

Workshop Breakout Sessions

Maria E. Schwartz
Concerns Resolution Branch
Office of Enforcement
U.S. Nuclear Regulatory Commission

Organization of Sessions

- Five breakout sessions over the next three days
- Each divided into three groups by the various type of licensee or an individual's interest:
 - Fuel Cycle Facilities, New Construction-Reactors, Power Reactors
 - Materials/Industrial
 - Materials/Medical
- Composed of panel members from a specific background and members of the audience who, based on their backgrounds or interest, wish to participate in one of the three groups

Example Breakout Session

- **Common Definition of Safety Culture**
- **Breakout Session 1:**
 - Purpose of the breakout session is to begin discussion on the definition of safety culture
 - Desired outcome of the breakout session is to arrive at a definition that panel members can bring back to discuss at the next plenary session
 - Provides NRC's and INPO's definitions of safety culture as starting point of discussion
 - Provides questions intended to stimulate discussion

Topics for Discussion

- A common definition of safety culture
- The principles/characteristics/traits that are part of a strong, positive safety culture

How We Will Use the Outcome of These Sessions

- To inform the panelists who will take information from the breakout session back for additional discussion at the following plenary session
- To reach alignment, or determine that alignment can not be reached, for additional discussion at the following plenary session

Additional Use of Information from Breakout Sessions

- These discussions, in addition to the comments we receive on the draft safety culture policy statement, will help us to have a better understanding of what we need to do as we proceed with this initiative
