Minerals Management Service
Minerals Revenue Management

Any use of trade, product, or firm names is for descriptive purposes only and does not imply endorsement by the U.S. Department of the Interior. Names of persons and companies used in examples are fabricated and intended for illustration purposes only.

Acronyms

API	American Petroleum Institute
BIA	Bureau of Indian Affairs
BLM	Bureau of Land Management
CD	compact disc
DNR	(Louisiana) Department of Natural Resources
DOI	Department of the Interior
EIA	Energy Information Administration
FOIA	Freedom of Information Act
GOMR	Gulf of Mexico Region
IMDA	Indian Mineral Development Act
LDWR	Louisiana Desktop Well Reference
LEAS	Louisiana Energy Access System
MB	megabyte
MMS	Minerals Management Service
MRM	Minerals Revenue Management
OEMM	Offshore Energy and Minerals Management
RMMLF	Rocky Mountain Mineral Law Foundation
WOGCC	Wyoming Oil and Gas Conservation Commission

What is the Purpose of This Guide?

This guide will help you with some of your requests for information from the Federal Government. The Minerals Revenue Management (MRM) is a program within the Minerals Management Service (MMS), an agency of the U.S. Department of the Interior (DOI). Information and links in this guide were current as of the date of publication. MRM publishes this guide to explain:

- How to obtain items MRM publishes and distributes through paper and/or electronic media; and how to receive further explanations of these items.
- How to obtain information from sources other than MRM.
- How to file a request under the Freedom of Information Act (FOIA) for information not already available to the public.
- How MRM processes your request.

How MRM Fulfills Its Responsibilities

The MRM is responsible for ensuring that all revenues from Federal and Indian mineral leases are efficiently, effectively, and accurately collected, accounted for, verified, and disbursed to appropriate recipients in a timely manner. These revenues totaled in excess of \$11.4 billion for fiscal year 2007. In addition to a broad range of financial services, MRM has a comprehensive compliance and asset management program, including an automated compliance verification system. The program is staffed by MMS, State, and tribal auditors. The leasing and resource management services of the following Federal agencies support MRM's collection activities:

The Offshore Energy and Minerals Management (OEMM) program within MMS is responsible for offshore leasing and associated operational functions, such as permit approval for drilling and production operations, production verification, onsite inspections, and enforcement. The MMS through OEMM has expanded authority to regulate alternative energy on the Outer Continental Shelf (OCS), in accordance with Energy Policy Act of 2005.

The Bureau of Land Management (BLM) within DOI is the leasing agent for all onshore public and acquired Federal lands and the operational supervisor for Indian lands. Operational functions include permit approval for drilling and production operations, production verification, onsite inspections, and enforcement. BLM also is responsible for surface management of public lands. Other agencies, such as the U.S. Forest Service or the U.S. Army Corps of Engineers, manage the surface of certain acquired lands.

The Bureau of Indian Affairs (BIA) within DOI facilitates the full development of the human and natural resources of American Indian and Alaska Native people, who manage their own affairs under a trust relationship with the Federal Government. BIA administers all Indian leases and contracts, prepares and maintains title records, and distributes mineral revenues received from MRM to individual Indian mineral owners.

What Sources of Information are Available?

Most of the information related to energy and mineral resource production that MRM collects is available from other sources. In the interest of economic and efficient Government operations, we do not duplicate the efforts of these other sources. You can obtain free information more readily from Internet sites or by ordering paper publications from private sources or from Government sources other than MRM.

Organizations to Contact

Information is readily available from many sources, including the organizations described in the following sections.

U.S. Energy Information Administration

The U.S. Energy Information Administration (EIA) is an independent statistical and analytical agency within the U.S. Department of Energy. It publishes numerous reports that include data and analyses of production, prices, and consumption of petroleum, natural gas, coal, and electricity. You can review the information available by visiting EIA's Internet site at <http://www.eia.doe.gov>.

