Subject: Available for a short follow up conversation re Brooks McCall effort?

Hi Sam,

kudos for all of the excellent progress you and the broader team are making on the Brooks McCall data effort. It was a very interesting phone call today, and things are definitely moving forward quickly. As you know, this topic is far outside my technical expertise, but I can perhaps serve as a bridge to relevant expertise elsewhere in USGS.

The discussion about the fast-tracked report/product raised an issue for me with respect to the degree that USGS can be "formally" involved in something that will be coming out so quickly. I would appreciate a chance to briefly discuss this with you at your earliest convenience. It may only take 5-10 minutes. I know you have a huge amount on your plate, but do you have any availability tomorrow (Tuesday) for a quick call? If so, is there a particular time that works best? If tomorrow is booked, perhaps Wednesday...

I appreciate any time you can set aside.

Mark
