

Dear Secretary Clank,

Please do not let our trade policies change what "made in the USA" means.

I look for "the Label" all the time, many times I have not purchased an item because of lower quality and a missing Label "made in the USA."

Please do not let business selfish interests change this. It is important I want "made in the USA" ~~to~~ to mean something, don't cheapen it.

Mary E. Anderson
