

Mission Support Alliance Support presents our scope of work.

Mission Support Alliance's current scope of work centers around providing support to the Hanford Site and the other DOE prime contractors that are on site. Our support efforts include maintaining the basic infrastructure, central support services such as security forces, fire stations and telecommunications networks and our general materials inventory to support site wide customer requests.

The following lists are the products and services mission support alliance typically procures. These products and services are what's needed to support our internal operations and several project areas.

If you're interested in doing business with Mission Support Alliance, we recommend you continue to monitor our internet website for further developments or potential Request for Proposals. All RFP's are posted to the website within 24 hours of receipt from our contracting officers. Before replying to an RFP please ensure your company has already registered in the vendor database as well as in the Central Contractor Registration website. If you have questions please contact Mission Support Alliance's Supplier Advocacy Office at 509-376-4697.
