

# Scaling Methodology Charts

2010 BPA Rate Case Workshop

October 22, 2008

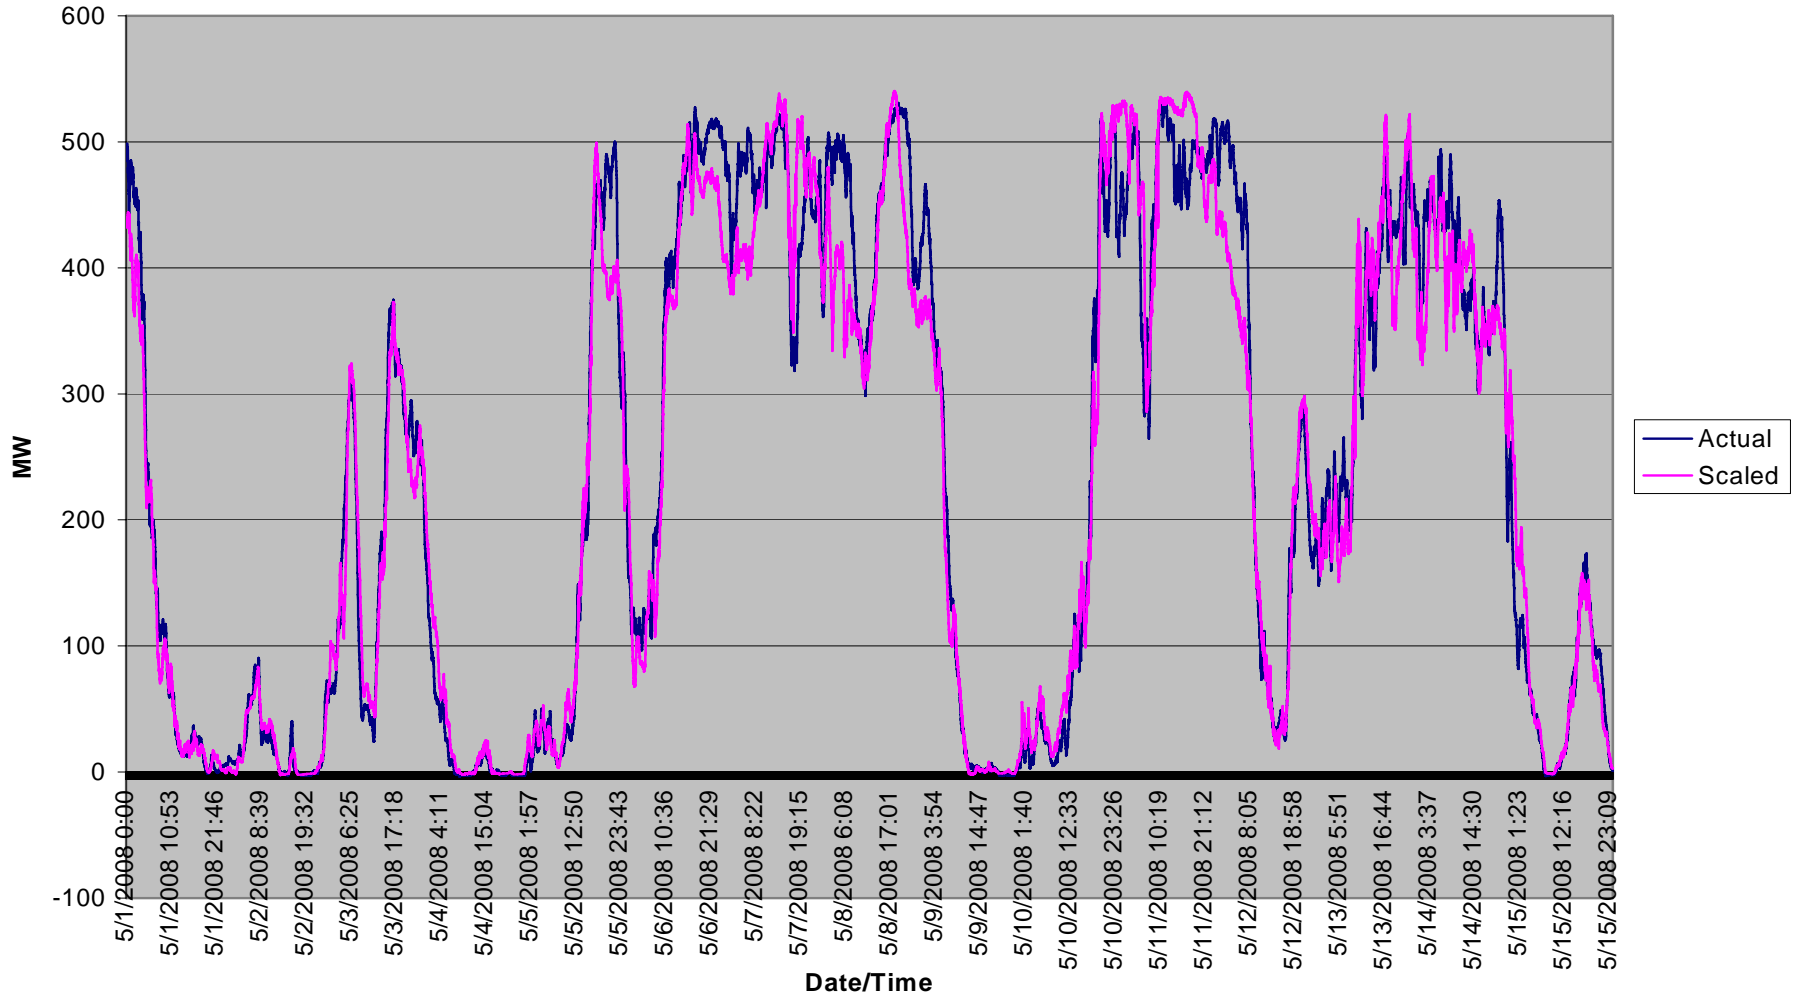

## Re-run of scaling check without the wind farms with issues

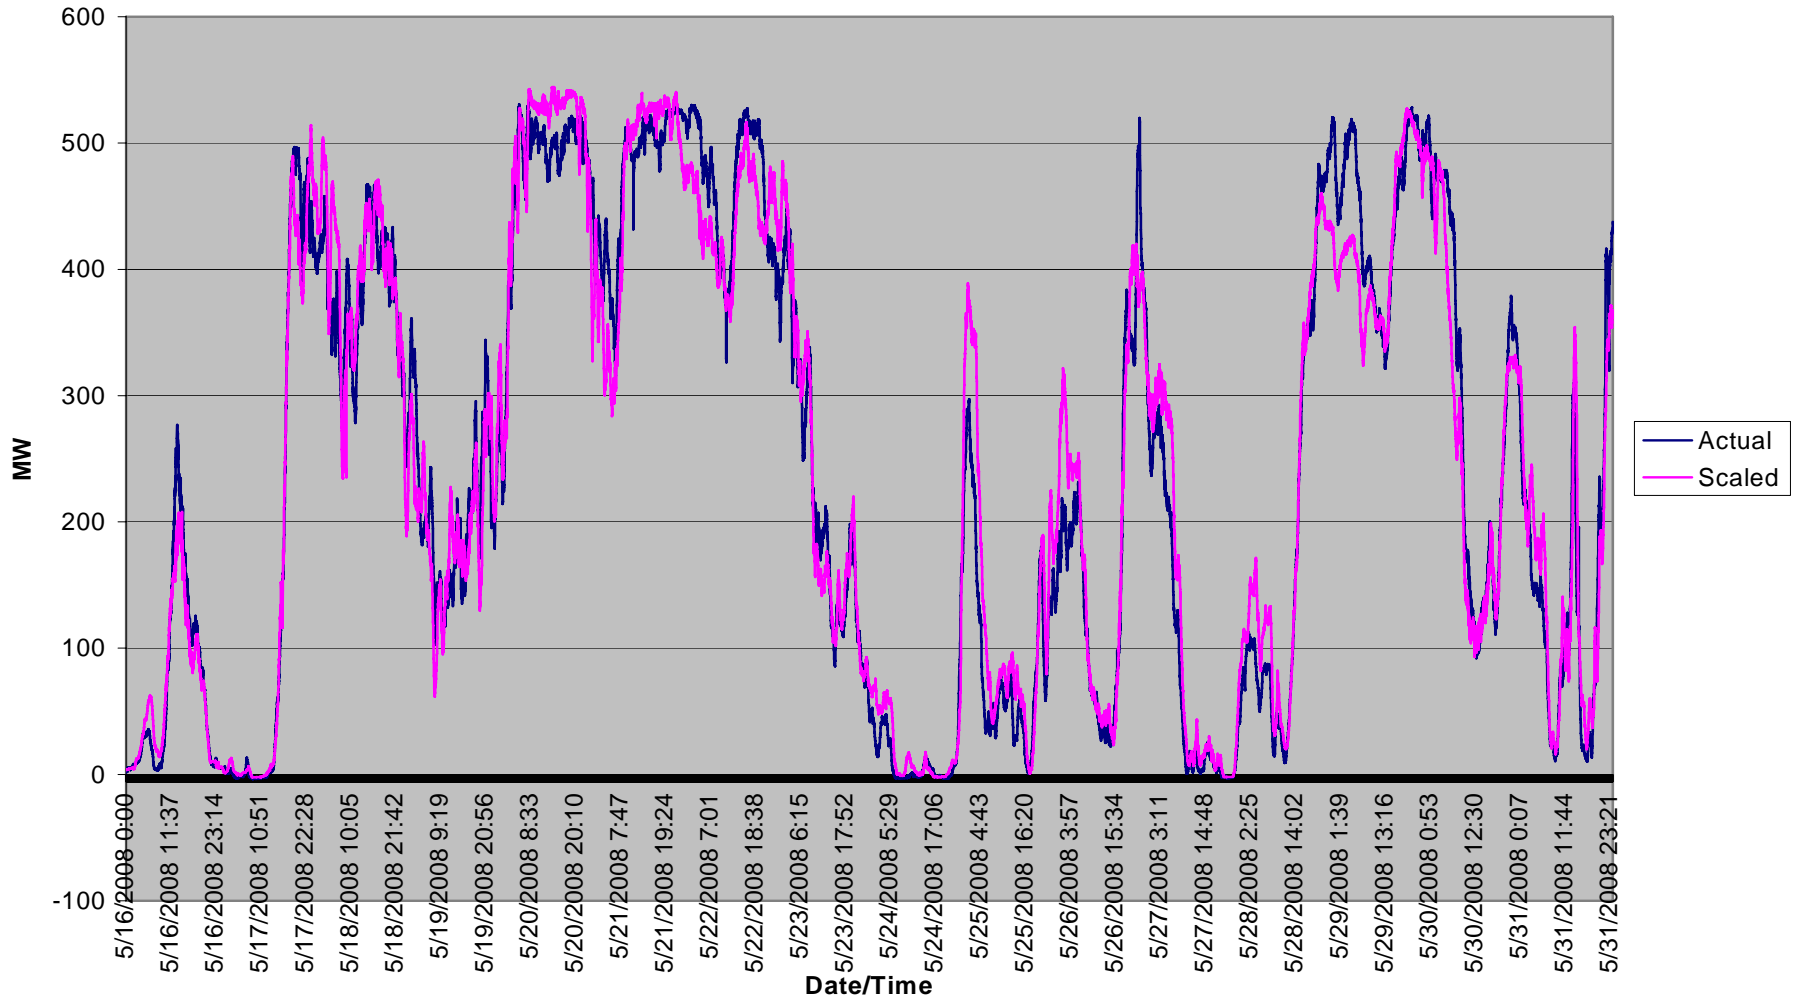

- BPA re-ran the scaling methodology removing the wind farms with issues. The results are:
  - Standard deviation and correlation for May
    - SD actual: 190.5, SD scaled: 183.3
    - Correlation: 0.979
  - Standard deviation and correlation for June
    - SD actual: 182.9, SD scaled: 179.0
    - Correlation: 0.967
- Next four charts are the scaled versus actual numbers.

