### ACCURACY OF SNP CHIP

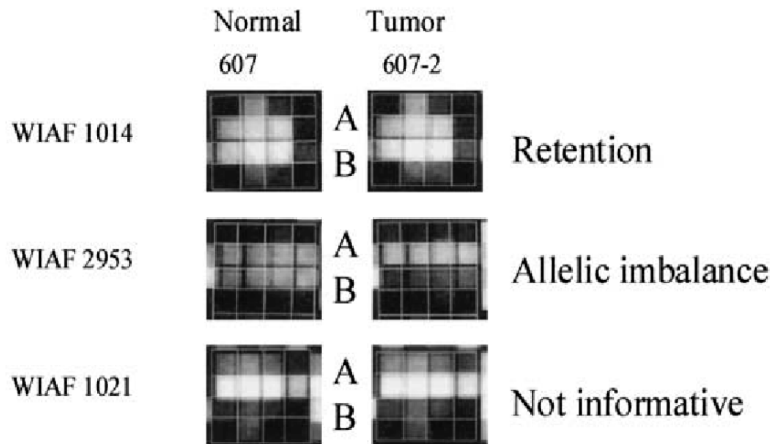

**Table 3.** ABACUS SNP Detection and Genotyping Accuracy

A. Accuracy of autosomal SNPs detection		
	Verified	Total Possible
Singleton SNPs	17	17
Non-singleton SNPs	91	91
Total SNPs	108	108
B. Number of autosomal SNPs electronically verified		
Number of SNPs electronically verified	371	
C. Accuracy of autosomal genotype calls		
Number of verified homozygous genotype calls	1515	
Number of incorrect homozygous genotype calls	0	
Percent correct homozygote calls	100.00%	
Number of verified heterozygous genotype calls	423	
Number of incorrect heterozygous genotype calls	3	
Percent correct heterozygote calls	99.30%	
D. Accuracy of haploid genotype calls		
Number of bases sequenced (6X coverage)	17,423	
Number of bases different from microarray chip calls	0	
Percent of bases identical	100.00%

## Accessing Expression Data

- Individual Lab and Journal Sites

The screenshot shows the Gene Expression Omnibus (GEO) website. At the top, there is the NCBI logo and the text "Gene Expression Omnibus" with the "ge" logo. Below this is a navigation bar with links for SAGEmap, UniGene, OMIM, PubMed, Entrez, and LocusLink. The main heading is "Public gene expression data" with a search box for "GEO Accession" and a "GO" button. On the left, there is a sidebar menu with categories: Information (Home, FAQ, Repository Scheme, Entity Fields, Data Tables, Administration, News), Submission (In a Nutshell, Detailed Guide, Login/Registration, New Submitter), Retrieval, and Statistics. The main content area contains an introductory paragraph about GEO, followed by sections for "Repository scheme", "Entity fields", "Data table format", and "Recent news". The "Recent news" section includes a date "August 1, 2006" and text about the Open Reading Frame (ORF) designator. At the bottom of the page, there are links for GEOED, NLM, NIH, GEO Help, NCBI Help, and Disclaimer.

National Human Genome Research Institute

## Accessing Expression Data

The screenshot shows the EMBL-EBI ArrayExpress website. At the top, it displays the EMBL-EBI logo and the text "European Bioinformatics Institute". Below the logo is a navigation menu with links for "EBI Home", "About EBI", "Research", "Services", "Toolbox", "Databases", "Downloads", and "Submissions". The "Databases" link is highlighted, and "ARRAYEXPRESS DATABASE" is shown below it. The main content area is titled "ArrayExpress at the EBI" and includes a description of the database as a public repository for microarray data. A "Current Content Overview" table is displayed, showing the following data:

Current Content Overview:	
Experiments:	66 <a href="#">View</a>
Arrays:	89 <a href="#">View</a>
Protocols:	459 <a href="#">View</a>
Hybridizations:	142

Below the table is an "Announcement" section with text regarding a planned downtime on the 1st of November and a scheduled EBI-wide power down on the 7th of February 2004. A "Latest News" sidebar on the right contains a "New MIAMEexpress Release 1.5" announcement and a link to "Mapping the MAGE-OM to data within the Stanford Microarray Database".

