Appeals:

Hearing and appeal procedures will follow 28 C.F.R., Part 18.

Renewals:

No renewals are available with Recovery Act funding.

Formula and Matching Requirements:

This program has no statutory formula.
Matching Requirements: The funding for states is allocated based on the number of violent crimes reported by the state from 2005 through 2007 to the FBI's UCR, and the population as provided by the U.S. Census Bureau for 2008.

For purposes of Recovery Act Byrne/JAG, by statute, the initial allocation to each state and Puerto Rico (excluding the remaining territories) is divided between the state and the local jurisdictions at a rate of 60 and 40 percent, respectively.

For the local jurisdictions, the allocation process begins by determining which of the local jurisdictions are eligible to receive an award. To be eligible, a jurisdiction must provide to the FBI's UCR a count of the number of violent crimes reported each year for a minimum of three years in the last ten years. By statute, jurisdictions that have not reported any data for at least three years in the last ten years for which UCR data is available do not receive an award.

For each eligible jurisdiction, BJS computes the average number of violent crimes committed for the three most recent years in which they reported data. Next, BJS uses the sum of these averages to determine the jurisdictions share of the local award they may receive. Finally, BJS examines the initial amount of the award, and jurisdictions that were allocated an initial award that is greater than or equal to \$10,000 receive a direct award from BJA for their own use. If the initial allocation is less than \$10,000, the statute provides that the allocation is given to the state, rather than to the local jurisdiction.

There is no match required at the Federal level. However, matching is an effective strategy for states and local units of government to expand justice funds and build buy-in for local criminal justice initiatives. This program does not have MOE requirements.

Technology Careers Training Demonstration Grants (\$5,000,000) authorizes grants to develop training programs for offenders no more than 3 years from release to find jobs in higher paying, technology-related jobs.

Offender Reentry Substance Abuse and Criminal Justice Collaboration (\$13,000,000) authorizes grants to develop treatment programs to better address the needs of returning offenders with co-occurring substance abuse and mental health issues.

Adult and Juvenile Demonstration (\$37,000,000) authorizes grants to states

and local governments that may be used to promote the safe and successful reintegration into the community of individuals who have been incarcerated. Allowable uses of funds include mentorship, housing, education and job training, engagement with community colleges, family programming, initiatives addressing victim priorities and restorative justice, research to improve the effectiveness of release and revocation decisions using risk assessment tools, and reentry court programs.

Mentoring Grants to Nonprofit Organizations (\$15,000,000) authorizes grants to nonprofit organizations that may be used for mentoring of adult offenders or providing transitional services for reintegration into the community.

16.813 NICS ACT RECORD IMPROVEMENT PROGRAM

NARIP

FEDERAL AGENCY:

Bureau of Justice Statistics, Department of Justice

AUTHORIZATION:

The NICS Improvement Amendments Act of 2007.

OBJECTIVES:

To improve the FBI's National Instant Criminal Background Check System (NICS) by providing assistance to States to improve the completeness, automation and transmittal to state and federal systems the records utilized by the NICS. Such records include criminal history records, records of felony convictions, warrants, records of protective orders, convictions for misdemeanor involving domestic violence and stalking, records of mental health adjudications, and others, which may disqualify an individual from possessing or receiving a firearm under federal law. Helping States to automate

these records will also reduce delays for law-abiding gun purchasers. The NICS Improvement Act amends the Brady Handgun Violence Prevention Act of 1993 (the Brady Act) (Public Law 103-159), under which the Attorney General established NICS. The Brady Act requires Federal Firearms Licensees (FFLs) to contact the NICS before transferring a firearm to an unlicensed person for information on whether the proposed transferee is prohibited from receiving or possessing a firearm under state or federal law. The NICS Improvement Act was enacted in the wake of the April 2007 shooting tragedy at Virginia Tech. The Virginia Tech shooter was able to purchase firearms from an FFL because information about his prohibiting mental health history was not available to the NICS and the system was therefore unable to deny the transfer of the firearms used in the shootings. The Act seeks to address the gap in information available to NICS about such prohibiting mental health adjudications and commitments and other prohibiting backgrounds. Filling these information gaps will better enable the system to operate as intended to keep guns out of the hands of persons prohibited by federal or state law from receiving or possessing firearms. The Act authorized two grant programs to assist states in providing certain information to the NICS, and prescribes grant penalties for non-compliance with the Acts record completeness goals. Pursuant to the Act, there are certain conditions, described below, that a state must satisfy in advance of receiving grants under the Act. The NICS Improvement Act has provisions that require states to meet specified goals for completeness of the records submitted to the Attorney General on individuals prohibited by federal law from possessing firearms. The records covered include automated information needed by the NICS to identify felony convictions, felony indictments, fugitives from justice, drug arrests and convictions, prohibiting mental health adjudications and commitments, domestic violence protection orders, and misdemeanor crimes of domestic violence. The Act provides for a number of incentives for states to meet the goals it sets for greater record completeness. First, the Act allows states to obtain a waiver, beginning in 2011, of the state matching requirement under the National Criminal History Improvement Program (NCHIP) grant program, if a state provides at least 90 percent of its records identifying persons in specified prohibited categories. Second, the Act authorizes grant programs described herein, which, pursuant to the Act, are being administered consistent with NCHIP, for state executive and judicial agencies to establish and upgrade information automation and identification technologies for timely submission of final criminal record dispositions and other information relevant to NICS checks. Finally, the Act provides for discretionary and mandatory Byrne Justice Assistance Grant (JAG) program grant penalties, beginning 3 years after enactment, for non-compliance with specified record completeness requirements within certain timeframes: after 3 years, 3 percent may be withheld in the case of less than 50 percent completeness; after 5 years, 4 percent may be withheld in the case of less than 70 percent completeness; and after 10 years, 5 percent shall be withheld in the case of less than 90 percent completeness (although the mandatory reduction can be waived if there is substantial evidence of the state making a reasonable effort to comply).

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

The Act outlines the allowable uses of grant funds:

Grants to States:

Section 103 of the NICS Improvement Act, regarding implementation assistance to the states, provides that the grants "shall be used by the States and Indian tribal governments, in conjunction with units of local government and State and local courts, to establish or upgrade information and identification technologies for firearms eligibility determinations." In accordance with the Act, a grant to a state, territory or Indian tribes may only be used to:

- Create electronic systems, which provide accurate and up-to-date information which is directly related to checks under the NICS, including court disposition and corrections records;
- Assist states in establishing or enhancing their own capacities to perform NICS background checks;
- Supply accurate and timely information to the Attorney General concerning final dispositions of criminal records to databases accessed by NICS;

Supply accurate and timely information to the Attorney General concerning the identity of persons who have a federally prohibiting mental health adjudication or commitment;

Supply accurate and timely court orders and records of misdemeanor crimes of domestic violence for inclusion in federal and state law enforcement databases used to conduct NICS background checks;

Collect and analyze data needed to demonstrate levels of state compliance with the Act; and

Maintain the required relief from disabilities program in accordance with the Act however, not less than 3 percent and no more than 10 percent of each grant shall be used for this purpose.

State Court Grants

Section 301 of the Act provides that grants shall be made to each state and territory, consistent with the states plans for the integration, automation, and accessibility of criminal history records, for use by the court systems to improve automation and transmittal to federal and state repositories of: (1) criminal history dispositions; (2) records relevant to determining whether a person has been convicted of a misdemeanor crime of domestic violence or a prohibiting domestic violence protection order; and (3) prohibiting mental adjudications and commitments. Further, the law provides that the amounts granted shall be used by the state court system only to:

Carry out, as necessary, assessments of the capabilities of state courts to automate and transmit arrest and conviction records, court orders, and mental health adjudications or commitments to federal and state record repositories; and

Implement policies, systems, procedures to automate and transmit arrest and conviction records, court orders, and mental health adjudications or commitments to federal and state record repositories.

Fiscal Year 2009: In fiscal year 2009, the Consumer Price Indexes (CPI), Producer Price Indexes (PPI), International Price Indexes (IPP), and Consumer Expenditure Surveys (CE) continued, as did regular publication of data from these prices statistics programs. During 2009, the CPI program continued publication of the new superlative measure of changes in living costs. The new measure more fully reflects the impact of changes in relative prices on consumers. As part of its 2009 initiative, the CPI will begin work on introducing a new sample of housing units and a process for updating these units on a continuous basis. IPP offered its new web-based repricing collection to 100 percent of its respondents the end of 2009. PPI published a new group of wherever-provided services indexes, adding to its current product line of commodity-based indexes. In 2009, the CE implemented changes to the interview questionnaire to improve wording, streamline the question flow, and collect new products and services. Fiscal Year 2010: In fiscal year 2010, the Consumer Price Indexes (CPI), Producer Price Indexes (PPI), International Price Indexes (IPP), and Consumer Expenditure Surveys (CE) continue, as will regular publication of data from these prices statistics programs. During 2010, the CPI will continue work on introducing a new sample of housing units and a process for updating these units on a continuous basis. The PPI will continue to research and develop new aggregation structures for indexes that reflect both goods and services in its stage of processing-type outputs. The CE will begin a field test on measurement issues of the Interview survey, such as survey length, respondent burden, and the use of global questions. In addition, the CE will develop questionnaire changes to be implemented in the Interview Survey in 2011 to keep the survey current with new products and to support CPI requirements. PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2009: The Office of Compensation and Working Conditions (OCWC) produces statistics in the areas of employee compensation, working conditions, and safety and health. Major programs within OCWC include the National Compensation Survey (NCS) and Occupational Safety and Health Statistics (OSHS). The NCS program provides comprehensive measures of occupational wages, employment cost trends, benefit incidence, and detailed benefit plan provisions. Throughout the year the NCS program published data on occupational earnings for metropolitan and non-metropolitan areas, broad geographic regions, and on a national basis. The index component of the NCS, the Employment Cost Index (ECI), measures changes in labor costs and was published quarterly. Average hourly employer costs were also presented quarterly by the NCS in the Employer Costs Index for Employee Compensation (ECEC). The OSHS program produces data on illnesses and injuries on the job and data on worker fatalities. The Survey Occupational Injuries and Illnesses (SOII) within the OSHS program produced annual statistics on nonfatal occupational injuries and illnesses including industry counts and frequency rates as well as information on the characteristics of cases and affected workers for nonfatal injuries and illnesses requiring days away from work. Fatality data come from the Census of Fatal Occupational Injuries (CFOI) data were also produced for metropolitan areas. **17.201 REGISTERED APPRENTICESHIP AND OTHER TRAINING
FEDERAL AGENCY:**

Employment Training Administration, Department of Labor

AUTHORIZATION:

National Apprenticeship Act of 1937 (Fitzgerald Act), Title 29, Part 29, Public Law 075-75-308, 50 Stat. 664, 29 U.S.C 50-50a-50b.

OBJECTIVES:

To stimulate and assist industry in the development, expansion, and improvement of Registered Apprenticeship and other training programs designed to provide the skilled workers required by U.S. employers, ensure equal employment opportunities in Registered Apprenticeship and other training programs, and ensure the quality of all new and existing Registered Apprenticeship programs.

TYPES OF ASSISTANCE:

Training

USES AND USE RESTRICTIONS:

Under the Office of Apprenticeship (OA), apprenticeship training programs and apprentices are registered in 25 States. OA also provides technical assistance and works closely with State Apprenticeship Agencies (SAAs) in the remaining 25 States, the District of Columbia, and three territories that register programs and apprentices in accordance with Federal standards. OA provides information on existing and recommended standards of training in Registered Apprenticeship as well as on other types of industrial skill improvement programs. The wage rates of apprentices in registered programs (Federal and State) are exempt from the prevailing wage requirements of the Davis-Bacon Act and the Service Contract Act. Registered Apprenticeship is the combination of learning on-the-job and related technical and theoretical instruction in a skilled occupation. Registered programs are driven directly by the demands of the labor market. The training is industry-driven, voluntarily sponsored by individual employers, employer associations, and/or by joint employer-employee groups. OA brings these entities together, as appropriate, to formulate Registered Apprenticeship training programs which meet the federal standards. Various educational institutions and sponsors provide theoretical and related instruction. Special efforts are being made to introduce the apprenticeship concept of training into high-growth/emerging industries and occupations and also to build a pipeline of skilled workers, particularly in the health care, green jobs, and advanced manufacturing sectors. The Advisory Committee on Apprenticeship (ACA) is an advisory board to the Secretary of Labor whose members represents employers, labor organizations, members of the public, as well as the education community, and others entities with an interest in skill training. The ACA provides advice and recommendations to the Secretary of Labor on apprenticeship and training issues. Special grants are provided to eligible organizations to assist employers and labor unions in placement and retention of women in apprenticeship and nontraditional occupations.

Applicant Eligibility:

Employers, a group of employers, or an association of employers, or individual employers with or without in each case the participation of a labor union. For grants: community based organizations, which may be faith based - see announcement of solicitation for grant applications.

Beneficiary Eligibility:

Individuals applying for acceptance into an apprenticeship training program must be at least 16 years old and must satisfy the apprenticeship program sponsor that they have sufficient ability, aptitude, and education to master the rudiments of the trade/occupation and to satisfactorily complete the related theoretical instruction required in the program.

Credentials/Documentation:

Along with the completed application form, each prospective apprentice may be required by the sponsor to submit a transcript of school subjects and grades, proof of age, an honorable military discharge (if applicable), and a high-school

diploma or equivalence certificate (if applicable). References from all previous employers may be required. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Preapplication coordination is required. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Prospective program sponsors must meet with an OA or SAA field representative, as appropriate, to develop a set of apprenticeship training program standards. These include the age and educational background of apprentices, and a schedule of the work processes and related theoretical instruction subjects to be covered during the training program. The program will be registered if it meets Federal requirements covering (a) the apprenticeability of the occupation(s) and (b) the suitability of the training standards for providing apprentices with sufficient knowledge to become skilled workers. Grants for projects are awarded on a competitive basis, announced in Solicitation for Grant Applications (SGAs) in the Federal Register and also on ETA's Internet website at <http://www.doleta.gov>. To compete for a grant, organizations develop a proposal and budget that demonstrate how the organization will provide services to a targeted population. The SGA provides all of the necessary information for applying for federal assistance.

Award Procedure:

Not applicable for advisory services and counseling type of assistance. Procedures for grant projects are specified in the applicable request for proposals. Generally, the procedure is as follows: A technical review panel composed of staff from ETA program offices as well as peer reviewers evaluates eligible submitted applications. The panel prepares a report for the ETA Grant Officer identifying the strengths and weaknesses of the application and the cumulative rating. Once selections are made by the Grant Officer, an Award Notification is sent through the appropriate congressional channels for notification. After awardees are notified, the list of awardees is posted on the ETA website at www.doleta.gov. If an application is rejected, a letter is sent to the applicant as notification that they were not selected as a recipient of the grant.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

For grants, from 45 to 90 days.

Appeals:

From 15 to 30 days. OA refusal to register programs and OA de-registration of existing programs may be appealed to the OA Administrator as provided in Title 29 CFR Part 29. For grants, procedures for each project are specified in the applicable request for proposals.

TYPES OF ASSISTANCE:

DIRECT PAYMENTS WITH UNRESTRICTED USE; FORMULA GRANTS

USES AND USE RESTRICTIONS:

The states have the direct responsibility for establishing and operating their own unemployment insurance programs, while the Federal Government finances the cost of administration. State unemployment insurance tax collections are used solely for the payment of benefits. Federal unemployment insurance tax collections are used to finance expenses deemed necessary for proper and efficient administration of the state unemployment insurance laws; to reimburse state funds for one-half the costs of extended benefits paid under the provisions of state laws which conform to the provisions of the Social Security Act and the Federal Unemployment Tax Act; and to make repayable advances to states when needed to pay benefit costs. Funds used for benefit payments may not be used for any program administration costs nor for training, job search, and job relocation payments. Disaster Unemployment Assistance (DUA) is paid out of funds provided by the Federal Emergency Management Agency (FEMA). Benefits for former Federal civilian employees, including postal workers, and former members of the Armed Forces are paid out of the Federal Employees Compensation Account (FECA) in the Unemployment Trust Fund, subject to reimbursement by the former employing agency. Trade Adjustment Assistance payments are made by states for workers adversely affected by trade imports or shifts in production. The Emergency Unemployment Compensation program is temporarily authorized.

Applicant Eligibility:

State workforce agencies, including those in the District of Columbia, Puerto Rico and the Virgin Islands.

Beneficiary Eligibility:

All workers whose wages are subject to State unemployment insurance laws, Federal civilian employees, ex-service members, trade readjustment allowance for workers who become unemployed or underemployed because of the adverse effect of increased imports or because of shifts in production outside the U.S., and workers whose unemployment is caused by a Presidentially declared disaster under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, are eligible if they are involuntarily unemployed, able to work, available for work, meet the eligibility and qualifying requirements of the state law, and are free from disqualifications. Individual State information on eligibility requirements is available from local One-Stop Career Centers or at <http://www.servicelocator.org/OWSLinks.asp>. The American Recovery and

Reinvestment Act (ARRA) provides for a temporary \$25 increase in weekly benefit amounts. The temporary Emergency Unemployment Compensation program was extended in ARRA and subsequent legislation.

Credentials/Documentation:

Awards of grants to states are conditioned on the Secretary of Labor's determination that the states' unemployment compensation laws are in conformity with the Social Security Act and the Federal Unemployment Tax Act and that state practices substantially comply with these laws. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

National and Regional Offices issue guidance to states annually regarding the procedures and documents for the application process. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. This program is excluded from coverage under OMB Circular No. A-110. Eligible applicants are furnished applications (State Quality Service Plan) by the Employment and Training Administration for this program. States submit the plans to apply for grants to the appropriate regional office of the Employment and Training Administration based on target performance levels pursuant to nationally-developed workload estimates. All plans are to be constructed in terms of selected workloads to be undertaken and the resources and numbers of employees needed to accomplish them.

Award Procedure:

The Regional Administrator for Employment and Training issues a preliminary approval for a state within the dollar target provided by the ETA National Office, based on the state plan submitted.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

From 30 to 60 days. Approximately 45 days at the Regional Office level.

Renewals:

Not Applicable.

Formula and Matching Requirements:

This program has no statutory formula.
This program has no matching requirements.
This program does not have MOE requirements.

Length and Time Phasing of Assistance:

Annual grants for base operation of programs based on workload projections pursuant to economic assumptions and nationally developed workload estimates. Additional quarterly funding based on actual workloads. Financing of administrative costs is accomplished through Letter of Credit drawdowns needed to meet immediate cash requirements. Method of awarding/releasing assistance: by letter of credit.

