**SSA Publication No. 13-11871
Released: July 2008**

Preface

This report provides a broad income picture of a cross section of the population aged 55 or older, with special emphasis on income of the population aged 65 or older. The tabulations focus on the major sources and amounts of income in 2004, both separately and combined, for those age groups. The relative importance of particular sources to total income is measured for individual units, and the share of aggregate income from particular sources is measured for the aged as a whole. Proportions of the aged below the poverty line are presented in terms of the income of the families with whom they live. Several tables describe the economic situation of the aged with varying levels of Social Security benefits and total money income. These data are a valuable resource for policymakers and researchers in government and in the private sector.

Since 1941, the Social Security Administration (SSA) has periodically surveyed the economic situation of the aged as part of its legislative directive to study the most effective methods of providing economic security. Between 1963 and 1972, three national surveys were conducted that sampled nonbeneficiaries as well as beneficiaries. In 1963 and 1968, SSA administered its own questionnaire and combined data from those surveys with Social Security record data of the survey respondents. In 1972, SSA benefit record data were combined with U.S. Census Bureau data from the March Current Population Survey (CPS).

SSA then began a series of biennial studies of the income of the aged based on the CPS data alone. The first report in the series described the income of the population aged 55 or older, and in some cases the population aged 65 or older, using 1976 data. The second report described apparent changes in the income of those age groups between 1976 and 1978. In the interest of publishing the data in a more timely fashion, however, beginning with the 1980 report, publications in the series have consisted of tabulations only. Starting with the 1990 report, we expanded the series with a companion publication, *Income of the Aged Chartbook*, which highlights selected data in charts and tables for the population aged 65 or older.

Beginning with this expanded 2004 edition, we are publishing a broader range of statistics to meet user needs. Some of these changes include introducing new statistics on demographics and noncash benefits, as well as adding an Asian category for tabulations by race. In addition, we have substantially increased the number of tables on the family income of aged persons and reformatted or added some tables for consistency across sections. New text sections are included to further assist data users. This new format will be used on a regular basis starting with the 2006 income data.

The source of data for this series is the March supplement of the CPS, which samples a large cross section of households in the United States each year and provides detailed information annually on income and labor force participation. Comparisons of CPS estimates with more precise estimates adjusted by federal income tax records and Social Security records indicate that some sources are underreported in the CPS. Also, changes that have been made in the survey from time to time have improved the measurement of income and labor force participation but have reduced the comparability of estimates between years. Despite these shortcomings, CPS data still provide the best available measures of income for detailed subgroups of the aged.

The data in this publication are presented in terms of either aged units or aged persons. An aged unit is defined as either a married couple living together or a nonmarried person. Using aged units or aged persons as the units of analysis allows one to measure incomes of the entire aged population either separately from or in combination with the income of other members of the families with whom they live. Beginning with the 2000 edition, poverty status is presented only for aged persons in terms of their family income, because that measure is now the preferred measure of poverty.

The tables focus on the income of the aged population separately, whether or not they live with other relatives. In contrast, Census Bureau publications that use CPS data classify aged persons living with a younger relative who is considered the householder as families under 65. Thus, a portion of the aged population cannot be accounted for within the Census Bureau's categorization. But for the 21 percent of persons aged 65 or older who lived with other family members in 2004, the income of the families with whom they lived is important information.

Lynn Fisher and Anne DeCesaro were responsible for the preparation of this report. Staff of the Division of Information Resources edited the report and prepared it for publication. This report and *Income of the Aged Chartbook* are available on our Web site at <http://www.socialsecurity.gov/policy>.

For questions pertaining to the data, please call Lynn Fisher at 202-358-6308 or e-mail inc.aged@ssa.gov. For additional copies, please e-mail op.publications@ssa.gov.

About This Report

About This Report	1
Source of Data.	1
Glossary	3
Demographic Concepts	3
Income Definitions	3
Receipts Not Counted As Income	5
Other Key Concepts	6
Technical Information for Constructing Income Measures from the CPS Survey Data	7
Frequently Asked Questions	11

Section 1: Demographic Characteristics

Key Terms and Concepts for Section 1	15
Demographic Characteristics of Aged Persons	
1.1 Percentage with characteristic, by sex, race, Hispanic origin, Social Security beneficiary status, and age, 2004.	16
1.2 Percentage of wives with characteristic, by husband's race, Hispanic origin, Social Security beneficiary status, and age, 2004	25
1.3 Percentage of husbands with characteristic, by wife's race, Hispanic origin, Social Security beneficiary status, and age, 2004	27

Section 2: Income Sources

Key Terms and Concepts for Section 2	29
Income Sources of Aged Units	
2.A1 Percentage with income from specified source, by marital status and age, 2004	31

2.A2 Percentage with income from specified source, by Social Security beneficiary status, marital status, and age, 2004	34
2.A3 Percentage with income from specified source, by marital status, race, Hispanic origin, and age, 2004	36
2.A4 Percentage with income from specified source, by Social Security beneficiary status, race, Hispanic origin, and age, 2004	39
2.A5 Percentage distribution of units with number and type of retirement benefits, by marital status, age, and receipt of earnings and income from assets, 2004.	41

Income Sources of Units 65 or Older

2.A6 Percentage with income from specified source, by marital status and quintile of total money income, 2004	44
--	----

Income Sources of Beneficiary Units 65 or Older

2.A7 Percentage of Social Security beneficiary aged units with income from specified source, by proportion of income from Social Security and marital status, 2004	45
--	----

Family Income Sources of Aged Persons

2.B1 Percentage with family income from specified source, by sex, marital status, and age, 2004	46
2.B2 Percentage with family income from specified source, by family's Social Security beneficiary status and aged person's sex and age, 2004	53
2.B3 Percentage with family income from specified source, by sex, marital status, race, Hispanic origin, and age, 2004	55
2.B4 Percentage with family income from specified source, by family's Social Security beneficiary status and aged person's race, Hispanic origin, and age, 2004	62

Family Income Sources of Nonmarried Aged Persons

2.B5 Percentage with family income from specified source, by sex, marital status, and age, 2004	64
--	----

Family Income Sources of Persons 65 or Older

- 2.B6 Percentage with family income from specified source, by number of persons in family and quintile of per-capita family total money income, 2004 66
- 2.B7 Percentage with family income from specified source, by sex and ratio of family total money income to the poverty threshold, 2004 70

Family Income Sources of Persons 65 or Older in Beneficiary Families

- 2.B8 Percentage with family income from specified source, by proportion of family income from Social Security and sex, 2004 71

Section 3: Total Money Income

- Key Terms and Concepts for Section 3 73

Total Money Income of Aged Units

- 3.A1 Percentage distribution, by marital status and age, 2004 74
- 3.A2 Percentage distribution, by Social Security beneficiary status, marital status, and age, 2004 77
- 3.A3 Percentage distribution, by marital status, race, Hispanic origin, and age, 2004 79
- 3.A4 Percentage distribution, by Social Security beneficiary status, race, Hispanic origin, and age, 2004 82

Total Money Income of Beneficiary Units 65 or Older

- 3.A5 Percentage distribution of beneficiary units, by marital status and quintiles of Social Security benefits, 2004 84

Total Money Income Excluding Social Security of Aged Units

- 3.A6 Percentage distribution of aged units and Social Security beneficiary units, by marital status and age, 2004 85

Total Money Income of Beneficiary Aged Units

- 3.A7 Percentage distribution of Social Security beneficiary aged units, by proportion of income from Social Security and marital status, 2004 87

Family Total Money Income of Aged Persons

- 3.B1 Percentage distribution, by sex, marital status, and age, 2004 . 88
- 3.B2 Percentage distribution, by family's Social Security beneficiary status and aged person's sex, marital status, and age, 2004 95
- 3.B3 Percentage distribution, by sex, marital status, race, Hispanic origin, and age, 2004 101
- 3.B4 Percentage distribution, by family's Social Security beneficiary status and aged person's race, Hispanic origin, and age, 2004 108

Family Total Money Income of Persons 65 or Older

- 3.B5 Percentage distribution of persons in beneficiary families, by quintile of per-beneficiary Social Security benefits, 2004 . . 110
- 3.B6 Percentage distribution of persons in beneficiary families, by number of Social Security beneficiaries in family and quintile of per-beneficiary Social Security benefits, 2004 111

Family Total Money Income Excluding Social Security of Aged Persons

- 3.B7 Percentage distribution of aged persons and persons in Social Security beneficiary families, by family beneficiary status, sex, marital status, and age, 2004 114

Family Total Money Income of Persons 65 or Older in Beneficiary Families

- 3.B8 Percentage distribution of persons in beneficiary families, by proportion of family income from Social Security and sex, 2004 120

Section 4: Income from Earnings

- Key Terms and Concepts for Section 4 121

Earnings Income of Aged Units

- 4.A1 Percentage distribution of recipient units, by age, 2004 122
- 4.A2 Percentage distribution of recipient units, by marital status and age, 2004 123

4.A3	Percentage distribution of recipient units, by Social Security beneficiary status, marital status, and age, 2004	124
------	--	-----

