

The Presidential Memorandum on Federal Fleet Performance, dated May 24, 2011, requires Agencies to disclose any executive fleet vehicles that are larger than a midsize sedan or do not comply with alternative fueled vehicle requirements.

The Peace Corps has one executive vehicle. To increase the use of alternative fuels, in 2010 the Agency replaced its executive vehicle with a 2011 Buick Lucerne flexible fuel vehicle that runs on a blend of up to 85% ethanol (E85), an alternative fuel. The executive vehicle is assigned to the Office of Administrative Services.

Through the use of alternative fuel in its fleet, the Peace Corps supports Federal goals under Executive Order 13514, Federal Leadership in Environmental, Energy, and Economic Performance, to reduce petroleum use and lower greenhouse gas emissions.
