(Updated only to revise Office of Origin)

5 FAH-8 H-331 WEB SERVER SOFTWARE

(CT:WEB-1;   09-29-2005)

Configuration standards for both Microsoft Internet Information Server (IIS) and Apache are available at http://acd.ds.state.gov/branches/sab/sab_securityconfiguration.htm.

5 FAH-8 H-332 WEB DEVELOPMENT SOFTWARE

(CT:WEB-1;   09-29-2005)

a. You may need software applications to facilitate the development process. Selection of web development software packages should take the end result into account. If such packages require additional applications on the Department of State servers, IT Change Control Board (IT CCB) approval is required for the additional applications. If in doubt, see the IT CCB approved software list (http://enm.irm.state.gov/IT_CCB/Baselines/Software/swbaseline_apps.html).

b. Standalone development networks must be configured in accordance with DS/ACD/SAB published parameters. Web development software not on the IT CCB approved list may be used on standalone development networks; however, this practice is not recommended.

c. Web development software for use by persons with disabilities must meet accessibility standards.