Earnings Income of Units 65 or Older

4.A4	Percentage distribution of recipient units, by race, Hispanic origin, and marital status, 2004	125
4.A5	Percentage distribution of recipient units, by marital status and quintile of total money income, 2004	126

Family Earnings Income of Aged Persons

4.B1	Percentage distribution of persons in recipient families, by sex and age, 2004	127
------	--	-----

Family Earnings Income of Persons 65 or Older

4.B2	Percentage distribution of persons in recipient families, by sex and age, 2004	128
4.B3	Percentage distribution of persons in recipient families, by sex and marital status, 2004	129
4.B4	Percentage distribution of persons in recipient families, by Social Security beneficiary status, sex and marital status, 2004	130
4.B5	Percentage distribution of persons in recipient families, by race, Hispanic origin, and sex, 2004	131
4.B6	Percentage distribution of persons in recipient families, by quintile of per-capita family total money income, 2004	132
4.B7	Percentage distribution of persons in recipient families, by number of persons in family and quintile of per-capita family total money income, 2004	133

**Section 5:
Income from Social Security**

Key Terms and Concepts for Section 5	137
--	-----

Social Security Income of Aged Units

5.A1	Percentage distribution of beneficiary units, by age, 2004	138
5.A2	Percentage distribution of beneficiary units, by marital status and age, 2004	139

Social Security Income of Units 65 or Older

5.A3	Percentage distribution of beneficiary units, by race, Hispanic origin, and marital status, 2004	140
5.A4	Percentage distribution of beneficiary units, by marital status and quintile of total money income, 2004	141
5.A5	Percentage distribution of Social Security beneficiary units, by proportion of aged unit income from Social Security and marital status, 2004	142

Family Social Security Income of Aged Persons

5.B1	Percentage distribution of persons in Social Security beneficiary families, by sex and age, 2004	143
------	--	-----

Family Social Security Income of Persons 65 or Older

5.B2	Percentage distribution of persons in Social Security beneficiary families, by sex and age, 2004	144
5.B3	Percentage distribution of persons in Social Security beneficiary families, by sex and marital status, 2004	145
5.B4	Percentage distribution of persons in Social Security beneficiary families, by race, Hispanic origin, and sex, 2004	146
5.B5	Percentage distribution of persons in Social Security beneficiary families, by quintile of per-capita total family money income, 2004	147
5.B6	Percentage distribution of persons in Social Security beneficiary families, by number of persons in family and quintile of per-capita total family money income, 2004	148
5.B7	Percentage distribution of persons in Social Security beneficiary families, by proportion of family income from Social Security and sex, 2004	151

**Section 6:
Income from Pensions**

Key Terms and Concepts for Section 6	153
--	-----

Pension Income of Aged Units

6.A1	Percentage distribution of recipient units, by type of pension and age, 2004	154
------	--	-----

6.A2	Percentage distribution of recipient units, by type of pension, marital status, and age, 2004	157
6.A3	Percentage distribution of recipient units, by type of pension, Social Security beneficiary status, marital status, and age, 2004	160
Pension Income of Units 65 or Older		
6.A4	Percentage distribution of recipient units, by type of pension, race, Hispanic origin, and marital status, 2004	163
6.A5	Percentage distribution of recipient units, by type of pension, marital status, and quintile of total money income, 2004	166
Family Pension Income of Aged Persons		
6.B1	Percentage distribution of persons in recipient families, by sex, type of pension, and age, 2004	169
Family Pension Income of Persons 65 or Older		
6.B2	Percentage distribution of persons in recipient families, by type of pension, sex, and age, 2004	172
6.B3	Percentage distribution of persons in recipient families, by type of pension, sex, and marital status, 2004	175
6.B4	Percentage distribution of persons in recipient families, by type of pension, Social Security beneficiary status, sex, and marital status, 2004	178
6.B5	Percentage distribution of persons in recipient families, by type of pension, race, Hispanic origin, and sex, 2004	181
6.B6	Percentage distribution of persons in recipient families, by type of pension and quintiles of per-capita total family money income, 2004	184
6.B7	Percentage distribution of persons in recipient families, by type of pension, number of persons in family, and quintiles of per-capita total family money income, 2004	187

**Section 7:
Income from Assets**

Key Terms and Concepts for Section 7	197	
Asset Income of Aged Units		
7.A1	Percentage distribution of recipient units, by age, 2004.	198

7.A2	Percentage distribution of recipient units, by marital status and age, 2004	199
7.A3	Percentage distribution of recipient units, by Social Security beneficiary status, marital status, and age, 2004	200

Asset Income of Units 65 or Older

7.A4	Percentage distribution of recipient units, by race, Hispanic origin, and marital status, 2004	201
7.A5	Percentage distribution of recipient units, by marital status and quintile of total money income, 2004	202

Family Asset Income of Aged Persons

7.B1	Percentage distribution of persons in recipient families, by sex and age, 2004	203
------	--	-----

Family Asset Income of Persons 65 or Older

7.B2	Percentage distribution of persons in recipient families, by sex and age, 2004	204
7.B3	Percentage distribution of persons in recipient families, by sex and marital status, 2004	205
7.B4	Percentage distribution of persons in recipient families, by Social Security beneficiary status, and aged person's sex and marital status, 2004.	206
7.B5	Percentage distribution of persons in recipient families, by race, Hispanic origin, and sex, 2004	207
7.B6	Percentage distribution of persons in recipient families, by quintile of per-capita total family money income, 2004.	208
7.B7	Percentage distribution of persons in recipient families, by number of persons in family and quintile of per-capita total family money income, 2004	209

**Section 8:
Importance of Income Sources
Relative to Total Income**

Key Terms and Concepts for Section 8	213	
Relative Importance of Income Sources for Aged Units		
8.A1	Percentage distribution of units, by source of income and age, 2004	214

8.A2	Percentage distribution of units, by source of income, marital status, and age, 2004	218
8.A3	Percentage distribution of units, by source of income, Social Security beneficiary status, marital status, and age, 2004	222
Relative Importance of Income Sources for Units 65 or Older		
8.A4	Percentage distribution of units, by source of income, race, Hispanic origin, and marital status, 2004	225
8.A5	Percentage distribution of units, by source of income, marital status, and quintile of total money income, 2004	229
Relative Importance of Family Income Sources for Aged Persons		
8.B1	Percentage distribution, by source of family income, sex, and age, 2004	233
Relative Importance of Family Income Sources for Persons 65 or Older		
8.B2	Percentage distribution, by income source, sex, and age, 2004	237
8.B3	Percentage distribution, by income source, sex, and marital status, 2004	241
8.B4	Percentage distribution, by source of family income, family Social Security beneficiary status, sex, and marital status, 2004	245
8.B5	Percentage distribution, by source of family income, race, Hispanic origin, and sex, 2004	248
8.B6	Percentage distribution, by source of family income, race, Hispanic origin, sex, and marital status, 2004.	252
8.B7	Percentage distribution, by source of family income and quintile of per-capita family total money income, 2004	256
8.B8	Percentage distribution, by source of family income, number of persons in family, and quintile of per-capita family total money income, 2004	260
8.B9	Percentage distribution, by source of family income, sex, and ratio of family total money income to the poverty threshold, 2004	271

**Section 9:
Importance of Social Security Relative
to Total Income (Beneficiary Aged Units
and Persons in Beneficiary Families Only)**

Key Terms and Concepts for Section 9	275	
Relative Importance of Social Security for Beneficiary Aged Units		
9.A1	Percentage distribution of beneficiary units, by age, 2004	276
9.A2	Percentage distribution of beneficiary units, by marital status and age, 2004	277
Relative Importance of Social Security for Beneficiary Units 65 or Older		
9.A3	Percentage distribution of beneficiary units, by race, Hispanic origin, and marital status, 2004	278
9.A4	Percentage distribution of beneficiary units, by marital status and quintile of total money income, 2004	279
Relative Importance of Social Security for Persons 65 or Older in Beneficiary Families		
9.B1	Percentage distribution of persons in beneficiary families, by sex and age, 2004	280
9.B2	Percentage distribution of persons in beneficiary families, by sex and age, 2004	281
9.B3	Percentage distribution of persons in beneficiary families, by sex and marital status, 2004	282
9.B4	Percentage distribution of persons in beneficiary families, by race, Hispanic origin, and sex, 2004	283
9.B5	Percentage distribution of persons in beneficiary families, by race, Hispanic origin, sex, and marital status, 2004	284
9.B6	Percentage distribution of persons in beneficiary families, by quintile of per-capita total family money income, 2004.	285
9.B7	Percentage distribution of persons in beneficiary families, by number of persons in family and quintile of per-capita family total money income, 2004	286

9.B8	Percentage distribution of persons in beneficiary families, by sex and ratio of family total money income to the poverty threshold, 2004	288
------	--	-----

Section 10:

Shares of Aggregate Income, by Source

Key Terms and Concepts for Section 10	289
---	-----

Shares of Aggregate Income for Aged Units

10.1	Percentage of aggregate income of aged units from specified source, by age, 2004	291
10.2	Percentage of aggregate income of aged units from specified source, by marital status and age, 2004	292
10.3	Percentage of aggregate income of aged units from specified source, by beneficiary status, marital status, and age, 2004	293

Shares of Aggregate Income for Units 65 or Older

10.4	Percentage of aggregate income of aged units from specified source, by race, Hispanic origin, and marital status, 2004	294
10.5	Percentage of aggregate income of aged units from specified source, by marital status and quintile of total money income, 2004	295

**Section 11:
Poverty Status of Aged Persons
Based on Family Income**

Key Terms and Concepts for Section 11	297
---	-----

Poverty Status of Aged Persons Based on Family Income

11.1	By Social Security beneficiary status, marital status, race, Hispanic origin, sex, and age, 2004	298
------	--	-----

Poverty Status of Persons 65 or Older Based on Family Income

11.2	By Social Security beneficiary status, marital status, race, Hispanic origin, sex, and age, 2004	301
11.3	Social Security beneficiaries, by marital status, race, Hispanic origin, sex and age, 2004	304

**Poverty Status of Persons 65 or Older
in Beneficiary Families Based on Family Income**

11.4	Persons in Social Security beneficiary families, by proportion of family from Social Security, sex, and age, 2004	307
------	---	-----

About This Report

About This Report

This biennial report presents detailed statistical information on the major sources and amounts of income for people aged 55 or older. The tabulations focus on the major sources of total income by age, sex, marital status, race, and Hispanic origin. Several tables describe the economic situation of the aged with varying levels of Social Security benefits. Their poverty status is presented in terms of the income of the families they live with.

¹ For a detailed description of the basic CPS sample design, see U.S. Census Bureau, *Current Population Survey: Design and Methodology*, Technical Paper No. 63RV (Washington, DC: Government Printing Office, March 2002).

Source of Data

Data for this series are from the March Current Population Survey (CPS) of the U.S. Census Bureau.¹ The CPS samples a large cross section of households in the United States each year (approximately 99,000 in March 2005). The March supplement gathers detailed information on income and labor force participation of each person 15 years of age or older in the sample households. For this series, the Social Security Administration (SSA) creates a subsample of persons 55 or older arranged in aged units. A separate data record is made for each married couple living together—at least one of whom is 55 or older—and for each nonmarried person 55 or older. Married persons living apart are classified as nonmarried persons.

From time to time, changes have been made in the survey. Although the changes have improved the measurement of income and labor force participation, they have reduced the comparability of estimates made in different years.²

²These changes are discussed in some detail in U.S. Census Bureau, *Current Population Reports, Series P60*, various years.

Glossary

Income of the Population 55 or Older is derived from the public-use file of the March Annual Social and Economic Supplement to the Current Population Survey. For this reason, most definitions in this Glossary are taken directly from documentation of the Current Population Survey and publications of the U.S. Census Bureau; when appropriate, the source of each definition is noted. The aged unit is not a concept used by the Census Bureau and as a result, no citation is given.

Information and definitions of concepts described here (except the aged unit and demographic characteristics of the aged unit) can be found at <http://www.census.gov/population/www/cps/cpsdef.html>. Further discussion of income sources and receipts not counted as income is taken from Section 9 of the technical documentation for the March 2005 Current Population Survey, available at <http://www.census.gov/apsd/techdoc/cps/cpsmar05.pdf>.

Demographic Concepts

Age. Age classification is based on the age of the person at his or her last birthday as of March 2005. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

Aged unit. With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older. Persons who are separated or married but not living with their spouse are included in the nonmarried persons category.

Certain differences exist between Census Bureau and SSA figures because the units of analysis are not directly comparable. Aged persons living with a younger relative who is considered the householder are classified by the Census Bureau as members of nonaged families. Also, nonmarried individuals are treated simply as nonmarried persons by SSA. In comparison, the Census Bureau counts nonmarried persons living with other relatives as part of a family and nonmarried persons who are living alone or with nonrelatives as unrelated individuals. The Census Bureau's family category includes both married couples and those non-married persons who are living with relatives.

Census data show that the number of households with the householder aged 65 or older was 23,135,000 in 2004.¹ In comparison, SSA tabulations show that there were 35,213,000 persons and 26,865,000 units aged 65 or older in 2004. The SSA count generally includes the Census Bureau's aged households plus some aged units living in nonaged households or living with other aged units in the same household. The number of aged households was 86 percent of the number of aged units.

Family. A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-

¹ DeNavas-Walt, Carmen, Bernadette D. Proctor, and Cheryl Hill Lee, U.S. Census Bureau, Current Population Reports, P60-229, *Income, Poverty, and Health Insurance Coverage in the United States: 2004*, Table 1. <http://www.census.gov/prod/2005pubs/p60-229.pdf>.

family members) are considered as members of one family.²

Hispanic origin. Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

Marital status. Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

Race. A person's race is his or her reported race. A married couple's race is defined as the race of the husband. Beginning with the 2002 edition, respondents were allowed to report more than one race. The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of these changes, data on race are not directly comparable to editions prior to 2002, and one should use caution when interpreting changes in the racial composition of the elderly over time. In 2002, less than 1 percent of persons aged 55 or older reported more than one race.

Income Definitions

Money income data are collected for all people 15 or older in the sample. Money income includes earnings, unemployment compensation, workers' compensation, Social Security, Supplemental Security Income, public assistance, veterans' payments, survivor benefits, pension or retirement income, interest, divi-

² U.S. Census Bureau. *Current Population Survey (CPS) Definitions and Explanations*. <http://www.census.gov/population/www/cps/cpsdef.html>. Last revised January 20, 2004.

dends, rents, royalties, income from estates and trusts, educational assistance, alimony, child support, cash assistance from outside the household, and other miscellaneous sources. It is income before deductions for taxes or other expenses and does not include lump-sum payments or capital gains.³

Total Money Income. The term is defined as the arithmetic sum of money wages and salaries, net income from self-employment, and income other than earnings. The total income of a household is the arithmetic sum of the amounts received by all income recipients in the household.⁴

Earnings is the sum of income from wages and salaries and income from self-employment.

Wages and salaries. Money wages or salary is defined as total money earnings received for work performed as an employee during the income year. It includes wages, salary, Armed Forces pay, commissions, tips, piece-rate payments, and cash bonuses earned, before deductions are made for taxes, bonds, pensions, union dues, and so forth. Earnings for self-employed incorporated businesses are considered wage and salary.⁵

Self-employment. Income from self-employment is the combined income from farm and nonfarm self-employment.

Farm self-employment is net money income (gross receipts minus operating expenses) from the operation of a farm by a person on their own account, as an owner, as a renter, or as a shareholder. Nonfarm self-employment is net money

How Income Is Measured

“For each person in the sample 15 years and over, the Annual Social and Economic Supplement (ASEC) asks questions on the amount of money income received in the preceding calendar year. . . .

It should be noted that although the income statistics refer to receipts during the preceding calendar year, the demographic characteristics, such as age, labor force status, and household composition, are as of the survey date. The income of the household does not include amounts received by people who were members during all or part of the previous year if these people no longer resided in the household at the time of interview. The Current Population Survey (CPS) collects income data for people who are current residents but did not reside in the household during the previous year.

Data on income collected in the ASEC by the U.S. Census Bureau cover money income received (exclusive of certain money receipts such as capital gains) before payments for personal income taxes, social security, union dues, Medicare deductions, etc. Therefore, money income does not reflect the fact that some families receive noncash benefits, such as food stamps, health benefits, subsidized housing, and goods produced and consumed on the farm. In addition, money income does not reflect the fact that noncash benefits are also received by some nonfarm residents, which often take the form of the use of business transportation and facilities, full or partial payments by business for retirement programs, medical and educational expenses, etc. Data users should consider these elements when comparing income levels. Moreover, readers should be aware that for many different reasons there is a tendency in household surveys for respondents to underreport their income. Based on an analysis of independently derived income estimates, the Census Bureau determined that respondents report income earned from wages or salaries much better than other sources of income, and that the reported wage and salary income is nearly equal to independent estimates of aggregate income.” (Source: DeNavas-Walt, Carmen, Bernadette D. Proctor, and Cheryl Hill Lee, U.S. Census Bureau, Current Population Reports, P60-229, *Income, Poverty, and Health Insurance Coverage in the United States: 2004*, page 29. <http://www.census.gov/prod/2005pubs/p60-229.pdf>).

income (gross receipts minus expenses) from one’s own business, professional enterprise, or partnership.⁶

Retirement benefits is the sum of Social Security benefits and public and private pensions.

Social Security. Social Security includes retired-worker benefits, dependents’ or survivor benefits, disability benefits made by the Social Security Administration prior to deductions for medical insurance, and railroad retirement insurance checks from the U.S. Government.

⁶ Ibid.

“Medicare” reimbursements are not included.⁷ In addition, fewer than 20 persons received transitionally insured benefits, a special type of retirement benefit, in 2004.⁸ For further information on types of Social Security benefits, see Social Security’s *Annual Statistical Supplement 2005*, pages 18-19.

