Miscellaneous Permanent Appropriations

Appropriations Language

Activities funded from these mandatory spending accounts do not require appropriation language since they were authorized in previous years.

Authorizing Statutes

Department of the Interior and Related Agencies Appropriations Act of 1985, as amended (P.L. 98-473, section 320; 98 Stat. 1874). Provides that all rents and charges collected for quarters of agencies funded by the Act shall be deposited and remain available until expended for the maintenance and operation of quarters of that agency. Authorizing language is:

"Notwithstanding title 5 of the United States Code or any other provision of law, after September 30, 1984, rents and charges collected by payroll deduction or otherwise for the use or occupancy of quarters of agencies funded by this Act shall thereafter be deposited in a special fund in each agency, to remain available until expended, for the maintenance and operation of the quarters of that agency..."

Flood Control Act of 1944, as amended (16 U.S.C. 460(d). Provides that receipts collected from the sales of timber and crops produced on U.S. Army Corps of Engineers land leased by another Federal agency for natural resources conservation may be used to cover expenses of producing these products and for managing the land for natural resource purposes. Authorizing language is:

"The Secretary of the Army is also authorized to grant leases of lands, including structures or facilities thereon, at water resource development projects for such periods, and upon such terms and for such purposes as he may deem reasonable in the public interest... [P]rovided further, that in any such lease or license to a Federal, State, or local governmental agency which involves lands to be utilized for the development and conservation of fish and wildlife, forests, and other natural resources, the licensee or lessee may be authorized to cut timber and harvest crops as may be necessary to further such beneficial uses and to collect and utilize the proceeds of any sales of timber and crops in the development, conservation, maintenance, and utilization of such lands."

Truckee-Carson Pyramid Lake Water Rights Settlement Act (P.L. 101-618, section 206(f)), as amended by Department of the Interior and Related Agencies Appropriations Act for FY 1998 (P.L. 105-83). Authorizes certain revenues and donations from non-federal entities to be deposited into the Lahontan Valley and Pyramid Lake Fish and Wildlife Fund to support restoration and enhancement of wetlands in the Lahontan Valley and to restore and protect the Pyramid Lake fishery, including the recovery of two endangered or threatened species of fish. Payments to the Bureau of Reclamation for storage in Northern Nevada's Washoe Project that exceed the operation and maintenance costs of Stampede Reservoir are deposited into the Fund and are available without further appropriation, starting in FY 1996. Beginning in FY 1998, P.L. 105-83 provides that receipts from the sales of certain lands by the Secretary of the Interior are to be deposited into the Lahontan Valley and Pyramid Lake Fish and Wildlife Fund. Authorizing language is:

"Lahontan Valley and Pyramid Lake Fish and Wildlife Fund -(1) There is hereby established in the Treasury of the United States the 'Lahontan Valley and Pyramid Lake Fish and Wildlife Fund' which shall be available for deposit of donations from any source and funds provided under subsections 205(a) and (b), 206(d), and subparagraph

208(a)(2)(C), if any, of this title; (2) Moneys deposited into this fund shall be available for appropriation to the Secretary for fish and wildlife programs for Lahontan Valley consistent with this section and for protection and restoration of the Pyramid Lake fishery consistent with plans prepared under subsection 207(a) of this title. The Secretary shall endeavor to distribute benefits from this fund on an equal basis between the Pyramid Lake fishery and the Lahontan Valley wetlands, except that moneys deposited into the fund by the State of Nevada or donated by non-Federal entities or individuals for express purposes shall be available only for such purposes and may be expended without further appropriation, and funds deposited under subparagraph 208(a)(2)(C) shall only be available for the benefit of the Pyramid Lake fishery and may be expended without further appropriation."

P.L. 105-83 – "Provided further, that the Secretary may sell land and interests in land, other than surface water rights, acquired in conformance with subsection 206(a) and 207(c) of Public Law 101-618, the receipts of which shall be deposited to the Lahontan Valley and Pyramid Lake Fish and Wildlife Fund and used exclusively for the purposes of such subsections, without regard to the limitation on the distribution of benefits in subsection 206(f)(2) of such law."

Justification of 2012 Program Changes

The 2012 budget request for Miscellaneous Permanent Appropriations is \$4,495,000 and 4 FTE, no net program change and 0 FTEs from the 2011 estimated receipts.

Program Overview

Operations and Maintenance of Quarters - The Operations and Maintenance of Quarters Account (O & M Quarters) uses receipts from the rental of Service quarters to pay for maintenance and operation of those quarters. Certain circumstances require Service personnel to occupy government-owned quarters, including a lack of off-site residences due to the isolation of the site, and the need for staff to be available

for onsite work. Such work includes protecting fish hatchery stock (ex. maintaining water flow to fish rearing ponds during freezing temperatures), monitoring water management facilities, ensuring the health and welfare of visitors, responding to fires and floods, and protecting government property. To provide for these needs, the Service manages 1,078 units comprised of 857 quarters on 216 refuges, 220 quarters on 61 hatchery facilities, and 1 quarter at an Ecological Services facility.

