Hey Roger,

I understand that there are a lot of people that need satisfied on this paper. I know that you are a little leery of changing the author list on the paper. My only plea on this one is that I have done a lot of work since your 3pt bd paper on this and will probably do a lot more. This is the defining paper for this response and I do feel like my work is justified to move up the list with the work Eric and Gregg have done (behind them of coarse). This is a USGS open file as well. I have no problem being the last of our group since I got a late start. Being 5 or 6 would make sense to me? I understand if the politics don't allow this but feel like I have earned a slightly better place.

Todd

PS - This is just a suggestion.