Pensions. Many employers and unions have established pension program for their employees so that upon retirement employees will receive regular income to replace their earnings.

⁷ U.S. Census Bureau. *Current Population Survey (CPS)—Definitions and Explanations*. <http://www.census.gov/population/www/cps/cpsdef.html>. Last revised January 20, 2004.

⁸ http://www.ssa.gov/OP_Home/rulings/di/07/SSR81-08-di-07.html.

Many of these programs also provide income to employees if they become severely disabled, or to their survivors upon death.⁹ Nonregular (nonannuitized or lump-sum) withdrawals from IRA, Keogh, and 401(k) plans are not included as income.

Employer pensions. Employer pensions include pensions from Railroad Retirement, government employee pensions, and private pensions and annuities.

Government employee pensions. Government employee pensions include regular payments from federal government (civil service), military, and state or local governments.

Private pensions and annuities. Private pensions and annuities include regular payments from companies or unions, annuities or paid-up insurance policies, individual retirement accounts (IRAs), Keogh, or 401(k) payments.

Asset income includes interest, dividends, income from estates or trusts, and net rental income or royalties.

Interest income. Interest includes payments people receive (or have credited to their accounts) from bonds, treasury notes, IRAs, certificates of deposit, interest-bearing savings and checking accounts, and all other investments that pay interest.¹⁰

Dividends. Dividends include income people receive from stock holdings and mutual fund shares. The CPS does not include capital gains from the sale of stock holdings as income.¹¹

¹⁰ U.S. Census Bureau. *Current Population Survey (CPS)—Definitions and Explanations*. <http://www.census.gov/population/www/cps/cpsdef.html>. Last revised January 20, 2004.

¹¹ Ibid.

Rents, royalties, and estates and trusts.

Include net income people receive from the rental of a house, store, or other property, receipts from boarders or lodgers, net royalty income, and periodic payments from estate or trust funds.¹²

Unemployment compensation. Payments include those the respondent received from government unemployment agencies or private companies during periods of unemployment and any strike benefits the respondent received from union funds.¹³

Workers' compensation. Payment includes those received periodically from public or private insurance companies for injuries received at work.¹⁴

Veterans' payments. Include payments disabled members of the Armed Forces or survivors of deceased veterans receive periodically from the Department of Veterans Affairs for education, on-the-job training, and means-tested assistance.¹⁵

Supplemental Security Income. Supplemental Security Income includes payments made by federal, State, and local welfare agencies to low-income persons who are aged (65 or older), blind, or disabled and who have limited income and financial resources.¹⁶

For more information on the SSI program, you may want to read our publication called "SSI" (Publication No. 05-11000). You may also want to read our introductory material in the booklet, "Understanding SSI." (Source: FAQ Answer ID 93 or visit the Social Security website at www.ssa.gov.)

Income Sources-Other Public Assistance.

Public assistance or welfare payments include public assistance payments such as Aid to Families with Dependent Children (now Temporary Aid to Needy Families) and general assistance.¹⁷

Receipts Not Counted As Income

Receipts from the following sources are not included as income: (1) money received from the sale of property, such as stocks, bonds, a house, or a car (unless the person is engaged in the business of selling such property, in which case the net proceeds is counted as income from self-employment); (2) withdrawals of bank deposits; (3) money borrowed; (4) tax refunds; (5) gifts; and (6) lump-sum inheritances of insurance payments.¹⁸

Noncash benefits include Food Stamps, energy assistance, and housing assistance. Receipt of noncash benefits is only reported in the section on the sources of income received. No dollar values are assigned to the noncash benefits in this publication, and they are not included in total money income. A person or aged unit is indicated as having received a noncash benefit if any person in the household received food, energy, or housing assistance.

Food. In this publication, food noncash benefits are comprised solely of food stamps. School breakfast, lunch, and other food assistance programs are not covered. The Food Stamp Act of 1977 was enacted for the purpose of increasing the food purchasing power of eligible households through the use of coupons to purchase food. The Food and Nutrition Service of the U.S. Department of Agriculture (USDA) administers the Food Stamp Program through State and local welfare offices. The Food Stamp Program

¹⁷ Ibid.

¹⁸ Ibid.

is the major national income support program which provides benefits to all low-income and low-resource households regardless of household characteristics (for example, sex, age, disability, etc.).¹⁹

Energy Assistance Program. The Low-Income Home Energy Assistance Program provides financial assistance to qualified households to help them pay heating costs. The program is funded by the federal government and administered by the States under broad guidelines.²⁰

Housing Assistance. There are some programs through which housing assistance is provided to low-income families and individuals living in public or privately owned dwellings. Two of the more common types of programs in which federal, State, and local funds are used to subsidize private sector housing are rent supplement and interest reduction plans. Under a rent supplement plan the difference between the “fair market” rent and the rent charged to the tenant is paid to the owner by a government agency. Under an interest reduction program the amount of interest paid on the mortgage by the owner is reduced so that subsequent savings can be passed along to low-income tenants in the form of lower rent charges. A recipient unit can either be a family of two or more related persons or an individual who is handicapped, elderly, or displaced by urban renewal or natural disaster.

Housing assistance questions differ from other questions covering noncash benefits in that they establish current reciprocity status in March 2005 rather than reciprocity status during 2004.²¹

Other Key Concepts

Poverty. The Census Bureau uses a set of money income thresholds that vary by family size and composition to detect who is poor. If a family’s total income is less than that family’s threshold, then that family, and every individual in it, is considered poor. The poverty thresholds do not vary geographically, but they are updated annually for inflation with the Consumer Price Index (CPI-U). The official poverty definition counts money income before taxes and excludes capital gains and noncash benefits (such as public housing, Medicaid, and food stamps).

Poverty statistics are based on a definition developed by Mollie Orshansky of the Social Security Administration (SSA) in 1964 and revised in 1969 and 1981 by interagency committees. This definition was established as the official definition of poverty for statistical use in all Executive departments in 1969 (in Bureau of the Budget Circular No. A-46) and was reconfirmed in the Office of Management and Budget Statistical Policy Directive No. 14. For further details, see the section, “Changes in the Definition of Poverty,” in Current Population Reports, Series P-60, No. 133.

The poverty thresholds are increased each year by the same percentage as the annual average Consumer Price Index (CPI). The poverty thresholds are currently adjusted using the annual average CPI-U (1982-84 = 100).

For further information on how the poverty thresholds were developed and subsequent changes in them, see Gordon M. Fisher, “The Development and History of the Poverty Thresholds,” Social Security Bulletin, vol. 55, no. 4, Winter 1992, pp. 3-14.²²

Discussions of alternative measures of poverty are available in Citro and Michael (1995).²³ The U.S. Census Bureau also publishes data on alternative measures of poverty; one of the most recent releases using Current Population Survey data is Dalaker (2005).²⁴

Relative Importance of Income Source. The relative importance of a source is the ratio of the amount of income from a given source to total income.

Aggregate Income Share. An aggregate income share is the ratio of the amount of income from a given source to total income for an entire subpopulation. Aggregate income share tables are distributions of dollars by source.

Technical Information for Constructing Income Measures from the CPS Survey Data

The information provided here is intended to help users familiar with working with survey data to reproduce statistics in this publication or construct additional comparable measures. For questions regarding the survey variables themselves, please consult the technical documentation for the March 2005 CPS (<http://www.census.gov/apsd/techdoc/cps/cpsmar05.pdf>).

Assigning persons to aged units

An aged unit can be either a nonmarried person or a married couple. The person record is used for nonmarried persons (A-MARITL equals 3,4,5,6, or 7). To create a married couple, a person with A-MARITL equals 1 or 2 is assigned to his or her spouse by matching A-LINENO of one person to the A-SPOUSE of another person in the same household (PH-SEQ is the same for both persons).

Variables used to calculate income

These are the income variables for an individual. To obtain total income for an aged unit, sum amounts over the married couple or over the nonmarried person. To obtain family totals, sum over all family members (those with the same FH-SEQ and FFPOS).

Frequently Asked Questions

There are statistics for persons, aged units, and the family income of persons. What is the difference? Which statistics should I use?

The wider variety of tables incorporated in this edition gives more options to users needing information on the income of the aged. The questions asked about the income of the elderly often fall into one of two categories: what income do the elderly provide for themselves and those they live with, and what income is available as a resource for the elderly.

Statistics for persons are based solely on the income and demographic attributes (age, sex, race, Hispanic origin) of each person; no spousal or other family income are included. Tables on person income are designed to provide information on the resources an aged person contributes to their living unit. These tables are not designed to answer questions on the resources available to an aged person.

Statistics for the family income of persons are also based on the demographic attributes (age, sex, race, Hispanic origin) of each person. Total income from all family members (related through blood, marriage, or adoption) is treated as another attribute of the person. If any person in the family has income from a specific source the aged person is considered to be in a recipient family. These tables are designed to answer questions on the resources available to an aged person.