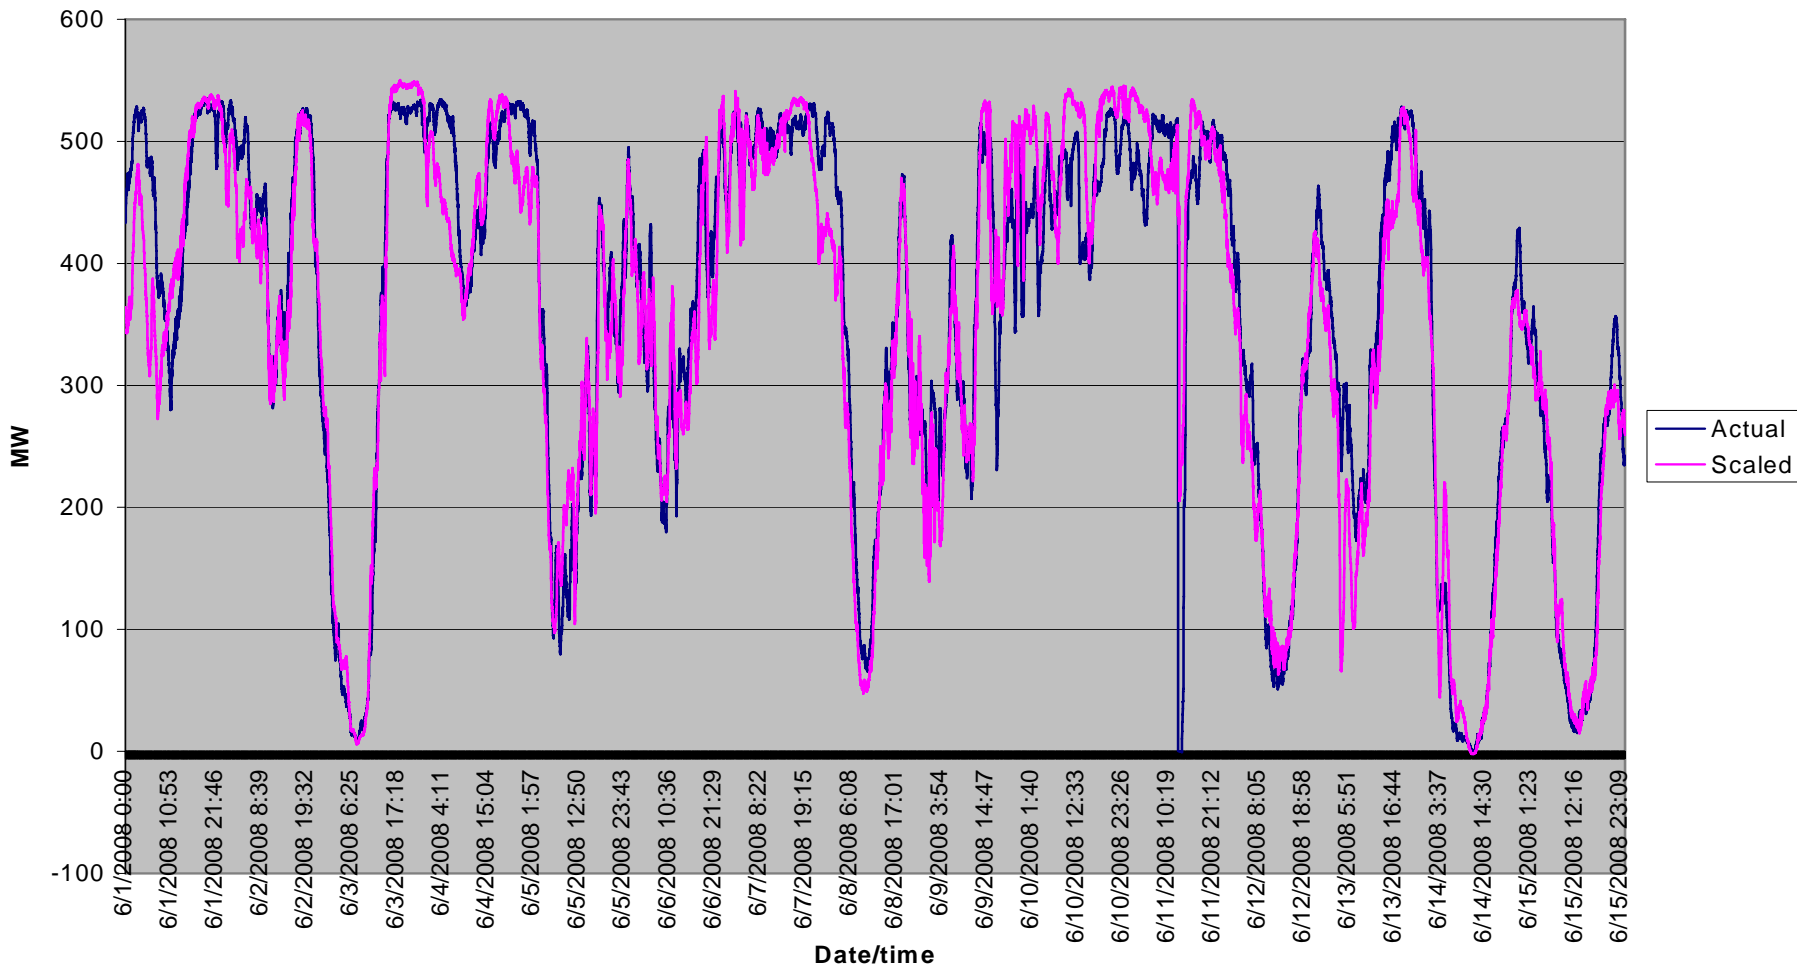

### Scaled versus Actual May 1-15

### Scaled versus Actual May 16-31

Scaled versus Actual June 1-15

Scaled versus Actual June 16-30
