#### Goods and Services

The U.S. Census Bureau and the U.S. Bureau of Economic Analysis, through the Department of Commerce, announced today that total January exports of **\$142.7 billion** and imports of **\$180.0 billion** resulted in a goods and services deficit of **\$37.3 billion**, down from \$39.9 billion in December, revised. January exports were \$0.5 billion less than December exports of \$143.2 billion. January imports were \$3.1 billion less than December imports of \$183.1 billion.

*supplies and materials* (\$0.5 billion) and *consumer goods* (\$0.2 billion). *Other goods* were virtually unchanged.

The December to January decrease in imports of goods reflected decreases in *automotive vehicles, parts, and engines* (\$1.5 billion); *capital goods* (\$1.1 billion); and *consumer goods* (\$0.9 billion). An increase occurred in *foods, feeds, and beverages* (\$0.1 billion). *Other goods* and *industrial supplies and materials* were virtually unchanged.

The January 2009 to January 2010 increase in exports of goods reflected increases in *industrial supplies and materials* (\$7.0 billion); *automotive vehicles, parts, and engines* (\$3.4 billion); *consumer goods* (\$2.1 billion); *foods, feeds, and beverages* (\$1.7 billion); *capital goods* (\$1.6 billion); and *other goods* (\$0.4 billion).

NOTE: Total goods data are reported on a Balance of Payments basis; commodity and country detail data for goods are on a Census basis. Monthly statistics are seasonally adjusted unless otherwise specified. For information on data sources and definitions, see the information section on page A-1 of this release, or at [www.census.gov/ft900](http://www.census.gov/ft900) or [www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm](http://www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm). **The next FT-900 release is Tuesday, April 13, 2010.**

The January 2009 to January 2010 increase in imports of goods reflected increases in *industrial supplies and materials* (\$9.1 billion); *automotive vehicles, parts, and engines* (\$5.4 billion); *capital goods* (\$2.0 billion); *consumer goods* (\$0.8 billion); *foods, feeds, and beverages* (\$0.3 billion); and *other goods* (\$0.3 billion).

## Services

Services exports increased \$0.2 billion from December to January. The increase was more than accounted for by increases in *other private services* (which includes items such as business, professional, and technical services, insurance services, and financial services) and *transfers under U.S. military sales contracts*. Changes in other categories of services exports were small.

Services imports increased \$0.1 billion from December to January. The increase was more than accounted for by increases in *other transportation* (which includes freight and port services) and *other private services*. A decrease in *travel* was partly offsetting. Changes in other categories of services imports were small.

Services exports increased \$2.7 billion from January 2009 to January 2010. The largest increases were in *other private services* (\$1.4 billion), *royalties and license fees* (\$0.7 billion), and *other transportation* (\$0.5 billion). Within *other private services*, the largest increases were in business, professional, and technical services and financial services.

Services imports increased \$1.3 billion from January 2009 to January 2010. The largest increases were in *other private services* (\$0.8 billion), *other transportation* (\$0.2 billion), and *direct defense expenditures* (\$0.2 billion). Within *other private services*, the largest increases were in insurance services and business, professional, and technical services.

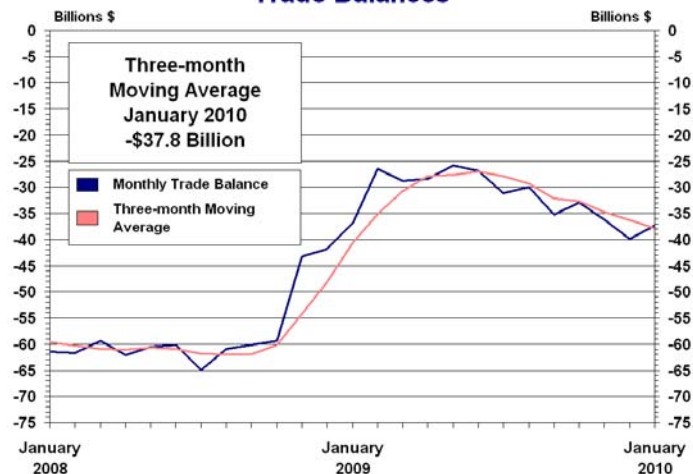

## Goods and Services Moving Average

For the three months ending in January, exports of goods and services averaged \$141.4 billion, while imports of goods and services averaged \$179.2 billion, resulting in an average trade deficit of \$37.8 billion. For the three months ending in December, the average trade deficit was \$36.3 billion, reflecting average exports of \$139.6 billion and average imports of \$175.9 billion.