Statistics for aged units treat each marital unit (married couple or nonmarried individual) as one unit. A nonmarried individual has only their income and demographic attributes. The

age of a married couple is the husband's age if he is at least 55—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife. All other demographic characteristics, including the statistical weight, are that of the husband. Income for the married couple is the sum of both spouses' income; if either spouse has income from a specific source the married couple is considered to be a recipient unit. Tables on aged unit income are designed to be flexible enough to answer both types of questions, but with a couple of qualifications. First, unlike person tables in which each person counts as a unit, aged unit tables treat each married couple as 1 unit and each nonmarried person as 1 unit. Interpreting aged unit tables like a person table will emphasize the economic well-being of nonmarried persons relative to married persons. Second, the aged unit tables exclude the income of other family members, which may not provide a complete picture of the resources available to the unit.

The table below illustrates the differences across units for total money income is taken from Tables 3.A1, 3.B1, and 3.C1. Median income is higher for aged units than it is for persons because aged unit income includes spousal income. Family income of persons 65 or older is higher still because it includes income from all family members, not just a spouse. The number (thousands) is the same for persons and family income of persons because only the attribute of interest (person versus family income) has changed; both are concerned with the same population—persons 65 or older. The number of aged units is lower because a married couple is counted as 1 unit, not 2 persons.

	Persons 65 or older	Aged units 65 or older	Family income of persons 65 or older
Median income (dollars)	14,710	20,481	28,698
Number (thousands)	35,213	26,865	35,213

I have seen other statistics on the income of the elderly that are different from these. What would cause these differences?

Statistics may differ across publications because different data are used. Income of the Population 55 or Older uses the March Supplement to the Current Population Survey, which is conducted by the U.S. Census Bureau. Some publications producing statistics on the income of the elderly may use other surveys like the Survey of Income and Program Participation or the Health and Retirement Survey. Still other publications, such as Social Security's Annual Statistical Supplement, use administrative data.

Different publications also may not employ the same procedures for similar statistics. The units (persons, aged units, families, households, and so forth) may differ. One methodology may exclude income or units that another does not.

The statistics below on the average amount of money the elderly received from Social Security illustrate these points. The first column shows the number of beneficiaries 65 or older and median Social Security income from Table 5.A1. The second column shows the number of ben-

eficiaries and average benefit from Table 5.A16 of the Annual Statistical Supplement, 2005. The number of beneficiaries differs because two different sources of data were used. The Annual Statistical Supplement statistics are based on a 10-percent sample of administrative records from Social Security's Master Beneficiary Record drawn for December 2004. The administrative records include institutionalized beneficiaries (for example, in nursing homes and hospitals) and do not rely on accurate self-reporting by the beneficiary to a survey. The benefit amounts differ not only because the data are different, but also because the Income of the Population statistic is the median of the annual amount received and the Annual Statistical Supplement statistic is the mean of the monthly benefit in December 2004.

	Income of the Population Table 5.A1	Supplement Table 5.A16
Beneficiaries 65 or older (thousands)	31,045	33,706
Median income (dollars)	10,399	...
Average monthly benefit	...	923.60
Average monthly benefit (annualized)	...	11,083.20

Why are there only 4 quintile limits?

The quintile limits indicate the boundaries between the quintiles. The bottom quintile has income below the lowest quintile limit with no lower boundary. Likewise, the top quintile has income of at least the highest quintile limit with no upper boundary. The middle quintiles are bounded on the top and bottom by the quintile limits.

Why isn't Social Security differentiated by type of benefit?

Social Security is not broken out by type of benefit because a person may receive more than one type of Social Security benefit (such as retired-worker benefit and spouse benefit). Aged units and families may have even more combinations of benefits (such as one spouse receiving retired-worker benefits and the other receiving disability benefits). For this reason, it also should not be assumed that beneficiary units 65 or older or persons 65 or older in beneficiary families are receiving retirement benefits, even though disability benefits are converted to retired-worker benefits at full retirement age.

Why don't you differentiate between income from defined benefit (DB) pensions and income from defined contribution (DC) plans like IRAs and 401(k) accounts?

We do not publish statistics differentiating between DB and DC pensions because a significant portion of payments from DC plans are not collected in the Current Population Survey. The Census Bureau only includes "regular payments" from retirement, survivor, and disability income in its definition of total money income. Many people do not choose to annuitize their pension accounts and instead make withdrawals from their pension accounts on their own. These withdrawals are not part of total money income, and data are not collected on withdrawals from pension accounts in the March Supplement to the Current Population Survey.¹

¹ A paper by Marc Roemer assessing the quality of income data in the March Current Population Survey and Survey of Income and Program Participation provides further insight into what pensions are and are not counted as money income. See "Assessing the Quality of the March Current Population Survey and the Survey of Income and Program Participation Income Estimates, 1990-1996," unpublished, but available at www.census.gov/hhes/www/income/assess1.pdf.

Do the statistics on receipt of asset income and the receipt of pension income in Section 2 indicate whether an elderly person has assets or a pension account?

No. The March Supplement of the Current Population Survey does not ask about asset and pension holdings, and not all asset and pension income is included in the Census Bureau's definition of total money income. Two notable exclusions are withdrawals from defined contribution pension accounts and capital gains or losses. Only "regular payments" from retirement, survivor, and disability income are included as pension income. Many people do not choose to annuitize their pension accounts and instead receive lump sums or make withdrawals from their pension accounts on their own. These withdrawals are not included as part of pension or total money income. Using receipt of income from assets or pensions will underestimate asset or pension holdings.

What is the difference between the relative importance of an income source in Sections 9 and 10 and a source's share of aggregate income in Section 11?

The most important difference between the two concepts is that the relative importance of an income source is based on aged units/family income of persons, while a share of aggregate income is an average over dollars. This means that the relative importance of Social Security for an aged unit is calculated by dividing each aged unit's Social Security income by its total income. Based on the ratio of Social Security income to total income, aged units are then placed in the appropriate row of the table (0 percent of income from Social Security, 1 percent to 19 percent of income from Social Security, and so forth). Only aged units with positive total income and nonnegative earnings and asset income are included. The mean at the bottom of each panel is an average of the ratio of Social Security

income to total income. The measures of relative importance of income sources in Sections 9 and 10 are designed to examine the resources available to an elderly person or aged unit.

On the other hand, aggregate income shares are designed to answer the question of what income sources the elderly as a whole are providing to their living units. Income provided by the nonelderly (in the case of aged units, spouses may be nonelderly) is excluded, even though it may be considered a resource for an aged person/unit. The Social Security share of aggregate income for persons 65 or older is the total number of dollars of Social Security received by persons 65 or older divided by the total number of dollars received by the elderly from all sources of income. Only the total number of dollars matters for aggregate income shares; neither the number of persons or aged units nor the distribution of money is taken into account.

I can't find the information I need. What are some other sources of data?

A good source of data on Social Security benefits and Supplemental Security Income is in Social Security Administration's Annual Statistical Supplement. It and other data publications from Social Security are located on Social Security Administration Office of Retirement and Disability Policy's data Web site, http://www.ssa.gov/policy/data_alpha.html.

The Census Bureau also has a series of publications based on the Current Population Survey, the most recent of which is called *Income, Poverty, and Health Insurance Coverage in the United States: 2004*. Several years of these reports can be accessed through the Census Bureau's Income Web site, <http://www.census.gov/hhes/www/income/income.html>. The Internal Revenue Service's Statistic of Income Division produces data on income which is

accessible through the IRS's Tax Statistics Web site, <http://www.irs.gov/taxstats/>.

Data on a variety of topics, including income, wealth, and consumption can be found in the Statistical Abstract of the United States through the Census Bureau at <http://www.census.gov/statab/www/>. The Bureau of Labor Statistics produces a series of reports on consumption from its Consumer Expenditure Survey. These reports and other data on consumption can be found at <http://www.bls.gov/cex/>. Data on wealth are included in the Survey of Consumer Finances (Federal Reserve Board, <http://www.federalreserve.gov/pubs/oss/oss2/scfindex.html>), the Panel Study of Income Dynamics (University of Michigan, <http://www.psidonline.isr.umich.edu/>), and through the Census Bureau's Housing and Household Economic Statistics Division (<http://www.census.gov/hhes/www/wealth/wealth.html>).

I can't find the answer to my question. Whom do I contact?

If you have questions about how the statistics in this publication were calculated, please contact Lynn Fisher at 202-358-6308. If you would like to request a copy of this publication, e-mail op.publications@ssa.gov. If you have questions regarding the Current Population Survey, please visit the Census Bureau's CPS Web site <http://www.bls.census.gov/cps/cpsmain.htm>. The technical documentation for the March 2005 Supplement is located at <http://www.census.gov/aprd/techdoc/cps/cpsmar05.pdf>. If you have questions regarding your personal Social Security records, including benefits and earnings history, please call 1-800-772-1213, visit <http://www.ssa.gov/onlineservices/> or contact your local Social Security field office.