National Human Genome Research Institute

## EXPRESSION DATA ANALYSIS

- Large amount of data
- Requires visualization and analysis tools

National Human Genome Research Institute

## EXPRESSION DATA ANALYSIS

- Check quality of individual experiments

### • Preprocessing

#### Normalization

Remove genes which are not accurately measured

Remove genes which are similarly expressed in all samples

- Unsupervised Clustering
- Supervised Clustering

National Human Genome Research Institute

## Unsupervised Clustering

How do genes and samples organize into groups?

Powerful method of data display.

Does not prove the validity of groups.

- Clustered Samples Are Biologically Similar
  - Clusters of Co-expressed genes
    - May be functionally related
    - May be enriched for pathways

National Human Genome Research Institute

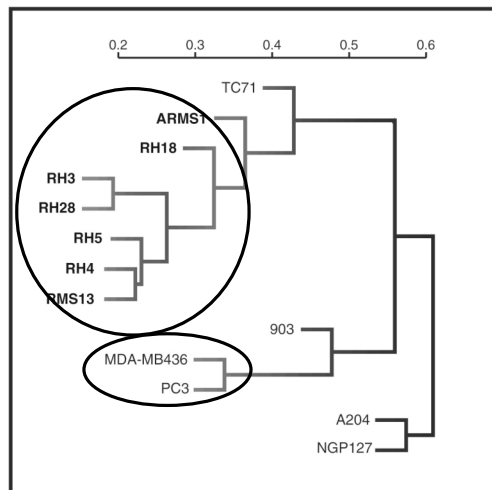

## UNSUPERVISED CLUSTERING IS BASED ON A GLOBAL SIMILARITY METRIC

## CLUSTERING GENES AND SAMPLES

Perou et al. Nature 2000 406:747

National Human Genome Research Institute

# Supervised Clustering

What genes distinguish samples in selected groups from each other?

- Choice of groups can be based on any known property of the samples.
- Many possible underlying methods: t-test or F-statistic frequently used.
- Output includes ranked gene list.
- Leads to the development of classifiers which can be applied to unknown samples.
- Must address the problem of false discovery due to multiple comparisons and discrepancy between sample/gene numbers.

## SIGNAL STRENGTH VARIES IN TISSUE PROFILING EXPERIMENTS

**THE MOST INTERESTING QUESTIONS  
TEND TO BE ASSOCIATED WITH  
WEAKER SIGNAL.**

*National Human Genome Research Institute*

## CONSIDER A SAMPLE SET

*National Human Genome Research Institute*

CONSIDER A SAMPLE SET

THESE ARE EASY TO DISTINGUISH BY  
ONE MEASUREMENT PER INDIVIDUAL.

*National Human Genome Research Institute*

CONSIDER A SAMPLE SET

TUMORS

EXPRESSION LEVEL  
(HIGHLY INFORMATIVE GENE)

THESE ARE EASY TO DISTINGUISH BY  
ONE MEASUREMENT PER INDIVIDUAL.

*National Human Genome Research Institute*

### CONSIDER A SAMPLE SET

THESE ARE HARDER TO DISTINGUISH. REQUIRE MORE THAN ONE MEASUREMENT PER INDIVIDUAL.

*National Human Genome Research Institute*

### CONSIDER A SAMPLE SET

THESE ARE HARDER TO DISTINGUISH. REQUIRE MORE THAN ONE MEASUREMENT PER INDIVIDUAL.

