Dear Sirs:

July 4, '97

I have written to my Congressmen & Senators concerning the give-away of America! We are supposed to give our Patents to all countries. We are supposed to give China another chance with the Handover of Hong Cong - as they have never complied with the desires of their own citizens. We are even using their tactics to kill our precious babies - Partial-Birth Abortions - absolute murder! Yes, we are even supposed to happily buy clothing, shoes, computers etc. etc. for, at best, two or three times the cost of our own products. But we can't even find any truly U.S.A. made clothing so now "they" want us to accept Made in U.S.A. labels even when it's a downright lie. Please read this letter, which I read and agree with completely: Made in U.S.A. signifies not only a quality of product but that the product was made by American labor that, by large, is protected by basic working conditions, human rights and minimum wages under U.S. labor laws. With the media uncovering, almost daily, the exploitation of workers in foreign nations under deplorable conditions, it would be sacrilegious to allow any part of any product to be condoned or sanctioned by the "Made in U.S.A. label. Many American consumers look for "Made in the U.S.A. items" when they shop. I for one, try very hard but they are almost impossible to find. The consumer should be entitled to know where a product is manufactured. We believe any attempt to "Fuzzify" that information is wrong. Legislation has already Gone Too Far!

Sincerely yours

Mrs. C. C. Hoffmann