Section 1: Demographic Characteristics

Key Terms and Concepts for Section 1¹

Age. Age classification is based on the age of the person at his or her last birthday as of March 2005. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

Aged unit. With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

Marital status. Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

Race. The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

Hispanic origin. Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

Family. A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

Social Security beneficiary. A beneficiary may be receiving retired-worker-benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

¹ For more information, consult the Glossary at the front of this publication.

Demographic Characteristics of Aged Persons

Table 1.1
Percentage with characteristic, by sex, race, Hispanic origin, Social Security beneficiary status, and age, 2004

Section 2: Income Sources

Key Terms and Concepts for Section 2 ¹

Table characteristics

Age. Age classification is based on the age of the person at his or her last birthday as of March 2005. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

Aged unit. With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

Marital status. Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

Race. The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

Hispanic origin. Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

Family. A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

Social Security beneficiary. A beneficiary may be receiving retired-worker-benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

Poverty. The Census Bureau uses a set of money income thresholds that vary by family size and composition to detect who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor.

Per capita income. Per capita income is total family income divided by the number of persons in the family.

The ratio of Social Security income to total income. This ratio is defined as Social Security income divided by total income. Units and persons in families with less than \$1 of total income or negative earnings or asset income are excluded from these tables.

Income sources

Earnings

Wages and salaries. Wages and salaries is defined as total money earnings received for work performed as an employee during the income year. It includes wages, salary, Armed Forces pay, commissions, tips, piece-rate payments, and cash bonuses earned, before deductions are made for taxes, bonds, pensions, union dues, and so forth. Earnings for self-employed incorporated businesses are considered wage and salary.

Self-employment. Income from self-employment is the combined income from farm and nonfarm self-employment.

Retirement benefits

Social Security. Includes retired-worker benefits, dependents' or survivor benefits, disability benefits, and transitionally insured benefits.

Government employee pensions. Government employee pensions include regular payments from federal government (civil service), military, and state or local governments.

Private pensions and annuities. Private pensions and annuities include regular payments from companies or unions, annuities or paid-up insurance policies, individual retirement accounts (IRAs), Keogh, or 401(k) payments. Nonregular (nonannuitized or lump-sum) withdrawals from IRA, Keogh, and 401(k) plans are not included as income.

Asset income

Interest income. Interest includes payments people receive (or have credited to their accounts) from bonds, treasury notes, IRAs, certificates of deposit, interest-bearing savings and checking accounts, and all other investments that pay interest.

Dividends. Dividends include income people receive from stock holdings and mutual fund shares. The CPS does not include capital gains from the sale of stock holdings as income.

Rents, royalties, and estates and trusts. Include net income people receive from the rental of a house, store, or other property, receipts from boarders or lodgers, net royalty income, and periodic payments from estate or trust funds.

Unemployment compensation. Payments include those the respondent received from government unemployment agencies or private companies during periods of unemployment and any strike benefits the respondent received from union funds.

Workers' compensation. Payment includes those received periodically from public or private insurance companies for injuries received at work Veterans' payments. Include payments disabled members of the Armed Forces or survivors of deceased veterans receive periodically from the Department of Veterans Affairs for education, on-the-job training, and means-tested assistance.

Public Assistance—Cash benefits

Supplemental Security Income. Supplemental Security Income includes payments made by federal, State, and local welfare agencies to low-income persons who are aged (65 or older), blind, or disabled, and who have limited income and financial resources.

Other Public Assistance. Public assistance or welfare payments include public assistance payments such as Aid to Families with Dependent Children (now Temporary Aid to Needy Families) and general assistance.

Public Assistance—Noncash Benefits

Noncash benefits. Include food stamps, energy assistance, and housing assistance. Receipt of noncash benefits is only reported in the section on the sources of income received. No dollar values are assigned to the noncash benefits in this publication, and they are not included in total money income. A person or aged unit is indicated as having received a noncash benefit if any person in the household received food, energy, or housing assistance.

Food. In this publication, food noncash benefits are comprised solely of food stamps.

Energy. The Low-Income Home Energy Assistance Program provides financial assistance to qualified households to help them pay heating costs.

Housing. There are some programs through which housing assistance is provided to low-income families and individuals living in public or privately owned dwellings. Two of the more common types of programs in which federal, State, and local funds are used to subsidize private sector housing are rent supplement and interest reduction plans.

¹ For more information, consult the Glossary at the front of this publication.

NOTE: Persons in families with zero total income or with negative total income, earnings, or income from assets are excluded.

Section 3:
Total Money Income

Key Terms and Concepts for Section 3 ¹

Age. Age classification is based on the age of the person at his or her last birthday as of March 2005. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

Aged unit. With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

Marital status. Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

Race. The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

Hispanic origin. Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

Social Security beneficiary. A beneficiary may be receiving retired-worker benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

Family. A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

Poverty. The Census Bureau uses a set of money income thresholds that vary by family size and composition to detect who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor.

The ratio of Social Security income to total income. This ratio is defined as Social Security income divided by total income. Units and persons in families with less than \$1 of total income or negative earnings or asset income are excluded from these tables.

Per beneficiary Social Security income is total Social Security income divided by the number of beneficiaries in the family.

Total Money Income. The term is defined as the arithmetic sum of money wages and salaries, net income from self-employment, and income other than earnings. The total income of a household is the arithmetic sum of the amounts received by all income recipients in the household.

Social Security. Includes retired-worker benefits, dependents' or survivor benefits, disability benefits, and transitionally insured benefits.

¹ For more information, consult the Glossary at the front of this publication.

Total Money Income of Aged Units

NOTE: Units with zero total income or with negative total income, earnings, or income from assets are excluded.

Section 4: Income from Earnings

Key Terms and Concepts for Section 4 ¹

Age. Age classification is based on the age of the person at his or her last birthday as of March 2005. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

Aged unit. With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

Marital status. Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

Race. The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

Hispanic origin. Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

Family. A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

Social Security beneficiary. A beneficiary may be receiving retired-worker benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

Earnings. Include wages and salaries and self employment. *Wages and salaries* are defined as total money earnings received for work performed as an employee during the income year. It includes wages, salary, Armed Forces pay, commissions, tips, piece-rate payments, and cash bonuses earned, before deductions are made for taxes, bonds, pensions, union dues, and so forth. Earnings for self-employed incorporated businesses are considered wage and salary. *Self-employment* is the combined income from farm and nonfarm self-employment.

¹ For more information, consult the Glossary at the front of this publication.

**Section 5:
Income from Social Security**

Key Terms and Concepts for Section 5 ¹

Age. Age classification is based on the age of the person at his or her last birthday as of March 2005. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

Aged unit. With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

Marital status. Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

Race. The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

Hispanic origin. Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

Family. A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

Social Security beneficiary. A beneficiary may be receiving retired-worker benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

The ratio of Social Security income to total income. This ratio is defined as Social Security income divided by total income. Units and persons in families with less than \$1 of total income or negative earnings or asset income are excluded from these tables.

¹ For more information, consult the Glossary at the front of this publication.

Social Security Income of Aged Units

Table 5.A1
Percentage distribution of beneficiary units, by age, 2004

Aged unit Social Security benefits (dollars)	Aged 55-61	Aged 62-64	Aged 65 or older

NOTE: Persons in families with zero total income or with negative total income, earnings, or income from assets are excluded.

**Section 6:
Income from Pensions**

Key Terms and Concepts for Section 6 ¹

Age. Age classification is based on the age of the person at his or her last birthday as of March 2005. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

Aged unit. With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

Marital status. Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

Race. The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to

the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

Hispanic origin. Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

Family. A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

Social Security beneficiary. A beneficiary may be receiving retired-worker benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

Employer pensions. Employer pensions include pensions from Railroad Retirement, government employee pensions, and private pensions and annuities.

Government employee pensions. Government employee pensions include regular payments from federal government (civil service), military, and state or local governments.

Private pensions and annuities. Private pensions and annuities include regular payments from companies or unions, annuities or paid-up insurance policies, individual retirement accounts (IRAs), Keogh, or 401(k) payments. Nonregular (nonannuitized or lump-sum) withdrawals from IRA, Keogh, and 401(k) plans are not included as income.

¹ For more information, consult the Glossary at the front of this publication.

a. Fewer than 75,000 weighted cases.

**Section 7:
Income from Assets**

Key Terms and Concepts for Section 7 ¹

Age. Age classification is based on the age of the person at his or her last birthday as of March 2005. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

Aged unit. With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

Marital status. Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

Race. The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of these

changes, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

Hispanic origin. Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

Family. A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

Social Security beneficiary. A beneficiary may be receiving retired-worker benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

Asset income. Includes interest, dividends, income from estates or trusts, and net rental income or royalties. *Interest* income. Interest includes payments people receive (or have credited to their accounts) from bonds, treasury notes, IRAs, certificates of deposit, interest-bearing savings and checking accounts, and all other investments that pay interest. Dividends. *Dividends* include income people receive from stock holdings and mutual fund shares. The CPS does not include capital gains from the sale of stock holdings as income. *Rents, royalties, and estates and trusts.* Include net income people receive from the rental of a house, store, or other property, receipts from boarders or lodgers, net royalty income, and periodic payments from estate or trust funds.