Reports:

Weekly, monthly, quarterly and yearly statistical reports of unemployment insurance workloads. Cash reports include the following transactions: federal cash receipts/disbursements; Federal expenditures and unobligated balance; recipient share of obligations and expenditures; program income. Additional expenditure data required includes other federal funds expended and real property proceeds expended. The comprehensive performance management system requires a State Quality Service Plan (SQSP) be submitted as part of the application. Where performance is below the established minimum criteria, a corrective action plan (CAP) is required as part of the SQSP. The CAP identifies state activities and planning targets for performance improvement activities. Separate quarterly financial status reports are required for grants used for administration of each type of program. Data and progress towards

performance targets are reviewed by the Regional and National Office staff. The State Quality Service Plan and corrective action plans are reviewed quarterly by Regional Office staff.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. 17.245 TRADE ADJUSTMENT ASSISTANCE

FEDERAL AGENCY:

Employment Training Administration, Department of Labor

AUTHORIZATION:

Trade Act of 1974, as amended, Title II, Public Law 93-618, 88 Stat. 1979, 19 U.S.C 2271-2322.

OBJECTIVES:

To provide adjustment assistance to qualified workers adversely affected by foreign trade which will assist them to obtain suitable employment.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

State Workforce Agencies (SWAs) serve as agents of the United States for administering the worker adjustment assistance benefit provisions of the Trade Act. SWAs, through the local offices, provide testing, counseling, and job placement services; job search and relocation assistance; training; and payment of weekly trade readjustment allowances (TRA). State unemployment compensation and extended benefits must generally be exhausted before TRA is paid to eligible claimants. Trade impacted workers are eligible to receive job search and relocation allowances in addition to the costs of training. They may be paid subsistence and transportation allowances to attend approved training outside the normal commuting distance of a worker's regular place of residence.

Applicant Eligibility:

In FY 2009, ETA administered two separate TAA programs the program implemented by the Trade and Globalization Adjustment Assistance Act of 2009 (TGAAA), that went into effect for petitions filed on or after May 18, 2009 (new program), and the TAA program that was administered under the Trade Act as amended by the TAA Reform Act of 2002, which existed before May 18, 2009 (old program). The TGAAA reauthorized TAA, expanded TAA coverage to more workers and firms, including workers and firms in the service sector; made benefits available to workers whose jobs have been off-shored to any country (as opposed to covering a more limited set of shifts in production), improved workers training options, and increased the affordability of health insurance coverage. The reauthorization also expanded the scope of the program to better assist adversely affected workers in finding new employment. It authorized funding for employment and case management services, and encouraged the type of long-term training necessary for jobs in the 21st century economy through an extension of income support, an increase in the cap for training funding, and access to training for adversely affected incumbent workers.

For a worker to be eligible to apply for TAA, the worker must be part of a group of workers that are the subject of a petition filed with the Department. Three workers of a company, a company official, a union or other duly authorized representative, or a One-Stop Career Center operator or One-Stop partner may file that petition with the Department. In response to the filing, the Department institutes an investigation to determine whether foreign trade was an important cause of the workers job loss or threat of job loss. If the Department determines that the workers meet the statutory criteria for group certification of eligibility for the workers in the group to apply for TAA, the Department grants the petition and issues a certification.

Once covered by a certification, individual workers apply for benefits and services through the One-Stop delivery system. Most benefits and services have specific individual eligibility criteria that must be met, such as previous work history, unemployment insurance eligibility, and individual skill levels.

Beneficiary Eligibility:

The TAA program currently offers the following services to eligible individuals: training, weekly income support, out-of-area job search and relocation allowances, case management and employment services, assistance

with payments for health insurance coverage through the utilization of the Health Coverage Tax Credit (HCTC), and wage insurance for some older workers through RTAA or ATAA. RTAA is the wage insurance option available to reemployed older workers authorized by the TGAAA. RTAA replaces ATAA, which provided wage insurance to reemployed older workers as a pilot project under the TAA Reform Act of 2002 for adversely affected workers covered by certifications of petitions filed before May 18, 2009.

Credentials/Documentation:

No Credentials or documentation are required. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. To apply for TAA under the Trade Act of 1974, as amended, a "Petition for Trade Adjustment Assistance" must be filed directly with the Office of Trade Adjustment Assistance at the address listed below and with the State official or organization designated by the Governor of the State in which the workers' firm or subdivision is located. OTAA and State contact information, as well as petition forms in English and Spanish, are available through the State Workforce Agencies or from the Office of Trade Adjustment Assistance listed below. The Petition forms may also be downloaded from our web-site at: <http://www.doleta.gov/tradeact>. Petitions must be filed with both the OTAA and the State agency in which the worker group's plant is located. Notice of such filing shall be promptly published in the Federal Register. Within 10 days after publication, the petitioner or any other person found by the Secretary to have a substantial interest may request a hearing and be afforded the opportunity to be present, to present evidence, and to be heard.

Award Procedure:

A Certification of Eligibility to apply for worker adjustment assistance may be issued by the Secretary of Labor to groups of workers who have been found by the Department of Labor to have met the requirements concerning foreign trade-affected separations from employment. Individual workers covered by the certification can apply to the local office of their State Workforce Agency for individual determinations of eligibility to receive benefits.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

From 30 to 60 days. For the TAA program, eligibility investigations begun by the receipt of a valid petition are completed, and a determination issued, within 40 calendar days of the receipt of the petition.

Appeals:

From 30 to 60 days. There are two courses of appeal, one administrative and the other judicial. Petitioners aggrieved by a final determination by the Secretary may, within 30 days after notice of such determination is published in the Federal Register, file an application for reconsideration with the Director of the Office of Trade Adjustment Assistance. If the determination following reconsideration is negative, they may, within 60 days after notice of the negative determination upon reconsideration, file a petition for review of such determination with the United States Court of International Trade in New York City. Aggrieved petitioners may request judicial appeal without first seeking administrative reconsideration, within 60 days after notice of such determination is published in the Federal Register.

Formula and Matching Requirements:

This program has no statutory formula.
This program has no matching requirements.

Length and Time Phasing of Assistance:

Cash trade readjustment allowances (TRA) generally becomes payable only

after workers have exhausted their entitlement to State unemployment compensation including extended benefits. For TAA certifications on petitions filed on or after May 18, 2009, the maximum number of weeks of State unemployment compensation, extended benefits and trade readjustment allowances cannot exceed 52 weeks except that up to 78 additional weeks may be paid to workers while participating in approved training and an additional 26 weeks for workers whose approved training program includes pre-requisite and/or remedial education. Participation in RTAA allows older workers, for whom retraining may not be appropriate, to accept reemployment at a lower wage and receive a wage subsidy instead of benefits under the regular TAA program. The RTAA allows for payments of 50 percent of the wage difference between old employment and new employment, not to exceed \$12,000 for up to two years. The individual must earn not more than \$55,000 a year in wages in reemployment, and must not return to employment from which the worker was separated. Base formula funding grants for training services are provided to States at the beginning of the year; additional funds may be requested by States based on additional needs above the base funding provided. Method of awarding/releasing assistance: lump sum.

Reports:

Quarterly Performance Reports are required. No cash reports are required. No progress reports are required. Quarterly financial reports on grants for administration of TAA/TRA program are required. Program performance is monitored both by state staff and by Federal Regional Office staff.

OBJECTIVES:

To enhance the productivity and competitiveness of the nation's workforce by providing workforce investment activities that increase the employment, retention, and earnings of participants, and increase occupational skill attainment by the participants. This program is designed to increase employment, as measured by entry into unsubsidized employment, retention in unsubsidized employment after entry into employment, and earnings. 17.260 WIA DISLOCATED WORKERS

(WIA-Dislocated Workers)

FEDERAL AGENCY:

Employment Training Administration, Department of Labor

AUTHORIZATION:

Workforce Investment Act of 1998, Title I, Subtitle B, Chapter 5, Title I, Public Law 105-220, 20 U.S.C 9201; The American Recovery and Reinvestment Act of 2009, Title VIII, Public Law 111-5.

OBJECTIVES:

The purpose of the WIA Dislocated Worker program is to reemploy dislocated workers, improve the quality of the workforce, and enhance the productivity and competitiveness of the nation's economy by providing workforce investment activities that increase the employment, retention, and earnings of participants, and increase occupational skill attainment by the participants. This program is designed to increase employment, as measured by entry into unsubsidized employment, retention in unsubsidized employment after entry into employment, and extent of recovery of prior earnings. The program serves individuals and helps employers meet their workforce needs. The employment goals will be measured using Unemployment Insurance Wage Records systems and customer satisfaction goals will be measured by sampling. The purpose of National Emergency Grants (NEGs) are to temporarily expand service capacity at the state and local levels by providing time-limited funding assistance in response to significant dislocation events. Significant events are those that create a sudden need for assistance that cannot reasonably be expected to be accommodated within the on-going operations of the formula-funded Dislocated Worker program, including the discretionary resources reserved at the state level.

TYPES OF ASSISTANCE:

FORMULA GRANTS; Project Grants

USES AND USE RESTRICTIONS:

The Act authorizes three levels of service, which are available to all job seekers. "Core" services include outreach, job search and placement assistance, and labor market information, and are available to all jobseekers. "Intensive" services include more comprehensive assessments, development of individual employment plans and counseling, and career planning, and are available to those who could not find employment through core services. Those customers who cannot find employment through intensive services may receive "training" services linked to job opportunities in their communities, including both occupational training and training in basic skills. To promote customer choice and involvement in career decisions, participants use an "individual training account" to select an appropriate training program from an eligible training provider. The Act also authorizes the provision of supportive services (e.g., transportation and child care assistance) to enable an individual to participate in the program. Funds reserved by the Secretary are also used for technical assistance and training and demonstration programs. Eligible circumstances for NEG funding include: Plant closures; mass layoffs affecting 50 or more workers; and special assistance, including health insurance coverage assistance to trade impacted workers and other individuals eligible under the Trade and Globalization Adjustment Assistance Act of 2009. Currently, CFDA number 17.260 represents both the WIA Dislocated Worker formula grants and the National Emergency Grants (NEGs). Beginning in Program Year (PY) 2010 CFDA number 17.260 will be archived and any new funds allocated through these two programs will be referenced using two new CFDA numbers: 17.277 for NEGs and 17.278 for WIA Dislocated Worker Formula Grants. 17.266 WORK INCENTIVE GRANTS

FEDERAL AGENCY:

Employment Training Administration, Department of Labor

AUTHORIZATION:

Workforce Investment Act Sections 121, 134(c), 189(c) (29 U.S.C 2841, 2864 (c), and 2939(c)). Key regulations governing the Workforce Investment Act (WIA) program are at 20 CFR Parts 651-652 and 660-671. , 29 U.S.C ; Wagner-Peyser Act. Key regulations governing the Wagner-Peyser Act program are at 20 CFR Parts 651-652 and 660-671., 29 U.S.C 49f.

OBJECTIVES:

Work Incentive Grants (WIGs) and Disability Program Navigators (DPNs) were established to increase the labor force participation and career advancement of persons with disabilities by effecting systemic change in the One Stop Career Centers. These programs support the capacity of the One Stop Career Center system to achieve integrated, seamless, and comprehensive services for people with disabilities, thereby increasing their employment, retention, and earnings. The competitive WIG Program has been reoriented from a competitive solicitation to the Disability Program Navigator (DPN) cooperative agreement, thereby assuring that the essential goals of the WIGs are achieved in the Workforce Investment System. The Department of Labor (DOL) and the Social Security Administration (SSA) jointly established a new position, the Disability Program Navigator (DPN), in One Stop Career Centers. The DPN guides the One Stop Career Center staff in helping people with disabilities access and navigate the various programs that impact upon their ability to gain/retain good jobs. Complex rules surrounding entitlement programs, along with the fear of losing cash assistance and health benefits, can often discourage people with disabilities from working. Consequently, the DPN initiative was established to better inform beneficiaries and other people

with disabilities about the work support programs now available at the DOL-funded One Stop Career Centers. The major objectives of the DPN initiative are: (1) creating systemic change and transforming the culture of how the One Stop Career Center system serves customers with disabilities; (2) promoting meaningful and effective access, both physical and programmatic, to the One Stop Career Center system for all customers, including persons with disabilities; (3) creating attitudinal change about the abilities of people with disabilities to work in a variety of jobs and industries; (4) developing new/ongoing partnerships to achieve comprehensive services to people with disabilities; (5) expanding and enhancing the workforce development system's capacity to serve customers with disabilities and employers through the implementation of effective DPN strategies and practices; and (6) increasing the number of people with disabilities served under the WIA and achieving quality employment outcomes for job seekers with disabilities through accessing WIA Title I and Wagner-Peyser Programs.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

Funds are used for establishing Disability Program Navigators in One Stop Career Centers and improving the centers' physical and programmatic access for customers with disabilities. All proposed costs should be necessary and reasonable according to the Federal guidelines set forth in the Uniform Administrative Requirements for Grants and Cooperative Agreements to state and local governments, codified at 289 CFR Part 97, and must comply with the applicable OMB cost principles circulars, as identified in 29 CFR 96.27 and 29 CFR 97.22(b). Awardees must comply with the all other applicable administrative standards and national policy provisions (listed in the SGA). Indirect costs cannot exceed ten percent of the award.

Funding for the Work Incentive Grants (WIGs)/Disability Program Navigators (DPNs) have been eliminated, effective June 30, 2010. Round IV DPN projects (Arkansas, Nevada, the Virgin Islands, and Guam) were initially funded through June 30, 2011. In addition, several existing projects will continue for some period of time in FY 2010 due to carry-over funding.

There is a new Disability Employment (DEI) Initiative, which is a joint project of the U.S. DOL/Employment and Training Administration (ETA) and Office of Disability Employment Policy. ETA issued a Solicitation for Grant Application (SGA) totaling approximately \$22 million to fund projects to improve the educational, training, and employment opportunities and outcomes of youth and adults with disabilities, including those receiving Social Security disability benefits. State WIA-administering entities will be eligible to receive grant funding, through cooperative agreements, ranging from \$1.5 to \$6 million, for a three-year period. These cooperative agreements will be used to foster exemplary and model service delivery through the public workforce investment system for job seekers with disabilities, building upon the disability program navigator initiative and other model service delivery strategies. The funds will be awarded by September 30, 2010. The Disability Employment "DEI" Initiative is covered under CFDA number 17.207 Employment Service/Wagner-Peyser Funded Activities. Funds must be used in accordance with Federal Regulations for this program. Restrictions are noted in grant agreements.

As of June 30, 2010, the funding for the DPN grants has been eliminated; several of the existing grants are continuing with carryover 2009 and 2010 funds. The Combined Appropriation Act of 2010, Public Law 111-1117, included \$12 million in funds to DOL's Employment and Training Administration (ETA) and the Office of Disability Employment Policy to fund \$22 million in competitive grants to state WIA-administering entities to improve educational, training, and employment opportunities and outcomes of youth and adults with disabilities who are unemployed, underemployed, and receiving Social Security disability benefits. ETA expects to award approximately six to ten cooperative agreements ranging from \$1.5 to 6 million for a three-year period. This funding will continue the Disability Program Navigator Initiative's effective practices, as well as other promising practices. The funds will be awarded by September 30, 2010. The funds are included under CFDA 17.207.

TYPES OF ASSISTANCE:

PROVISION OF SPECIALIZED SERVICES

USES AND USE RESTRICTIONS:

Under Section 212 (a)(5)(A) of the Immigration and Nationality Act, foreign workers who seek to immigrate to the United States for employment shall be excluded from admission unless the Secretary of Labor determines and certifies to the Secretary of State and to the Secretary of Homeland Security that there are not sufficient U.S. workers available for the position, and that the employment of such foreign workers will not adversely affect the wages and working conditions of U.S. workers similarly employed. The certified employer must hire the foreign worker as a full-time employee; there must be a bona fide job opening available to U.S. workers; job requirements must adhere to what is customarily required for the occupation in the U.S. and may not be tailored to the foreign worker's qualifications. In addition, the employer shall document that the job opportunity has been and is being described without unduly

restrictive job requirements, unless adequately documented as arising from business necessity. The employer must pay at least the prevailing wage for the occupation in the area of intended employment.

Applicant Eligibility:

(1) Any employer who is unable to find qualified U.S. workers to meet his or her needs and seeks to hire a foreign worker to fill a given job vacancy on a permanent basis is eligible to file an application for permanent labor certification with the Department of Labor. (2) An employer who seeks to employ a foreign worker whose category of employment is included in the Department of Labor, Schedule A list of precertified occupations contained in Part 656, Title 20, Code of Federal Regulations is eligible to file an application directly with the appropriate U.S. Citizenship and Immigration Services Office.

Beneficiary Eligibility:

Prior to filing the application for permanent employment certification, the employer must request a prevailing wage determination from the State Workforce Agency (SWA) having jurisdiction over the proposed area of intended employment and must attest, in addition to a number of other conditions of employment, to having conducted recruitment prior to filing the application. Commencing January 1, 2010, employers intending to file permanent labor certification applications must request prevailing wage determinations from the Employment and Training Administrations center located in Washington, DC. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Employers must file labor certification applications for permanent employment directly with the appropriate National Processing Center (except for Schedule A occupations). See <http://workforcsecurity.doleta.gov/foreign/perm.asp> for additional details.

Award Procedure:

If the appropriate National Processing Center approves the application, the application form is "certified" (approved) by the Certifying Officer and returned to the employer/agent who submitted the application. The labor certification is then filed by the sponsoring employer in support of its immigrant worker petition with USCIS.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

Timeframe for processing of permanent labor certification applications varies with the circumstances of each case.

Appeals:

The permanent labor certification program provides for reconsideration by a Certifying Officer of denial of an application, upon the employer's request. Instead of or following a request for reconsideration, requests for administrative review of final determinations (denials of permanent labor certification applications) may be made directly to the Department of Labor's Board of Alien Labor Certification Appeals (BALCA).

Renewals:

Not Applicable.

Formula and Matching Requirements:

Statutory formulas are not applicable to this program. Matching requirements are not applicable to this program. MOE requirements are not applicable to this program.

OBJECTIVES:

To provide greater protection for U.S. and foreign workers while assisting U.S. employers to obtain temporary foreign workers, when needed. Also, to enable agricultural and other employers to obtain foreign workers for temporary or seasonal jobs when domestic workers are not available; and to assure adequate working and living conditions for domestic and foreign workers employed in similar tasks.

TYPES OF ASSISTANCE:

Federal Employment; FORMULA GRANTS; PROVISION OF SPECIALIZED SERVICES

USES AND USE RESTRICTIONS:

The Department of Labor issues labor certifications for temporary employment under several programs: H-1B Specialty (Professional) Worker Program, H-1B1 Specialty Worker Program (professionals from Chile or Singapore working in specialty occupations), E-3 Specialty Worker Program (professionals from Australia working in specialty occupations), H-2A Temporary Labor Certification (Agricultural), H-2B Temporary Labor Certification (Non-Agricultural), and D-1 Crewmember Program.