For further information, you may use the following contacts:

Energy Information Administration
1000 Independence Ave., SW
Washington, DC 20585

Average response time within 3 business days

(202) 586-8800
Live expert from 9:00 AM – 5:00 PM EST
Monday – Friday (excluding Federal holidays)

MMS Gulf of Mexico Region

The MMS Gulf of Mexico Region (GOMR) production and lease data are available at <http://www.mms.gov/offshore/>. Products are available for downloading and are offered for sale on compact disc (CD). Included in its Public Information Catalog are reports on leases, pipelines, wells, reserves, platforms, composite polygons, and geographic mapping data. A description of the information available and associated PDF files can be viewed at <http://www.mms.gov/stats/OCSproduction.htm> and <http://www.mms.gov/ld/leasing.htm>.

These files are available in the following formats for a nominal fee:

- Fixed ASCII files
- Delimited ASCII files
- DXF files
- Adobe Acrobat PDF format
- ArcInfo format
- CD-ROM and
- Online Query

For further information call:

Phone: (504) 736-2519 or (800) 200-GULF

Fax: (504) 736-2620

Louisiana Department of Natural Resources, Office of Conservation, Oil and Gas Division

The Louisiana Desktop Well Reference (LDWR) provides a graphical well information system that may be of interest to oil and gas exploration and production companies, independent consultants, geologists, and engineers. LDWR incorporates several levels of well information from the Louisiana Department of Natural Resources (DNR) Production Audit and Reporting System database and geographical information on a single CD. This includes a State map with all well locations and associated production and well completion information from January 1990 through the most recent available data. DNR also offers dial-up, online access to oil and gas information by way of the Louisiana Energy Access System (LEAS). Through LEAS, DNR provides customers with online access to specified services on its computer. You can get more information by visiting their Internet site at <http://dnr.louisiana.gov/>.

Wyoming Oil and Gas Conservation Commission

In addition to a wealth of other information, the Wyoming Oil and Gas Conservation Commission (WOGCC) Internet site includes Wyoming State production data by field, Federal lease number, and American Petroleum Institute (API) well number. You can review the information available by visiting <http://wogcc.state.wy.us>. For further information, you may write to the following address:

Wyoming Oil & Gas Conservation Commission
2211 King Blvd, Casper, Wyoming

Mailing Address:
P.O. Box 2640
Casper, WY 82602

Or call:
Phone No. 1-307-234-7147
Fax No. 1-307-234-5306

Other Sources

Most resource-producing States offer similar data. There also are many commercial sources of data, including the reporters/payors who submit information to MRM. Although the Government cannot release information that could cause commercial harm, reporters/payors may decide to release their own data.

MRM Reading Room Records

In keeping with the spirit of FOIA, it is MMS policy to make its records available to the public to the greatest extent possible. Four categories of records—MMS Director’s decisions, specific agency policy statements, administrative staff manuals, and previous FOIA releases that are likely to be the subject of requests in the future—must be made available in agency reading rooms, with indexing to facilitate public access. Frequently requested FOIA documents, MMS Manual Chapters and Interim Policy Documents are available through the MMS homepage. The library button from that homepage provides information on many different topics of interest to the public.¹ Further information can be accessed through the links button, which has links to many government and industry

¹ The reading room requirement does not apply to any records that “are promptly published and offered for sale” 5 U.S.C. 552(a)(2). This issue is discussed in *FOIA UPDATE*, Vol. XVII, No. 4, Fall 1996: page 1, and Vol. XVIII, No. 1, Winter 1997: page 2, U.S. Department of Justice, Office of Information and Privacy. For additional information please go to <http://www.doi.gov/foia/>.

websites. Most of MRM's reading room records are offered for sale through the Rocky Mountain Mineral Law Foundation's (RMMLF) Gower Federal Service—Royalty Valuation and Management.² The MRM has adopted this service as its official index.