## Selected Not Seasonally Adjusted Goods Details

The January figures show surpluses, in billions of dollars, with Hong Kong \$1.6 (\$2.0 for December), Australia \$0.9 (\$1.1), and Belgium \$0.3 (\$0.1). Deficits were recorded, in billions of dollars, with China \$18.3 (\$18.1), OPEC \$7.2 (\$6.8), Mexico \$4.6 (\$5.2), Canada

## Trade Balances

\$3.9 (\$3.0), Japan \$3.3 (\$4.6), European Union \$2.8 (\$6.4), Nigeria \$2.1 (\$2.2), Ireland \$1.6 (\$1.6), Venezuela \$1.6 (\$2.1), and Germany \$1.1 (\$2.9).

Advanced technology products exports were \$21.3 billion in January and imports were \$24.6 billion, resulting in a deficit of \$3.3 billion. January exports were \$2.7 billion less than the \$24.0 billion in December, while January imports were \$4.3 billion less than the \$28.9 billion in December.

## Revisions

For December, goods exports and goods imports (not seasonally adjusted) were virtually unrevised. Goods carry-over in January was \$0.1 billion (0.1 percent) for exports and \$1.1 billion (0.8 percent) for imports. For December, revised export carry-over was virtually unchanged at \$0.1 billion (0.1 percent). For December, revised import carry-over was \$0.3 billion (0.2 percent), revised down from \$1.0 billion (0.7 percent).

Goods and services exports and imports for all months in 2009 were revised in order to align the seasonally adjusted months with the annual totals.

Services exports and imports for July through December 2009 reflect the incorporation of more comprehensive and revised quarterly and monthly data. For services exports, the largest monthly revisions were in *other private services* and *royalties and license fees*. For services imports, the largest monthly revisions were in *other private services*, *royalties and license fees*, and *other transportation*.

Services exports for December were revised up \$0.5 billion to \$44.1 billion. The revision was more than accounted for by upward revisions in *other private services* and *royalties and license fees*. Services imports for December were revised up \$0.1 billion to \$32.1 billion. The revision was more than accounted for by upward revisions in *other transportation*, *passenger fares, travel*, and *U.S. government miscellaneous services*. Downward revisions in *other private services* and *royalties and license fees* were partly offsetting.

# NOTICE

## Upcoming Revisions to Goods and Services

On June 10, 2010, the U.S. Census Bureau (Census) and the U.S. Bureau of Economic Analysis (BEA) will release two reports: “U.S. International Trade in Goods and Services: April 2010” and “U.S. International Trade in Goods and Services: Annual Revision for 2009.” With these reports, statistics on trade in goods on a Census basis will be revised beginning with 2007, and statistics on trade in goods on a balance of payments (BOP) basis and on trade in services will be revised beginning with 1999. The revised statistics on goods and services will also be included in the annual revision of the [U.S. international transactions accounts](#) (ITAs), which BEA will release on June 17, 2010. As in past years, BEA’s annual revision of the ITAs will reflect newly available source data as well as changes in definitions and methodologies.

BEA’s annual revision this June will reflect a new treatment for certain transactions currently recorded in services by reclassifying them to goods on a BOP basis. The reclassifications will result in upward revisions to goods and offsetting downward revisions to services; they will have no effect on total goods and services exports and imports or on the combined goods and services balance. The revisions to goods will be made through the adjustments that BEA applies to goods exports and imports on a Census basis to convert them to a BOP basis. These adjustments are combined and presented as “Net adjustments” in this report. The reclassifications do not affect goods exports and imports on a Census basis, either in the aggregate or by commodity. In the ITAs, the adjustments will be distributed as described below to the appropriate end-use commodities, which BEA presents in a standard table of the ITAs, [Table 2. U.S. Trade in Goods](#).