Quarters require regular operational maintenance, periodic rehabilitation, and upgrading to maintain safe and healthy conditions for occupants. Rental receipts are used for general maintenance and repair of quarters buildings; code and regulatory improvements; retrofitting for energy efficiency; correction of safety discrepancies, repairs to roofs and plumbing; utilities upgrades, access road repair and maintenance, grounds and other site maintenance services; and the purchase of replacement equipment such as household appliances, air conditioners, and furnaces. Funds are used to address the highest priority maintenance and rehabilitation projects to address health, safety, and structural problems. Refuges replace equipment when appropriate with energy efficient systems and equipment. Vacant housing is made available for occupancy to volunteers who are not subject to rental payments.

In 2010, O & M Quarters funds were utilized at Little White Salmon/Willard National Fish Hatchery (WA) for a "Green" Quarters Project – Energy Improvements in Government Residences. A Condition Assessment was accomplished for both Little White Salmon and Willard National Fish Hatchery in June of 2005. The condition assessment identified concern regarding the lack of insulation and missing caulk in some windows at 14 government residences located at the Complex. This project enhanced the energy efficiency in nine Willard Quarters and five Little White Salmon Quarters by replacing the basement windows, re-caulking the first story windows as needed, and inspecting and verifying that the bedroom floor (garage ceiling) insulation meets a minimum R25 energy star rating.

Prior to fiscal year 2010, the Service's Pacific Region Safety Office had identified two quarters, at the Hagerman National Fish Hatchery Quarters, as having walkway hazards within their driveways and sidewalks connected to housing units. Portions of the concrete and asphalt had deteriorated with heaves and large cracks in multiple locations. To address this concern, in June 2010, the Hatchery used O & M Quarters funds to contract with a private firm to repair the hazards.

The replacement of an existing concrete and asphalt driveway with a new concrete garage driveway and carport extension corrected a safety concern while simultaneously providing employment opportunities.

In 2010, O & M Quarters funds were utilized at National Elk Refuge (WY). Funding was used to furnish a new 4-plex bunkhouse. This facility is already in good use for short-term housing for refuge volunteers who are assisting with winter wildlife observations, visitor center staffing, and snow removal. The housing is also invaluable for Wildlife Health office employees who are on temporary duty to the

National Elk Refuge each month focusing on herd health monitoring. Their work includes monitoring diseases affecting elk on the Refuge and surveillance for chronic wasting disease (CWD). Using O & M Quarters funds to enhance these quarters has contributed to the ability for Refuge staff to work with volunteers and other partners to fulfill the Refuge's purpose.

Rental rates for Service quarters are based upon comparability with private sector housing. Quarters rental rates are reset on a rotating basis every five years using statistical analysis of comparable rentals from 16 areas nationwide. Between surveys, rents are adjusted using the Consumer Price Index-Rent Series annual adjustment from the end of the fiscal year. No changes to rates are anticipated in 2011.

Proceeds From Sales, Water Resources Development Projects - The Proceeds from Sales special fund receipt account pays for the development and maintenance of wildlife habitat and covers expenses of forestry technicians administering timber harvest activities.

Thirty national wildlife refuges and one Wetland Management District were established as overlay projects on U.S. Army Corps of Engineers land and are administered in accordance with cooperative agreements. The agreements provide that timber and grain may be harvested and sold with the receipts returned for development, conservation, maintenance, and utilization of such lands. These expenses cannot exceed the receipt amounts deposited as proceeds from sales. Refuge examples include Mark Twain NWR Complex (IL) and Flint Hills NWR (KS) and Charles M. Russell WMD (MT), which are currently engaged in grain harvesting on water resources development projects.

Examples of some of the projects undertaken using Proceeds from Sales receipts are: soil amendments (ex. addition of lime or fertilizer), road construction and repairs, or ditch and fence construction and maintenance. The agreements with the Corps of Engineers specify that the receipts collected on refuges must be spent within five years. This agreement structure provides for carryover balances from year to year which allows the receipts to accumulate until sufficient funds are available to support some of the larger development projects on these refuges.

