

5 FAH-8 H-320 HARDWARE

*(CT:WEB-5; 06-21-2012)
(Office of Origin: IRM/BMP/GRP/GP)
(Updated only to revise Office of Origin)*

5 FAH-8 H-321 COMMERCIAL AND CONTRACT INTERNET SERVICE PROVIDER (ISP)

(CT:WEB-1; 09-29-2005)

The recommended means of publishing a public Web site is to use facilities already in place within the Department of State. The Bureau of International Information Programs (IIP) has Internet hosting capabilities that can be accessed by posts. Bureaus/posts must assess their organizational needs to determine the most effective means of hosting a Web site. 5 FAM 731 h governs use of a commercial Internet Service Provider (ISP) and will be a critical selection factor.

5 FAH-8 H-322 ORGANIZATION HOSTED SITES

(CT:WEB-1; 09-29-2005)

- a. Posts and bureaus hosting their own intranet Web sites must procure their own hardware and configure it in accordance with the Department of State security requirements. The IT Change Control Board (IT CCB) approved hardware can be found at:
 - (1) http://enm.irm.state.gov/IT_CCB/Baselines/Hardware/hwbaseline_specs.html for general hardware specifications;
 - (2) http://enm.irm.state.gov/IT_CCB/Baselines/Hardware/hwbaseline_servers.html for server hardware;
 - (3) http://enm.irm.state.gov/IT_CCB/Baselines/Hardware/hwbaseline_work.html for workstations hardware; and
 - (4) http://enm.irm.state.gov/IT_CCB/Baselines/Hardware/hwbaseline_misc.html for miscellaneous hardware items.

- b. System configuration information can be found at DS/ACD/SAB Web site,
http://acd.ds.state.gov/branches/sab/sab_securityconfiguration.htm.
