

Medical online shopping...simplified

The Defense Medical Logistics Standard Support Customer Assistance Module [DCAM] allows the Department of Defense Military Health System users to view and order from electronic supply catalogs. DCAM primarily supports the theater environment and allows non-logisticians to electronically download catalog data, place orders and obtain status.

Product Features

- Handles medical logistics orders, follow-up requests and receipt confirmations worldwide
- Automates the medical supply process while delivering electronic catalog and ordering capability
- Enables medical logistics mission at lower Levels of Care (Levels I and II in Theater) and some small clinics

Benefits to the Military Health System

- Replenishes medical supplies in the battlefield
- Offers electronic exchange of catalog, order and status information
- Generates supply orders and status while managing unit level medical supplies