¹ For more information, consult the Glossary at the front of this publication.

Number (thousands)	2,891	366	331	638	859	697

NOTE: Per-capita family total money income quintile limits are \$9,508, \$13,599, \$19,120, and \$30,199.

**Section 8:
Importance of Income
Sources Relative to
Total Income**

Key Terms and Concepts for Section 8 ¹

Age. Age classification is based on the age of the person at his or her last birthday as of March 2005. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

Aged unit. With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

Marital status. Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

Race. The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

Hispanic origin. Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

Family. A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

Social Security beneficiary. A beneficiary may be receiving retired-worker-benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

Per capita income. Per capita income is total family income divided by the number of persons in the family.

Relative Importance of Income Source. The relative importance of a source is the ratio of the amount of income from a given source to total income for an aged unit or family. These tables are distributions of persons or aged units by the importance of a given source at the individual unit level.

Income sources

Retirement benefits. Include Social Security benefits, Railroad Retirement income, government employee pensions, and private pensions or annuities.

Social Security. Includes retired-worker benefits, dependents' or survivor benefits, disability benefits, and transitionally insured benefits.

Government employee pensions. Government employee pensions include regular payments from federal government (civil service), military, and state or local governments.

Private pensions and annuities. Private pensions and annuities include regular payments from companies or unions, annuities or paid-up insurance policies, individual retirement accounts (IRAs), Keogh, or 401(k) payments. Nonregular (nonannuitized or lump-sum) withdrawals from IRA, Keogh, and 401(k) plans are not included as income.

Earnings. Include wages and salaries and self-employment. *Wages and salaries* is defined as total money earnings received for work performed as an employee during the income year. It includes wages, salary, Armed Forces pay, commissions, tips, piece-rate payments, and cash bonuses earned, before deductions are made for taxes, bonds, pensions, union dues, and so forth. Earnings for self-employed incorporated businesses are considered wage and

salary. *Self-employment* is the combined income from farm and nonfarm self-employment.

Asset income. Includes income from interest, dividends, rent, royalties, and estates and trusts. *Interest* includes payments people received (or have credited to their accounts) from bonds, treasury notes, IRAs, certificates of deposit, interest-bearing savings and checking accounts, and all other investments that pay interest. *Dividends* include income from stock holdings and mutual fund shares. The CPS does not include capital gains from the sale of stock holdings as income. *Rents, royalties, and estates and trusts* includes net income from the rental of a house, store, or other property, receipts from boarders or lodgers, net royalty income, and periodic payments from estate or trust funds.

Public Assistance. Includes Supplemental Security Income and other monetary public assistance programs. Noncash benefits are not included.

Poverty. The Census Bureau uses a set of money income thresholds that vary by family size and composition to detect who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor. The poverty thresholds do not vary geographically, but they are updated annually for inflation with the Consumer Price Index (CPI-U). The official poverty definition counts money income before taxes and excludes capital gains and noncash benefits (such as public housing, Medicaid, and food stamps).

¹ For more information, consult the Glossary at the front of this publication.

Relative Importance of Income Sources for Aged Units

NOTES: Persons in families with zero total income or with negative total income, earnings, or income from assets are excluded.

The family money income of aged persons is compared with the official poverty lines of families in 2004.

**Section 9:
Importance of Social
Security Relative to
Total Income (Beneficiary
Aged Units and Persons in
Beneficiary Families Only)**

Key Terms and Concepts for Section 9 ¹

Age. Age classification is based on the age of the person at his or her last birthday as of March 2005. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

Aged unit. With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

Marital status. Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

Race. The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly

comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

Hispanic origin. Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

Family. A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

Social Security beneficiary. A beneficiary may be receiving retired-worker-benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

Per capita income. Per capita income is total family income divided by the number of persons in the family.

Relative Importance of Income Source. The relative importance of a source is the ratio of the amount of income from a given source to total income for an aged unit or family. These tables are distributions of persons or aged units by the importance of a given source at the individual unit level.

Poverty. The Census Bureau uses a set of money income thresholds that vary by family size and composition to detect who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor. The poverty thresholds do not vary geographically, but they are updated annually for inflation with the Consumer Price Index (CPI-U). The official poverty definition counts money income before taxes and excludes capital gains and noncash benefits (such as public housing, Medicaid, and food stamps).

¹ For more information, consult the Glossary at the front of this publication.

Relative Importance of Social Security for Beneficiary Aged Units

Table 9.A1
Percentage distribution of beneficiary units, by age, 2004

Proportion of income	Aged 55–61	Aged 62–64	Aged 65 or older

NOTES: Persons in families with zero total income or with negative total income, earnings, or income from assets are excluded.

The family money income of aged persons is compared with the official poverty lines of families in 2004.

**Section 10:
Shares of Aggregate
Income, by Source**

Key Terms and Concepts for Section 10 ¹

Age. Age classification is based on the age of the person at his or her last birthday as of March 2005. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

Aged unit. With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

Marital status. Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

Race. The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

Hispanic origin. Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

Family. A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

Social Security beneficiary. A beneficiary may be receiving retired-worker-benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

Poverty. The Census Bureau uses a set of money income thresholds that vary by family size and composition to detect who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor. The poverty thresholds do not vary geographically, but they are updated annually for inflation with the Consumer Price Index (CPI-U). The official poverty definition counts money income before taxes and excludes capital gains and noncash benefits (such as public housing, Medicaid, and food stamps).

Income sources

Social Security. Includes retired-worker benefits, dependents' or survivor benefits, disability benefits, and transitionally insured benefits.

Government employee pensions. Government employee pensions include regular payments from federal government (civil service), military, and state or local governments.

Private pensions and annuities. Private pensions and annuities include regular payments from companies or unions, annuities or paid-up insurance policies, individual retirement accounts (IRAs), Keogh, or 401(k) payments. Nonregular (nonannuitized or lump-sum) withdrawals from IRA, Keogh, and 401(k) plans are not included as income.

Employer pensions. Employer pensions include pensions from Railroad Retirement, government employee pensions, and private pensions and annuities.

Government employee pensions. Government employee pensions include regular payments from federal government (civil service), military, and state or local governments.

Private pensions and annuities. Private pensions and annuities include regular payments from companies or unions, annuities or paid-up insurance policies, individual retirement accounts (IRAs), Keogh, or 401(k) payments.

Retirement benefits. Include Social Security benefits, Railroad Retirement income, government employee pensions, and private pensions or annuities.

Social Security. Includes retired-worker benefits, dependents' or survivor benefits, disability benefits, and transitionally insured benefits.

Government employee pensions. Include payments from federal (civil service), military, state or local governments.

Private pensions or annuities include payments from: companies or unions; annuities or paid-up insurance policies; and regular payments from individual retirement accounts (IRAs), Keogh, or 401(k) payments; or other retirement income. Nonregular (nonannuitized or lump-sum) withdrawals from IRA, Keogh, and 401(k) plans are not included as income.

Earnings. Include wages and salaries and self-employment. *Wages and salaries* is defined as total money earnings received for work performed as an employee during the income year. It includes wages, salary, Armed Forces pay, commissions, tips, piece-rate payments, and cash bonuses earned, before deductions are made for taxes, bonds, pensions, union dues, and so forth. Earnings for self-employed incorporated businesses are considered wage and

¹ For more information, consult the Glossary at the front of this publication.

salary. *Self-employment* is the combined income from farm and nonfarm self-employment.

Asset income. Includes income from interest, dividends, rent, royalties, and estates and trusts. *Interest* includes payments people received (or have credited to their accounts) from bonds, treasury notes, IRAs, certificates of deposit, interest-bearing savings and checking accounts, and all other investments that pay interest. *Dividends* include income from stock holdings and mutual fund shares. The CPS does not include capital gains from the sale of stock holdings as income. *Rents, royalties, and estates and trusts* includes net income from the rental of

a house, store, or other property, receipts from boarders or lodgers, net royalty income, and periodic payments from estate or trust funds.

Public Assistance. Includes Supplemental Security Income and other monetary public assistance programs. Noncash benefits are not included.

Other income is total income minus retirement benefits, earnings, income from assets, and public assistance. Some income sources represented in this category include worker's compensation, unemployment benefits, personal contributions, alimony, and child support.

NOTE: Quintile limits are \$10,399, \$16,363, \$25,587, and \$44,129 for all units; \$20,258, \$29,437, \$42,129, and \$68,299 for married couples; and \$8,364, \$12,000, \$16,471, and \$26,064 for nonmarried persons.

**Section 11:
Poverty Status of
Aged Persons Based
on Family Income**

Key Terms and Concepts for Section 11 ¹

Age. Age classification is based on the age of the person at his or her last birthday as of March 2005. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

Aged unit. With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

Marital status. Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

Race. The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly

comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

Hispanic origin. Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

Family. A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

Social Security beneficiary. A beneficiary may be receiving retired-worker-benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

Per capita income. Per capita income is total family income divided by the number of persons in the family.