Applicant Eligibility:

H-2A Program: An agricultural employer who anticipates a shortage of U.S. workers needed to perform agricultural labor or services of a temporary or seasonal nature. The employer may be an individual proprietorship, a partnership or a corporation. An association of agricultural producers may file as a sole employer, a joint employer with its members, or as an agent of its members. An authorized agent, whether an individual (e.g., and attorney) or an entity (e.g., an association), may file an application on behalf of an employer. Associations may file master applications on behalf of their members. H-2B Program: The job and the employer's need must be one time, seasonal, peak load or intermittent; the job must be for less than one year; and there must be no qualified and willing U.S. workers available for the job. An employer can file an application for labor certification with the appropriate National Processing Center of the Employment and Training Administration. State Workforce Agencies are federally funded to issue prevailing wage determinations for foreign labor certification programs.

Grants support state activities to help employers recruit U.S. workers before seeking to hire a foreign worker. These foreign labor certification programs govern employers who have a need for workers in specialty occupations or as fashion models or in temporary agricultural or non-agricultural employment.

Credentials/Documentation:

In the major temporary labor certification programs, employers sponsoring foreign workers to fill a temporary need file the certification from the Department of Labor as documentation in support of their respective I-129 nonimmigrant worker petitions with the Department of Homeland Security,

United States Citizenship and Immigration Services (USCIS). In the H-1B1 and E-3 programs, a USCIS petition is not needed for initial visa issuance, and the foreign national may use proof of certification in support of the visa application. Employers contact the appropriate office of the Employment and Training Administration. Also see <http://www.doleta.gov/business/gw/guestwkr/> for additional details on specific programs.

Award Procedure:

State workforce agencies receive notification of grant award after federal approval of their workplans. Employers must prove they qualify for foreign labor certification before they can move to the next step of the employment-based immigration process. Certifications are sent to the employer in support of the petition to be filed with the U.S. Citizenship and Immigration Services which determines admissibility and Visa classification. Certified copies of accepted attestations for the D-1 Crewmember program are returned to the employer and the USCIS is notified of the filing in writing. OBJECTIVES:

To reemploy dislocated workers, improve the quality of the workforce, and enhance the productivity and competitiveness of the nation's economy by providing workforce investment activities that increase the employment, retention, and earnings of participants, and increase occupational skill attainment by the participants. This program is designed to increase employment, as measured by entry into unsubsidized employment, retention in unsubsidized employment after entry into employment, and extent of recovery of prior earnings. The program intends to increase credential attainment among displaced workers and help employers meet their workforce needs. The employment goals will be measured using Unemployment Insurance Wage Records systems and customer satisfaction goals will be measured by sampling.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

The Act authorizes three levels of service, which are available to all job seekers. "Core" services include outreach, job search and placement assistance, and labor market information, and are available to all jobseekers. Those customers who cannot find employment through intensive services may receive "training" services linked to job opportunities in their communities, including both occupational training and training in basic skills. To promote customer choice and involvement in career decisions, participants use an "individual training account" to select an appropriate training program from an eligible training provider. The Act also authorizes the provision of supportive services (e.g., transportation and child care assistance) to enable an individual to participate in the program. Funds reserved by the Secretary are also used for technical assistance and training and demonstration programs. Funds must be used in accordance with the statute and regulations.

Applicant Eligibility:

Under WIA, the organizations eligible to receive formula-based funding from the Department are the 50 states, Puerto Rico, The District of Columbia and the outlying areas. Funds are allotted based on a statutory formula and states, in turn, allocate funds to local workforce investment boards (approximately 600), by formula prescribed by the governor.

Beneficiary Eligibility:

Additional standards apply to child labor; to wage payment standards for professional performers and related or supporting professional employees of productions assisted by grants from the National Endowments for the Arts and Humanities; to curtail employer use of lie detector tests, including polygraph tests for pre-employment screening or during the course of employment; to enforce standards to protect the terms and conditions of employment for migrant and seasonal agricultural workers; to enforce provisions requiring the provision of potable drinking water, handwashing and toilet facilities; to enforce contractual obligations regarding wages and other working conditions between certain temporary, alien agricultural workers (H-2A) and their employers; to enforce worker protection provisions applicable to nonimmigrant workers in "specialty occupations" (H-1B), foreign workers as registered nurses in health professional shortage areas (H-1C), nonagricultural labor or services of temporary or seasonal nature (H-2B), and foreign crew members performing longshore work; to require private employers with 50 or more employees and all schools and public employers to provide eligible employees up to 12 weeks of unpaid leave, job restoration, and continued employer provided health insurance due to the employee's serious health condition, the birth of or placement for adoption/foster care of a child, for the care of a child, spouse or parent with a serious health condition or for any "qualifying exigency" arising out of the fact that the employee's spouse, son, daughter, or parent is on active military duty, or has been notified of an impending call or order to active military duty in support of a contingency operation (provided the active duty relates to a military member of the National Guard or Reserves), or require these same employers to provide up to 26 weeks of unpaid leave, job restoration, and continued employer provided health insurance to an eligible employee who is a spouse, son, daughter, parent, or next of kin of a covered service member with a serious injury or illness.

TYPES OF ASSISTANCE:

ADVISORY SERVICES AND COUNSELING; INVESTIGATION OF COMPLAINTS

USES AND USE RESTRICTIONS:

Federal wage and hour standards apply generally to employees engaged in interstate or foreign commerce or in the production of goods for such commerce or in enterprises so engaged and, in addition, to employees of Federal, State and local governments, hospitals, businesses providing medical or nursing care for residents, schools and preschools. Generally, for covered employment the minimum wage is \$6.55 per hour (\$7.25 per hour effective July 24, 2009) with time and one-half the regular rate of pay required for hours worked over 40 in a workweek. There are special rules applicable to employees of State and local governments, including provisions concerning volunteer work, compensatory time-off, and outside employment. To the extent necessary to prevent curtailment of employment opportunity, certificates authorizing special minimum wage rates are issued for learners, workers with disabilities, full-time students, student workers, and apprentices. In nonagricultural employment, the basic minimum age is 16 years for general employment, 14 for work outside school hours in certain occupations under specified conditions, and 18 in occupations found hazardous by the Secretary. In agricultural employment, the basic minimum age is 16 years during school hours and in occupations found hazardous by the Secretary; otherwise, age 14 for work outside school hours except for 12- and 13-year-olds with written parental consent or on farms where their parents are employed, or under age 12 with written parental consent on a

farm not subject to Federal minimum wage or under a limited waiver for local 10- and 11-year-old hand-harvesters of short-season crops under specified conditions. Failure to comply with the child labor provisions of the Fair Labor Standards Act or regulations issued there under may generally result in an assessment of a civil money penalty not to exceed \$11,000 for each minor involved in violations; however, a penalty of up to \$50,000 may be assessed for each violation that caused the death of or serious injury to a working youth, and this penalty may be increased to \$100,000 where the employer's violation is repeated or willful. Employees of contractors performing on most federally financed or assisted construction projects, or providing services under contract to Federal agencies, are subject to special standards. These special standards require that employees receive no less than the wages and fringe benefits prevailing in the locality as determined by the Secretary of Labor, and that overtime compensation, with few exceptions, be paid for hours worked on such contracts in excess of 40 in a week. The standards apply to performance on direct Federal contracts and also to most construction projects financed in whole or in part by the Federal Government (e.g., projects under the National Housing Act). Under current law, for Federal and federally assisted construction contracts over \$2,000 and Federal service contracts over \$2,500 subject to prevailing wage requirements, contracting agencies must obtain a wage determination issued by the Wage and Hour Division. Also under current law, employees working on Federal contracts in excess of \$10,000 calling for the manufacture or furnishing of supplies are required to be paid not less than the Federal minimum wage and overtime pay for hours worked in excess of 40 a week. Labor standards are set under the Arts and Humanities Act which require the payment of the prevailing minimum compensation as determined by the Secretary of Labor to professional performers or supporting personnel who work on projects or productions assisted by grants from the National Endowments for the Arts and Humanities. The Employee Polygraph Protection Act prohibits most private employers from administering lie detector tests to employees or prospective employees but permits the use of polygraph tests under certain conditions. The Nursing Relief for Disadvantaged Areas Act, as extended by the Nursing Relief for Disadvantaged Areas Reauthorization Act, amended the Immigration and Nationality Act (INA) to provide for the enforcement of attestations made by H-1C employers of foreign nurses working temporarily in areas of health professional shortages. The attestations are related to wages and working conditions, in addition to the treatment of U.S. registered nurses similarly employed. The Migrant and Seasonal Agricultural Worker Protection Act requires that covered employers disclose and abide with the terms and conditions of employment and that farm labor contractors register with the Secretary of Labor. The field sanitation standards under the Occupational Safety and Health Act require that employers provide potable drinking water, handwashing, and toilet facilities for covered workers. The H-2A provisions of the INA provide for the enforcement of contractual obligations concerning wages and other working conditions between certain temporary, alien agricultural workers and their employers. The H-2B provisions of the INA provide for the enforcement of conditions of employer petitions to admit nonimmigrant workers for non-agricultural labor or services. Section 203 of the Immigration Act of 1990 places limitations on the performance of Longshore work by alien crew members in U.S. ports; Section 212(n) places limitations on the employment of nonimmigrant workers in H-1B Specialty Occupations. The Family and Medical Leave Act requires a private employer of 50 or more employees and all public employers and schools to grant up to 12 weeks of unpaid leave in a 12-month period to any employee who was employed at least 12 months for 1,250 hours of service during the preceding 12 months, and is employed at a work site where there are 50 employees within 75 miles for certain qualifying events related to self and family care, and up to 26 weeks to care for a qualified service member with a serious injury or illness.

Applicant Eligibility:

Any covered employee, unless specifically exempt, is entitled to be paid in accordance with applicable monetary standards in the United States, District of Columbia, Puerto Rico, Virgin Islands, American Samoa, Guam, Wake Island, Johnston Island, and the Outer Continental Shelf Lands defined in the Outer Continental Shelf Lands Act. (Geographic application varies under the respective statutes and eligibility is dependent upon specific statutory language.) For family and medical leave, coverage includes any employer with 50 or more employees but excludes any employer at a worksite with fewer than

50 employees within a 75-mile radius.

The general rules for applying the Federal restrictions on garnishment are: If an individual's weekly disposable earnings are \$196.50 or less, no amount may be garnished; if the weekly disposable earnings are more than \$217.50 but less than \$290.00, only the amount in excess of \$217.50 may be garnished; and if the weekly disposable earnings are in excess of \$290.00 or more, 25 percent of disposable earnings may be garnished. The Act, as amended, limits court orders for the support of any person to 50 percent of the disposable earnings of an individual supporting another spouse or child and to 60 percent of disposable earnings if not. An additional 5 percent may be garnished for support payments more than 12 weeks in arrears. The restrictions do not apply under Federal bankruptcy proceedings for wage-earners, nor do they apply to debts due for State or Federal taxes. In addition, garnishments issued under the laws of any State may be exempted from the operation of the Federal law where the Secretary of Labor determines that such laws provide substantially similar restrictions. PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2009: No Current Data Available Fiscal Year 2010: In FY 2010, the Womens Bureau continued to support and develop on-going projects in its effort to promote an environment responsive to the demands and challenges of the 21st Century workforce. These targeted initiatives were designed to enhance opportunities for women under the Departments vision of Good Jobs for Everyone, and the Bureaus vision To empower all working women to achieve economic security. In cooperation with numerous womens, Federal, state, community, and faith-based organizations, the Bureau worked to develop, implement, and promote green jobs initiatives, flexible workplace policies, equal pay recommendations, assistance to homeless women veterans, and education and training for women in nontraditional occupations. GREEN JOBS INITIATIVE During FY2010, The Womens Bureau developed nine training pilots in conjunction with experts in green industries to serve as models for engaging and preparing women for a variety of high-growth and emerging green jobs over the next decade. In addition to technical skills training, pilot participants also learned basic skills such as resume writing, interview preparation, computer skills, and financial education. The pilots provided an opportunity for the Bureau to conduct action-based research on successes in preparing women for green jobs. The Womens Bureau also hosted a series of five teleconferences for workforce practitioners, designed to offer information and an exchange of ideas to better connect women with green jobs training and green employment. Topics included Why is Green Good for Women?, Womens Entrepreneurship in Green Industries, Recruiting and Retaining Women, Women Working in Green Construction and Energy Efficiency, and Women Working in Alternative Energy. NATIONAL DIALOGUE ON WORKPLACE FLEXIBILITY The Womens Bureau kicked off its National Dialogue on Workplace Flexibility with an announcement made by the Secretary Of Labor at the White House, building on efforts to gather information and promote best practices for workplace flexibility. The Bureau will be working with the White House Council on Women and Girls to host a series of meeting throughout the country. EQUAL PAY On Equal Pay Day, the Womens Bureau and the White House Council on Women and Girls hosted a briefing by several non-governmental organizations on the current status of the wage gap and equal pay for women. The non-governmental organizations shared their insights and recommendations about equal pay with policymakers in the Womens Bureau, the Department of Labor, and other Federal agencies. HOMELESS WOMEN VETERANS The Bureau's Region III office held a Women Vets @ Work Job Summit in Washington, DC, that successfully assisted 19 unemployed, under-employed and homeless women veterans in gaining employment in public and private sector jobs. The Bureau also created a Homeless Women Veterans Report that included information and data collected from listening sessions hosted throughout the country. The report identifies the needs of homeless women veterans and explores factors that lead to homelessness among female veterans as well issues regarding reintegration

into the workforce and how to improve services and resources for this population. Information gathered for the report will also provide a basis for the development of future research, projects and funding opportunities. **WOMEN IN THE TRADES** As part of the Departments observance of Womens History Month, the Womens Bureau and the Secretary of Labor hosted a roundtable discussion on the status of women in the trades. The event aimed to enhance communication and share useful strategies and ideas on womens entrance and advancement in trade occupations. DOL leadership joined twenty participants representing Labor, tradeswomen organizations, researchers and advocates to discuss recruitment, training and on-the-job issues, and barriers to retention. 17.806 VETERAN'S PREFERENCE IN FEDERAL EMPLOYMENT

FEDERAL AGENCY:

Veteran's Employment and Training Service, Department of Labor

AUTHORIZATION:

Veterans Preference Act of 1944, Public Laws 78-359, 93-508, 94-502, 95-520, 95-454, 97-72, 97-306, 98-543, 99-576, 101-237, 102-16, 102-568, 105-339, and 106-117; 109-163; Executive Order 11521, March 26, 1970.

OBJECTIVES:

To provide assistance to preference eligible individuals who believe that their rights under veterans' preference statutes and regulations have been violated. Recognizing their sacrifice, Congress enacted laws to prevent veterans seeking Federal employment from being penalized for their time in military service. Veterans' preference recognizes the economic loss suffered by citizens who have served their country in uniform, restores veterans to a favorable competitive position for Government employment, and acknowledges the larger obligation owed to disabled veterans. Veterans' preference is not so much a reward for being in uniform as it is a way to help make up for the economic loss suffered by those who answered the nation's call to arms. Historically, preference has been reserved by Congress for those who were either disabled or who served in combat areas. Eligible veterans receive many advantages in Federal employment, including preference for initial employment and a higher retention standing in the event of layoffs. However, the veterans' preference laws do not guarantee the veteran a job, nor do they give veterans' preference in internal agency actions such as promotion, transfer, reassignment, and reinstatement. By law, veterans who are disabled or who served on active duty in the Armed Forces during certain specified time periods or in military campaigns are entitled to preference over others in hiring from competitive lists of eligibles and also in retention during reductions-in-force. Preference applies in hiring for virtually all Federal jobs, whether in the competitive or excepted service. In addition to receiving preference in competitive appointments, veterans may be considered for special noncompetitive appointments for which only they are eligible.

TYPES OF ASSISTANCE:

FEDERAL EMPLOYMENT

USES AND USE RESTRICTIONS:

To assist persons who perform service in the uniformed services to secure Federal employment and to ensure a higher retention standing in the event of a reduction-in-force. To provide information and assistance to veterans, employers, labor organizations, and other elements of the community concerned with veterans' preference in Federal employment and retention. The Department of Labor - Veterans' Employment and Training Service investigates complaints with the goal of voluntary resolution of veterans' preference problems. Unresolved complaints can be pursued by the complainant veteran to the Merit Systems Protection Board.

Applicant Eligibility:

(1) Five-point preference is given to those honorably separated veterans (this means an honorable or general discharge) who served on active duty (not active duty for training) in the Armed Forces: During any war (this means a war declared by Congress, the last of which was World War II); during the period April 28, 1952, through July 1, 1955; for more than 180 consecutive days, any part of which occurred after January 31, 1955, and before October 15, 1976; during the Gulf War period beginning August 2, 1990, and ending January 2, 1992; for more than 180 consecutive days, any part of which occurred during the period beginning on September 11, 2001, and ending on the date prescribed by Presidential proclamation or by law as the last date of Operation Iraqi

Freedom; or in a campaign or expedition for which a campaign medal has been authorized, such as El Salvador, Lebanon, Granada, Panama, Southwest Asia, Somalia, and Haiti. Medal holders and Gulf War veterans who originally enlisted after September 7, 1980, or entered on active duty on or after October 14, 1982, without having previously completed 24 months of continuous active duty, must have served continuously for 24 months or the full period called or ordered to active duty. Effective on October 1, 1980, military retirees at or above the rank of major or equivalent, are not entitled to preference unless they qualify as disabled veterans. Ten-point preference is given to those honorably separated veterans who: (1) Qualify as disabled veterans because they have served on active duty in the Armed Forces at any time and have a present service-connected disability or are receiving compensation, disability retirement benefits, or pension from the military or the Department of Veterans Affairs; or (2) are Purple Heart recipients; the spouse of a veteran unable to work because of a service-connected disability; the unmarried widow of certain deceased veterans; and the mother of a veteran who died in service or who is permanently and totally disabled. When applying for Federal jobs, eligible veterans should claim preference on their application or resume. Applicants claiming 10-point preference must complete form SF- 15, Application for 10-Point Veteran Preference. Veterans who are still in the service may be granted 5 points tentative preference on the basis of information contained in their applications, but they must produce a DD Form 214 prior to appointment to document entitlement to preference. Note: Reservists who are retired from the Reserves but are not receiving retired pay are not considered "retired military" for purposes of veterans' preference. (2) Veterans who have been separated from the armed forces under honorable conditions shortly before completion of 3 years, or completion of 3 years or more of active duty military service are eligible to compete for vacant Federal positions for which the agency making the announcement will accept applications from individuals outside its own workforce under merit promotion procedures. This does not make them preference eligible, but allows access to certain Federal job openings for which they would otherwise not be entitled to apply. (3) Public Law 94-502 authorizes Federal agencies to provide unpaid training or work experience, as a part of the Department of Veterans Affairs vocational rehabilitation for a disabled veteran. Such training may be designed to provide noncompetitive appointment.