RMMLF Gower Federal Service—Royalty Valuation and Management

Gower Federal Service—Royalty Valuation and Management is the comprehensive source of information on Federal and Indian royalties. It is updated with full-text copies of MMS Director's decisions addressing Federal and Indian royalty valuation, management, and collection issues. These are supplemented with Payor Letters, Solicitor's Opinions, and comprehensive manuals from periodic Special Institutes on Royalty Valuation and Management. These Special Institutes, co-sponsored by RMMLF and MRM, provide an up-to-date definitive analysis of legal, accounting, marketing, and management issues associated with the current valuation and payment of Federal and Indian (tribal and allotted) royalties under various Federal and Indian statutes, regulations, leases and agency orders, guidelines, and directives. RMMLF offers numerous royalty management publications for sale.

You can obtain further information on publications by visiting RMMLF's Internet site at <http://www.rmmlf.org>. You may write to the following address:

Rocky Mountain Mineral Law Foundation
9191 Sheridan Blvd.
Suite 203
Westminster, CO 80031

Or Call:
Phone: (303) 321-8100
Fax: (303) 321-7657

MRM's Internet Site

Many records that are publicly available are on the MRM Internet site at <http://www.mrm.mms.gov/> The FOIA Web site address is <http://www.mrm.mms.gov/foia/foia.htm>. You can find background information for MMS at <http://www.mms.gov> and for DOI at <http://www.doi.gov>. MRM's Internet site is organized with blue topic buttons on the left of the screen. By browsing through our electronic pages, you can learn how much money is derived annually from minerals production on Federal onshore and offshore lands—and how much is shared with States. We provide facts, figures, and technical papers

² The Rocky Mountain Mineral Law Foundation is a nonprofit, tax-exempt corporation (tax identification number: 84-6037688).

on the Laws and Regulations and Statistics pages. We also provide news releases, Congressional testimony, regulations, *Federal Register* notices, proposed and final rules, comments on proposed regulations, and more. You can visit each of three offshore regions electronically to learn about MMS's involvement in offshore leasing, environmental, and scientific activities. Our Internet site is linked to the Internet sites of some of our important affiliates, including the Library of Congress, one of the world's greatest informational sources.

If you need additional assistance in reviewing MRM's information, contact our Public Affairs Officer, Patrick Etchart. He can be reached weekdays in Denver, CO at (303) 231-3162 or by e-mail at Patrick.Etchart@mms.gov.

FOIA Public Reading Room

MRM's FOIA reading room is located in Building 85, Denver Federal Center, Lakewood, CO. Because the room is within a controlled access area, visitors must make an appointment to review records and make copies. You can make an appointment by calling Gregory Kann at 303-231-3971, Tracey Fay at 303-231-3430 or Jayne Barton at 303-231-3706.

Requesting Information under FOIA

The Freedom of Information Act (FOIA) (5 U.S.C. 552) generally provides that any person has a right to access Federal agency records unless the records are protected from disclosure by an exemption or exclusion. You do not need to demonstrate an interest in the records or justify the request. Information will be disclosed, with the exceptions noted in the law, regardless of the form or format of the record. When responding to a request under FOIA, MRM is not required to provide information already furnished or offered for sale by RMMLF Gower Federal Service or through other sources.

FOIA applies only to records in existence at the time we receive your request. We are not required to create records, conduct research, compile or analyze data, or answer questions to respond to FOIA requests. The records will not necessarily be made available in their entirety. Some identifying details and other privileged or sensitive information may be deleted. Parts may be withheld according to an exemption if disclosure is prohibited by statute or if the information involves any of the following FOIA exemptions:

- 1 Matters of national defense and foreign policy,
- 2 Internal personnel rules and practices,
- 3 Information exempted by other statutes,

- 4 Trade secrets, commercial or financial information (confidential business information),
- 5 Privileged interagency or intra-agency communications,
- 6 Personal information affecting an individual's privacy,
- 7 Records compiled for law enforcement purposes,
- 8 Records of financial institutions, and
- 9 Geological and geophysical information concerning wells.

The MRM receives information requests from companies or individuals who originally submitted data to us and from other interested parties. Payors/reporters or their authorized representatives may request and receive copies of all the reference data, production data, and royalty data they submitted to us. The division or office that maintains the requested records processes such requests rather than the FOIA office.

