

US Green Hospital Build and Senior Housing Mission Led by Ambassador Locke

Date: April 18-23, 2012

Venue: Beijing, Xi'an, Dalian (optional)

You are invited to join the US Green Hospital & Senior Housing Mission led by **U.S. Ambassador to China Gary Locke from April 18-23 in Beijing, Xi'an and Dalian (optional)**.

China's market for Hospital Design and Construction and Senior Housing has expanded rapidly in recent years. This mission is an excellent opportunity for U.S firms to access this market and meet influential people and companies that can help you to develop your China market. The Commercial Service in Beijing will work with the Beijing Municipal Government, China Real Estate Chamber of Commerce, and the Shaanxi Provincial Government to arrange this mission. Participants will **attend government meetings, make presentations, exhibit at display tables, and attend receptions**. The target audience will be government officials, hospital managers, real estate developers, and local design institutes. Please fill in the attached application form and submit it by **February 29th**.

We look forward to your participation!

Sincerely,

Andrew, Merry & the CS China team

April 18: Beijing, April 20: Xi'an, April 23: Dalian (optional, the Ambassador will not participate in Dalian)

Selective Application:

Spaces are limited for this mission and all applicants will be carefully vetted to ensure best fit for the mission goals.

Sponsorships:

To highlight your firm, you also may have the opportunity to apply to sponsor one of the hospitality events. Please let us know if you are interested.

Cost:

- Beijing and Xi'an – \$5600 per company (one person)
- \$380 Each additional person per company (Maximum 3 persons each company)
- Dalian (optional) – \$2560 per company (including one person)
- Cost only covers official activities and not personal expenses for travel, lodging, most meals and incidentals

Industry focus:

- Architecture - focus on hospitals, clinics and senior housing
- Senior Housing – operation, management of senior housing projects
- Green Building – green building products and solutions for medical and senior care facilities
- Hospital Infrastructure – large scale equipment that needs to be considered in the design phase