Beneficiary Eligibility:

Non-disabled veterans, disabled veterans and certain wives or husbands, widows, widowers, and mothers of veterans.

Credentials/Documentation:

For veterans' preference, general proof of honorable separation such as discharge certificate or DD Form 214. In addition, for 10-point preference, a letter from the Department of Veterans Affairs or military department certifying existence of service-connected disability. When the 10-point preference is based on the award of a Purple Heart, official documentation of the award is sufficient. This program is excluded from coverage under OMB Circular No. A-87.

Preapplication Coordination:

None. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

This program is excluded from coverage under OMB Circular No. A-102. This program is excluded from coverage under OMB Circular No. A-110. Application forms are available from Service Centers of the Office of Personnel Management and from Federal agency personnel offices. Veterans eligible for noncompetitive appointment should make personal contact with the Federal agency where they would like to be considered for employment. Veterans who believe that they have not been properly accorded their rights have several different avenues of complaint, depending upon the nature of the complaint and the individual's veteran status: The Veterans Employment Opportunities Act of 1998 allows preference and other eligibles to file a complaint with the Department of Labor's Veterans' Employment and Training Service (VETS) when the person believes an agency has violated his or her rights under any statute or regulation relating to veterans' preference. Eligible veterans seeking employment who believe that an agency has not properly accorded them their veterans' preference, or failed to provide special placement consideration noted above, may file a complaint with the local Department of Labor VETS

representative (located at State employment service offices). To be eligible to file a complaint a veteran must: Have served on active duty for more than 180 days and have other than a dishonorable discharge; have a service-connected disability; or served on active duty during a period of war, or received a campaign badge or expeditionary medal (e.g., the Southwest Asia Service Medal). The Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA) prohibits discrimination in employment, retention, promotion, or any benefit of employment on the basis of a person's service in the uniformed services. Complaints under this law should also be filed with the local Department of Labor VETS representative (located at State employment service offices). Since a willful violation of a provision of law or regulation pertaining to veterans' preference is a Prohibited Personnel Practice, a preference eligible who believes his or her veterans' preference rights have been violated may file a complaint with the local department of Labor VETS representative, as noted above. (FAA Centers of Excellence)

FEDERAL AGENCY:

Federal Aviation Administration (FAA), Department of Transportation

AUTHORIZATION:

Federal Aviation Administration Research, Engineering and Development Authorization Act of 1990, Public Law 101-508.

OBJECTIVES:

To conduct long term continuing research in specific areas of aviation related technology. Responsibilities of Centers may include, but are not limited to: the conduct of research concerning catastrophic failure of aircraft; airspace and airport planning and design; airport capacity enhancement techniques; human performance in the air transportation environment; aviation safety and security; the supply of trained air transportation personnel including pilots and mechanics; and other aviation issues pertinent to developing and maintaining a safe and efficient air transportation system, and the interpretation, publication, and dissemination of the results of such research.

TYPES OF ASSISTANCE:

PROJECT GRANTS; PROVISION OF SPECIALIZED SERVICES; USE OF PROPERTY, FACILITIES, OR EQUIPMENT

USES AND USE RESTRICTIONS:

Centers of Excellence are established for long term continuing mission critical research in specific areas of technology areas. Funding may be used for the establishment and operation of the Centers of Excellence and the related training, education and research projects. The FAA determines a need for a Center of Excellence in a specific area of technology and publishes a Notice of Availability of Solicitation in Grants.gov. In response to this announcement, each applicant submits a description of their institutional capabilities, available faculty, facilities and equipment, and additional information as required in the solicitation. Researchers at each Center are expected to maintain a close working relationship with relevant FAA program offices that have responsibility in areas related to their research. Centers conduct semi-annual reviews, and a major symposium at the conclusion of each 3-year phase of research to satisfy Congressional requirements to disseminate research results to a broad audience. CONGRESSIONAL RESTRICTIONS: (1) Matching Funds - The Federal share of the grant awarded shall be 50 percent of the cost to establish and operate and conduct related research within the Center of Excellence and related research activities. (2) Maintenance of Effort - Each recipient will maintain its aggregate expenditures from all other sources for establishing and operating the Center and related research activities at or above the average level of such expenditures in its 2 fiscal years preceding November 5, 1990. (3) Locations of centers and distribution of funds shall be geographically equitable. (4) Contract tasks may be awarded following the competitive process and include negotiable cost share. (5) Funds are awarded to universities. Industry affiliates must align with academic institutions who may then sub-contract to others as appropriate.

Applicant Eligibility:

Applicants are limited to colleges and universities with the financial resources to meet statutory requirements for matching Federal funds and maintenance of effort. Academic institutions may partner with industry affiliates, other public and private entities, and government laboratories.

Beneficiary Eligibility:

Recipients are limited to colleges and universities with the financial resources

to meet statutory requirements for matching Federal grants and maintenance of effort. In conducting research, a Center of Excellence may contract with nonprofit research organizations and other appropriate persons.

Credentials/Documentation:

Required documentation is outlined in each solicitation package. After each Notice of Solicitation is published, copies of the Solicitation are available during a Public Meeting and/or from the FAA Centers of Excellence Program Office, FAA Technical Center, Atlantic City International Airport, NJ 08405. To establish a Center of Excellence, a competitive process is conducted to include: a public announcement, publication of a solicitation, a management/fiscal review, and a technical evaluation. Public Law 101-508 established the following six selection criteria: (1) The extent to which the needs of the State in which the applicant is located are representative of the needs of the region for improved air transportation services and facilities. (2) The demonstrated research and extension resources available to the applicant for carrying out this program. (3) The capability of the applicant to provide leadership in making national and regional contributions to the solution of both long- range and immediate air transportation problems. (4) The extent to which the applicant has an established air transportation program. (5) The demonstrated ability of the applicant to disseminate results of air transportation research and educational programs through a State-wide or region-wide continuing education program. (6) The projects which the applicant proposes to carry out under the grant. Each proposal must include the following: (a) description of current research projects being conducted in the specific research area, (b) a schedule of anticipated costs to establish and operate the Center of Excellence, (c) a plan for meeting the 50 percent nonfederal contribution toward the matching requirements, (d) a statement showing its aggregate expenditures from all other sources for aviation research in its 2 fiscal years preceding November 5, 1990, (e) all data sufficient for the evaluation team to determine the extent to which the applicant is able to satisfy the six selection criteria outlined in the preceding paragraph. Each proposal must contain a: 1. completed Application for Federal Assistance (SF-424 Research and Related); 2. table of contents; 3. technical statement addressing the problems inherent in the specific technical area(s) and probable solutions; 4. summary of results from FAA funding in the past five years; 5. biographical sketch for all senior personnel and a list of their principal accomplishments and publications during the past five years; 6. proposed budget for the initial three years including the anticipated costs of managing a new Center of Excellence, and a management plan; 7. listing of all current and pending support on all research awards from all sources; 8. listing of all available facilities and major items of equipment to be available to conduct research, and that which is necessary to acquire. 9. letters of support from various industry representatives, state and local officials, etc. Other required forms are to be included such as Disclosure of Lobbying Activities Form SF-LLL and certification of Compliance with the Civil Rights Act. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

FAA may hold a public information meeting prior to submission of proposals. Questions may be submitted to the FAA Centers of Excellence Program Director, AJP-9, FAA Technical Center, Atlantic City International Airport, NJ 08405. Environmental impact information is not required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." Colleges and universities may apply after the FAA has published a Notice of Availability of Solicitation for a Center of Excellence in a specific research area on the Grants.gov website. Solicitation and application packages are available from the FAA Centers of Excellence Program Office, FAA Technical Center, Atlantic City International Airport, NJ 08405.

Award Procedure:

Each Air Transportation Center of Excellence is awarded on behalf of the FAA Administrator. The FAA Centers of Excellence Program Director issues solicitations, receives all proposals, convenes evaluation teams to evaluate

eligible institutions for Centers of Excellence awards. Applicants should be prepared to host an onsite inspection of existing research facilities.

20.205 HIGHWAY PLANNING AND CONSTRUCTION

(Federal-Aid Highway Program, Federal Lands Highway Program).

FEDERAL AGENCY:

Federal Highway Administration (FHWA), Department of Transportation

AUTHORIZATION:

Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), Public Law 109-59, 23 U.S.C 101.

OBJECTIVES:

Federal-aid Highway Program: To assist State transportation agencies in the planning and development of an integrated, interconnected transportation system important to interstate commerce and travel by constructing and rehabilitating the National Highway System (NHS), including the Eisenhower Interstate System; and for transportation improvements to most other public roads; to provide aid for the repair of Federal-aid highways following disasters; to foster safe highway design; to replace or rehabilitate deficient or obsolete bridges; and to provide for other special purposes. This program also provides for the improvement of roads in Puerto Rico, Guam, the U.S. Virgin Islands, American Samoa, the Northern Mariana Islands, and the Alaska Highway. The Federal Lands Highway Program (FLHP), as an adjunct to the Federal Aid Highway Program, provides assistance to the Federal Land Management Agencies (FLMAs) for Federally owned roads. It provides transportation engineering services for planning, design, construction, and rehabilitation of the highways and bridges providing access to federally owned lands. The Federal Lands Highway organization also provides training, technology, deployment, engineering services, and products to other customers.

TYPES OF ASSISTANCE:

FORMULA GRANTS; PROJECT GRANTS

USES AND USE RESTRICTIONS:

Federal-aid highway funds are generally apportioned by statutory formulas to the States. They are generally restricted to roads open to the public and not functionally classified as rural minor collectors or local. Exceptions to this highway functional classification restriction include: planning and research activities; bridge, bicycle and pedestrian, and safety improvements that may be on any public road; transportation enhancement activities; the recreational trails program (see program 20.219); safe routes to school, nonmotorized transportation, the FLHP, and public transportation improvement. The FLHP is not a grant program. For highway projects, funds may be used for environmental studies, engineering and design services, right-of-way acquisition and relocation assistance, and construction for capital improvement projects classified as new construction, reconstruction, restoration, rehabilitation, and resurfacing, or for functional, geometric, or safety reasons. Funds may also be used for planning; research, development, and technology transfer; intelligent transportation systems projects; roadside beautification; wetland and natural habitat mitigation, traffic management and control improvements; improvements necessary to accommodate other transportation modes, development and establishment of transportation management systems; billboard removal; construction of bicycle facilities and pedestrian walkways; fringe and corridor parking; car pool and van pool projects; transportation enhancements such as scenic and historic highway improvements; and recreational trails. Funds generally cannot be used for routine highway operational activities, such as police patrols, mowing, snow plowing, or maintenance, unless it is preventative maintenance. Also, funds authorized for the NHS, Surface Transportation Program (STP), Congestion Mitigation and Air Quality (CMAQ) Improvement Program, Equity Bonus (BE) program, and some additional programs may be used for mass transportation improvements; CMAQ funds are limited to projects and programs in air quality, non-attainment and maintenance areas for ozone, carbon monoxide, and small particulate matter that reduce transportation related emissions. Eligibility criteria for the

programs differ, so program guidance should be consulted. Projects in urban areas of 50,000 or more population must be based on a transportation planning process carried out by a Metropolitan Planning Organization (MPO) in cooperation with the State and transit operators, and the projects must be included in metropolitan transportation plans and improvement programs. Projects in non-metropolitan areas of a State must be consistent with a statewide transportation plan. Projects in both metropolitan and non-metropolitan areas must also be included in a fiscally constrained Statewide Transportation Improvement Program (STIP) developed as part of the required statewide transportation planning process. The FHWA and the Federal Transit Administration (FTA) must approve the STIP jointly.

Applicant Eligibility:

By law, the Federal-aid highway program is a federally assisted State program that requires each State to have a suitably equipped and organized transportation department. Therefore, most projects are administered by or through State transportation departments (State DOTs). Projects to be funded under the Federal-aid highway program are generally selected by State DOTs or MPOs, in cooperation with appropriate local officials, as specified in 23 U.S.C. and implementing regulations. Territorial highway projects are funded in the same manner as other Federal aid highway projects, with the territorial transportation agency functioning in a manner similar to a State transportation department. Most FLHP projects are administered by the FHWA Office of Federal Lands Highway and its Divisions or by the various FLMAs. Under the FLHP, projects in the Indian Reservation Road (IRR) Program are selected by Tribal governments and are approved by the Bureau of Indian Affairs (BIA) and the Federal Highway Administration. Due to recent legislation, Tribal governments meeting certain requirements may now administer various IRR projects on behalf of the BIA and FHWA. The Fish and Wildlife Service (FWS) and the National Park Service (NPS) select projects in the Refuge Road and Park Roads and Parkways programs, respectively. For the Forest Highway Program, the Forest Service, the States and the Federal Highway Administration jointly select projects.

Beneficiary Eligibility:

State transportation departments, and in some instances, Federal agencies, other State agencies, local agencies, and private, community-based organizations.

Credentials/Documentation:

Eligible activities and allowable costs will be determined in accordance with Title 23 and the OMB cost principles applicable to the recipient/sub-recipient. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

An environmental impact assessment is required for most projects under this program, although the level of review varies with the project. Projects under the FLHP have similar requirements; however, an interested applicant would need to contact the designated FLMA or the local FLH Division for more information. An environmental impact assessment is required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

OMB Circular No. A-102 applies to this program. This program is excluded from coverage under OMB Circular No. A-110. In general, projects/programs proposed for funding must be included in a fiscally constrained STIP, submitted by the State DOT, and approved jointly by the FHWA and the FTA. In addition, the State DOT may need to submit statements of work or plans, specifications, and estimates for certain proposed projects to the FHWA division office located in each State for approval. The FHWA has an agreement with each State that details the extent to which the State assumes the responsibilities of the FHWA for projects in that State. For projects on the Interstate System costing more than \$1 million, FHWA oversight of design and construction is required. For projects that are on the National Highway System but not on the Interstate System, the State may assume the responsibilities of the FHWA for oversight of design and construction, unless the State or the FHWA determines that such assumption is not appropriate. For projects that are not on the National Highway System, the State shall assume the

responsibilities of the FHWA for oversight of design and construction, unless the State determines that such assumption is not appropriate. For the discretionary portion of public lands highways, State DOTs submit desired projects to the FHWA division office located in each State. Following the appropriate project selection process, a Transportation Improvement Program (TIP) for the Park Roads and Parkways, Forest Highway and Refuge Road programs is developed by one of the Federal Lands Highway Division offices, and forwarded to the respective State for inclusion in the appropriate MPO TIP and STIP. For the Indian Reservation Roads program, a TIP is submitted to the FHWA Office of Federal Lands Highway for approval and then forwarded to the respective State for inclusion in the appropriate MPO TIP and STIP. Projects under the FLHP are subject to the metropolitan and statewide planning requirements.

Award Procedure:

The State DOTs generally decide which projects will be developed within funding levels but the FHWA division office located in each State makes the final decision on the eligibility of specific projects. There are several categories where funding is allocated at the discretion of the Secretary of Transportation and administered by the FHWA. Candidate projects for discretionary allocations are usually solicited before the start of the Federal fiscal year (October 1) and must be submitted by the State DOTs. FHWA approval of a project and execution of a project agreement constitute a commitment to pay the Federal share of the project's allowable costs. Projects administered by the FHWA Office of FLH or the FLMAs are subject to procurement processes identified in the Federal Acquisition Regulations. Project awards are subject to the availability of funds.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Length and Time Phasing of Assistance:

Federal-aid highway funds generally become available at the beginning of the fiscal year for which they are authorized and must be obligated within 3 years after the close of that fiscal year. However, some categories of funds are available until expended. Method of awarding/releasing assistance: lump sum.

Reports:

No program reports are required. No cash reports are required. No progress reports are required. SF-425. Except for projects that a state has oversight responsibility for, the FHWA division office in each State monitors and reviews State projects and programs during highway project location, design and construction. After the project is completed State maintenance of the project is reviewed periodically. Certain non-construction activities, such as transportation planning, require periodic progress reports. Similar procedures apply to the FLMAs and FLHP projects with the FHWA Office of FLH providing the mandatory stewardship and oversight. A value engineering analysis or other cost-reduction analysis is required for each project on the Federal-aid system with an estimated total cost of \$25,000,000 or more, a bridge project with an estimated total cost of \$20,000,000 or more; and any other project determined to be appropriate. Annual financial plans are required for projects with an estimated total cost of \$100,000,000 or more. In addition, a project management plan must be submitted for projects with an estimated total cost of \$500,000,000 or more.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit

Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133.

Records:

Project records and documents must be retained by the State or other governmental recipients/ subrecipients as specified in 49 CFR Part 18 or by non-profit recipients/subrecipients as specified in 49 CFR Part 19. For the Federal Lands Highway Program, the Federal Lands Highway Divisions maintain the project records.

Range and Average of Financial Assistance:

Federal-aid highway funds are provided to States on an annual basis, by a combination of statutory formula and discretionary allocation, stemming from multi-year authorization acts, the most recent being the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU). Total contract authority, for the range of programs and earmarks, from the Highway Account of the Highway Trust Fund, for the five-year period ending September 30, 2009 is as follows: 37,660,764,306, 38,557,541,690, 40,876,948,610, 42,254,431,862, and 33,868,790,045.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2009: The Federal-aid Highway Program has made significant contributions to the safer operation of the nation's highways, to the better intermodal connectivity of roads to other forms of transportation, and to the improvement of pavement and bridge conditions throughout the country, while helping to safeguard environmental conditions. It has provided funding for a wide range of alternatives to traditional highway construction projects to better serve transportation needs. It has developed and advanced critical new technologies, such as Intelligent Transportation Systems, and shared them with the States. The FLHP works to create the best transportation system in balance with the values of the Federal and tribal lands. The mission of the program is to improve transportation access to and within Federal and tribal lands and provide technical services to the highway community. EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2009: Federal-aid highway funds are generally apportioned by statutory formulas to the States and generally restricted to use on Federal-aid highways (i.e., roads open to the public and not functionally classified as local or rural minor collector). Exceptions to the use on Federal-aid highways include: (1) planning and research activities; (2) bridge and safety improvements, which may be on any public road; (3) bicycle and pedestrian projects, transportation enhancement activities, safe routes to school, and recreational trails projects, which may be located along any road or off road; and (4) the Federal Lands Highway Program. Some categories of funds may be granted directly to Local Public Agencies (LPAs), such as cities, counties, tribal governments, Metropolitan Planning Organizations (MPOs), and other political subdivisions. States also may pass funds through to such agencies. Federal-aid funds may be used for: surveying; engineering; right-of-way acquisition and relocation assistance; capital improvements classified as new construction or reconstruction; improvements for functional, geometric, or safety reasons; 4R projects (restoration, rehabilitation, resurfacing, and reconstruction); planning; research, development, and technology transfer; intelligent transportation systems projects; roadside beautification; wetland and natural habitat mitigation; traffic management and control improvements; improvements necessary to accommodate other transportation modes; development and establishment of transportation management systems; billboard removal; construction of bicycle facilities and pedestrian facilities; fringe and corridor parking; car pool and van pool projects; and transportation enhancements, such as scenic and historic highway improvements. These funds generally cannot be used for routine highway operational activities, such as police patrols, mowing, snow plowing, or maintenance, unless it is preventative maintenance. Also, certain authorizations (e.g., Surface Transportation Program (STP) Congestion Mitigation and Air Quality (CMAQ) Improvement Program) may be used for improvements to transit; CMAQ funds are for projects and programs in air quality, non-attainment and maintenance areas for ozone, carbon monoxide, and small particulate matter, which reduce transportation related emissions. ADHS projects are subject to the same standards, specifications, policies, and procedures as other Federal-aid highway projects. Fiscal Year 2010: Similar projects will be completed nationwide. Fiscal Year 2011: Similar projects will be completed nationwide.

CRITERIA FOR SELECTING PROPOSALS:

To be eligible, most projects must be located on public roads that are not functionally classified as local. The major exceptions are the Highway Bridge Replacement and Rehabilitation Program, which provides assistance for bridges on and off the Federal-Aid highways; highway safety activities; bicycle and pedestrian projects, transportation enhancement activities, the recreational trails program, and planning, research, development, and technology transfer. Proposed projects meeting these and other planning, design, environmental, safety, etc., requirements can be approved on the basis of State and local priorities within the limit of the funds apportioned or allocated to each State.

20.237 COMMERCIAL VEHICLE INFORMATION SYSTEMS AND NETWORKS

CVISN

FEDERAL AGENCY:

Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation

AUTHORIZATION:

Safe, Accountable, Flexible, Efficient Transportation Equity Act Legacy for Users (SAFETEA LU), Section 4126, Public Law 109-59.

OBJECTIVES:

The Commercial Vehicle Information Systems and Networks (CVISN) Program is a key component of the Federal Motor Carrier Safety Administrations (FMCSA) drive to improve commercial motor vehicle safety. The goals and objectives for the CVISN program include:

1. Improve highway safety by enabling safety inspectors to target resources on the high risk carriers, drivers, and vehicles. These changes are expected to reduce the frequency and severity of accidents that involve commercial vehicles. CVISN will also support future initiatives in security, recognizing that homeland security is a critical issue for the nations transportation system.

2. Streamline credentials and tax administration by enabling government agencies and motor carriers to conduct business transactions electronically, reducing administrative costs, paperwork, and time.

3. Reduce congestion costs for motor carriers by automating vehicle screening systems to reduce delays at weigh stations and international border crossings. These changes are expected to improve freight mobility and reduce delivery costs.

4. Ensure regulatory compliance and equitable treatment as the program expands. Motor carrier compliance with credentials and tax regulations is expected to be less burdensome. Automated screening systems and better targeted safety inspections are expected to catch a greater number of non-compliant or unsafe drivers.

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

In summary, CVISN refers to a collection of information systems and communication networks that support commercial vehicle operations owned by governments, motor carriers, and other stakeholders. CVISN Core projects help support electronic credentials and paperless vehicles to streamline the motor carrier authentication process. These credentialing services are available on the world wide web via the FMCSA SAFER system. This allows enforcement agencies access to real time data quickly.

CVISN Expanded grants can be used to automate roadside operations by electronically screening motor vehicles. Through automation, the current weigh station screening and safety inspection processes can be expedited by weigh-in-motion, hand-held computers and brake testing equipment. License plate readers, upgrades to a States current Commercial Vehicle Information Exchange Window, and connecting State International Registration Plan,

International Fuel Tax Agreement, and Oversize/ Overweight projects are also available by this grant. However, these projects are only funded after an eligible entity after they have met the CVISN Core project requirements. Eligible entities must first successfully implement the top-level design program plan to show that they have demonstrated that they have established either the Core or Expanded components. No more than \$100,000 may be used for the top-level design program plan. After approval of the plan, grantees may apply for Core or Expanded grants (Expanded, only after the Core components are met). CVISN is a 100% discretionary grant program.

Applicant Eligibility:

Eligible applicants include State Departments of Public Safety, Departments of Transportation, or State Law Enforcement Agencies in any of the fifty States and the District of Columbia.

Beneficiary Eligibility:

Federal, State and local entities are the beneficiary.

Credentials/Documentation:

In order to be eligible for CVISN Core funding, a State must have a FMCSA-accepted Core CVISN Program Plan and Top Level Design. A State may apply for funding to develop this plan.

In order to be eligible for CVISN Expanded funding, a State must have a FMCSA-accepted Expanded CVISN Program Plan and Top Level Design and be able to demonstrate when it will be certified as being Core CVISN Compliant. A State may apply for funding to develop the program plan. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Preapplication coordination is not applicable. Environmental impact information is not required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. This program is excluded from coverage under OMB Circular No. A-110. A State CVISN team / program manager is responsible for the following steps in the application process:

Completing the Core CVISN Program Plan/Top-Level Design for acceptance by FMCSA (for States in Planning/Deployment Phase). Or, completing the Expanded CVISN Program Plan/Top-Level Design for acceptance by FMCSA for Core CVISN compliant States.

Complete the OMB standard forms and CVISN grant application requirements on grants.gov

Award Procedure:

The amount of award to a qualified applicant will be at the discretion of FMCSA based upon a panel review of all applications, recommendations of the review panel, and funding availability. Successful applicants will be required to sign a grant agreement with FMCSA.

Deadlines:

Jul 15, 2010 to Jul 15, 2011

Range of Approval/Disapproval Time:

Contingent upon Agency funding levels.

Appeals:

Not Applicable.

Renewals:

Renewals or request for extensions to the grant period of performance are available.

Formula and Matching Requirements:

This program has no statutory formula.

Matching Requirements: Percent: 50%. Matching Funds:

SAFETEA LU dictates that Federal CVISN deployment funds may not be used to fund more than 50 percent of a projects total budget. As such, if a State wishes to apply for \$1,000,000 in Federal CVISN funding for which it is eligible, it must identify \$1,000,000 in state or private-sector funding that can be used to match the Federal contribution. FMCSAs match requirements are

very flexible and allow states to include many types of funds as match. Federal CVISN match sources may be:

Direct funds/resources that offset the costs of the specific project towards which the grant is applied; or

Indirect funds/resources that are related to the States CVISN program but do not offset the costs associated with the specific project towards which the grant is applied.

Eligible sources of direct matching funds include:

State/private sector funds applied to the project funded by the Federal CVISN Deployment Grant;

State-funded staff salaries associated with the Federally-funded project (e.g., project management, subject matter experts, developer/IT resources); and State-funded capital expenses for the Federally-funded project (e.g., hardware/software, roadside equipment, e-screening equipment).

Eligible sources of indirect matching funds include:

State/private sector funds associated with another CVISN project;

Staff salaries associated with another CVISN project (e.g., CVISN program management, project management, subject matter experts, developer/IT resources); and

Capital expenses associated with another CVISN project (e.g., hardware/software, roadside equipment, e-screening equipment).

At this time, the following may not be used as match towards a Federal CVISN Deployment Grant:

Monies received from other Federal programs (e.g., MCSAP, PRISM, SaDIP, Border Enforcement, CDL);

Toll credits; and

Funds/resources previously used as match towards another Federal grant.

This program does not have MOE requirements.

Length and Time Phasing of Assistance:

The funds are available for expenditure as stipulated in the grant agreement negotiated between the State and FMCSA. See the following for information on how assistance is awarded/released: Reimbursable agreement.

Reports:

No program reports are required. SF-425. Grant recipients must provide quarterly progress reports and financial reports to FMCSA. SF-425. Through financial and progress reports.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133.

20.239 MOTOR CARRIER RESEARCH AND TECHNOLOGY PROGRAMS

Not Applicable

FEDERAL AGENCY:

Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation

AUTHORIZATION:

Surface Transportation Assistance Act of 1982, Public Law 97-242; Motor Carrier Safety Act of 1992, Public Law 102-240; Transportation Equity Act for the 21st Century, 49 U.S.C 31108.

OBJECTIVES:

The Analysis Research and Technology (ART) Office administers FMCSA Research and Technology (R&T) Program. Through the R&T program, FMCSA seeks to reduce the number and severity of crashes to reduce injuries and fatalities contributing to a safe and secure commercial transportation network. The R&T program is targeting crashes involving CMVs and the efficiency of CMV operations through conducting systematic studies directed toward fuller scientific discovery, knowledge, or understanding, adopting, testing, and deploying innovative driver, carrier, vehicle, and roadside best practices and technologies, and expanding the knowledge and portfolio of deployable technology.

The development, testing, and deployment of simple and advanced innovative driver/vehicle technologies and integrated IT solutions support the Agency's priorities by demonstrating new roadside safety technologies and operational concepts, accelerating the deployment of vehicle-based and other safety and security technologies. Also by managing IT projects that integrate data collected and exchanged by various information systems and networks, and providing technical support and assistance to States and the motor carrier industry.

The R&T Program has a number of projects directed towards driver behavior, as well as vehicle and carrier safety. The R&T Program also supports information-based safety and security projects. In addition, the support extends to FMCSA programs, specifically, enforcement (HM safety and bus safety), policy (regulations and medical qualifications), and outreach.

The R&T programs strategic objective Produce Safer Drivers supports the FMCSA's "Safety Goal. The ART Office will continue to evaluate the most critical driver risk factors through the Case-Control Commercial Driver Individual Differences Study. The factors include demographic characteristics, medical conditions, personality traits, attitudes, work environmental conditions, and behavioral history. A medical examination and battery of psychological and behavioral history measures will be administered to as many as 21,000 CMV drivers. The ART Office continues research to determine the effectiveness different restart provisions in the hours of service regulations (HOS) governing CMV drivers in restoring performance.

The R&T programs strategic objective Improve Safety of Commercial Motor Vehicles supports the FMCSA's "Safety Goal by continuing research aimed at accelerating the deployment of vehicle-based, and other safety and security technologies to reduce crashes. The ART Office will continue conducting fast-turnaround and independent evaluation of promising safety technologies aimed at commercial vehicle operations. FMCSA funding will be used for the evaluation, and the technology developer will partner with the Agency to provide the technology for testing. The FMCSA envisions that individual test and evaluation programs could be completed in 612 months. This program should greatly reduce both the time and the resources required to conduct independent evaluations of potentially life-saving safety technologies. The ART Office will continue a DOT multimodal (NHTSA, FMCSA) sponsored study of collecting and analyzing data on bus and motorcoach fires. The study will conduct detailed engineering root cause analyses to determine the causes of bus and motor coach fires.

The R&T programs strategic objective Produce Safer Carriers supports the FMCSA's "Safety Goal by continuing programs aimed at producing science-based regulations to advance the Agency's strategic and policy goals. This research will support rulemaking activities by gathering and consolidating research for inclusion into the Agency's rulemakings and required analyses. The ART Office will continue to evaluate the Effectiveness of Fostering Safety Culture in Motor Carriers. This study will use the Service Corps of Retired Executives (SCORE) to help new entrant motor carriers to foster development of a culture for making daily operating decisions based on both good business practices and FMCSA regulatory requirements.

The R&T programs strategic objective Advance Safety through Information-Based Initiatives supports the FMCSA strategic objective

Commercial Motor Vehicle Safety and the DOT strategic objective Safety by continuing programs aimed at assuring interoperability of systems supporting safety, security, and productivity and providing technical assistance to States. The ART Office will continue Roadside/On-Board Safety Technology Countermeasures/Wireless Inspection Pilot Test. This study will evaluate the safety benefits of a state-wide wireless inspection network where drivers logs and vehicle fault codes are electronically checked on a weekly basis. The R&T programs strategic objective Enable and Motivate Internal Excellence supports the FMCSAs strategic goal of Organizational Excellence by improving performance to serve the customers of the ART Office more effectively and economically. The ART Offices has a long-standing partnership with the National Academies of Sciences TRB, which will be broadened to increase TRBs participation and expertise in FMCSAs analysis, research, and technology programs. Specific joint activities include publishing truck and bus synthesis reports and special reports, conducting conferences, and publishing reports from the Innovations Deserving Exploratory Analysis (IDEA) program.

20.601 ALCOHOL IMPAIRED DRIVING COUNTERMEASURES INCENTIVE GRANTS I

Alcohol Impaired Driving Countermeasures Incentive Grants

FEDERAL AGENCY:

National Highway Traffic Safety Administration (NHTSA), Department of Transportation

AUTHORIZATION:

Safe, Accountable, Flexible, Efficient, Transportation Equity Act: A Legacy for Users (SAFETEA-LU) of 2004, Section 2007, Public Law 109-59, 23 U.S.C 410.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Incentive grant funds are available to States to implement effective programs to reduce drunk and drugged driving, in compliance with established criteria.

Applicant Eligibility:

States, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands. States are provided with two alternative means to qualify for a Section 410 grant. Under the first alternative, States may qualify as a low fatality rate State if they have an alcohol-related fatality rate of 0.5 or less per 100 million vehicle miles traveled (VMT). Under the second alternative, States may qualify as a programmatic State if they demonstrate that they meet three of eight grant criteria for fiscal year 2006, four of eight grant criteria for fiscal year 2007, and five of eight grant criteria for fiscal years 2008 and 2009. Qualifying under both alternatives would not entitle the State to receive additional grant funds. SAFETEA-LU directs that States with low alcohol-related fatality rates, based on the agency's Fatality Analysis Reporting System (FARS), be awarded grants without the need to satisfy any of these programmatic criteria. There is also an additional Section 410 grant available to assist the 10 States with the highest impaired driving related fatalities as determined by the most recent FARS data.

Beneficiary Eligibility:

State Highway Safety Agency.

Credentials/Documentation:

State submits certification and application that it meets eligibility requirements; after being informed by the National Highway Traffic Safety Administration (NHTSA) that it is eligible for a grant, State submits to the agency a plan that describes the programs the State will implement using the funds. 20.700 PIPELINE SAFETY PROGRAM BASE GRANTS

FEDERAL AGENCY:

Pipeline and Hazardous Materials Safety Administration, Department of Transportation

AUTHORIZATION:

Natural Gas Pipeline Safety Act of 1968, Public Law 090-481, 86 Stat. 616, 49 U.S.C 1971, as amended by Accountable Pipeline Safety and Partnership Act of 1996, Public Law 104-304, as amended by Pipeline Inspection, Protection, Enforcement and Safety Act of 2006, Public Law 109-468, 49 U.S.C 601, as amended by Pipeline Safety Act of 1992, Public Law 102-508, 49 U.S.C 601, as amended by Pipeline Safety Act of 1979, Public Law 096-129, 93 Stat. 989.

OBJECTIVES:

To develop and maintain State gas and hazardous liquid pipeline safety programs.

TYPES OF ASSISTANCE:

FORMULA GRANTS

USES AND USE RESTRICTIONS:

The Federal Pipeline Safety Law authorizes Federal reimbursement of up to 80 percent of a State's expenditure during the year for personnel, equipment, and activities reasonably required by the State agency for the conduct of its pipeline safety program. The Law further stipulates that the State expenditures in any given year, without Federal assistance, cannot be less than the average amount expended by the State for gas and hazardous liquid safety programs for the 3 fiscal years prior to the fiscal year in which the Secretary makes the payment, except when the Secretary waives this requirement. The State agency must also agree to provide the remaining cost of the safety program(s). Within these limitations, the available funds are allocated by a method designed to reflect the degree to which a State has met certain goals established. The allocation is determined by assigning point values to the States for having achieved certain levels of program participation, dividing this point score by the sum of the States' point scores, and multiplying this ratio by the amount available for the distribution. PHMSA distributed the remaining funds according to certain criteria designed to seek improvements in State programs. The criteria used by PHMSA were the extent of intrastate jurisdiction, inspector qualifications, recommended number of inspection person-days, State adoption of applicable Federal regulations, and other relevant criteria. In 2008, the Federal allocations represented 41 percent of the estimated State requests in the natural gas program (range: 37 to 43 percent) and the Federal allocations represented 42 percent of the estimated State requests in the hazardous liquid program (range:

37 to 41 percent). Funds must be dedicated to the Certified Pipeline Safety Program.

Applicant Eligibility:

The Department provides Federal funds, up to 80 percent of the States total program costs to any State agency with a certificate under Section 60105 of Title 49, United States Code, an agreement under Section 60106 of Title 49, United States Code, or to any State acting as a DOT agent on interstate pipelines. State must agree that the aggregate expenditures of State funds, exclusive of Federal funds, on the pipeline program for the calendar year to which the Federal funds apply are/not less than the average level of such expenditures for the previous 3 years.

Beneficiary Eligibility:

State, District of Columbia, and Puerto Rico.

Credentials/Documentation:

Appropriate State legal official must approve legality of agency application and agreement. Costs will be determined in accordance with OMB Circular No. A-87 for State and local governments, and "Procedural Guide for the Pipeline Safety Grant Program." PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2009: Since the beginning of the grant program, all States and territories and 41 Indian tribes have received over \$182 million in assistance. The HMEP program has set aside 3 percent of planning and training funds to support Federally recognized Native American tribes. Over 151,000 HazMat responders have been trained. 2,563 HazMat Commodity Flow Studies have been conducted. 1,224 HazMat Emergency Plans have been updated. 943 HazMat Emergency Preparedness Exercises have been conducted. Fiscal Year 2010: Recent events have proven that there can be no greater goal than improved hazardous materials safety. The HMEP grants program provides for hazardous materials response planning and training. These activities will ensure the safety of HazMat responders and the communities they serve. DOT data systems indicate that there are 15,000 -17,000 incidents each year, of which 500 are serious. Appropriate response to even one accident can more than compensate for the cost of the program, and an inappropriate response can easily cost many millions of dollars in property loss, and loss of human life. PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2009: Completed kinetics and modeling studies on sodium alanate and have demonstration that absorption is controlled by the reaction at a moving boundary. Completed kinetics studies on the LiBH₄/MgH₂ system using different ratios of LiBH₄ and MgH₂ and shown that the kinetics decrease as the amount of LiBH₄ in the system increases. Have continued studies on hydrogen storage systems based on MgH₂ mixed with additives such as TiH₂ and Mg₂Ni. We have shown that both of these additives can lower reaction temperatures and improve reaction rates.

III. Current Fiscal Year (Actual): Studying complex borohydride systems that are based on Mg(BH₄)₂. TPD analyses show that these systems have some partial reversibility.

IV. Previous Year (Actual): Kinetics studies on the LiBH₄/MgH₂ system are continued. Different ratios of LiBH₄ and MgH₂ are being tested. We have studied complex borohydride systems that contain Cu, Zr or Mn. These systems release hydrogen at lower temperatures than the LiBH₄/CaH₂ system but they are only partially reversible. A paper on the kinetics and modeling studies of the NaAlH₄ system has been submitted for publication. We completed a paper on the LiBH₄/CaH₂ system that has been accepted for publication.

V. Budget Fiscal Year (Estimate): Find novel materials that can store and release large quantities of hydrogen gas at moderate temperatures and pressures in order to meet Department of Energys object of identifying by 2015

materials that will absorb 9 weight percent hydrogen. Fiscal Year 2010: No Current Data Available Fiscal Year 2011: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

Three criteria will be considered in the evaluation process, which were established in the final rule. This information will have been provided by applicants during the project designation process. No additional applicant input is required to address these criteria. These criteria establish the degree to which projects are expected to:

1. Reduce external cost and provide public benefit,
2. Offer a lower-cost alternative to increasing land-based capacity in the Corridor, and
3. Demonstrate the likelihood of becoming self-supporting in a specified and reasonable timeframe.

I. Applicants may, however opt to provide additional information specific to the above criteria if they desire. In evaluating this option, applicants should consider paragraph (g)(2)(B) of section 3515 of the National Defense Authorization Act of 2010, which requires that, in order to receive a grant under the program, the following factors will be taken into consideration:

1. Applicants shall demonstrate to the satisfaction of the Secretary that the funds received will be spent efficiently and effectively,
2. Applicants shall demonstrate to the satisfaction of the Secretary that a market exists for the services of the proposed project as evidenced by contracts or written statements of intent from potential customers,
3. An applicant shall provide at least 20 percent costs from non-Federal sources, and,
4. In awarding grants under the program, the Secretary shall give preference to those projects or components that present the most financially viable transportation services and require the lowest percentage Federal share of the costs.

While the criteria above were generally addressed in the original Marine Highway Project application requirements (Section 393.4(e)1(G); Proposed Project Timeline; and (F)(ii) and (i); Business Planning, respectively), these more specific requirements may warrant submission of additional information in response to this Notice of Funding Availability. It is important that this information is available to the Department during the grant evaluation process.

FEDERAL AGENCY:

Appalachian Regional Commission

AUTHORIZATION:

Appalachian Regional Development Act of 1965, Public Law 89-4, as amended, 40 U.S.C. 14101-14704.

OBJECTIVES:

To help the regional economy become more competitive by putting in place the building blocks for self-sustaining economic development, while continuing to provide special assistance to the Region's most distressed counties and areas. This program focuses on activities which support ARC's mission to be a strategic partner and advocate for sustainable community and economic development. Activities funded must advance ARC's strategic plan. Specific program goals are: (1) Increase job opportunities and per capita income in Appalachia to reach parity with the nation; (2) Strengthen the capacity of the people of Appalachia to compete in the global economy; (3) Develop and improve Appalachia's infrastructure to make the Region economically competitive; and (4) Build the Appalachian Development Highway System to reduce Appalachia's isolation. Specific objectives were developed for each goal. Grants are made either directly by the Commission or grants may supplement other Federal grants.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Appalachian funds enable the States and local areas to develop networks of facilities and services. Individual programs following this description illustrate the types of investments that can be made. In considering programs and projects to be given assistance under this Act, and in establishing a priority ranking of the requests for assistance presented to the Commission (ARC), the ARC follows procedures insuring consideration of the following factors: (1) The relationship of the project or class of projects to overall regional development and the reduction of economic distress; (2) the population and area to be served including the relative per capita income and the unemployment rates in the area; (3) the relative financial resources available to the State or political subdivision or instrumentalities thereof which seek to undertake the project; (4) the importance of the project or class of projects in relation to other activities which may compete for the same funds; (5) the prospects that the project for which assistance is sought will improve the opportunities for sustained employment, income growth, or socioeconomic development of the area; and (6) the degree and manner of private sector involvement. No financial assistance can be used to assist establishments relocating from one area to another. Each State is required to file a State Appalachian development plan, appraising prospects for development in its Appalachian area and relating to them a strategic program for which Appalachian funding is requested in that year. Once an application is submitted for the individual projects and given final approval, the grant is administered either by the basic Federal agency involved in that type of program or directly by the ARC. Preapplication Coordination:

The following describes the general nature and Administration of Appalachian Regional Development Program. The Appalachian Regional Development program is a joint Federal-State partnership for the development of the Appalachian region. Responsibility for the development of plans and programs authorized under the Act is vested in the ARC, composed of the 13 State Governors (who may appoint alternates) and a Federal Co-Chairman. General policies and procedures, and the allocation of Appalachian funds among the various programs and States are established by the ARC. Application for assistance may only be made through a State member of the ARC. The State Alternate's Offices are the coordinators for the Governors for Appalachian investments. Preapplication conferences can determine within a few weeks if the project conforms to the State Appalachian Development Plan. The appropriate local development district director should be the first contact. The State Alternate's Offices will provide guidance on specific problems and

technical assistance in the preparation of applications. (See individual Appalachian program descriptions.)

Only infrastructure projects require an environmental review. Please see 40 U.S.C. 14507. An environmental impact statement is required for this program. This program is excluded from coverage under E.O. 12372.

Application Procedures:

OMB Circular No. A-102 applies to this program. OMB Circular No. A-110 applies to this program. Applications for individual projects must be submitted through and with the approval of the State Alternate to the Appalachian Regional Commission (listed in the appendix). (See individual Appalachian program description.)

Award Procedure:

Upon receipt of project applications approved by the State, the Federal Co-Chairman determines that the project satisfies all requirements for assistance under the Act and approves the application. If a basic Federal agency will administer the project, it is then notified and will disburse funds when appropriate. The ARC notifies Congressional offices and the office of the Governor of grant awards. (See individual Appalachian program descriptions.).

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

(See individual Appalachian program descriptions.).

Appeals:

There are no appeal procedures as such, project review allows for full and free interchange with applicants.

Renewals:

Generally renewals are not applicable except for administrative expenses, including technical services, of local development districts (23.009).

Formula and Matching Requirements:

Statutory formulas are not applicable to this program.
Matching Requirements: For the Area Development program, grants are generally limited to 50% of project costs. For projects in counties designated as At Risk, this limit can be raised to 70% and in economically Distressed counties, it can be raised to 80%. For projects in counties designated as Competitive (those approaching national economic norms), funding is usually limited to 30% of project costs. Funding is usually not available for projects located in counties that have attained or exceeded national economic norms. For the Appalachian Development Highway System, funding for work is allowed at 80%, wherever the project is located. Administrative grants to Local Development Districts are generally funded at 50%. These grants may be increased to 75% upon request by a state in Districts where distressed counties are located. See the ARC Code for additional information.

To help the regional economy become more competitive by putting in place the building blocks for self-sustaining economic development, while continuing to provide special assistance to the Region's most distressed counties and areas. This program focuses on activities which support ARC's mission to be a strategic partner and advocate for sustainable community and economic development. Activities funded must advance ARC's strategic plan. Specific program goals are: (1) Increase job opportunities and per capita income in Appalachia to reach parity with the nation; (2) Strengthen the capacity of the people of Appalachia to compete in the global economy; (3) Develop and improve Appalachia's infrastructure to make the Region economically competitive; and (4) Build the Appalachian Development Highway System to reduce Appalachia's isolation. Specific objectives were developed for each goal. Grants are made either directly by the Commission or grants may supplement other Federal grants.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

The grants may be used for providing supplemental funds under Federal grant-in-aid programs. To be eligible for special basic grants, projects must be of high priority in the State's Appalachian development plan and be either of critical importance to a phased investment and development program for a multicounty area, or of unusual economic benefit to such area. Refer to "General Provisions for Area Development Program" of the Appalachian Regional Commission Code and ARC Project Guidelines for additional use restrictions. Also, please see www.arc.gov. The Appalachian Regional

Commission awards grants and contracts from funds appropriated to the Commission annually by Congress. At least half of ARC's Area Development grant funding is directed to projects that benefit counties and areas in the Appalachian Region designated by ARC as economically distressed. Most program grants originate at the state level. Potential applicants should contact their state ARC program manager to request a preapplication package.

Applicant Eligibility:

States, their subdivisions and instrumentalities and private nonprofit agencies.

The State Alternate's Office will provide guidance on specific problems and technical assistance in preparation of applications. An environmental impact statement may be required for this program, depending on the basic Federal grant-in-aid program being assisted. The standard application forms as furnished by the Federal agency and required by OMB Circular No. A-102 must be used for this program.

Only infrastructure projects require an environmental review. Please see 40 U.S.C. 14507. An environmental impact statement is required for this program. This program is excluded from coverage under E.O. 12372.

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2009: Hospital Digital Mammography Equipment: In 2009, ARC invested \$325,000 to assist Manchester Memorial Hospital, a rural health system that serves patients regardless of their ability to pay, in the purchase of a Full Field Digital Mammography system. Four distressed counties in Kentucky rely on this hospital for care. The hospitals existing analogue equipment was over fourteen years old, in disrepair, and incapable of transmitting scans digitally. Diagnosis was difficult due to the poor quality of the scans. The project enabled 835 patients to receive screening to detect and prevent cancer more precisely. Fiscal Year 2010: Growing Green Collar Jobs in Southwest Virginia: With green energy jobs expected to grow in the Region, ARC invested \$100,000 in 2010 in a project launched by Southwest Virginia Community College. ARC funds were matched by Virginia Tobacco Commission funds to develop a green energy training and education program in partnership with private industry. Activities included updating existing construction trade programs to include efficiency and renewable components with the creation of a certificate program; and educating the community at-large about green technologies and energy efficient practices through free workshops. Existing national curriculum was utilized for the program. One hundred and sixty students are anticipated to be trained within the first year of the project. EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

30.001 EMPLOYMENT DISCRIMINATION_TITLE VII OF THE CIVIL RIGHTS ACT OF 1964

FEDERAL AGENCY:

Equal Employment Opportunity Commission

AUTHORIZATION:

Title VII of the Civil Rights Act of 1964 (Public Law 88-352), as amended, 42 U.S.C. section 2000e et seq.

OBJECTIVES:

Title VII prohibits employment discrimination against applicants or employees based on race, color, religion, sex (including pregnancy), and national origin.

Title VII also prohibits retaliation against applicants or employees who oppose employment practices that discriminate based on race, color, religion, sex or national origin or for filing a discrimination charge, testifying, or participating in any way in an investigation, proceeding, or litigation under Title VII.

TYPES OF ASSISTANCE:

ADVISORY SERVICES AND COUNSELING; INVESTIGATION OF COMPLAINTS

USES AND USE RESTRICTIONS:

Individuals are protected from discrimination on the basis of race, color, religion, sex (including pregnancy) and national origin by employers with 15 or more employees, Federal, state, and local governments, employment agencies, and labor organizations. The EEOC Assessment System, available at <https://egov.eeoc.gov/eas/>, enables individuals: to determine whether EEOC is the appropriate agency to contact regarding discrimination, harassment or retaliation. Charges of discriminatory employment practices can be filed by or on behalf of an individual or group of individuals claiming to be aggrieved. Mediation may be offered to the parties involved. If mediation is not used or is not successful, an investigation may ensue. If after its investigation the Commission determines that there is reasonable cause to believe that discrimination has occurred, it will attempt to resolve the charge informally through conciliation. If conciliation proves to be unsuccessful and the employer is not a State or local government, the Commission may bring a civil action against respondent(s) named in the charge or issue a right to sue letter to the party who filed the charge, giving him or her the right to file a civil action in federal court. If conciliation fails on a charge against a State or local government, EEOC refers the case to the Department of Justice for consideration of litigation or issuance of a right to sue letter. If the Commission does not find reasonable cause, the charging party is issued a right to sue letter.

Applicant Eligibility:

Any aggrieved individual, or any individual, labor union, association, legal representative, or organization filing on behalf of an aggrieved individual, who has reason to believe that an unlawful employment practice within the meaning of Title VII, as amended, has been committed by an employer with 15 or more employees, an employment agency, labor organization, or joint labor-management committee controlling apprenticeship or other training or retraining, including on-the-job training programs.

Any aggrieved individual who believes he or she has been retaliated against for

Charges may be filed in person, by mail or by fax at the nearest field office of the EEOC.

Award Procedure:

A charge is sufficient when the Commission receives from the person making the charge a written signed statement that includes an allegation of discrimination, the name(s) of the parties involved, and a request that the EEOC act to protect the applicant or employees rights or otherwise settle a dispute between the applicant or employee and the employer.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

If the evidence does not establish that discrimination occurred, charging parties will be given written notice of their right to sue. A charging party may file a lawsuit within 90 days after receiving a notice of a right to sue from EEOC, as stated above.

Under Title VII, a charging party also can request a notice of right to sue from EEOC 180 days after the charge was first filed with the Commission, and may then bring suit within 90 days after receiving this notice. 30.008 EMPLOYMENT DISCRIMINATION AGE DISCRIMINATION IN EMPLOYMENT

FEDERAL AGENCY:

Equal Employment Opportunity Commission

AUTHORIZATION:

Age Discrimination in Employment Act of 1967, (Pub. L. 90-202), as amended,
29 U.S.C. section 621 et seq.

OBJECTIVES:

The Age Discrimination in Employment Act (ADEA) prohibits discrimination based on age (40 or older) with respect to any term, condition, or privilege of employment, including hiring, firing, promotion, layoff, compensation, benefits, job assignments, and training. The ADEA also prohibits retaliation against an individual for opposing employment practices that discriminate based on age or for filing an age discrimination charge, testifying, or participating in any way in an investigation, proceeding, or litigation under the ADEA.

TYPES OF ASSISTANCE:

ADVISORY SERVICES AND COUNSELING; INVESTIGATION OF COMPLAINTS

USES AND USE RESTRICTIONS:

Individuals 40 years of age or older are protected from age discrimination by employers with 20 or more employees, federal, state, and local governments, employment agencies and labor organizations. It is unlawful for covered employers to post advertisements indicating any preference, limitation, or specification based on age. Limited exceptions apply: in situations in which age is a bona fide occupational qualification reasonably necessary to the normal operation of the business; in situations in which the differentiation is based on reasonable factors other than age; or if an otherwise prohibited practice is in observance of the terms of a bona fide seniority system or employee benefit plan (except that no such seniority system or employee benefit plan shall excuse the failure to hire, or require or permit the involuntary retirement of any covered individual). Exemptions and exceptions also apply for highly compensated employees, public officials, firefighters and law enforcement officers. The EEOC Assessment System, available at <https://egov.eeoc.gov/eas/>, enables individuals to determine whether EEOC is the appropriate agency to contact regarding their specific claims of discrimination, harassment or retaliation. If a charge is filed, mediation may be offered to the parties involved. If mediation is not used or is not successful, an investigation may ensue.

Applicant Eligibility:

Any aggrieved individuals age 40 and over, or any individual, organization, or agency filing on behalf of an aggrieved individual who has reason to believe that a covered employer has committed an unlawful employment practice within the meaning of the ADEA, as amended.

Beneficiary Eligibility:

Applicants, current employees, or former employees of the named respondent(s) who are age 40 or older and who have been subjected to unlawful employment practices based on age by the named respondent(s), and/or who have been subjected to retaliation for opposing age discrimination or participating in an ADEA investigation, proceeding, or litigation.

Credentials/Documentation:

An allegation of unlawful employment practice(s) may be made in person, by mail or by fax. An allegation must be in writing, signed, and notarized when necessary to meet state or local requirements. Charges may be filed in person, by mail or by fax at the nearest field office of the EEOC.

Award Procedure:

Deadlines:

The ADEA requires that charges be filed within 180 days of the date of the alleged violation, within 300 days if the charge is also covered by a state anti-discrimination law, or within 30 days after the receipt of notice of termination of state proceedings, whichever is earlier. A civil action may be commenced at any time 60 days after a charge has been filed with the EEOC. If the evidence does not establish that discrimination occurred, charging parties will be given written notice of their right to sue. 30.010 EMPLOYMENT DISCRIMINATION EQUAL PAY ACT**FEDERAL AGENCY:**

Equal Employment Opportunity Commission

AUTHORIZATION:

Equal Pay Act of 1963, (Pub. L. 88-38), as amended, 29 U.S.C. section 206(d).

OBJECTIVES:

The Equal Pay Act (EPA) prohibits sex discrimination in the payment of wages to men and women performing jobs that require substantially equal skill, effort and responsibility, under similar working conditions within the same establishment. The EPA also prohibits retaliation against applicants or employees who oppose compensation practices that discriminate based on sex or who file a discrimination charge, testify, or participate in any way in an investigation, proceeding, or litigation under the EPA.

TYPES OF ASSISTANCE:

ADVISORY SERVICES AND COUNSELING; INVESTIGATION OF COMPLAINTS

USES AND USE RESTRICTIONS:

Employers engaged in commerce or in the production of goods for commerce (i.e. subject to The Fair Labor Standards Act of 1938, as amended, 29 U.S.C. 201, et seq.), including the Federal Government, and State and local governments, are prohibited from paying unequal wages to men and women performing jobs that require substantially equal skill, effort and responsibility, under similar working conditions within the same establishment. Labor organizations representing employees of a covered employer are prohibited from causing or attempting to cause employers to violate the Act. Exceptions are permitted only where payment is made pursuant to a seniority system, a merit system, a system that measures earnings by quantity or quality of production, or a differential based on any other factor other than sex. The EEOC Assessment System, available at <https://egov.eeoc.gov/eas/>, enables individuals to determine whether EEOC is the appropriate agency to contact regarding their specific claim of wage discrimination or retaliation. The Commission may investigate allegations of violations of the Act and may initiate and conduct litigation.

Applicant Eligibility:

Any aggrieved individual, or any individual, organization, or agency filing on behalf of an aggrieved individual, who has reason to believe that a covered employer has committed an unlawful employment practice within the meaning of the EPA. An employee who believes he or she has been retaliated against for opposing compensation practices that discriminate based on sex or who files a discrimination charge, testifies, or participates in any way in an investigation, proceeding, or litigation under the EPA.

Beneficiary Eligibility:

Applicants, current employees, or former employees of the named respondent (s) who have been subjected to unlawful compensation practices based on gender by the named respondent (s), and/or who have been subjected to retaliation for opposing gender-based compensation discrimination or participating in an EPA investigation, proceeding, or litigation.

Credentials/Documentation:

The EPA does not require aggrieved parties to file a charge of discrimination with EEOC before filing a private lawsuit. However, since many EPA claims also raise Title VII sex discrimination issues, it may be advisable to file a charge of discrimination under both laws within the appropriate time limit (see Deadlines). An allegation of unlawful employment practice(s) may be made in person, by mail or by fax. An allegation must be in writing, signed, and/or notarized when necessary to meet state or local requirements. Charge forms (EEOC Form 5, Charge of Discrimination) are available to all persons from all field offices of the Commission. This program is excluded from coverage under OMB Circular No. A-87.