Beginning with statistics for 1999, BEA will reclassify certain exports and imports by the U.S. military from services to goods. BEA will remove exports of goods related to foreign military sales from the services category *Transfers under U.S. military agency sales contracts* and, in the ITAs, will place them in the goods category *Exports, n.e.c.*, and it will remove imports of petroleum by the U.S. military from the services category *Direct defense expenditures* and, in the ITAs, will place them in the goods category *Petroleum and products*. Also beginning with statistics for 1999, BEA will remove fuel purchases by foreign air and ocean carriers in U.S. ports (exports) and by U.S. air and ocean carriers in foreign ports (imports) from *Other transportation services* and, in the ITAs, will place them in the goods category *Petroleum and products*.

The changes described above are part of a multi-year effort to align the ITAs with the most recent international guidelines for international economic accounts as released in 2009 in the sixth edition of the International Monetary Fund’s *Balance of Payments and International Investment Position Manual*. Additional information on BEA’s 2010 annual revision of the ITAs and plans for implementing the new international standards will appear in the May 2010 issue of the [Survey of Current Business](#), which BEA will release in mid-May.

## **Changes to Low Value Estimates for Goods**

Effective with this release, the U.S. Census Bureau has changed the current import and export low value estimation methodologies to improve coverage and quality. The U.S. Census Bureau estimates imports and exports of goods valued below the established filing exemption levels. Data users will see a change in the low value estimates as a result of the implementation of these methodologies. Additional information is available at <http://www.census.gov/foreign-trade/aip/lvpaper.html>. For time series purposes, monthly low-value estimates for 2010 using the former estimation methodology will be made available upon request.

If you have any questions or need additional information, please contact the U.S. Census Bureau's Methods Research and Quality Assurance Branch on (301) 763-3080.

## **State Import Data for Goods**

Effective with this release, the U.S. Census Bureau has introduced a state import data series. The state of import reflects the U.S. state or territory of ultimate destination of the imported merchandise. A new exhibit has been added to the FT900: U.S. International Trade in Goods and Services Supplement. In addition, the following data products will be produced: state import data by 6-digit Harmonized System (HS) code and state import data by 4-digit North American Industry Classification System (NAICS) based code. An example of the data structure for these products can be found at <http://www.census.gov/foreign-trade/reference/products/layouts/index.html>. Historical data tables and products back to January 2008 are available.

If you have any questions or need additional information, please contact the U.S. Census Bureau's Data Dissemination Branch on (301) 763-2311 or at [ftd.data.dissemination@census.gov](mailto:ftd.data.dissemination@census.gov).

(1) Data presented on a Balance of Payments (BOP) basis. For information on data sources and methodology, see the information section on page A-1 of this release, or at [www.census.gov/ft900](http://www.census.gov/ft900) or [www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm](http://www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm).

NOTE: The three-month moving averages shown in this exhibit are computed by summing the subject month, the two prior months, dividing by three and showing the average at the end month of the period. A moving average is useful in smoothing the volatile trade data so that trends can better be discerned.

(1) The petroleum products aggregated in the end-use commodity classification system include virtually the same energy related petroleum products as those aggregated in the SITC. The end-use petroleum products, however, include some products such as ethane, butane, benzene, and toluene which are included in "Manufactured Goods" in the SITC.

NOTE: For information on data sources, nonsampling errors, definitions and details concerning what is included in the Net Adjustments, see the information section on page A-1 of this release, or at [www.census.gov/ft900](http://www.census.gov/ft900) or [www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm](http://www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm).

