- Create an alert from your search
- Set up an ATOM or RSS feed for your alerts
- Choose to receive information from many or just a few sources
- Personalize your alerts profile and preferences

Website of the Week: Science.gov

"... don't tell the folks at Google, but there's a great way to search for all kinds of scientific and technical information without the pages and pages of ... 'targeted' ads. Science.gov covers just about everything ..."

6 must-have features for top-flight Web sites

Science.gov: "...someone researching land use doesn't have to worry about whether the information resides with the Interior Department or the U.S. Geological Survey because Science.gov will search for applicable information in any available database."

—Kevin McCaney, Federal Computer Week
September 4, 2009

Science.gov breaks down the stovepipes of research

"... with Science.gov, you don't have to worry about which agency published the research ... the site offers a one-stop shop for searching U.S. scientific databases ... Science.gov proved to be one of the early examples of how federated search could be done ... at last count, you could do a single search of ... about 200 million documents ... over the years, Science.gov has added features to make it easier to sort through data."
