Construction Management Firm Selected For San Ysidro Border Station

San Francisco, CA — The U.S. General Services Administration (GSA) today announced the selection of URS Corporation of San Francisco, CA as the construction management firm for the Expansion and Reconfiguration Project at the San Ysidro Border Station in San Diego, CA.

The expansion and reconfiguration of the existing Port of Entry at San Ysidro will include work in both the primary and secondary inspection areas. Up to 50 northbound primary inspection booths will be added, as well as administrative office space, overhead canopies, and a new pedestrian inspection building. The goal of the project is to improve traffic flow, safety, and security for both travelers and the inspection agencies.

The estimated construction cost range is between \$100 million and \$125 million. The project is scheduled for completion in the Fall of 2011.

URS Corporation is a leading provider of planning, design, systems engineering and integration, technology development, program and construction management, and operations and maintenance services. URS uses its broad-based facilities and logistics expertise to manage construction and renovation projects for US federal, state, and local governments, as well as Fortune 500 companies. URS-designed facilities and facility programs provide lasting value for clients and satisfy the needs of facility users and operators. URS operates in 20 countries worldwide.

GSA is a centralized federal procurement, property management, and policy agency created by Congress to improve government efficiency and help federal agencies better serve the public. It acquires, on behalf of federal agencies, office space, equipment, telecommunications, information technology, supplies and services. It also plays a key role in developing and implementing government-wide policies. GSA's 13,000 associates provide services and solutions for the office operations of more than one million federal workers in more than 8,000 government-owned and leased buildings in 2,000 U.S. communities.
