To Whom It May Concern:

I am not in Favor of changing the requirements For items to be labeled "Made In USA" to allow a lesser amount of American materials and/or labor to be used. Not only do I use The "Made In USA" label for patriotic and economic reasons but I also believe it to be an indicator of better quality. I will often buy a domestic product that is higher priced than a similar Foreign-made product based on that belief, and I am very rarely disappointed.

Thank you,

*Matthew A. Roman*
