AES Broadcast #2012042

AESDirect Required Maintenance – Scheduled Outages

This message is intended for AESDirect program users only. If you are not an AESDirect program filer, you will not be affected by these outages.

The AESDirect system will experience required system maintenance occurring between Saturday, July 14, 2012 and Sunday, July 15, 2012. There will be two extended outages when the AESDirect system will not be available for EEI filing.

The first outage will occur on July 14, 2012 from 1:00am EDT to 5:00am EDT.

The second outage will occur on July 15, 2012 from 1:00am EDT to 5:00am EDT.

We strongly encourage you to file your shipments prior to these outages if possible.

During the two outages all AESDirect program filers may submit shipments under the AES Downtime Policy. State Department licensable shipments cannot be exported under the AES Downtime Policy and must be held until the connection is restored and an Internal Transaction Number (ITN) is received. Once connection is brought back on-line after each outage, all AESDirect program transactions for shipments that were exported under the AES Downtime Policy must be filed along with any new AES transactions.

AESPcLink users are encouraged to continue creating and storing shipments in a queue on their local computer for transmission when AESDirect is brought back on-line after each outage.

If you utilize the AES Downtime Policy for export, please contact the port from which you will be exporting. In lieu of the AES Proof of Filing citation, please use the AES Downtime citation which consists of the phrase AESDOWN, your individual company's Filer ID, followed by the date.

For example: AESDOWN 123456789 07/14/2012

Please see the CBP web site for further information on the AES Downtime Policy:
