## **Nonrubber Footwear Statistical Report, 1995**

**Publication 2958**

**April 1996**

## PREFACE

This series of quarterly reports on the U.S. nonrubber footwear industry is published by the U.S. International Trade Commission pursuant to a request from the Senate Committee on Finance. In a letter received on August 10, 1984, the Committee requested that the Commission institute an investigation under section 332 of the Tariff Act of 1930 (19 U.S.C. 1332) for the purpose of preparing and publishing quarterly reports on nonrubber footwear in order that it might monitor the condition of the industry on a quarterly basis. In response to this request, the Commission instituted investigation No. 332-191 on August 28, 1984.

This annual report on the nonrubber footwear industry is the first of the five annual reports the U.S. International Trade Commission has determined to publish pursuant to a letter from the Senate Committee on Finance. In its letter dated February 29, 1996, the Committee on Finance requested that the Commission change its publication schedule from quarterly to annual reports, effective January 1, 1996, and finally cease publishing the report in the year 2000. The Committee requested that the annual report continue to include data on production and/or shipments, imports, exports, apparent consumption, market share, employment, unemployment, and plant closings. In accordance with this request, the Commission has decided to change the publication schedule from quarterly to annual with immediate effect and will publish five annual reports for the years 1995 through 1999. The final report, for 1999, will be published in March 2000.

## HIGHLIGHTS

U.S. production--U.S. production of nonrubber footwear in 1995 declined by 2 percent, to 159.1 million pairs, following a 6-percent drop in 1994. The value of U.S. producers' shipments in 1995 declined more rapidly, by 8 percent, to \$3.5 billion (table 1).

U.S. consumption of nonrubber footwear in 1995 declined for the first time since 1990, by 2 percent from the 1994 level. The U.S. industry's share of the domestic nonrubber footwear market by volume did not change from the 11-percent share in 1994, but dropped by 2 percentage points in terms of value, to 24 percent. The ongoing decline in employment continued as the industry averaged 53,800 persons in 1995 compared with 57,900 persons in 1994, or by 7 percent (table 2).

U.S. imports--U.S. imports of nonrubber footwear in 1995 declined by 2 percent from the 1994 level, to 1,079.5 million pairs, the first such decline since 1989. U.S. imports by value, however, grew by 3 percent, to nearly \$10 billion. Imports' share of the domestic nonrubber footwear market (by volume) remained unchanged at 89 percent.

China continued to expand its share of the U.S. nonrubber footwear market in 1995, when its market share in terms of quantity rose to 59 percent from 55 percent in 1994. Imports from China rose by 5 percent in 1995 to 716 million pairs, valued at \$4.9 billion. By contrast, imports from all other suppliers together declined by 14 percent, to 363 million pairs.

Italy was the only other major supplier to increase its shipments in 1995, although its growth slowed considerably from that in 1994. Nonrubber footwear imports from Italy increased by 6 percent to 45 million pairs (\$994 million), following a 20-percent growth in 1994. Approximately 86 percent of these imports consisted of leather footwear, nearly one-half of which were priced over \$20 per pair (f.o.b.).

Imports from Brazil continued to decline in 1995, by 21 percent from the 1994 level, to 96.2 million pairs, valued at \$1.1 billion. This decline partly reflected diminished price competitiveness of its products in the U.S. market since July 1994 because of appreciation of the Brazilian real against the U.S. dollar. About 95 percent of the imports from Brazil consisted of footwear with leather uppers, primarily women's shoes, in the price range of \$8 to \$12 per pair (f.o.b.).

Imports from Spain declined by 9 percent to 22.1 million pairs (\$364 million), following a 61-percent growth in 1994. A favorable exchange rate for Spain helped the country to increase its shipments to the United States in 1994 whereas an 8-percent appreciation of the Spanish peseta in 1995 against the U.S. dollar increased the dollar price of imports from Spain by 14 percent and made them less competitive in the U.S. market.

Imports from Indonesia and Thailand, consisting primarily of leather athletic footwear, declined by 11 and 5 percent, respectively, largely because of sluggish demand for athletic footwear in the U.S. market. The rapid decline in imports from Taiwan and Korea reflected continued movement of labor-intensive footwear operations from these countries to low-wage Asian countries, particularly China. In 1995, imports from Taiwan and Korea together declined by 37 percent, to 36.1 million pairs, representing only 3 percent of total imports. In 1986, Taiwan and Korea were the largest sources, which together supplied 619 million pairs, or two-thirds, of total U.S. imports that year.

Imports from Mexico increased rapidly, rising by 63 percent, to 9.8 million pairs in 1995. However, the value of these imports rose by only 25 percent, indicating a 24-percent decline in the unit

value. The growth in imports from Mexico can be partly attributed to a 47-percent devaluation of the Mexican peso in 1995 from the 1994 level, which effectively reduced dollar prices of Mexican footwear and increased their price competitiveness in the U.S. market. Approximately 82 percent of imports from Mexico consisted of leather shoes.

## Footwear plant openings and closings, 1995

### Openings:

- |                               |                          |
|-------------------------------|--------------------------|
| 1. Beacon Shoe Company        | Piedmont, Missouri       |
| 2. West Virginia Shoe Company | Marlinton, West Virginia |

### Closings:

- |                               |                              |
|-------------------------------|------------------------------|
| 1. Brown Shoe Company         | Pocahontas, Arkansas*        |
| 2. Brown Shoe Company         | Cabool, Missouri             |
| 3. Brown Shoe Company         | St. Louis, Missouri          |
| 4. Brown Shoe Company         | Steelville, Missouri         |
| 5. Brown Shoe Company         | Dyer, Tennessee              |
| 6. Brown Shoe Company         | Lexington, Tennessee         |
| 7. C&J Clark America Inc.     | Marlinton, West Virginia     |
| 8. Converse, Inc.             | Mission, Texas               |
| 9. Playtimer Industries, Ltd. | Elizabethville, Pennsylvania |
| 10. Thurmont Shoe Co.         | Thurmont, Maryland           |
| 11. Timberland                | Boone, North Carolina        |
| 12. Vans, Inc.                | Orange, California           |

\*Brown Shoe Company closed two plants in Pocahontas, Arkansas.

1/ Percentages based on unrounded data.

2/ "Quantity" represents U.S. production, and "value" represents shipments of domestically manufactured footwear.

3/ Preliminary.

4/ Less than 0.5 percent.

Note.--Because of rounding, figures may not add to totals shown.