For requesters unrelated to the submitters of the original information, MRM withholds sales/royalty value data as commercial or financial information (confidential business information) under exemption 4. Such data, when combined with widely available production information, can disclose a payor's pricing strategy and cause competitive harm. Additionally, solid minerals and geothermal lease-level production data are considered confidential because such data reveal cost structure information. Combined with value data, mine production data disclose pricing strategies. We consult with the payors/reporters who submitted the information only if addressing unique situations.³

Accordingly, we process requests for information from anyone other than the submitter without notification or consultation with the submitter as follows:

Indian tribal and allottee leases (except Indian Mineral Development Act (IMDA) leases, which are exempt from FOIA disclosure requirements):

Oil and gas products—MRM releases payor numbers, lease numbers, most production, and rental data. Annual sales/royalty values by commodity are available only in the summary reports on the Internet.

Solid mineral and geothermal products—MRM releases all payor numbers, lease numbers, and rental/minimum or advanced royalty data. Annual production volumes by commodity are available only in the summary reports on the Internet.

³ Under the regulations at 43 CFR 2.23(h)(1) (2007), consultation is not required when MRM determines the request should be denied. Similarly, the regulations at 43 CFR 2.23(h)(2) (2007) provide that consultation is unnecessary when the information has previously been lawfully published or officially made available to the public.

Federal onshore and offshore leases:

Oil and gas products—MRM releases all payor accounts, lease, production, and rental/minimum royalty data. Annual sales/royalty values by commodity are available only in the summary reports on the Internet.

Solid mineral and geothermal products—MRM releases all payor, lease number, and rental/minimum or advanced royalty data. Annual production volumes by commodity are available only in the summary reports on the Internet.

Routinely Withheld Information

The MRM routinely withholds information as described in this section.

Indian tribal and allottee leases:

Most information on leases signed under the IMDA.

Oil and gas products—MRM withholds monthly and annual sales prices and sales/royalty values at the lease or lower level of detail.

Solid mineral and geothermal products—MRM withholds monthly and annual sales prices, sales/royalty values, and monthly and annual production data at the lease or lower level of detail.

Federal onshore and offshore leases:

Oil and gas products—MRM withholds monthly and annual sales prices and sales/royalty values at the lease or lower level of detail. Generally the information listed above that is greater than 10 years old will be released.

Solid mineral and geothermal products —MRM withholds monthly and annual sales prices, sales/royalty values, and monthly and annual production data at the lease or lower level of detail.

Voluntarily provided commercial/financial information:

Information voluntarily provided to assist MRM is routinely withheld if the submitter customarily treats the information as proprietary.

Audit Manuals and Strategy Documents:

The Audit Manual, Compliance Review Manual, and certain other strategy documents are routinely withheld because release of these materials could allow circumvention of our regulations.

Filing FOIA requests

- All FOIA requests must be submitted in writing. Describe the material you want as specifically as possible. The FOIA specifies two requirements for access requests. First, the requester must “reasonably describe” the records sought. Second, the request must be made in accordance with published DOI procedural regulations at 43 CFR 2.8 (2007). Under these regulations, a description of a requested record is sufficient if it enables an agency employee familiar with the subject area to locate the records with a “reasonable amount of effort.” Requests that are not filed in accordance with published regulations are not considered received until they have been identified as proper FOIA requests by the agency. Until then, the agency has no obligation to search, to meet deadlines, or to release documents. Once a request is identified as a proper FOIA request by the agency, the FOIA Office must provide a written response within 20 working days. The response should inform the requester of the determination to release or deny the requested information, and when the responsive records will be available if they are not enclosed with the response. The law allows for a 10 day extension when unusual circumstances exist.

The multi-track system for FOIA request processing allows simpler FOIA requests to be processed on a separate track from the more complicated requests. At this time MRM has two tracks: Simple and Complex. Your FOIA contact can sometimes help you limit the scope of your FOIA request to allow for processing on the faster track. Many of the FOIA requests received at MRM require research and consultation, which puts them in the Complex track.