TYPES OF ASSISTANCE:

ADVISORY SERVICES AND COUNSELING; INVESTIGATION OF COMPLAINTS

USES AND USE RESTRICTIONS:

Individuals are protected from discrimination on the basis of disability by employers with 15 or more employees, Federal, state, and local governments, employment agencies, and labor organizations. The EEOC Assessment System, available at <https://egov.eeoc.gov/eas/>, enables individuals to determine whether EEOC is the appropriate agency to contact regarding their specific claims of discrimination, harassment or retaliation. Charges of discriminatory employment practices can be filed by or on behalf of an individual or group of individuals claiming to be aggrieved. Mediation may be offered to the parties involved. If mediation is not used or is not successful, an investigations may ensue. If after its investigation, the Commission determines that there is reasonable cause to believe that discrimination has occurred, it will attempt to resolve the charge informally through conciliation. If conciliation proves to be unsuccessful and the employer is not a State or local government, the Commission may bring a civil action against respondent(s) named in the charge or issue a right to sue letter to the party who filed the charge, giving him or her the right to file a civil action in federal court. If conciliation fails on a charge against a State or local government, EEOC refers the case to the Department of Justice for consideration of litigation or issuance of a right to sue letter. If the Commission does not find reasonable cause, the charging party is issued a right to sue letter.

Applicant Eligibility:

Any aggrieved individual, or any individual, or any organization, or agency filing on behalf of an aggrieved individual, who has reason to believe that an unlawful employment practice within the meaning of Title I of the ADA has been committed by an employer with 15 or more employees, an employment agency, labor organization, or joint labor-management committee controlling apprenticeship or other training or retraining, including on-the-job training programs. Any aggrieved individual who believes he or she has been retaliated against for opposing employment practices that discriminate based disability or who files an ADA charge, testifies, or participates in any way in an investigation, proceeding, or litigation under the ADA.

Beneficiary Eligibility:

Applicants, for employment, current employees, and former employees of the named respondents in a charge who have been subjected to unlawful employment practices based on disability by the named respondent (s), and/or who have been subjected to retaliation for opposing disability discrimination or participation in an ADA investigation, proceeding, or litigation.

Charge forms (EEOC Form 5, Charge of Discrimination) are available to all persons from all field offices of the Commission. This program is excluded from coverage under OMB Circular No. A-87.

Charges may be filed in person, by mail or by fax at the nearest field office of the EEOC.

Award Procedure:

A charge is sufficient when the Commission receives from the person making the charge a written signed statement that includes an allegation of discrimination, the name(s) of the parties involved, and a request that the EEOC act to protect the applicant or employees rights or otherwise settle a dispute between the applicant or employee and the employer.

Deadlines:

Not Applicable.

Range of Approval/Disapproval Time:

The ADA requires that charges be filed within 180 days of the date of the alleged violation, within 300 days if the charge is also covered by a state or local anti-discrimination law, or within 30 days after the receipt of notice of termination of state or local proceedings, whichever is earlier. If the evidence does not establish that discrimination occurred, charging parties will be given written notice of their right to sue. Persons can also ask for a notice of right to sue before EEOC finishes its investigation. A charging party may file a lawsuit within 90 days after receiving a notice of a right to sue from EEOC, as stated above. Under the ADA, a charging party also can request a notice of right to sue from EEOC 180 days after the charge was first filed with the Commission, and may then bring suit within 90 days after receiving this notice. In the case of centers with residential programs, does the application provide evidence that the fellows' projects benefit significantly from the location of the center and the intellectual exchange among the fellows? (3) How strong is the institution's previous record in offering fellowships? Have former fellows been productive? Have the scholarly contributions resulting from their FPIRI fellowships been of value to scholars and general audiences in the humanities? Under Secretary for Health. For Non Veteran Beneficiaries eligibility is established by adjudication of the Sponsoring Veteran as Permanently and Totally disabled (P&T) (38 CFR 17.52(a)(1)(iii)) and that the Non Veteran Beneficiary is a dependant of the Veteran by the VBA and is eligible for Chapter 35 Benefits.

Beneficiary Eligibility:

ENVIRONMENTAL PROTECTION AGENCY

66.001 AIR POLLUTION CONTROL PROGRAM SUPPORT

FEDERAL AGENCY:

Office of Air and Radiation, Environmental Protection Agency

AUTHORIZATION:

Clean Air Act of 1990, Section 105, Public Law 101-549.

OBJECTIVES:

The objectives of the 105 program are to assist State, Tribal, Municipal, Intermunicipal, and Interstate agencies in planning, developing, establishing, improving, and maintaining adequate programs for the continuing prevention and control of air pollution and/or in the implementation of national primary and secondary air quality standards.

Projects should also focus on addressing environmental justice (EJ) concerns in communities. EJ is the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.

Funding Priority - Fiscal Year 2010: By nature, much of the work occurring in FY 2009, including the implementation of mobile, area and stationary source pollution controls, will continue into FY 2010. However, several new developments will alter the priorities for the program across the country in FY 2010 - the response to the new national ambient air quality standards (NAAQS) for ozone, lead, fine particulates (PM_{2.5}), nitrogen dioxide (NO₂), and sulfur dioxide (SO₂). Recipients will continue to review air quality reports and take appropriate actions dealing with new violating areas with any of the NAAQS; submit re-designation requests including maintenance plans for areas with clean air quality data as appropriate; work with local area stakeholders to support innovative and local initiatives; continue to implement 8-hr ozone State Implementation Plans (SIPs); and submit any outstanding ozone SIP elements (including prior commitments). Recipients will also prepare recommendations on designations for the revised ozone NO₂ and SO₂ NAAQS. For PM_{2.5}, recipients will submit any outstanding PM_{2.5} SIP elements as needed and implement PM_{2.5} plans designed to attain the 1997 NAAQS. They will continue SIP planning for attaining the 2006 PM_{2.5} NAAQS standards. Some states will work with local agencies to implement woodstove change-out programs in areas where change-outs could significantly reduce ambient particle concentrations. Areas may also explore feasibility of changing out existing outdoor wood-fired boilers to significantly reduce PM_{2.5} concentrations. Recipients will also work on monitoring and SIP planning to attain the Lead (Pb) NAAQS. As in FY 2009, for ambient monitoring, all state/local primary quality assurance organizations operate monitors and submit NAAQS pollutant data, Photochemical Assessment Monitoring Stations (PAMS), and quality assurance (QA) data to AQS directly or indirectly through another organization according to schedule in 40 CFR Part 58. Data must also meet quality assurance requirements according to Appendix A to 40 CFR Part 58. These organizations will also submit their required annual (monitoring) network plans by July 1 of 2010. They must also certify their 2008 NAAQS pollutant data in AQS and provide supporting documentation by May 1, 2010 (state/local only, unless tribal work plan requirement). Additionally monitoring organizations will report real time ozone and PM_{2.5} data to AirNOW system for cities required to report the Air Quality Index (AQI) (state/local only); will continue the 5-year-cycle network assessment required by July 1, 2010; (state/local only, unless tribal work plan requirement). Air quality reporting, including particle pollution forecasting, will be expanded to additional cities. States affected by the NO_x SIP Call will continue to contribute a portion of their grant funds to support a centrally-administered emissions budget and trading program as part of their NO_x State Implementation Plan. For regional haze, States and other stakeholders will continue to work with EPA on issues related to submitted regional haze SIPs and will continue to implement Best Available Retrofit Technology (BART) requirements. As in FY 2009, funds for air toxics purposes are provided to: expand existing air toxics monitoring networks operated by State, Tribal, and local agencies in order to better characterize air toxics risks and assess the effectiveness of control strategies. Recipients will collect data for the annual integrated criteria air pollutant (CAP) and hazardous air pollutant (HAP) emissions inventory; implement delegated or approved section 112, 111(d) and 129 standards, as appropriate, for major

sources and area sources; implement delegated residual risk standards; and work with communities to develop and implement local air toxics programs that address outdoor, indoor, and mobile sources with emphasis on areas with potential environmental justice concerns. State and local air pollution control agencies work with EPA to operate the national fine particulate (PM_{2.5}) monitoring network to accurately assess and characterize the nature and extent of fine particulates (PM_{2.5}) across the country. This assessment is necessary to determine the air quality status of an area in relation to the national PM_{2.5} ambient air quality standard. At least three years of quality-assured data are required in order to determine an area's attainment status. The air quality status of an area will determine the nature and complexity of its attainment plan, its associated control strategies, and its implementation schedule. The immediate goals of this multi-year program are: appropriate spatial characterization of PM_{2.5} NAAQS; public reporting of PM_{2.5} in the Air Quality Index; characterization of PM_{2.5} chemical speciation data for long term trends; development and accountability of emission control programs and tracking of regional haze, and limited support of health studies; implementation of NCore CO, SO₂, NO₂/NO_y trace-level monitoring to support characterization of PM precursors; assessment of PM_{2.5} data quality; and procurement and testing of PM_{2.5} filters. Grant funds are used to provide support to eligible state and local air agencies for continued operation of high value federal reference method (FRM) and speciation monitoring sites; additional investments in PM_{2.5} mass and speciation continuous monitoring and associated data management systems for timely reporting of high quality data; and continued investments in precursor gas analyzers, data analyses, and quality assurance activities that will support better understanding of particle formation.

PROJECT GRANTS

USES AND USE RESTRICTIONS:

Grant funds may be used for costs specifically incurred in the conduct of a State/Local/Tribal Air Pollution Control Program in accordance with the purposes enumerated in the approved application. These include personnel costs, supplies, equipment, training of personnel, travel, and other necessary expenditures during the approved project period. Funds may not be used for construction of facilities, nor for expenses incurred other than during each approved award period. Grant funds may not be used to subsidize the costs of Title V operating permit programs or to supplant otherwise available recipient resources. Assistance agreement awards under this program may involve or relate to geospatial information. Further information regarding geospatial information may be obtained by viewing the following website:
<http://geodata.epa.gov>.

Grant recipients and sub-recipients are encouraged to adopt and enforce policies that ban text messaging while driving company-owned or -rented vehicles or government-owned vehicles, or while driving privately-owned vehicles when on official government business or when performing any work for or on behalf of the government. Grant recipients and sub-recipients are encouraged to conduct initiatives of the type described in section 3(a) of the Federal Leadership on Reducing Text Messaging While Driving Executive Order that was signed on October 1, 2009.

Applicant Eligibility:

Municipal, Intermunicipal, State, Federally Recognized Indian Tribe, or Interstate or Intertribal with legal responsibility for appropriate air pollution planning, development, establishment, implementation, and maintenance of Clean Air Act air pollution control activities, including management of grant support for those activities, provided such organization furnishes funds for the current year that are equal to or in excess of its recurrent expenditures for the previous year for its approved section 105 air pollution program. The determination of expenditures is subject to decisions based on provisions of the Clean Air Act and applicable grant regulations. This program is available to each State, territory and possession of the U.S., including the District of Columbia. For certain competitive funding opportunities under this CFDA description, the Agency may limit eligibility to compete to a number or subset of eligible applicants consistent with the Agency's Assistance Agreement Competition Policy.

Beneficiary Eligibility:

Municipalities (local governments), Intermunicipalities, States, Federally

Recognized Indian Tribes, and Interstate and Intertribal agencies.

Credentials/Documentation:

The application must supply evidence of legal authority for air pollution control including responsibility for carrying out the implementation plan requirements under 110 of the Clean Air Act; evidence of the availability of nonfederal matching funds; assurance that federal funds do not supplant available recipient funds, evidence that the Governor or his designated State agency has been given the opportunity to comment on the relationship of the program to be funded to the State plan; and a workable program officially adopted for the agency. Principles for determining allowable costs are set forth in applicable Federal management circulars described in the general grant regulations and procedures 40 CFR Part 31 of the Federal Regulations. Costs will be determined in accordance with OMB Circular No. A-87 for State and local governments. OMB Circular No. A-87 applies to this program.

Preapplication Coordination:

Discussion with the applicable EPA Regional Office is advised for air program grant applications. The standard application forms as furnished by the Environmental Protection Agency and required by OMB Circular No. A-102 must be used for this program. Applications are subject to the State's review. Environmental impact information is not required for this program. This program is eligible for coverage under E.O. 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review.

Application Procedures:

OMB Circular No. A-102 applies to this program. This program is excluded from coverage under OMB Circular No. A-110. Requests for application forms and completed applications must be submitted to the appropriate EPA Regional Grants Administration Branch. Application must meet the requirements of the grant regulations and will be reviewed to determine merit and relevancy of the proposed project particularly with regard to the most recently available national program and grant guidance. Applicants may be able to use <http://www.grants.gov> to electronically apply for certain grant opportunities under this CFDA.

Award Procedure:

Procedures for awards are outlined in General Grant Regulations 40 CFR Part 31. For competitive awards, EPA will review and evaluate applications, proposals, and/or submissions in accordance with the terms, conditions, and criteria stated in the competitive announcement. Competitions will be conducted in accordance with EPA policies/regulations for competing assistance agreements.

Deadlines:

Contact the headquarters or regional office, as appropriate, for application deadlines.

Range of Approval/Disapproval Time:

Approximately 90 days.

Appeals:

Assistance agreement competition-related disputes will be resolved in accordance with the dispute resolution procedures published in 70 FR (Federal Register) 3629, 3630 (January 26, 2005). Copies of these procedures may also be requested by contacting the individual(s) listed as "Information Contacts." Disputes relating to matters other than the competitive selection of recipients will be resolved under 40 CFR 30.63 or 40 CFR 31.70, as applicable.

Renewals:

Not Applicable.

Formula and Matching Requirements:

This program has no statutory formula. Matching Requirements: The Clean Air Act does not prescribe a specific statutory funding formula but does direct that the factors of population, the extent and severity of the air pollution problem, and financial need, be considered in the allocation of available resources by the Agency. The current allocation approach is currently under review for updating by the Agency. EPA is undertaking the review in consultation with eligible recipients. State,

Interstate, and Local programs may receive up to 60 % Federal funding for the total approved program costs. The Grantee must contribute a minimum of 40% as well as meet a maintenance of effort (MOE) requirement. The amount of Federal share of grant costs should be determined by reference to the criteria set forth in Section 105 of the Clean Air Act and in 40 CFR 35.145, 40 CFR 35.146, and 40 CFR 147. Not more than 10 % of the funds available shall be granted for air pollution control programs in any one State. Not less than one-half of one % of the funds are to be made available as a minimum to a State (overall) for application. However, award of these levels of funds will be made only if the agencies within the State meet the requirements of the Act and grant regulations. For Indian Tribes establishing eligibility pursuant to Section 35.573, the Regional Administrator may provide financial assistance in an amount up to 95 % of the approved costs of planning, developing, establishing, or improving an air pollution control program, and up to 95 % of the approved costs of maintaining that program. After 2 years from the date of each Tribe's initial grant award, the Regional Administrator will reduce the maximum federal share to 90 %, as long as the Regional Administrator determines that the Tribes meet certain economic indicators that would provide an objective assessment of the tribe's ability to increase its share. This program has MOE requirements, see funding agency for further details.

Length and Time Phasing of Assistance:

The terms of the grant shall be determined at time of award. See the following for information on how assistance is awarded/released: Assistance agreements may be fully funded by a lump sum or funded incrementally (quarterly).

Reports:

Grantees are required to submit program reports in accordance with Agency policy and the Monitoring and Reporting Program Performance requirements stated in Federal Grant Regulations 40 CFR Part 31 and OMB Circular No.A-102. Grantees are required to submit financial reports in accordance with Agency policy and the Financial Reporting and Financial Management Systems requirements stated in Federal Grant Regulations 40 CFR Part 31 and OMB Circular No.A-102. Grantees are required to submit progress reports in accordance with Agency policy and the Monitoring and Reporting Program Performance requirements stated in Federal Grant Regulations 40 CFR Part 31 and OMB Circular No.A-102. No expenditure reports are required. Grantees are required to perform performance monitoring in accordance with Agency policy and requirements stated in Federal Grant Regulations 40 CFR Part 31 and OMB Circular No.A-102.

Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. Grants and cooperative agreements are subject to inspections and audits by the Comptroller General of the United States, the EPA Office of Inspector General, other EPA staff, or any authorized representative of the Federal government. Reviews by the EPA Project Officer and the Grants Specialist may occur each year.

Records:

Financial records, including all documents to support entries on accounting records and to substantiate charges to each grant, must be kept available to personnel authorized to examine EPA grant accounts. All records must be maintained for 3 years from the date of submission of the annual financial status report. If questions still remain, such as those raised as a result of audit, related records should be retained until the matter is completely resolved.

