Subject: area estimate maps

Roger,

Here is a quick jpg map showing where I got those numbers from.

tomorrow

Todd,

In my previous email I used 1,700 sq km, but I see you got 17,000 sq km.

Ira got ~12,000 sq km.

If 17,000 then the amount of oil in the sheen could be

significant.

At 1 micron thick and 17,000 sq km that is ~ 102,000 barrels

10 microns would be ~ 1 million barrels.

wow.

Roger