## INFORMATION ON GOODS AND SERVICES

### GOODS

#### CENSUS BASIS

The Census basis goods data are compiled from the documents collected by the U.S. Customs and Border Protection and reflect the movement of goods between foreign countries and the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and U.S. Foreign Trade Zones. They include government and non-government shipments of goods, and exclude shipments between the United States and its territories and possessions, transactions with U.S. military, diplomatic and consular installations abroad, U.S. goods returned to the United States by its Armed Forces, personal and household effects of travelers, and in-transit shipments. The General Imports value reflects the total arrival of merchandise from foreign countries that immediately enters consumption channels, warehouses, or Foreign Trade Zones.

For imports, the value reported is the U.S. Customs and Border Protection appraised value of merchandise; generally, the price paid for merchandise for export to the United States. Import duties, freight, insurance, and other charges incurred in bringing merchandise to the United States are excluded.

Exports are valued at the f.a.s.- free alongside ship value of merchandise at the U.S. port of export, based on the transaction price including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation.

Monthly data include actual month's transactions as well as a small number of transactions for previous months. Each month we revise the aggregate seasonally adjusted (current and chain-weighted dollar) and unadjusted export, import and trade balance figures, as well as the end-use totals for the prior month. SITC and country detail data are not revised monthly. The timing adjustment shown in Exhibit 14 is the difference between monthly data as originally reported and as recompiled. Quarterly revisions are made to the chain-weighted dollar series. In the last month of each quarter, the current and previous quarter are revised to incorporate the Bureau of Labor Statistics' monthly revisions and align Census and the U.S. Bureau of Economic Analysis' quarterly data. Annual revisions for the months are made in June to reflect corrections received subsequent to the monthly revisions. These revisions are reflected in totals, end-use, SITC, and country summary data. The monthly end-use, commodity, and country and area data presented in this release are on a Census basis. This refers to Exhibits 6 - 18.

#### *U.S./CANADA DATA EXCHANGE AND SUBSTITUTION*

The data for U.S. exports to Canada are derived from import data compiled by Canada. The use of Canada's import data to produce U.S. export data requires several alignments in order to compare the two series.

1. *Coverage* -- Canadian imports are based on country of origin. U.S. goods shipped from a third country are included. U.S. exports exclude these foreign shipments. For January 2010, these shipments totaled \$102.7 million. U.S. export coverage also excludes certain Canadian postal shipments. For January 2010, these shipments totaled \$19.1 million.

U.S. import coverage includes shipments of railcars and locomotives from Canada. Effective with January 2004 statistics, Canada excludes these shipments from its goods exports to the United States, therefore creating coverage differences between the two countries for these goods.

2. *Valuation* -- Canadian imports are valued at the point of origin in the United States. However, U.S. exports are valued at the port of exit in the United States and include inland freight charges, making the U.S. export value slightly larger. Canada requires inland freight to be reported. Combining the inland freight and the Canadian reported import value provides a consistent valuation for all U.S. exports. Inland freight charges for January 2010 accounted for 2.5 percent of the value of U.S. exports to Canada.
3. *Reexports* -- U.S. exports include reexports of foreign goods. Again, the aggregate U.S. export figure is slightly larger. For January 2010, reexports to Canada were \$2,974.3 million.
4. *Exchange Rate* -- Average monthly exchange rates are applied to convert the published data to U.S. currency. For January 2010, the average exchange rate was 1.0438 Canadian dollars per U.S. dollar.
5. *Other* -- There are other minor differences, which are statistically insignificant, such as rounding error.

## Canadian Estimates

Effective with January 2001 statistics, the current month data for exports to Canada contain an estimate for late arrivals and corrections. The following month, this estimate is replaced, in the press release tables only, with the actual value of late receipts and corrections. This estimate improves the current month data for exports to Canada and treats late receipts for exports to Canada in a manner more consistent with the treatment of late receipts for exports to other countries.

### *Nonsampling errors*

The goods data are a complete enumeration of documents collected by the U.S. Customs and Border Protection and are not subject to sampling errors; but they are subject to several types of nonsampling errors. Quality assurance procedures are performed at every stage of collection, processing and tabulation; however the data are still subject to several types of nonsampling errors. The most significant of these include reporting errors, undocumented shipments, timeliness, data capture errors, and errors in the estimation of low-valued transactions.

