TREASURER

8/18/97

Dear FTC officials,

The members of my local Union, many family members, as well as friends and co-workers alike, are very disturbed over the possible watering down of the "made in USA" label. Contrary to reports that it's too late to save USA products and all this "open market world economy," many of us insist on USA products and look far and wide to find them. Why should we be deceived by partial situations? It is either made in the USA or it isn't. We love this country and are proud of our products, please do what's right! If consumers demand true "made in the USA" products they will make a comeback. Help us save

*what is currently "made in the USA".
This subject has rocked the already
loss of confidence many are feeling
about the government who is supposed
to help protect us and our great
country, please do what's right
and protect our current standards
and integrity.*

*Sincerely,
William J. Webber,
President USWA #9189*