*National Human Genome Research Institute*

## CONSIDER A SAMPLE SET

TUMORS

EXPRESSION LEVEL  
(POORLY INFORMATIVE GENE)

THESE ARE HARDER TO DISTINGUISH. REQUIRE  
MORE THAN ONE MEASUREMENT PER INDIVIDUAL.

*National Human Genome Research Institute*

## WE CAN TELL APPLES FROM ORANGES.

### CAN WE DISTINGUISH DIFFERENT KINDS OF APPLES?

*National Human Genome Research Institute*

## A CONTINUUM OF POSSIBLE OUTCOMES FROM MICROARRAY RESEARCH

- SOME FEATURES WILL SEPARATE TUMORS EASILY INTO CLASSES, AND MIGHT BE REDUCED TO SINGLE GENE TESTS, IMPLEMENTED IN A CONVENTIONAL FASHION.
- OTHERS WILL BE MORE DIFFICULT, AND REQUIRE MULTIPLE GENE MEASUREMENTS.
- MANY CLINICALLY RELEVANT FEATURES APPEAR TO FALL WITHIN THIS DIFFICULT GROUP.

*National Human Genome Research Institute*

## A CONTINUUM OF POSSIBLE OUTCOMES FROM MICROARRAY RESEARCH

- SOME GENES WILL SHOW DIFFERENCES BETWEEN GROUPS OF SAMPLES BY CHANCE ALONE.
- THERE MAY BE NO ONE GENE WHICH SEPARATES GROUPS RELIABLY.
- FIND THE MOST INFORMATIVE GENES AND USE THEM IN COMBINATION .

*National Human Genome Research Institute*

## **RISK OF OVERFITTING IN CLINICAL STUDIES WITH SMALL SAMPLE SETS**

**NEED INDEPENDENT VALIDATION  
SETS.**

*National Human Genome Research Institute*

## **MICROARRAY STUDIES GENERATE ORGANIZED LIST OF GENES**

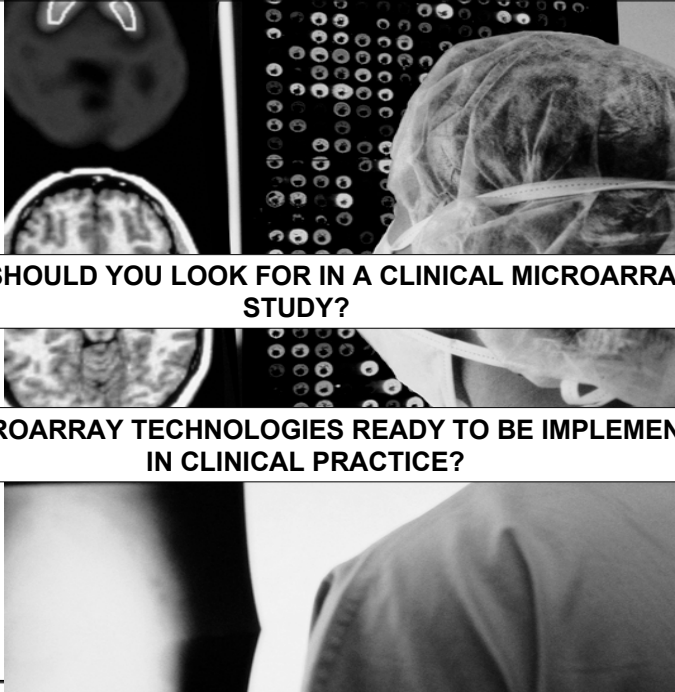

- **Often cryptic and hard to interpret.**
- **Hypothesis generating, but this is often rather subjective.**
- **Seldom provide strong evidence for a specific mechanism.**
- **Expression data is intrinsically limited.**

*National Human Genome Research Institute*

## GETTING BEYOND GENE LISTS

- Optimal use of gene annotations.
- Optimizing use of public data.
- Incorporating data from model systems.
- Linking expression data to sequence.
- Adding other types of genome scale data.