**Reporting Errors:** Reporting errors are mistakes or omissions made by importers, exporters or their agents in their import or export declarations. Most errors involve missing or invalid commodity classification codes and missing or incorrect quantities or shipping weights. They have a negligible effect on import, export and balance of trade statistics. However, they can affect the detailed commodity statistics.

**Undocumented Shipments:** Federal regulations require importers, exporters or their agents to report all merchandise shipments above established exemption levels. The U.S. Census Bureau has determined that not all required documents are filed, particularly for exports.

**Timeliness and Data Capture Errors:** The U.S. Census Bureau captures import and export information from administrative documents and through various automated collection programs. Documents may be lost, and data may be incorrectly keyed, coded or recorded. Transactions may be included in a subsequent month's statistics if received late.

**Low-valued Transactions:** The total values of transactions valued as much as or below \$2,500 for exports and \$2,000 (\$250 for certain quota items) for imports are estimated for each country, using factors based on the ratios of low-valued shipments to individual country totals for past periods.

The U.S. Census Bureau recommends that data users incorporate this information into their analyses, as nonsampling errors could impact the conclusion drawn from the results. For a detailed discussion of errors affecting the goods data, see "U.S. Merchandise Trade Statistics: A Quality Profile" available on the internet at [www.census.gov/foreign-trade/aip/index.html#infopapers](http://www.census.gov/foreign-trade/aip/index.html#infopapers) or from the Foreign Trade Division, U.S. Census Bureau.

### *Adjustments for Seasonal and Working-Day Variations*

Goods are initially classified under the Harmonized System (HS) which describes and measures the characteristics of goods traded. Combining trade into approximately 140 export and 140 import end-use categories makes it possible to examine goods according to their principal uses (See Exhibits 7 and 8). These categories are used as the basis for computing the seasonal and working-day adjusted data. These adjusted data are then summed to the six end-use aggregates for publication (Exhibit 6). These data are provided to the U.S. Bureau of Economic Analysis, from the U.S. Census Bureau, for use in the Balance of Payments and the National Income and Product Accounts.

The seasonal adjustment procedure is based on a model that estimates the monthly movements as percentages above or below the general level of each end-use commodity series (unlike other methods that redistribute the actual series values over the calendar year). Because of the extremely variable movements of the data series for aircraft, users studying data trends may wish to analyze aircraft separately from other trade.

### *Adjustments for Price Change*

Data adjusted for seasonal variation on a chained-dollar basis (2005 base year) are presented in Exhibits 10 and 11. This adjustment for price change is done using the Fisher chain-weighted methodology. The deflators are primarily based upon the monthly price indexes published by the Bureau of Labor Statistics using techniques developed for the National Income and Product Accounts by the U.S. Bureau of Economic Analysis.

### *SITC Data*

Goods data appearing in Exhibit 15 are classified in terms of the Standard International Trade Classification (SITC) Revision 3. Agricultural goods consist of non-marine food products and other products of agriculture which have not passed through complex processes of manufacture, such as raw hides and skins, fats and oils, and wine. A few goods such as essential oils, starches, casein, and albumin, considered to be agricultural by the U.S. Department of Agriculture, have been excluded from agricultural goods and are included in manufactured goods where they are classified in the SITC.

Manufactured goods conform to the SITC sections that include chemicals and related products; manufactured goods classified chiefly by material; machinery and transport equipment; miscellaneous manufactured articles; and goods and transactions not classified elsewhere.

Reexports are foreign merchandise entering the country as imports, and at the time of exportation are in substantially the same condition as when imported. Reexports, included in overall export totals, appear as separate line items in Exhibit 15.