Obligations:

(Project Grants) FY 09 \$176,593,000; FY 10 est \$179,732,000; FY 11 est \$290,007,000

Range and Average of Financial Assistance:

In FY 2010 - From approximately \$71, 471 to \$6,689,317 per recipient; average approximately \$1,545,000.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2009: In FY 2009, approximately 110 applications were received from State, Local and Tribal agencies to help support their continuing air quality programs were funded. This same level is expected to be received and funded in FY 2010. These programs plan and implement measures to improve, protect, monitor and report air quality in their communities. The plans integrate state and local measures with federal measures - including advances in environmental technologies (e.g., cleaner fuels, vehicle and industrial technology), in addressing and reducing air pollution and in meeting National Ambient Air Quality Standards (NAAQS). The NAAQS are regularly reassessed to assure that public health and welfare is being adequately protected. The most recent designations for ozone occurred in 2004 and 94 of the original 126 ozone areas are now meeting that NAAQS based on data collected during 2006-2008. For PM, the Agency designated 86 areas, with a total population of 35.8 million people, as nonattainment for PM10 in 1992 and 45 of those areas remain in nonattainment. In April 2005, EPA designated 39 areas as nonattainment for the PM2.5 based on air quality data collected during 2001-2003 and 18 of those areas are now meeting the NAAQS based on data collected during 2006-2008. As the new standards for ozone and PM2.5 take affect, updates on in designations and progress in air quality status will be provided. States have achieved widespread attainment of standards for several of the criteria pollutants: CO, SO2, NO2 and Lead. Specifically: for carbon monoxide, EPA originally designated 78 areas, affecting 69.8 million people, as nonattainment for CO in 1992, and all these areas are now in attainment. For sulfur dioxide (SO2), EPA designated 54 areas, with a total population of 9.8 million people, as nonattainment for SO2 in 1992. There are now 9 nonattainment areas remaining but all the areas have monitoring data measuring attainment of the SO2 NAAQS. For nitrogen Dioxide (NO2), there are no designated NO2 nonattainment areas and all areas continue to meet the NAAQS. For the previous lead (Pb) NAAQS, EPA designated 13 areas, with a total population of 1.8 million people as nonattainment for Pb in 1992, and 2 nonattainment areas remain. Areas failing to meet the new lower lead NAAQS have not yet been designated as nonattainment. Fiscal Year 2010: It is anticipated that the same number of applications will be received and funded in FY 2010. Fiscal Year 2011: No Current Data Available

EXAMPLES OF FUNDED PROJECTS:

Fiscal Year 2009: Continuing program grants are provided to State, Local and Tribal air pollution control agencies for the purpose of operating programs that plan and implement activities to achieve ambient air quality standards. These programs cover: planning for attainment of updated national air quality standards including fine particulates and ozone; state implementation plan development; ambient monitoring; emission inventories; air and emissions modeling; source permitting; certain compliance and enforcement activities related to mobile and non-Title V stationary and area sources; public outreach and education activities; development and implementation of air quality regulations; implementation of market-based, early action compacts and other innovative air pollution reduction or prevention strategies; technical training; risk and data analyses; information management; and program evaluation,

progress reporting and other program operation and maintenance activities. Fiscal Year 2010: Continuing program grants are provided to State, Local and Tribal air pollution control agencies for the purpose of operating programs that plan and implement activities to achieve ambient air quality standards. These programs cover: planning for attainment of updated national air quality standards including fine particulates and ozone; state implementation plan development; ambient monitoring; emission inventories; air and emissions modeling; source permitting; certain compliance and enforcement activities related to mobile and non-Title V stationary and area sources; public outreach and education activities; development and implementation of air quality regulations; implementation of market-based, early action compacts and other innovative air pollution reduction or prevention strategies; technical training; risk and data analyses; information management; and program evaluation, progress reporting and other program operation and maintenance activities. Fiscal Year 2011: No Current Data Available

CRITERIA FOR SELECTING PROPOSALS:

The criteria for awarding air pollution control program assistance grants are provided in the 1990 Clean Air Act, Section 105, and set forth in State and local assistance grant regulations (40 CFR 35). Some of the criteria considered for award include the following: 1) No grant may be awarded unless the program contained in the grant application meets the requirements of Section 35.140 (program purposes and associated regulations) and has been approved by the Regional Administrator. Sections 35.104 and 35.107 describe what an agency needs to do to prepare an adequate application. This usually includes the use of annual program technical and grant guidance from EPA and is generally done in consultation with the EPA Regional Office. 2) No grant may be awarded until the Regional Administrator has consulted with the official designated by the Governor(s) of the State(s) affected by such award pursuant to Section 105(b) of the Clean Air Act. Such consultation should consider the role of the applicant in the enforcement of any applicable implementation plan and confirm that the applicant's program will be generally compatible with the objectives of the applicable implementation plan. 3) The requirements of this Section shall not apply to Indian Tribes that have established eligibility pursuant to Section 35.573 and intertribal agencies made up of such Tribes. 4) No grant may be awarded unless the Regional Administrator has determined that the agency has adequate air pollution control authority and necessary regulations to implement such authority. The evaluation and selection criteria for competitive awards under this CFDA description will be described in the competitive announcement.

66.032 STATE INDOOR RADON GRANTS

(SIRG)

FEDERAL AGENCY:

Office of Air and Radiation, Environmental Protection Agency

AUTHORIZATION:

Indoor Radon Abatement Act, Section 306, 15 U.S.C 2661.

OBJECTIVES:

Title III of the Toxic Substances Control Act (TSCA), the Indoor Radon Abatement Act (IRAA), Section 306, authorizes EPA to assist States and Federally Recognized Indian Tribes to develop and implement programs to assess and mitigate radon-related lung cancer risk.

Projects should also focus on addressing environmental justice (EJ) concerns in communities. EJ is the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.

Funding Priority - Fiscal Year 2010: In FY 2010 the SIRG program will emphasize radon risk reduction through increased action by consumers, homeowners, real estate professionals, radon services professionals, homebuilders, tribes, non-governmental organizations, and Federal, state and local governments. Projects funded by SIRG should have the following results:

- Building homes to include radon-reducing features,
- Reducing radon in existing homes, and

- Building new schools to include radon-reducing features, and reducing radon in existing schools.

To achieve these outcomes and increase results, the SIRG program aims to: (1) improve the effectiveness of state-local/tribal radon programs; (2) focus on high radon potential areas, especially for new home building, building code adoption, and green building programs; (3) encourage testing and mitigation within residential property transfers; and (4) encourage SIRG recipients to be strategic in their risk reduction efforts and results reporting, e.g., by institutionalizing risk reduction practices and policies, utilizing best practices, and developing better sources of data and information.

TYPES OF ASSISTANCE:

PROJECT GRANTS

USES AND USE RESTRICTIONS:

The following activities are eligible for funding under SIRG: radon surveys, public information and educational materials, radon control programs, purchase of radon measurement equipment or devices, purchase and maintenance of analytic equipment, training, program overhead and administration, data storage and management, mitigation demonstrations, and toll-free hotlines. Funding for these eligible activities may be used to develop State radon response programs. States may, at the Governor's direction, provide assistance to local governments for public information and educational materials, radon control programs and training. **RESTRICTIONS:** The statute places the following restrictions on the use of Federal funds: 1) SIRG recipients must perform satisfactorily in the preceding budget period to be eligible to receive additional funding; 2) State expenditures for measurement equipment/devices and mitigation demonstrations cannot exceed 50 percent of the grant amount in a budget period; 3) State expenditures for general overhead and program administration cannot exceed 25 percent in a budget period; and 4) SIRG applicants may use grant funds for financial assistance to persons only to the extent that such assistance is related to approved demonstration projects or the purchase and analysis of radon measurement devices.

Renewals:

Renewals of awards will be conducted in accordance with the provisions of Section 306 and the SIRG Guidance (SIRGG).

Formula and Matching Requirements:

This program has no statutory formula.

Matching Requirements: This program has no statutory formula. EPA may provide States with up to 60% of allowable costs of approved SIRG Program activities. TSCA Section 306 requires a progressive match for States and Tribes; 25% in the first year; 40% in the second year; and, 50% in the third and subsequent years of participation in the SIRG program. However, in the FY 2006 appropriation, Congress permanently reduced the recipient match requirement from a maximum of 50% to 40% for participants with three or more years in the program.

This program does not have MOE requirements.

Length and Time Phasing of Assistance:

Awards funded made under TSCA Section 306, are normally for a period of 12-36 months. EPA negotiates project periods appropriate to the specific project, and encourages three-year grant periods. However, EPA project periods

are limited to a maximum of five years. Grants and cooperative agreements may be fully funded or incrementally (partially) funded. Method of awarding/releasing assistance: lump sum.

Reports:

Grantees are required to submit program reports in accordance with Agency policy and the Monitoring and Reporting Program Performance requirements stated in Federal Grant Regulations 40 CFR Part 31 and OMB Circular No.A-102. Audits:

In accordance with the provisions of OMB Circular No. A-133 (Revised, June 27, 2003), "Audits of States, Local Governments, and Non-Profit Organizations," nonfederal entities that expend financial assistance of \$500,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Nonfederal entities that expend less than \$500,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in Circular No. A-133. Grants and cooperative agreements are subject to inspections and audits by the Comptroller General of the United States, the EPA Office of Inspector General, other EPA staff, or any authorized representative of the Federal government. Reviews by the EPA Project Officer and the Grants Specialist may occur each year.

Obligations:

(Project Grants) FY 09 \$8,074,000; FY 10 est \$8,074,000; FY 11 est \$8,074,000

Range and Average of Financial Assistance:

Federal funding can range from \$15,000 to a maximum of 10% of the annual appropriation amount per State applicant and \$10,000 to \$80,000 per Tribal applicant. The average Federal funding per applicant is \$150,000 for States and \$30,000 per Tribe. Minimum awards are \$10,000.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2009: In FY09, the SIRG program awarded approximately 44 assistance agreements (40 states, 4 tribes) totaling \$8,074,000. In calendar 2008-2009 an estimated 137,700 additional homes included radon-reducing features (latest data; 65,700 new homes (2008) and 72,000 existing homes (2009)). Much of this progress resulted from the work of coalitions and partnerships comprised of local governments, national and local nonprofit organizations, industry, advocates and other leaders. The SIRG program continues to stress the importance of achieving and measuring results in the number of homes, schools, and other buildings tested and mitigated for radon; in the number of new homes built with radon-reducing features, and existing homes mitigated within real estate transactions (disclosure and property condition). Recipients are required to include the SIRG results measures template in their work plans, and projects with clear risk reduction benefits are to be preferred over projects projected to have lesser risk reducing results. Persons and organizations looking for ways to participate in the national radon risk-reduction effort should visit RadonLeaders.org. Fiscal Year 2010: Information for FY 2010 is not yet available. Fiscal Year 2011: No Current

CRITERIA FOR SELECTING PROPOSALS:

The EPA will base its review of SIRG applications on whether they reflect the program's goals and promote integrity in States' use of grant funds. Pursuant to TSCA Section 306(e), if State applications exceed the funds appropriated for award in a fiscal year, EPA will prioritize State activities based on the following criteria: (1) the seriousness and extent of the radon contamination problem to be addressed; (2) the potential for the activity or project to bring about reduction in radon levels; (3) the potential for the development of innovative radon assessment techniques, mitigation measures as approved by

the Administrator, or program management approaches which may be of use to other States; (4) the potential for the activity to implement EPA's model radon-resistant building standards; (5) the potential for the development of radon programs in high-risk areas; and (6) the potential for the activity to improve the effectiveness and viability of the State program. EPA may establish additional criteria related to demonstration activities or other aspects of the SIRG program. All other requirements of the SIRG program are applicable to the States and Tribes unless otherwise stated in TSCA 306.

66.034 SURVEYS, STUDIES, RESEARCH, INVESTIGATIONS, DEMONSTRATIONS, AND SPECIAL PURPOSE ACTIVITIES RELATING TO THE CLEAN AIR ACT

FEDERAL AGENCY:

Office of Air and Radiation, Environmental Protection Agency

AUTHORIZATION:

Clean Air Act of 1963, Section 103, Public Law 95-95, 42 U.S.C 7401; National Environmental Policy Act of 1969, Section 102(2)(F), Public Law 91-190, 42 U.S.C 4332.

OBJECTIVES:

To support Surveys, Studies, Research, Investigations, Demonstrations and Special Purpose assistance relating to the causes, effects (including health and welfare effects), extent, prevention, and control of air pollution to include such topics as air quality, acid deposition, climate change, global programs, indoor environments, radiation, mobile source technology and community-driven approaches to transportation and emissions reduction.

Projects should also focus on addressing environmental justice (EJ) concerns in communities. EJ is the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.

Funding Priority - Fiscal Year 2010: (1) Indoor Environments. Activities will support surveys, studies, research, training, outreach, education, investigations or demonstrations performed by organizations that lead to effective outreach strategies to educate key audiences about indoor air pollutants, their associated health risks and encourage effective mitigation and control strategies. Currently, the Program focuses on several critical aspects of indoor air quality that pose significant risks to public health, and in particular, to children and other disproportionately impacted segments of society. Program focus includes, but is not limited to reducing the exposure of children and others with asthma to indoor triggers that worsen their condition, promoting the adoption of operation and maintenance practices in schools throughout the nation to reduce the harmful effects of poor indoor air quality on the health of students and staff, promoting voluntary radon testing by homeowners to identify elevated levels and fix them when they are found, as well as working with homebuilders to incorporate radon resistant construction features into new homes, and encouraging adult smokers to protect their children from the adverse health effects of environmental exposure to secondhand smoke by making a conscious decision to smoke outside and keep their homes and cars smokefree.

(2) Radiation. Activities support technical, outreach, and educational projects relating to environmental radiation. Activities also support the national environmental radiation monitoring program. This program prepares for and responds to incidents involving nuclear or radiological material, oversees the safe disposal of radioactive waste, maintains two laboratories that perform

radiological sampling and analyses, and provides standards for protecting human health and the environment from radioactive material. Program focus includes, but is not limited to the following activities: performance testing and evaluation, development of analytical procedures, purchasing of radiation laboratory equipment and support and enhancement of radiological laboratory capability and capacity across the nation to reduce the gap in analyzing environmental samples following a significant national radiological incident.

(3) Community-Scale Air Toxics Ambient Monitoring (CSATAM). The CSATAM Grant Program results in two-year projects designed to assist state, local and tribal communities in identifying and profiling air toxics sources, characterizing the degree and extent of local air toxics problems and tracking progress of air toxics reduction activities in specific local areas without reliance on often uncertain estimates of emissions and air dispersion models. Further, projects typically allow the recipient state, local and tribal air pollution control agencies to establish or enhance hazardous air pollutant monitoring networks, thus providing long term capability to investigate and assess specific local air quality scenarios of concern. The program will continue working with grant recipients that received funding in previous years. No new awards are expected in FY 2010.

(4) Mobile Sources Technologies. Projects encompass studies and investigations utilizing state-of-the-art experimental techniques in advanced engine development technology, including hydraulic hybrid drive-trains, to optimize fuel economy, reduce exhaust emissions (including PM and NOx) and improve performance. In addition, projects may support studies identifying barriers to technological innovation, analyzing innovative strategies for overcoming these barriers, encouraging the development and adoption of new vehicle and fuel technologies for the control of emissions.

(5) Heavy Duty Truck Fuel Consumption and Emissions Reductions. This program studies and analyzes fuel consumption and emissions reductions associated with the use of innovative technologies for heavy duty diesel trucks. Projects involve truck fleets that operate under varying conditions in order to evaluate the effectiveness of the various technologies.

(6) National Internet-based On-Board Diagnostic (OBD) Information Exchange. This program supports activities that maintain, update and improve the Internet-based information clearinghouse to facilitate accurate and timely exchange of technical information related to on-board diagnostic (OBD) between state inspection/maintenance programs, the automotive industry and the general public.

(7) Climate Change. The Climate Change Division (CCD) supports activities relating to improving economic, technical and programmatic understanding of climate change. CCD supports technical, outreach, and education projects regarding climate change impacts, mitigation and adaptation options in order for private and public sectors may more effectively and comprehensively address their climate goals. Additionally, CCD supports projects that break down market barriers that may limit investment in technologies that reduce methane and non-CO2 greenhouse gases; address the technical issues surrounding sequestration and carbon storage; address collection and analyses of economic data relating to climate change; and the Methane to Markets program (M2M) that support climate technology transfer in developing and transition countries. The Methane to Markets Partnership is an international public-private initiative that advances cost effective, near-term methane recovery and use as a clean energy source in four sectors: agriculture, coal mines, landfills, and oil and gas systems. M2M projects reduce greenhouse gas emissions in the near term and provide a number of important environmental and economic co-benefits. Co-benefits include stimulating local economic growth, creating new sources of affordable alternative energy, improving local air and water quality with associated public health benefits and increasing industrial worker safety. Greenhouse Gas Reporting system will support projects that will help identify options for how data collected through state reporting requirements and the multiple reporting rule (MRR) may be used to facilitate state-and facility-based greenhouse gas programs.

(8) Climate Protection Partnerships. EPA funds Global climate Change programs which are voluntary government/industry partnership programs

designed to capitalize on the opportunities that consumers, businesses, and organizations have for making sound investments in efficient equipment, policies and practices. The Global Climate Change program will manage a number of efforts to remove barriers in the marketplace and to deploy technology faster in the residential, commercial, and industrial sectors of the economy. Our programs work by overcoming widely acknowledged barriers to energy efficiency: lack of clear, reliable information on technology opportunities; lack of awareness of energy efficient products and services; lack of financing options to turn lifecycle energy savings into initial cost savings for consumers; low incentives to manufacturers for efficiency research and development. In addition, our Global Climate Change programs will provide technical assistance, training, information exchange and other forms of cooperation to enhance the capabilities of governments and other stakeholders to protect human health and the environment regionally and globally.

(9) Sustainable Skylines Initiative. During FY 2010, the SSI program will continue efforts with communities that received funding in FY 2009. The Sustainable Skylines Initiative (SSI) resulted in projects that maximized federal, state, regional, and local resources to provide tangible cross-cutting projects. Projects' results could include, but are not limited to specific air, water, waste and livability benefits; provide economy of scale to amplify media attention, level of support, and outreach ability for specific projects while showing a larger sustainability effort; and bridge city and regional sustainability efforts to re-energize existing programs and developing key emerging priorities.

Range and Average of Financial Assistance:

EPA generally award grants ranging in value from \$5,000 to \$750,000 per fiscal year. The average value of each grant is \$150,000 per fiscal year.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2009: Indoor Environments - Produced effective outreach strategies to educate key audiences about indoor air pollutants and their associated health risks, convincing them to adopt effective mitigation and control strategies. These outreach strategies focused on several critical aspects of indoor air quality that pose significant risks to public health, and in particular, to children and to other disproportionately impacted segments of society. These include: reducing the exposure of children and others with asthma to indoor triggers that worsen their condition; promoting the adoption of operation and maintenance practices in schools throughout the nation to reduce the harmful effects of poor indoor air quality on the health of students and staff; promoting voluntary radon testing by homeowners to identify elevated levels and fix them when they are found, as well as working with homebuilders to incorporate radon resistant construction features into new homes; and encouraging adult smokers to protect their children from the adverse health effects of environmental exposure to secondhand smoke by making a conscious decision to smoke outside and keep their homes and cars smokefree. Radiation - Assistance provided support and enhancement for radiological laboratory capability and capacity across the nation to reduce the gap in analyzing environmental samples following a

significant national radiological incident. Key activities include audits and proficiency testing, provision of radiological instrumentation, supplies, training, and limited facilities upgrades. The USEPA's Methane to Markets Partnership Grants program began in 2006 and has now provided almost \$13 million for nearly 70 cooperative agreements to recipients around the globe to build capacity and promote international capture and use of methane. The grants have become and integral and important capacity building instrument of the Methane to Markets Partnership, a public-private partnership (of 33 partner governments) that reduces greenhouse gas (GHG) pollution by promoting the cost-effective, near-term recovery and use of methane, a GHG that is more than 20 times more potent than carbon dioxide. Methane capture and use projects supported by the partnership through grants and other means are currently reducing emissions by more than 27.3 million metric tons of carbon dioxide equivalent ~ annually equivalent to the annual emissions from 5 million passenger vehicles. Fiscal Year 2010: Indoor Environments - Produced effective outreach strategies to educate key audiences about indoor air pollutants and their associated health risks, convincing them to adopt effective mitigation and control strategies. In FY 2009 we received 235 applications and funded 9 projects, including five previously funding Level I projects that successfully completed their project, competed for and received a Level II grant. CARE communities have implemented a variety of EPA Voluntary Programs and reduced citizen's exposure to toxics including lead, diesel emissions, solid waste, mercury and environmental tobacco smoke. The communities have also reduced emissions of green house gases. Fiscal Year 2010: Information Not Yet Available. Fiscal Year 2011: No Current Data Available