Poverty. The Census Bureau uses a set of money income thresholds that vary by family size and composition to detect who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor. The poverty thresholds do not vary geographically, but they are updated annually for inflation with the Consumer Price Index (CPI-U). The official poverty definition counts money income before taxes and excludes capital gains and noncash benefits (such as public housing, Medicaid, and food stamps).

The ratio of Social Security income to total income. This ratio is defined as Social Security income divided by total income. Units and persons in families with less than \$1 of total income or negative earnings or asset income are excluded from these tables.

¹ For more information, consult the Glossary at the front of this publication.

NOTES: The family money income of aged persons is compared with the official poverty lines of families in 2004. Persons in families with zero total income or with negative total income, earnings, or income from assets are excluded.

Appendix

Technical Appendix

This appendix addresses the most frequently encountered mathematical operations when using this book. The first segment involves manipulation of the data. The second segment addresses the reliability of the estimates. For more information on manipulating the data, please consult a mathematics or statistics textbook. For more information on calculating the reliability of the estimates, please consult the technical documentation for the March 2005 Survey at <http://www.census.gov/apspd/techdoc/cps/cpsmar05.pdf>.

Manipulating the data

Converting a percentage of a population to a count of units

First, divide the percentage by 100. Then multiply that decimal by the total population.

Example: How many aged units 65 or older have income from Veterans' benefits?

In Table 2.A1, 4.2 percent of aged units 65 or older had income from Veterans' benefits, and there was a total of 26,865,000 aged units 65 or older. Dividing the percentage by 100 yields: $4.2/100=0.042$. Then multiply: $0.042*26,865,000=1,128,000$.

Combining two percentage distributions

First, convert each percentage to a count of units. Then add the two counts of interest. Finally, divide by the sum of the two total populations.

Example: What percentage of aged units 65-74 had total money income of \$15,000-\$19,999?

In Table 3.A1, 9.0 percent of aged units 65-69 and 12.1 percent of aged units 70-74 had total money income of \$15,000-\$19,999. There were a total of 7,078,000 aged units 65-69 and 5,999,000 aged units 70-74.

First, find the number of aged units with total money income of \$15,000-\$19,999:

$0.09*7,078,000 = 637,000$ aged units 65-69 had total money income of \$15,000-\$19,999

$0.121*5,999,000 = 726,000$ aged units 70-74 had total money income of \$15,000-\$19,999

$637,000 + 726,000 = 1,363,000$ aged units 65-74 had total money income of \$15,000-\$19,999

Second, find the total population:

$7,078,000$ (aged units 65-69) + $5,999,000$ (aged units 70-74) = $13,077,000$ aged units 65-74

Finally, divide the population of interest by the total population:

$1,363,000/13,077,000 = 0.104$ or 10.4 percent of aged units 65-74 had total money income of \$15,000-\$19,999.

Note: This procedure cannot be used on medians or some means presented in this publication.

Estimating a particular percentile limit

This is also known as getting a cumulative distribution from a frequency distribution. Add percentages in the frequency distribution (column) until you exceed the percentile limit you want. Then interpolate within that last interval to estimate your desired percentile (see example below).

Example: What was the Social Security income cutoff for the bottom decile (10 percent) of beneficiary aged units 65 or older?

In Table 5.A1, get the total percent (cumulative distribution) by adding up the percents in the aged units 65 or older column until you exceed 10 percent. Because 6,000-6,999 is the first row to exceed 10 percent total, the 10-percent limit is between \$6,000 and \$6,999.

Next look at the total percent immediately lower than 10 percent (here it's 8.6). So, $10-8.6 = 1.4$ means that you need 1.4 percentage points more of the population. There are 4.2 percentage points in the 6,000-6,999 category. Take the proportion $1.4/4.2$ (what you need/what you have) and multiply it by 1,000 (the total number of dollars for the row category). $(1.4/4.2)*1,000 = \$333$. Add 333 to 6,000 (the bottom dollar for the row). The bottom decile limit is 6,333.

Social Security (dollars)	Percent	Social Security (dollars)	Total percent
1-499	0.1	< 500	0.1
500-999	0.4	< 1,000	0.5
1,000-1,499	0.3	< 1,500	0.8
1,500-1,999	0.6	< 2,000	1.4
2,000-2,499	0.4	< 2,500	1.8
2,500-2,999	0.5	< 3,000	2.3
3,000-3,499	0.6	< 3,500	2.9
3,500-3,999	0.6	< 4,000	3.5
4,000-4,499	1.2	< 4,500	4.7
4,500-4,999	0.9	< 5,000	5.6
5,000-5,999	3.0	< 6,000	8.6
6,000-6,999	4.2	< 7,000	12.8

Reliability of the Estimates

Because the figures in this report are based on a sample of the older population, all reported statistics (counts, percentages, and medians) are only estimates of population parameters and may deviate somewhat from their true values—that is, from the values that would have been obtained from a complete census using the same questionnaires, instructions, and interviewers.

The standard error is primarily a measure of sampling variability—that is, it measures the variations that occur by chance because a sample rather than the entire population is surveyed. As calculated for this report, the standard error also partly measures the effect of response and enumeration errors but does not measure systematic biases in the data. The chances are about 68 out of 100 that an estimate for the sample would differ from a complete census figure by less than the standard error. The chances are about 95 out of 100 that the difference would be less than twice the standard error.

Standard Error of Estimated Percentages

The reliability of an estimated percentage, computed by using sample data for both numerator and denominator, depends on both the size of the percentage and the size of the total on which the percentage is based. The approximate standard error $S_{x,p}$ of an estimated percentage can be obtained using the formula

$$s_{x,p} = \sqrt{\frac{b}{x} p(100 - p)}$$

Here x is the total number of persons, families, or households (the base of the percentage), p is the percentage, and b is the parameter from the following table associated with the characteristic in the numerator of the percentage

Characteristic	Total or white	Black	Hispanic
Below poverty level	1,998	1,998	1,998
All income levels	1,249	1,430	1,430

Use of this formula in calculating the standard error of a single percentage is illustrated as follows:

An estimated 33.8 percent of units aged 65 or older had total money income of \$30,000 or more in 2004 (Table 3.A1). Because the base of this percentage is approximately 26,865,000—the number of units aged 65 or older—the standard error of the estimated 33.8 percent is approximately 0.3 percent. The chances are 68 out of 100 that the estimate would have shown a figure that differed from one resulting from a complete census by less than 0.3 percent. The chances are 95 out of 100 that the estimate would have shown a figure differing from one after a complete census by less than 0.6 percent—that is, this 95 percent confidence interval would range from 33.2 percent to 34.4 percent.

For a difference between two sample estimates, the standard error is approximately equal to the square root of the sum of the squares of the standard errors of each estimate considered separately. This formula will represent the actual standard error quite accurately for the difference between separate and uncorrelated characteristics. If, however, there is a high positive correlation between the two characteristics, the formula will overestimate the true standard error.

A comparison of the difference in the percentage of units aged 62 to 64 and 65 or older who had total money income of \$30,000 or more in

2004 illustrates how to calculate the standard error of a difference between two percentages:

33.8 percent of the 26,865,000 units aged 65 or older and 55.8 percent of the 4,990,000 units aged 62 to 64 had total money income of \$30,000 or more in 2004 (Table 3.A1)—a difference of 22 percentage points. The standard errors of those percentages are 0.3 and 0.8, respectively. The standard error of the estimated difference of 22 percentage points is about

$$0.9 = \sqrt{(0.3)^2 + (0.8)^2}$$

The chances are 68 out of 100 that the difference is between 21.1 and 22.9 percentage points and 95 out of 100 that it is between 20.2 and 23.8 percentage points. Because the confidence interval around the difference does not include zero, there is a statistically significant difference between the proportions of units who are aged 62 to 64 and those who are aged 65 or older with income of \$30,000 or more.

Confidence Limits of Medians

The sampling variability of an estimated median depends on the distribution as well as on the size of the base. Confidence limits of a median based on sample data may be estimated as follows: (1) using the appropriate base, the standard error of a 50 percent characteristic is determined; (2) the standard error determined in step 1 is added to and subtracted from 50 percent; and (3) the confidence interval around the median corresponding to the two points estimated in step 2 is then read from the distribution of the characteristic. A two-standard-error confidence limit may be determined by finding the values corresponding to 50 percent plus and

minus twice the standard error. This procedure may be illustrated as follows:

The median total money income of the estimated 26,865,000 units aged 65 or older was \$20,481 in 2004 (Table 3.A1). The standard error of 50 percent of those units expressed as a percentage is about 0.34 percent. As interest usually centers on the confidence interval for the median at the two-standard-error level, it is necessary to add and subtract twice the standard error obtained in step 1 from 50 percent. This procedure yields limits of approximately 49.3 percent and 50.7 percent. By interpolation, 49.3 percent of units aged 65 or older had total money income below \$20,297, and 50.7 percent had total money income below \$20,990. Thus, the chances are about 95 out of 100 that the census would have shown the median to be greater than \$20,297 but less than \$20,990.