### *Advanced Technology Products (ATP)*

About 500 of some 22,000 commodity classification codes used in reporting U.S. merchandise trade are identified as "advanced technology" codes and they meet the following criteria:

1. The code contains products whose technology is from a recognized high technology field (e.g., biotechnology).
2. These products represent leading edge technology in that field.
3. Such products constitute a significant part of all items covered in the selected classification code.

The aggregation of the goods results in a measure of advanced technology trade which appears in Exhibits 16 and 16A. This product and commodity-based measure of advanced technology differs from broader NAICS industry-based measures which include all goods produced by a particular industry group, regardless of the level of technology embodied in the goods.

### **BALANCE OF PAYMENTS (BOP) BASIS**

Goods on a Census basis are adjusted by the U.S. Bureau of Economic Analysis to goods on a BOP basis to bring the data in line with the concepts and definitions used to prepare the international and national accounts. Broadly, the adjustments include changes in ownership that occur without goods passing into or out of the customs territory of the United States. These adjustments are necessary to supplement coverage of the Census basis data, to eliminate duplication of transactions recorded elsewhere in the international accounts, and to value transactions according to a standard definition.

The export adjustments include:

**U.S. military sales contracts** - This *deduction* of U.S. military sales contracts is made because the U.S. Census Bureau has included these contracts in the goods data, but BEA includes them in the services category "Transfers Under U.S. Military Sales Contracts."

**Private gift parcels** - This *addition* is made for parcels mailed to foreigners by individuals through the U.S. Postal Service. (Only commercial shipments are covered in Census goods exports.)

**Gold exports, nonmonetary** - This *addition* is made for gold that is purchased by foreign official agencies from private dealers in the United States and held at the Federal Reserve Bank of New York. The Census data only include gold that leaves the customs territory.

Some other adjustments are also made to exports:

*Deductions* for repairs of goods, developed motion picture film, and military grant-aid. *Additions* for sales of fish in U.S. territorial waters, exports of electricity to Mexico, and vessels and oil rigs that change ownership for which no export document is filed.

The import adjustments include:

**Inland freight in Canada and Mexico** - An *addition* is made for inland freight in Canada and Mexico. Imports of goods from all countries are valued at the foreign port of export, including inland freight charges ("customs value"). In the case of Canada and Mexico, this should be the cost of the goods at the U.S. border. However, the customs value for imports for certain Canadian or Mexican goods is the point of origin in Canada or Mexico. The BEA makes an *addition* for the inland freight charges of transporting these goods to the U.S. border to make the value comparable to the customs value as reported by all other countries.

**Gold imports, nonmonetary** - This *addition* is made for gold sold by foreign official agencies to private purchasers out of stock held at the Federal Reserve Bank of New York. The Census data only include gold that enters the customs territory.

**Imports by U.S. military agencies** - This *deduction* of U.S. military sales contracts is made because the U.S. Census Bureau has included these contracts in the goods data, but BEA includes them in the services category "Direct Defense Expenditures." BEA's source material is more comprehensive, but has no distinction between goods and services.

**Locomotives and railcars** - An addition is made for imports of certain locomotives and railcars that are not reported to U.S. Customs and not included in Census data. Estimates based on trade data from other countries are included beginning with January 2001, when a reporting exclusion began to materially impact the total value of U.S. imports of locomotives and railcars.

Some other adjustments are also made to imports:

*Deductions* for repairs of goods and developed motion picture film. *Additions* for imported electricity from Mexico, conversion of vessels for commercial use, repairs to U.S. vessels abroad, and valuation of software imports at market value.

## SERVICES

The statistics are estimates of services transactions between foreign countries and the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and other U.S. territories and possessions. Transactions with U.S. military, diplomatic, and consular installations abroad are excluded because they are considered to be part of the U.S. economy.

Services are shown in seven broad categories. Types of services for imports and exports are the same for six of the seven categories. For the seventh, exports is "Transfers Under U.S. Military Sales Contracts" while for imports the category is "Direct Defense Expenditures." The following is a brief description of the types of services included in each category:

**Travel** - Purchases of services and goods by U.S. travelers abroad and by foreign visitors to the United States. A traveler is defined as a person who stays for a period of less than 1 year in a country of which the person is not a resident. Includes expenditures for food, lodging, recreation, gifts, and other items incidental to a foreign visit.