Before preparing a FOIA request, you may want to contact the MMS/MRM office(s) that you believe may have the records in order to discuss with them how to best describe the records/documents you are requesting. You may also contact the FOIA office for assistance in formulating your request and for help in determining if the records may already be publicly available.

To expedite your request, follow these instructions:

- Send a written request by mail, e-mail, or fax, and state your request is under the FOIA.
- Describe the scope of the records you are requesting in as much detail as possible. Please try to include specific time-frames, MMS Lease Numbers, etc.
- State the category of your request for fee purposes—commercial, media, educational, or all others.
- Authorize fees up to the maximum amount you are willing to pay.
- Indicate how you qualify if requesting a fee waiver. Please see 43 CFR 2.19 (2007) for criteria.
- Specify the format in which you want your response, such as hard copy, or CD.
- Provide an address, telephone number, email address, and/or fax number where we can reach you to obtain additional information.

Submit a written request by e-mail to MRM FOIA at MRMFOIA@mms.gov or by mail to:

MRM FOIA Officer
MMS/MRM
P.O. Box 25165, MS-340A1
Denver, CO 80225-0165

Phone: (303) 231-3971
Paper Fax: (303) 231-3998
E-Fax: (303) 445-4288

Services and Fees

It is the Government's policy to charge for goods and services provided beyond those received by the general public. This policy was incorporated in the Department's rule for processing FOIA requests (43 CFR 2.15 (2007)). Accordingly, you may have to pay for the time spent searching for, reviewing, and deleting proprietary data from the requested

records. You also must cover the direct costs of the media used to provide the data. The standard charges are updated annually and can be located at <http://www.doi.gov/foia/2008/2008Fees.doc>.

You are also responsible for fees on overdue bills. These fees include a \$35 administrative charge plus interest at the prevailing U.S. Treasury rate. We will send a bill with our response to your request.

Payments and Fee Waivers

Advance payment may be requested when fees are likely to exceed \$250 or if there is risk of nonpayment. Failure to pay a previously incurred bill will delay a FOIA request from being processed until receipt of the past due amount and penalties. Fees can be waived or reduced when the criteria established by regulations and Department guidance are met.

Requests for fee waivers are decided on a case-by-case basis. The requestor must provide sufficient justification to support a fee waiver for each FOIA request.

Release History

Release Number	Release Date	Revised Chapter/Sections	RMP Originator	Preparer
1.0	8/17/1998		RPS	AMS/OC
2.0	8/16/1999		RPS	AMS/OC
3.0	9/24/2001		Center for Excellence	AMS/OC
4.0	08/18/2008		FOIA Officer	FOIA Office

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering sound use of our land and water resources; protecting our fish, wildlife, and biological diversity; preserving the environmental and cultural values of our national parks and historical places; and providing for the enjoyment of life through outdoor recreation. The department assesses our energy and mineral resources and works to ensure that their development is in the best interests of all our people by encouraging stewardship and citizen participation in their care. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.

As a bureau of the Department of the Interior, Minerals Management Service's (MMS) primary responsibilities are to manage the mineral resources located on the Nation's Outer Continental Shelf (OCS), collect revenues from the Federal OCS and onshore Federal and Indian lands, and distribute those revenues.

Moreover, in working to meet its responsibilities, the **Offshore Energy and Minerals Management Program** administers the OCS competitive leasing program and oversees the safe and environmentally sound exploration and production of our Nation's offshore natural gas, oil, and other mineral resources. The **MMS Minerals Revenue Management** program meets its responsibilities by ensuring the efficient, timely, and accurate collection and disbursement of revenue from mineral leasing and production due to Indian tribes and allottees, States, and the U.S. Treasury.

The MMS strives to fulfill its responsibilities through the general guiding principles of (1) being responsive to the public's concerns and interests by maintaining a dialogue with all potentially effected parties and (2) carrying out its programs with and emphasis on working to enhance the quality of life for all Americans by lending MMS assistance and expertise to economic development and environmental protection.
