This letter is in regard to the F.T.C.'s
Commission to weaken standards for "Made in
U.S.A. Claims by manufacturers.

Preserve the current rule requirement of all
made in U.S.A.

We have too much foreign made inferior
products in the U.S.A. today, and the consumer
is paying as much as made in U.S.A. products.

Nafta has helped to ruin our country's
economy in the worst way. Greedy industrialists
are lining their pockets at the expense of
American jobs to foreign countries and cheap
labor, sometimes child labor.
