Accurate payments	100%	99.97%	99.99%			<p>On October 15, 2009, FIB did not accurately record the daily investment interest rate into the InvestOne accounting system, resulting in the agencies invested in overnight securities receiving approximately \$38,000 more in interest than they should have. In September 2010, FIB communicated this error to the agencies, and adjusted the accounts' for the interest differences. However, in October 2010, it was determined that two funds, FTC (29X6013) and SEC (50X6563), were incorrectly adjusted. At that time, 50 correction transactions were processed to the sub-accounts, causing our percent accurate measure to be less than 100%.</p>
