

Public Media, Democratic Engagement, and Broadband

*Ellen P. Goodman
Professor of Law
Rutgers University – Camden*

*FCC Broadband Workshop
August 6, 2009*

Public Media Mission

- ▶ Public broadcasting was original broadband provider – universal service, citizen engagement through information
- ▶ Mission has always been:
 - **OUTREACH** to underserved communities
 - Provide **ACCESS** to information and networks
 - **ENGAGE** publics with information, technology tools, meaningful media
- ▶ Where 20th c technology fell short, 21st c technology can deliver

**CREATE
CURATE
CONNECT**

Create

- ▶ Trusted, enterprise journalism
- ▶ High quality documentaries, science, civics programming – collaborative and interactive
- ▶ Educational applications & information

- Local enterprise journalism – NPR's Argo Initiative to strengthen local reporting, web-first public news networks
- Documentary film – *Not in Our Town* suite of films and community nodes of activism
- Curriculum – PBS Education *Access, Analyze, Act :Blueprint for 21st C. Civic Engagement*

Curate

- ▶ Drive traffic to quality professional and amateur content & information that is new and relevant to community interests
- ▶ Incubate and open access to public audio/video content

- KQED, Northern Cal. – hosting curriculum bank, science blogs, community – generated content
- Public Radio Exchange – feeding public radio stations new content and aggregating public radio programming for listeners

Connect

- ▶ Connect technology, expression, action
- ▶ Connect citizens to each other, to services, to information
- ▶ Connect reporting of local and global issues

- **New Media Institute** – training independent, minority, public media makers to create, provide tech. leadership, spur demand
- **KECT, St. Louis** – connecting community to mortgage crisis solutions
- **New America Media** – reporting to connect ethnic minorities to communities of origin abroad

Some Aspirations

- ▶ **Train** community-based creators in multimedia production and tech. leadership
- ▶ Invigorate local **journalism**
- ▶ Create **community hubs** to convene and organize citizens around pressing local issues
- ▶ **Aggregate** archived and scattered content for easy access and re-use by public
- ▶ **Produce** high quality digital media and applications with public service mission

What's Needed (besides more \$)

- ▶ Better broadband
- ▶ Improved content management, search, coordination
- ▶ “Cloud” services (storage, processing power, bandwidth) for public media
- ▶ More partnerships with community institutions, government, and business
- ▶ Governance and structural shifts