In 2009, Midwest Regional Service staff at the Two Rivers NWR used Proceeds from Sales funds to purchase native tree seedlings and grass seed, which was used to restore agricultural lands to natural savanna habitat on the Refuge. The Proceeds from Sales funds used for restoration fulfill a specific management strategy identified in the Refuge's Comprehensive Conservation Plan (CCP) and were generated on the same acres that were restored. Through implementation of the Two Rivers CCP with available Proceeds from Sales funds, the Service has successfully reduced the agricultural acres on Two Rivers NWR to a nominal amount. Now the total area provides important habitat and supplemental food for migratory birds along the Mississippi River.

In 2010, Flint Hills NWR (KS) staff used Proceeds from Sales funds to purchase a Wheel Tractor Scraper, which is routinely used to maintain wetlands. In 2010 this equipment also was used to build a wildlife tour route road which required relocation because of flooding.

Choctaw NWR, located in southwest Alabama, utilized Proceeds from Sales funds in 2010 to purchase a well-equipped Kubota RTV 900. The RTV will be utilized for herbicide applications deep in the hardwood timber units of the Refuge to control invasive species such as cogon grass, Nepalese Browntop, and Chinese Climbing Fern. The RTV will enable employees to carry large quantities of herbicide which will save time and improve performance. During the rainy season, the RTV will preserve the roads on the Refuge while carrying employees and supplies, therefore leaving a smaller ecological footprint. Increased access to remote areas will aid law enforcement during patrols and rescue missions, while also permitting maintenance and marking of the Refuge boundary.

Lahontan Valley and Pyramid Lake Fish and Wildlife Fund - Pursuant to the Truckee-Carson-Pyramid Lake Water Rights Settlement Act of 1990 (P.L. 101-618, Title II) and the Department of the Interior and Related Agencies Appropriations Act for FY 1998 (P.L. 105-83), this fund was established for fish and wildlife purposes in the Lahontan Valley and for protection and restoration of the Pyramid Lake Fishery. Deposits to this fund are authorized to be made from the storage revenues received by the Bureau of Reclamation's Washoe Project after operating costs are paid for Stampede Reservoir, proceeds from land sales, donations and other sources.

Wetlands in Northern Nevada's Lahontan Valley, including those at Stillwater National Wildlife Refuge and Carson Lake, are a key migration and wintering area for up to 1,000,000 waterfowl, shorebirds, and raptors traveling on the eastern edge of the Pacific Flyway. More than 250,000 ducks, 28,000 geese and 12,000 swans have been observed in the area during wet years. In addition to migratory populations, the wetlands support about 4,500 breeding pairs producing 35,000 waterfowl annually. Up to 70 bald eagles, Nevada's largest concentration, have wintered in the valley.

In 1996, the Service completed a Final Environmental Impact Statement and Record of Decision which described, analyzed and implemented a program to purchase up to 75,000 acre-feet of water from the Carson Division of the Newlands Project for Lahontan Valley wetlands. In partnership with the State of Nevada, the Bureau of Indian Affairs (BIA), and the Bureau of Reclamation, 41,200 acre-feet of Newlands Project water rights have been acquired for Lahontan Valley wetlands to date. Of the acquired water rights; approximately 30,500 acre-feet were acquired by the Service, 1,800 acre-feet were acquired by BIA and 8,900 acre-feet were acquired by the State. Water rights have been purchased from willing sellers at appraised market value. In addition to acquiring water, the Service is authorized to pay customary operations and maintenance charges to the local irrigation district for delivering the acquired water.

The Service is pursuing various activities to protect and restore the Pyramid Lake fishery, including operation and maintenance of Marble Bluff Fish Passage Facility, Lahontan cutthroat trout incubation operations at Marble Bluff Fish Passage Facility, and other ongoing conservation efforts for the fishes of Pyramid Lake.

Expenditures from the Lahontan Valley and Pyramid Lake Fish and Wildlife Fund continue to support the Service's water rights acquisition and land sales programs at Stillwater NWR. Among other expenses covered from this fund, \$289,000 was paid for annual water charges to the Truckee-Carson Irrigation District for delivery of acquired water to wetlands.

2012 Program Performance

Operation and Maintenance of Quarters

Estimated receipts in 2011 and 2012 are expected to be approximately \$3,000,000 each year. Revisions continue to be made in the management of the program to reduce the operating balance of the account and target the highest priority repairs and improvements.

Proceeds From Sales, Water Resources Development Projects

Estimated receipts in 2011 and 2012 are expected to be approximately \$495,000 each year for timber and grain harvest. Receipts depend on the amount of the commodity harvested, current market value, and the amount of the commodity that the Service uses for wildlife habitat management purposes. Annual receipts may also vary from year to year due to the influence of natural events such as flood or drought.

Lahontan Valley and Pyramid Lake Fish and Wildlife Fund

In 2012, receipts from land sales are estimated at \$1,000,000. The anticipated receipts have dropped from prior years because of adverse regional real estate market conditions.
