I. SECY-10-0044 – Review of Final Rule Package. “Export and Import of Nuclear Equipment and Material; Updates and Clarifications (10 CFR Part 110, RIN 3150-AI16)

The Commission approved a final rule amending 10 CFR Part 110, “Export and Import of Nuclear Equipment and Material,” with the attached changes. The final rule updates, clarifies, and corrects several provisions of Part 110 to improve the regulatory framework for the export and import of nuclear equipment and material including radioactive waste.

Following incorporation of these changes, the Federal Register notice should be reviewed by the Rulemaking, Directives, and Editing Branch in the Office of Administration and forwarded to the Office of the Secretary for signature and publication.

(OIP) (SECY Suspense: 7/16/10)

The staff should consider the need to develop guidance and to engage in further stakeholder interaction to ensure that general licensees understand the regulatory restrictions for exporting materials to embargoed nations. The staff should inform the Commission of its efforts in this regard and provide any relevant feedback on its interactions.
