability for DCPS					
21-30-5	Add nomenclature change for Dump Valve to Vent Valve for DCPS					
21-30-6-1	Add nomenclature change for Dump Valve to Vent Valve for DCPS					
21-30-6-2	Add nomenclature change for Dump Valve to Vent Valve for DCPS					
21-30-6-3	Add homenclature change for Dump Valve to Vent Valve for DCPS					
21-30-7	Add Item applicability for DCPS & clarify Item applicability is for automatic					
21-30-8	absolute regulators. Add Air Jet Pump relief. (O) Procedure is to configure and operate the					
21-60-4	airplane unpressurized, the same as Item 30-7. Add nomenclature change for Dump Valve to Vent Valve for DCPS					
21-60-7	Add nomenclature change for Dump Valve to Vent Valve for DCPS Add nomenclature change for Dump Valve to Vent Valve for DCPS					
21 00 7	The nomendation of the region of builty valve to vent valve for bot of

Guidelines for (O) & (M) Procedures						

The FOEB has identified a need for certain procedures to provide an adequate level of safety while providing relief for some items. These procedures must be established by the operator and may be based on the aircraft manufacturer's recommended procedures, Supplemental Type Certificate modifier's recommended procedures, or equivalent operator procedures. When recommended procedures are published the operator should comply with these procedures. If recommended procedures are not published, the following guidelines delineate the aspects to be considered by the operator in the development of required procedures.

Guidelines for (O) & (M) Procedures should be based on the Maintenance and Operational Procedures for the Minimum Equipment List *Hawker / 125 Series 1 thru 900XP*, (P/N CDMOP306094xx as amended) published by Hawker Beechcraft Corporation.