National Human Genome Research Institute

WHAT SHOULD YOU LOOK FOR IN A CLINICAL MICROARRAY STUDY?

ARE MICROARRAY TECHNOLOGIES READY TO BE IMPLEMENTED IN CLINICAL PRACTICE?

National Human Genome Research Institute

WHAT TO LOOK FOR IN CLINICAL  
CORRELATIVE STUDIES  
USING MICROARRAYS

- WELL DEFINED QUESTION AND PATIENT SAMPLE.
- HIGH QUALITY ARRAY MEASUREMENTS (HARD TO ASSESS WITHOUT REFERENCE TO PRIMARY DATA---SHOULD BE MADE PUBLIC).
- APPROPRIATE AND RIGOROUS STATISTICAL ANALYSIS OF ARRAY DATA.
- FORMAL CLASSIFIER THAT CAN BE APPLIED TO NEW SAMPLES.
- VALIDATION SAMPLE SET.

*National Human Genome Research Institute*

WHAT TO LOOK FOR IN CLINICAL  
CORRELATIVE STUDIES  
USING MICROARRAYS

- **GOAL SHOULD BE TO SEEK AND VALIDATE CLINICALLY RELEVANT SIGNATURES WITHIN DEFINED PATIENT GROUPS FOR WHICH NO CURRENT FEATURES ADEQUATELY ANSWER THE CLINICAL QUESTION POSED.**

*National Human Genome Research Institute*

## **EXPRESSION PROFILING IN THE CLINIC?**

### **PROBLEMS:**

- **SPECIALIZED TECHNOLOGY**
- **RNA IS UNSTABLE**
- **FROZEN TISSUE NOT PART OF USUAL OR SAMPLE FLOW**

*National Human Genome Research Institute*

## **EXPRESSION PROFILING IN THE CLINIC?**

### **OPTIONS:**

- **REFERENCE LABORATORIES**
- **RNA PRESERVATIVES**
- **USE OF PARAFFIN EMBEDDED MATERIALS.**

*National Human Genome Research Institute*

## **EXPRESSION PROFILING IN THE CLINIC?**

- **COMMERCIAL TESTS BEGINNING TO APPEAR.**
- **NOT FDA APPROVED**
- **LIMITED CLINICAL VALIDATION**
- **ADDITIONAL CLINICAL STUDIES NEEDED**

*National Human Genome Research Institute*

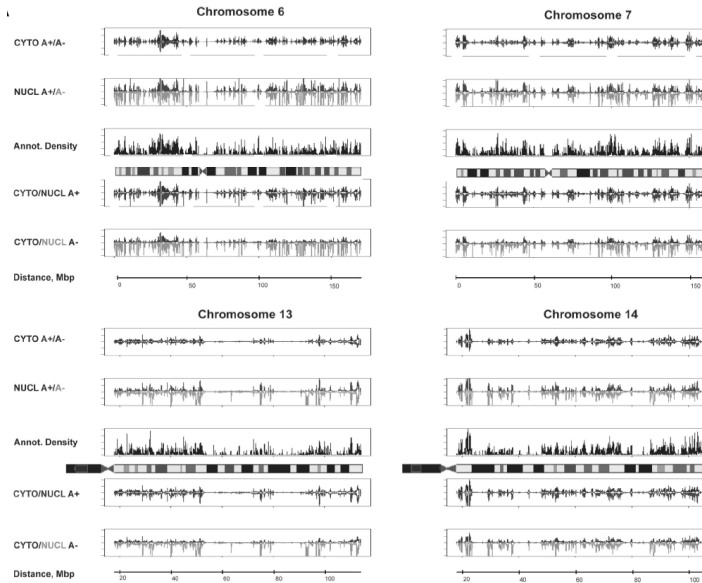

## **DNA Microarray Applications**

- **Resequencing**
- **Comparative Genomic Hybridization**
  - **Gene Expression**
- **Transcription factor localization**
