Dear Sirs:

This letter is in reply to the request for comments regarding the manufacturing of materials off-shore and having them carry the label "Made in the USA".

Why don't we just put the country up for sale? I for one am very much aware of the global economy and I am sick and tired of trying to get people off welfare when the majority of low paying jobs have left the country. The label "Made in the USA" should mean just that... made in the 50 states recognized and represented in the Congress.

Have you every tried to buy a toy made in this country? I cannot buy a toy for my grandchildren that is made here. It is pretty sad. I refuse to buy anything not made **in** this country and hope and pray there will be more individuals like me. If I want things from the other countries I will go there and buy them.

Sincerely,

Margaret A Judge

Margaret A. Judge