**Passenger Fares** - Fares paid by residents of one country to residents of other countries. Receipts consist of fares received by U.S. carriers from foreign residents for travel between the United States and foreign countries and between two foreign points. Payments consist of fares paid by U.S. residents to foreign carriers for travel between the United States and foreign countries.

**Other Transportation** - Charges for the transportation of goods by ocean, air, waterway, pipeline, and rail carriers to and from the United States. Includes freight charges, operating expenses that transportation companies incur in foreign ports, and payments for vessel charter and aircraft rentals with crew.

**Royalties and License Fees** - Transactions with affiliated and unaffiliated foreign residents. (The term "affiliated" refers to a direct investment relationship, which exists when a U.S. person has ownership or control, directly or indirectly, of 10 percent or more of a foreign business enterprise's voting securities or the equivalent, or when a foreign person has a similar interest in a U.S. enterprise.) Transactions involve intangible assets and proprietary rights such as the use of patents, techniques, processes, formulas, designs, know-how, trademarks, copyrights, franchises, and manufacturing rights. The term "royalties" generally refers to payments for the utilization of copyrights or trademarks, and the term "license fees" generally refers to payments for the use of patents or industrial processes.

**Other Private Services** - Transactions with affiliated and unaffiliated foreign residents. (The term "affiliated" refers to a direct investment relationship, which exists when a U.S. person has ownership or control, directly or indirectly, of 10 percent or more of a foreign business enterprise's voting securities or the equivalent, or when a foreign person has a similar interest in a U.S. enterprise.) Transactions consist of education services; financial services (includes commissions and other transactions fees associated with the purchase and sale of securities and noninterest income of banks, and excludes investment income); insurance services; telecommunications services (includes transmission services and value-added services); business, professional, and technical services (includes

advertising services; computer and data processing services; database and other information services; research, development, and testing services; management, consulting, and public relations services; legal services; construction services; architectural and engineering services; mining services; industrial engineering services; installation, maintenance, and repair of equipment; and medical services); and other services (includes film and tape rentals).

**Transfers Under U.S. Military Sales Contracts** (*Exports only*) - Exports of goods and services in which U.S. government military agencies participate. Includes both goods, such as equipment, and services, such as repair services and training, that cannot be separately identified.

**Direct Defense Expenditures** (*Imports only*) - Expenditures incurred by U.S. military agencies abroad, including expenditures by U.S. personnel, payments of wages to foreign residents, construction expenditures, payments for foreign contractual services, and procurement of foreign goods.

**U.S. Government Miscellaneous Services** - Transactions of U.S. government nonmilitary agencies with foreign residents. Most of these transactions involve the provision of services to, or purchases of services from, foreigners; transfers of some goods are also included.

Services estimates are based on quarterly, annual, and benchmark surveys and partial information generated from monthly reports. Service transactions are estimated at market prices. Estimates are seasonally adjusted when statistically significant seasonal patterns are present. No country or area detail is available due to the lack of adequate source data upon which to base estimates.

**The revision policy is as follows:** Each month, a preliminary estimate for the current month and a revised estimate for the immediately preceding month are released. After the initial revision, no further changes are made to that month until more complete source data become available in March, June, September, and December. The releases in March, June, September, and December contain revised estimates for the previous six months. The release in March also contains revisions for all months of the previous year in order to align the seasonally adjusted monthly data with annual totals. The release in June contains annual revisions, which reflect updated source data and changes in estimating methodologies.

Quarterly and annual estimates of services are included as part of the U.S. international transactions accounts, published in news releases in March, June, September, and December and in the January, April, July, and October issues of the Survey of Current Business. The next release of the international transactions accounts is scheduled for March 18, 2010. The Survey is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, or online at [www.bea.gov/scb/index.htm](http://www.bea.gov/scb/index.htm).
